With smokers who know...it's

Camels for Mildness!

Yes, Camels are SO MILD that in a coast-to-coast test of hundreds of men and women who smoked Camels—and *only* Camels—for 30 consecutive days, noted throat specialists, making weekly examinations, reported

NOT ONE SINGLE CASE OF THROAT IRRITATION due to smoking CAMELS!

• LETTERS

the same manner as I summed up the letter from the man who wanted to bury Tau Beta Pi; "Sour Grapes."

Herbert S. Willie
Pres., Pi Tau Sigma

To The Editor:

How many hours in a day? There has always been much wailing about heavy homework schedules and no time for worthwhile other-than-academic activities, such as the semi-annual visit to the dentist, the bi-monthly date with a female woman, the daily pause for the elimination of hunger, and other non-essentials.

But, for the Senior—and especially the eighth-termer—the 48-hour day becomes an absolute, sure-as-shooting necessity. desperately trying to meet unyielding requirements for graduation, he must make time for necessity. Desperately trying to meet unyielding requirements for graduation, he must make time for placement procedures (after graduation is a bit late to start looking for employment — those subsistence checks don't keep coming indefinitely, you know). Similarly, the almost-finished Techawk must pose repeatedly for photos, mend his clothing (after four years, even Army O.D. and Navy Blues will show wear), and carry the burden of student leadership (most organizations are sparked by upperclassmen, as a matter of course).

Eventually, as they always do, the administration will find ways and means of easing the impossible situation which confronts a student in his last undergraduate year. Adjustments are certain to be made in the curriculum and its distribution over the four-year period. Examination and grading procedures, too, will be resurveyed. But let's hope that action will be taken now to give a break to history's largest class—the class that has put up with an inadequate physical plant and facilities, inexperienced instructors, and tightened standards during these difficult postwar years.

Let's do something now to make devoted alumni out of these weary Seniors.

Tired Techhawk

Triad of Greeks plan barn dance

Three campus fraternities have planned a combined social activity unique in Tech history.

Alpha Epsilon Pi, Alpha Sigma Phi and Theta Xi will conduct the "Triad" on December 3 in the Alpha Sig house at 32nd and Michigan.

In reality, the affair involves two dances; a barn dance, complete with caller, hillbilly band, straw and wagonwheels in one third floor room, and ballroom dancing to recorded music in the basement.

Souvenir bids will be given to dancers and refreshments are to be served. Cooperating chairmen at the event are Jim Fitzpatrick of the Alpha Sigs, Max Vogel of Alpha Epsilon Pi and Al Johnson of Theta Xi.

Local con-man implicated by mistress

Chicago.—Harry Regan, local gangster, has been sensationally implicated in the death of philanthropist Byron Faulkner.

This is the latest defense move of Faulkner's attractive former secretary, Karen Andre, lately indicted for murder, and follows the recent revelation of "clandestine love-nest meetings" between Miss Andre and Faulkner. Defense Attorney Ralph Stevens hopes to explain the mysterious disappearance of Faulkner's wife, Nancy, missing since her testimony at the inquest.

Bjorn Faulkner, one-time financial king and contributor to Illinois Tech, met his death January 16th under yet unexplained circumstances. He had reportedly jumped or fallen from his 20th story penthouse, but police found a bullet wound in his body.

Superior Court Judge William Heath has set opening dates for the trial as December 7, 8 and 9. A jury will be impaneled from among Illinois Tech students at the trial.

This courtroom drama is the first production of the newly-formed Campus Players, under the direction of Mr. Henry Knepler of the language and literature department. Further details will be released in the December 2 issue of Technology News.

Techawks will view fine arts

Beginning November 28, Techawks will have the opportunity to view examples of the finer arts in the form of a series of exhibits to be held until May in the MC lobby and the NU lounge.

Henry T. Heald, president of IIT, has selected a committee of five faculty members and two students, headed by John F. White, dean of development, to arrange a program. Well-known artists in the fields of water colors, sculpture, oils and miniatures will be represented.

The first exhibition will be the sculpture of Egon Weiner, internationally famous for his works. A collection of twenty pieces will be shown in the MC lobby from November 28 to December 10. Mr. Weiner has received many prizes and awards, the most recent of which were the Gold Medal and Logan Award at the Art Institute this year. His works are currently being shown at Mandel Brothers department store in the loop.

The next exhibition will be from January 10-21, and will be a series of oils by Ugo Liberi.

2c OFF

Per gallon of gas sold to any IIT student, staff or faculty member—as well as a nickel discount on oil, and expert grease jobs at a dollar.
