Hostel Spaces

This year, 30 million tourists will come to Chicago. Within the city 5 hostels share the duty of providing cost-effective lodging for many of these travelers.

Eclipsed by comparison to nearly every other global city.

To make the hostile hospitable, the Hostel Spaces concept seeks to reclaim places filibustered by highway infrastructure and give communities the choice to embrace, or transcend the social, physical and psychological boundaries they have embodied for decades. For the South Chicago Hostel, this concept will connect people to the city by re-connecting a community.
