Research Web

What features will Research Web include?

Research Web is an online tool being developed to provide solutions to all of these problems and more.

Researcher, but don’t know how.

By students who want to get involved in research.

There are common problems encountered:

Can’t find a professor to work with?

Need feedback on a project?

Can’t find a research project to work on?

Research Web brings it all together for...

manage your time and progress

and research activities

and share data from your experiments

A convenient place for you to store

experiences

forms where you can take candid

collaborations at any time or place

Social networking tools that let you
