WELCOME

Open House Night at the Armour Institute of Technology is the one night of the year when the faculty and the students have made special preparation to extend greetings and welcome to all the friends of the Institute. Special exhibits have been prepared in the various departments, which we hope will be of interest to all of our visitors. Members of the faculty and students will explain the workings of their respective departments and demonstrate the experiments and apparatus on display.

We hope that the parents of our students will meet the teachers of their sons and acquire a more intimate knowledge of our methods and work. Please remember that visitors are always welcome at the Institute at any time, and we hepe that your evening spent with us tonight will prove enjoyable and interesting.

The interclass relay at 9:30 a.m. will be the first thing on the program. Shortly after this, at 9:45 a. m., the pentathalon will begin. This will determine the best allaround track man at Armour. Following the pentathalon is the interfraternity relay at 11:30 a.m.

The class rush, which is scheduled as the first event of the afternoon, is expected to be quite a lively contest. Enthusiasm has been growing for over a month. At this time it will be manifasted in sand. The sacks will be placed in the middle of Ogden Field. Each sack of straw will count one point and each sack of sand will count for five points. The Sophs with their red shirts will have the north end of the field as their goal and the Frosh will deposit the sacks they collect at the south end. It will be absolutely forbidden to throw the sacks over the fence.
