

D. T. Smith Is New Editor

(Continued from Page 1)

other important successions effected are: Stephen Janiszewski, E. E., '30, Make-up Editor, to succeed Walter J. Ehrmeyer, E. E., '29; H. Slavitt, Arch., '32, to succeed John G. Attwood, Ch. E., '29, as Art Editor; F. B. Attwood, Ch. E., '31, to succeed D. T. Smith as News Editor; C. H. Johnson, E. E., '30, succeeding John W. Gamble, F. P. E., '29, as Circulation Manager; C. E. Rudelius, E. E., '30, succeeding John E. Barman, F. P. E., as Exchange Editor.

The appointment of an Advertising Manager to succeed M. O. Nelson will be deferred until next September, when the man best qualified for the position will be chosen. A Humor Editor is also desired, to succeed Al Auerbach, C. E., '31, who prefers to allow someone else the active duties of preparing the "Slipstick" each week. He himself will have charge of the Feature Department, heretofore called the Editorial Department. In this capacity he will be responsible for all articles and features that are not strictly news.

The change to a new staff will annually be made at about this time. It is planned to make the Anniversary Issue each year the last to be in charge of the senior members.

Many openings still exist for new men who are desirous of making the staff, by devoting some of their time each week toward the preparation of the *Armour Tech News*. These men may apply either to one of the editors or to Professor Hendricks.

Eckelman's Recovery Proves Temporary

H. R. Eckelman, '30, F. P. E., who has been suffering from an attack of blood poisoning since Easter, returned to school last Monday, but was forced to discontinue his studies again Tuesday. At the present time he is at his home in Milwaukee undergoing treatment.

The peculiar misfortune happened to Eckelman while on an Easter visit at the home of his relatives. Feeling an itchy sensation on his body, he scratched it, breaking the skin. After returning to Chicago this scratch became infected, and on Thursday, April 4, his condition became much worse. Friday his trouble was diagnosed as blood poisoning, and he was treated accordingly. He returned to school last Monday, thinking he was recovered, but found that he was too weak to keep up his school work.

Griffith Leaves for Oregon State

Prof. James Griffith, Assistant Professor of Hydraulics and Sanitary Engineering, will leave Armour Institute this summer to begin teaching next year at the Oregon State College, at Corvallis, Oregon. With the promotion he will rate as Professor of Structural Engineering at the Oregon State College. His many friends will regret his leaving after teaching four years at Armour.

Reed Attends Collegiate Architecture Convention

Professor Earl H. Reed, Head of the Department of Architecture, will attend the 16th annual convention of the Association of Collegiate Schools of Architecture held at the Mayflower Hotel, Washington, D. C., April 22 and 23. The convention is held annually to discuss educational projects.

Armour Chalks Up 3rd Straight Win

Armour's third straight victory was chalked up last Thursday afternoon when the Kraftsmen obtained a 3-0 verdict over the Chicago Normal College nine at Ogden Field.

Hits were scarce in the game and all interest was centered about the opposing hurlers. Stehno and Herman engaged a bitter pitching duel that eked out but three hits in the entire game. Two of the hits came from the offerings of Herman, while Stehno contributed a solitary double. Stehno's performance registered itself as being too impressive for the teachers to counteract. At no time did Chicago Normal place Armour into any uncomfortable positions, and only two of the opposing batsmen placed foot on second base.

Hit in Crucial Moments
Although it was difficult for Armour to gather any hits, the team managed to wield the war clubs when the hits were in demand. Stehno's sacrifice hits and Yount's double gave Armour the three runs.

Summary Armour—3		Ab	R	H	P	A
Hauser, lf	3	0	0	1	0
Weldon, ss	3	0	0	0	1
Reichle, 2b	2	0	0	0	2
Robin, 1b	3	0	0	8	0

Bases on balls—off Herman, 4. Struck-out by—Herman—5. By Stehno—9. Hit by pitched ball—Hauser, Gent, Johnson. Two base hits—Stehno, Yount, Rittmeyer. Sacrifice hits—Stehno—2. Stolen bases—Jennings, Johnson. Errors—Ramlose.

F. P. E.'s Gassed in Met. Lab.

(Continued from Page 1)

The apparatus was checked out to them by Donald Ullock, Curator of Chemical Laboratories, as being in good condition. The stills were started and the gas turned on. Odors of fuel gas were noticed among the malodorous scents of coal tar, coke, and sulphur, but an examination for leaks was unsuccessful. Both doors were kept open allowing a considerable breeze to blow through the room. Before noon, Schoneman complained of feeling faint, and left the lab. Reaching his car, he got in, but fainted, falling on the horn button on the steering wheel. After a few seconds he regained consciousness, and was driven home by a friend.

That afternoon, only three students returned to the lab, Heath, Horras and Larsen, to watch the stills. At 3:30 the odor of gas became stronger, a more diligent search was made for leaks in the gas pipes. To their surprise they discovered the cap on the end of a one inch size feed pipe was missing, the fuel gas discharging into the atmosphere. They immediately turned off the gas at the base of the pipe system, and went upstairs to report it to Professor Schommer. Heath complained of feeling weak and left the building for home. He walked the four blocks to his house, and then collapsed in the doorway. A doctor was called immediately, who gave artificial respiration until Heath showed satisfactory breathing. He fainted at four o'clock, and it was eight o'clock before he became fully conscious.

Horras complained of feeling sick, and got in his car, accompanied by a friend, to drive home. Soon he lapsed into a semi-conscious condition, and his friend drove him to a doctor, where stimulants were applied. He then was taken home and put to bed.

Larsen, who was the least exposed of the three, felt well enough to drive home by himself, but became very ill later. According to Professor Schommer, the gas pipe section in question had been damaged by a Junior Chemical student on the previous Tuesday. The student had reported the matter to the Curators office, and a mechanic had removed the damaged section, not capping up the pipe. When the F. P. E. students started the next

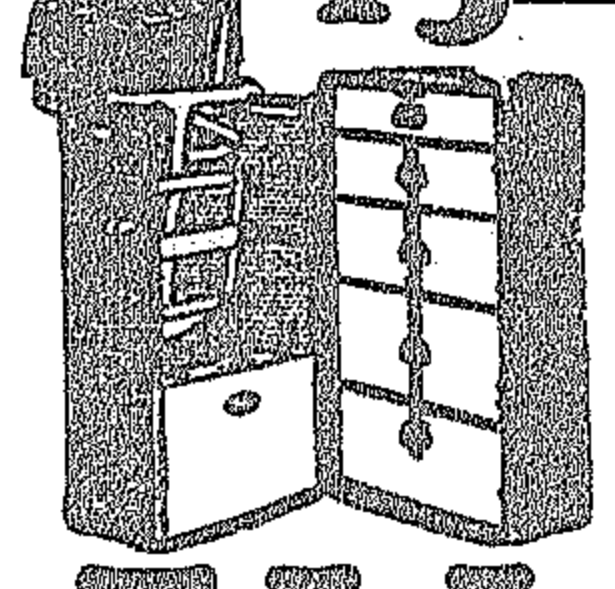

Open House Show Planned by Wm. Buggy

At a meeting of the Senior F. P. E.'s last Wednesday, a committee, headed by W. J. Buggy, was selected to take charge of the Fire Protection exhibit on Open House night. J. W. Gamble and J. E. Barman are the other members of the committee.

day their experiment, the pipe was still missing and was not yet capped. The gas pipes in the Metallurgical laboratory have no marking to distinguish them from the water pipes, or any other pipes.

The student, who was J. E. Tarniman, '30, was interviewed. He stated that he had damaged the pipe section in question, one leading from the feed pipe to one of the furnaces. He reported the matter, he said, to the curator, Donald Ullock, who happened to be in the room. The curator, with the assistance of Tarniman, removed the pipe. With the assurance that the curator knew of the pipe, Tarniman stated that he thought no more of it.

ON MOTHER'S DAY

A vision come true

In a part of Africa little known to the whites, where obscure trails ran, Cecil Rhodes dared to envision a railroad. He lived to build it.

The railroad itself was part of a vaster dream, a dream of a far inland colony linked fast to existing coast settlements by rail and wire communication. And he lived to build Rhodesia.

First the dream, then the reality, is the

rule with telephone men too, as they work to greater heights of service. But in between, they know, must come periods of careful planning and smooth coordination of many elements.

Scientific research, manufacturing, plant construction, commercial development, public relations, administration—many varied telephone activities offer a widening opportunity to practical-minded visionaries.
