> shower cabin with a basic filtration system

> backpack facilitates water transportation

> laundry water recycling

> water bank 「aquacredit」a community oriented, franchise based system that increases the available supply of water in the slum while giving access to potable water, year round, to those who cannot afford to purchase it.

how does it work?

individuals harvest monsoon water

water is sold to credit and cash buyers

aquacredit franchise purchases water for credit

aquacredit franchise safely stores water

example process

aquacredit sells reusable, heavy-duty, food-grade plastic bags for water storage to franchises.

aquacredit provides franchises with business operation instructions, possible water storage solutions, and monsoon water harvesting information.
