In an effort to help companies dealing with cost analysis the Warehousing Education and Research Council (WERC) has come up with a plan to develop a web-based tool.

The tool will provide assistance to companies seeking to outsource logistics operations in figuring out vital information that will help in the decision-making process.

In the project planning phase our team identified the accomplishments of last semesters goals and expanded on them to offer a new RFI/RFP tool along with improving the existing model and program.

Accomplishments
FAQ
- Created an instruction manual for the model which includes key terms and questions the may help the user navigate.

RFI/RFP
- Developed a structure that allows the user to send out Requests for Proposals and Information as well as allows the user to clearly see all their new options from those results.

Programming Team
- Expanded and improved on the existing program as well as constructing the RFI/RFP tool online.
