SENIOR BANQUET FEATURED TODAY AT MEDINAH CLUB

Entertainment Speeches
Scheduled for
Dinner

RAY SHOAN IN CHARGE

About one hundred seniors will attend the annual Senior Banquet, which is to be held tonight at the Medinah Athletic Club, the world's largest club house. This event is to climax the social season for the graduates. Ray Shoan, the social chairman, has charge of arrangements.

The program, commencing at 6:30 p. m., consists of a steak dinner and entertainment, both local and professional. There will also be speeches by Professors John Schommer, G. L. Scherger, P. C. Huntly, and C. B. Cooper, who will be introduced by Master of Ceremonies E. P. Boynton.

The feast is to take place in the ladies' dining room, which is said to be one of the most beautiful in the city.

Proof Reading Delays Publication of Cycle

Delay, caused by the necessity of re-reading proof on the 1930 Cycle, caused the postponement of the date of distribution of the yearbook.

According to P. E. Heath, F. P. E. '30, editor-in-chief of the publication, the yearbook will be ready for distribution on Wednesday, May 28.

Annual Smoker Held by A. I. E. E.

The annual dinner smoker of the Chicago section of the A. I. E. E. was given at the Bal Tabarin on Wednesday evening, May 14. Armour was well represented by members of the Senior, Junior and Sophomore classes who occupied five of a total of approximately thirty-two tables.

The dinner was served to the accompaniment of a six-piece orchestra. Other entertainment during the dinner consisted of singing and playing by a mixed quartet. Later on the whole assembly sang the new A. I. E. E. song to the tune of "On Wisconsin." As the evening progressed several acrobatic dances were interspersed with selections from the orchestra. Ingenious lighting effects of the room also kept the gathering interested.

The various organizations represented then gave their part of the program which in general consisted of a male quartet, several solos, a magician and three short skits. The Armour Branch of the A. I. E. E. was represented by three members of the Junior class. William Drigot and Richard G. Kellmer executed an Apache dance to the accompaniment of Kenneth Meyers on the piano. An extemporaneous and somewhat colorful act put on by a beautiful chorine with the assistance of Professor Freeman was also a part of the entertainment. To the delight of the audience, these two demonstrated the proper manner in which to osculate in public.

The meeting was then turned over to the chairman for a few minutes and after several introductions was followed by a comic, open-glove boxing match between two gold dust twins. This completed the evening's program and the crowd dispersed well satisfied.

Circus Day, Junior Informal Climax Many Events of Annual Junior Week

Fraternities and Classes Hold Annual Track Contests

The Freshman Relay team composed of J. Ireland, A. Helmick, J. Sorenson, and E. Sademan started off the sports on Circus Day last Friday by copping the Interclass Relay. The men will receive individual silver watch charms.

Walter M. Miran, '31, won the Pentathlon with a total of 4327½ points. J. Kara, '30 and F. M. James, '31 took second and third place respectively. Gold, silver and bronze medals were awarded for first, second and third places. The events were as follows: one hundred yard dash, shot put, one hundred yard high hurdles, broad jump, and one-half mile run.

The Theta Xi relay team composed of Rowley, Olsen, Carlstrom and Sorenson won the Interfraternity relay. A circulating silver loving cup is given to the winning team.

The Interfraternity track-meet was won by Beta Psi with a total of 54 points. Triangle with 25½ points and Sigma Kappa Delta with 18½ points were second and third respectively.

W. M. Miran, '31, of Beta Psi was high point man with a total of 18 points. He won first place in the 100 yd. dash, 220 yd. dash, broad jump, and also a second place in the shot put.

Vernon Sturm, '30, and Bud Weldon, '30, managed the athletic events of the day.

SUMMARIES

100-Yd. Dash—1st, Miran, Beta Psi; 2nd, A. Jens, S. K. D.; 3rd, Sorenson, T. X.; 4th, Jones, S. K. D. Time, 10:2.

1 Mile Run—1st, Lind, Triangle; 2nd, Anderson, Beta Psi; 3rd, Sieferth, Phi Pi Phi; 4th, Carlson, Phi Pi Phi. Time, 5:17 4/5.

100 Yd. High Hurdles—1st, Stevenson, Beta Psi; 2nd, Kramer, S. K. D.; 3rd, Oberbeck, Triangle; 4th, Cruver, Phi Pi Phi. Time, 16:3.

440 Yd. Dash—1st, Kutteruf, S. K. D.; 2nd, Leichtenberg, Phi Pi Phi; 3rd, Mead, Phi Pi Phi; 4th, Rossing, Triangle. Time, 59:2.

100 Yd. Low Hurdles—1st, Venema, Triangle; 2nd, Setterberg, Beta Psi; 3rd, Oberbeck, Triangle; 4th, Carlston, T. X. Time 13:0.

220 Yd. Dash—1st, Miran, Beta Psi; 2nd, Leichtenberg, Phi Pi Phi; 3rd, Rossing, Triangles; 4th A. Jens, S. K. D. Time, 24:7.

880 Yd. Run — 1st, Lind, Triangles; 2nd, Sorenson, T. X.; 3rd, Anderson, Beta Psi; 4th, Kenner, Triangles. Time, 2:17:4.

Pole Vault—1st, Mullins, Beta Psi; Tied for 2nd and 3rd, Edstrand, Phi Pi Phi, and Hendricks, Phi Kappa Sigma. Height, 7 feet 6 in.

Broad Jump — 1st, Miran, Beta Psi; 2nd, Staib, Beta Psi; 3rd, Wilson, Phi Kappa Sigma; 4th, Setterberg, Beta Psi. Distance, 18 feet 6 inches.

Shot Put—1st, C. Jens, S. K. D.; 2nd, Miran, Beta Psi; 3rd, Carlstrom, T. X.; 4th, Mullins, Beta Psi. Distance, 34 feet 5½ inches.

Discus—1st, Hendricks, Phi Kappa Sigma; 2nd, Jungles, Beta Psi; 3rd, Mullins, Beta Psi; 4th, Cassidy, Phi Pi Phi. Distance, 99:4 feet.

High Jump—1st, Setterberg, Beta Psi; tied for 2nd and 3rd, Venema, Triangle, and Stevenson, Beta Psi; tied for 4th, Kutteruf, S. K. D.; Hendricks, Phi Kappa Sigma, and Goldsborough, Beta Psi. Height, 4 feet 10 inches.

Dr. Scherger presented an illustrated lecture at the Auburn Park Swedish Methodist Episcopal Church. The lecture was on the subject of the Passion Play of Oberammergau and was illustrated with pictures taken by Dr. Scherger while in Europe.

Hundred Couples Attend Prom at Congress Hotel

The Junior Formal, the last dance and the only formal on the school calendar drew a crowd of about one-hundred couples to the Gold Room of the Congress last Friday night. Del Lampe's orchestra, which furnished the music, was said by the guests to be the best. The dinner also came in for its share of commendation.

Especially delighted were the female halves of the couples with the unique favors, and the pearl like dance programs.

Although the accurate check has not been made, B. McLaughlin, class social chairman, expects that the dance will not show a profit.

Fraternity Council Elects Officials

At the meeting of the Interfraternity Council last Wednesday, May 14, the following officers were elected for the coming year:

C. J. Robin, president.
M. C. Larkin, treasurer.
J. M. McAlear, secretary.

After the election of officers it was decided that the cup given to the winner of the Interfraternity Sing should be made a permanent trophy, each fraternity donating toward its cost.

Senior Reception to Be Held Here June 5

The annual Senior Reception will be held on the evening of June 5 in the library. All seniors, their feminine guests, members of the faculty and their wives are to be invited.

Dr. Raymond, who is making arrangements for the event, promises novel entertainment for the guests.

Fire Protec Society Elects Wilde Head

The officers for next year were elected at the last meeting of the F. P. E. Society Wednesday, May 14. The men elected were:

A. F. Wilde, president.
A. H. Jens, vice-president.
W. M. Miran, secretary.
M. C. Larkin, treasurer.

This meeting closed the term of office of E. J. Ransel as president, an office which he has filled most capably, promoting the most interesting speeches at each meeting, speakers who have given every aspect of the insurance business, as was Ransel's aim.

Fire Alarm Scares Open House Visitors

All was quiet in the foundry on the fourth floor of Machinery Hall on Monday, Open House Night, except for the preparations for a heat scheduled for 8:20. But when the cupola had been almost emptied, the usual flames, coke and iron burst into the darkness of the night from the chimney of the cupola and caused someone to turn in a fire alarm. Seven or eight pieces of apparatus responded and the firemen carried portable extinguishers up to the fourth floor. Finding no conflagration they parked their instruments of war and remained to see the heat.

Mr. Larsen states that this is an annual occasion, the alarm being turned in by someone probably at a distance from the building.

Freshmen Cop Class Rush, S. K. D.'s Win Pageant

The annual class rush was run Friday at 1:30 and ended with the Freshmen leading by the close score of 28 to 22. Immediately after the rush the fraternity stunts were held as scheduled, the S. K. D.'s winning by the unanimous decision of the judges and thus obtaining permanent possession of the President's Cup, donated by Dr. Raymond. The Circus Day Skin becomes a temporary possession.

Much Spirit Shown
The spirit displayed by the freshman and sophomore classes began to make itself known Thursday night in a series of raids on various fraternity houses along Michigan Boulevard. During the night several men lost possession of various articles of wearing apparel, chiefly trousers and were obliged to withdraw to more secluded battle grounds than the Boulevard offers.

Sophomores Start Battle
Friday morning's activities started when the sophomores spied a freshman carrying a green shirt and promptly relieved him of it. The freshman soon was joined by more of his class and an attempt made to retrieve the lost shirt. A general melee resulted which ended only with the declaration of a truce until the time of the rush.

Classes Equally Represented
When the two classes lined up at about one o'clock it was quite evident that for the first time in several years the sophomores were not overwhelmingly outnumbered. Although the freshmen were more numerous the sophomores turned out with almost as many men.

The boys were lined up across the center of the field and the two classes placed on opposite sides of them at equal distances according to the custom.

The Junior Marshals, in bright yellow jackets and white trousers, kept themselves busy instructing the two classes and forming them into lines. A considerable crowd collected to watch the rush and waited impatiently for the start.

Dr. Raymond Starts Rush
Finally, when everything was ready, Dr. Raymond gave the signal to start by firing a pistol and the rush was on.

The sophomores, led by "Rog" Waindle and the freshmen, under the direction of Gustavson attacked with equal fierceness. In a few seconds the field was covered with groups of various sizes struggling for the sacks. After ten minutes time was called and the rush stopped.

Through some error the statement was first made that the sophomores had won. This decision was soon reversed and the final score given as: freshmen 28, sophomores 22.

Then came the fraternity stunts which give the day its name, Circus Day. The Beta Psi's led off with a burlesque called the "Straw Market Review" under the direction of Langhammer and Spalding. The next was "A Side Show" by the

Spring Concert Well Attended

The Armour Tech Musical Clubs presented their twenty-ninth annual home concert last Thursday evening, May 15, in the Assembly Hall to an enthusiastic audience.

The weather last Thursday was ideal compared to that prevailing on the concert night of a year ago when the downpour of rain kept many from attending. This year brought a large turnout to listen to three hours of musical enjoyment furnished by the Glee Club, Orchestra, Stress and Strains, and the Interfraternity Sing.

Phi Pi Phi won the Interfraternity Sing, with Delta Tau Delta placing second. The competitive field consisted of seven fraternities, here named in the order in which they sang: Delta Tau Delta, Theta Xi, Phi Pi Phi, Beta Xi, Phi Kappa Sigma, Triangle and Sigma Kappa Delta.

By winning, Phi Pi Phi regains possession of the traveling trophy, a gift of the Interfraternity Council, which they lost to the Triangle last year, but won the year before. The judges, consisting of Doctors Raymond and Protheroe, Dean Palmer and Professor Leich, admitted difficulty in deciding the winner because of the excellent performances given. Delta Tau Delta, the first on the list, experienced great difficulty in getting started on their first song. That they redeemed themselves in the second selection can be seen from the fact that they were awarded second place.

The orchestra, under direction of Frank Aste, '30, opened and closed the program, playing first a group of four numbers of which "I Love You, Believe Me, I Love You," by Bouteleje was a constituent and later closing the concert with another group of four selections.

"Alexander," a humorous song for choral voices, by Brewer, was the feature song of the Glee Club's first appearance on the program. "The Song of the Waves" and "El Dorado," both written by Dr. D. E. Protheroe, director of the Glee Club, the latter song being dedicated to the Armour Chorus, were also sung in a subsequent appearance. George Burhop, '33, sang the solo in "On the Road to Mandalay" and was encored.

The work of the "Stresses and Strains" was highly appreciated by the audience for they were heartily applauded and had to give encores.

J. E. Higgins, '30, president of the Musical Clubs, arranged the details of the concert with J. H. Kovarik, '30, the business manager assisting.

Rifle Club Elects Statkus President

The Rifle Club held an election of officers in the Physic Lecture Room last Thursday, May 15, at 12:45. The following men were elected:

L. B. Statkus, president.
W. D. Wilson, vice president.
R. A. Hess, secretary.
E. J. Helmick, treasurer.
J. V. Pooler, range officer.

It was decided at the meeting that the vice president should assume the duties of range officer when that officer is not present, and assist him at all other times.

It was announced that a match with the Humboldt Park Rifle Club would be held Thursday, May 22, at 7 o'clock. Members of the team were asked to report promptly at 2405 West North Ave.

Sphinx, honorary literary fraternity, held a business meeting in the News Office yesterday.

A. T. A. A. BANQUET HONORS MEMBERS OF ARMOUR TEAMS

Invite 125 Athletes to
Informal Dinner
Thursday

HUNTLY TO PRESIDE

Armour's first Athletic Banquet will be held in the Adams room of the Lake Shore Athletic Club on Thursday, May 22, in recognition of the efforts put forth by men for Armour athletics.

The committee composed of the athletic managers and headed by Mr. Allison have made arrangements for the informal dinner which will start at six-thirty.

This is an invitational affair and is sponsored by the Armour Tech Athletic Association, which has given invitations to nearly one hundred and twenty-five men.

Professor Huntly, president of the Board of Athletic Control, will be toastmaster. At the speakers' table will be the executives of the Institute and the officers of the Armour Tech Athletic Association. Professor Schommer, Athletic Director, all the coaches of the various teams and the student business managers will occupy a table at the opposite end of the room. In addition to the athletes, invitations have been extended to several representatives on the staff of each of Armour's publications.

The Stresses and Strains Orchestra and other features will furnish the entertainment.

The purpose of this dinner is to honor every man who has made an effort to be of service to the Institute's athletic teams. At the banquet, besides "A" men, will be members of the squads, managers, coaches and members of the Board of Athletic Control.

Senior Mechanicals Inspect Two Plants

The Illinois Steel Co. was the scene of the inspection trip made by the Senior Mechanicals last Tuesday, May 13. At the plant, located at 89th Street, the important processes of the steel industry were viewed and the men were present at the Bessemer converter operations besides witnessing the rolling of ingot iron. Other items of interest were the pouring of iron from ladles and the "soaking" of ingot in gas pits. Under the direction of Professor Nachman, the seniors inspected the plant in four hours.

Tuesday, May 15, the Senior Mechanicals visited the power station of the Commonwealth Edison Co. located at Crawford Ave. and the canal. Professor Gebhardt was in charge of the twenty-five men who went on the trip and explained, along with the guide, the principles and operation of this 425,000 kilowatt generating plant. There are several units to the plant and each is capable of developing from 50,000 to 100,000 kilowatts apiece. The inspection began at 9:30 and was over in two hours.

Bacci, '26, Wins Award; To Get European Tour

Alex Bacci, Arch., '26, was recently awarded the thirtieth annual scholarship of the Architectural Sketch Club of Chicago. The award includes a gift of \$1,200 to be used for defraying the expenses on a six-month trip to Europe.

The design represented a fixed bridge over the Chicago River. Bacci is now a designer in the office of Raymond M. Hood.

TECHNICAL EDUCATION

Industry has pitched a camp just outside the college gate, according to a recent editorial which appeared in the *Christian Science Monitor*. No longer can it wait in its superintendent's office for the college graduates to come seeking a job. The Dean of the School of Engineering of Pennsylvania State College has estimated that American industries require an annual supply of 40,000 technically trained men, and the colleges are furnishing but 8,000. Thus a number of places needing workers are filled by men obtained from other sources, but for the higher and more responsible position, industry is dependent on the college.

Armour has been one of the sources from which men are taken for responsible positions in the industry. Every year representatives from many of the larger corporations are sent to get acquainted with the promising seniors, and a large number of our graduates are placed by this system.

Colleges are becoming more and more rigid in their requirements so that the men who are taken can be properly trained in their chosen field. In years past when industry refused to recognize the college trained technical man there was little to induce a man to enter a technical school. Today, with the industries waiting at the door for the graduate, applications are made in such numbers that it is necessary to pick with care the men who are to be allowed the opportunity of obtaining a technical education.

Industry is, says the *Monitor*, and has been for some time, markedly short of the technically trained college graduate. Here is at least one instance where the schools, public and private, can enlighten their pupils as to an important vocation that is sadly undermanned. It is to be deplored that young people early in their school experience are allowed to lose interest in mathematics because they see no use for it. Many a latent engineer has thus failed to find his place.

On one occasion Aristotle was asked how much educated men were superior to those uneducated. "As much," said he, "as the living are to the dead."

Of course, everybody likes and respects self-made men. It is a great deal better to be made in that way than not to be made at all.

Oliver Wendall Holmes

"The Slipstick"

Cleave to "The Slipstick"; let
the Slapstick fly where it may.

THE HORSE THAT FAILED

We shall meet but we shall miss him,
There will be one vacant desk,
For his pony went and failed him,
Disappointment did the rest.

We heard the other day that our earth's satellite was called the "silver" moon because it comes in quarters and halves.

WON GUD TURN DESERVES ANUDDER

Once upon a time a fella wend fishin. It simms wot he fergot tha bate. H'mmm soch a dommie. So instead uv goin hom he wend fur a wak. It heppened wot he sene a snak wid a tode in his mouth. He tuk tha tode frum tha snak an begin tuh fishe. Butt tha snak wooden go away, so he gav tha snak a reward. He puled out his hip-poket receptical an gav tha snak a drinke. Tha snak wend away heppy an tha fella wend on fishin. All of a sudden-like he feld a jerk on his pants. He loked down an saw tha snak wid anodder tode.

Little Rennie's Notebook.

WLL WLL

Wouldn't it be awful if there were no vowels?
Ths shws wht th nglsh lngg wid b wtht thm.

"Well I'll be darned," said the sock as the needle started to sew him up. M. Phthalic Acid.

How did you find the scenery along that new highway?

By simply looking through a knothole in one of the billboards. F. E. D.

Harmony in Linen

Judge: "They tell me your name is Muggleworth?"
Applicant: "Yes, your honor."
Judge: "And you want the court to change it to Pullman? Now just tell me why you want it changed."
Applicant: "Well, your honor, to tell the truth, it was my wife's idea. She got to thinking that we ought to have the same name that is on our towels." Dollar Bill.

An Englishman was visiting this country for the first time, and as he was driving along the highway, saw a sign, "Drive Slow. This Means YOU!"
The Englishman stopped in surprise and exclaimed: "My word! How did they know I was here?"

"Where are you going to eat?"
"Let's eat up the street."
"Aw, no; I don't like asphalt."

Anyway, a man can still take a chew without feeling that he should first offer one to the lady.

A FUTURE ARMOURITE

The teacher (dear girl) was quizzing little Johnny, and she asked him what a transparent object was. Little Johnny: "One that you can look through."
Teacher: "Give me an example."
L. J.: A doughnut.

Chuck.

Steve told us that a certain noted engineering school (bulletin on request) has a five year course. Well, Steve, that's nothing, so has Armour, and maybe six, too.

Civil: "Somebody swiped my handbook."
Another: "Ketchem?"
First: "Ketch 'em, heck, I never even saw him." R. E. M. (Not an ad).

Street of Chance

If you bet on three kings, that's gambling; if you bet you can make three spades, that's entertainment; if you bet wheat will go up, that's big business.

Stude: "Say, here's a button in my salad."
Waiter: "Yes, sir, it must have come off when the salad was dressing." The Co-ed.

Speaking of fast ones: When we asked to see her home she said that she would send us a picture of it.

Chinese Patient (over telephone): "Doc, what time you fixee teeth for me?"
Dentist: "Two-thirty, all right"
C. P.: "Yes, tooth hurty me all right, but what time you want me to come?" Sparks.

THE CALL OF SPRING

The following was found on a classroom blackboard: "All college students who loaf during the spring should be expelled."

Prof.: "And yet we couldn't run a college without any students." Another Co-ed.

Now we are stumped. Is our co-ed a "the" or a "they"? Time will tell, maybe.

It seems as though the Juniors will have to look on from a back seat now, for the Senior's act will be on the stage in a very short time. Phil J.

Professor Samuel Fletcher Bibb

(A Biographical Sketch)

BY P. EMIL SEIDELMAN

Samuel Fletcher Bibb, Assistant Professor in Mathematics, was born near Ripley, Tennessee, on June 2, 1891. He attended a rural school, located about one-half mile from his father's farm, called the Bibb school, and already at this early age did not waste his spare time, but utilized it in solving problems for his older sisters.

As his primary interest was in mathematics he followed it by going to Hall-Moody Institute at Martin, Tennessee. While at this academy he took part in debating and public speaking and became a member of the debating team during his senior year.

After graduating from West Tennessee State Normal, a school offering a two-year college course, he entered military service and rose through the ranks to second lieutenant of infantry. Having received his discharge in January, 1919, he entered the University of Chicago and received his S. B. degree the following year. While at college he majored in mathematics and minored in physics and chemistry. Professor Bibb, while at college, was keenly interested in sports; however, due to his extreme light weight, the closest he ever came to Stagg's famous football team was the rooting section.

After graduation, Professor Bibb taught mathematics at the Michigan College of Mines at Houghton, for two years. Then, after studying for one year, he took his S. M. degree at the University of Chicago as a continuation of his work in mathematics.

By this time he realized that the teaching profession was to be his chosen vocation and to his present delight, he seriously placed his efforts in that field, where he was best fitted and would receive the most from life. After teaching for two years at the University of North Dakota, he came to Armour in the summer of 1925 as an Assistant Professor in Mathematics.

Professor Bibb is a member of the Mathematical Association of America, the American Mathematical Society, the Collegiate Club of Chicago, and also an Associate Member of Sigma Xi Fraternity.

In June, 1926, he married Miss Harriet Ruth Carr, a graduate of the University of North Dakota, whose parents are living at McVille, N. D.

After his wife and two-year-old daughter are asleep, he obtains some amusement studying the rare stamps and covers he has been collecting during the past ten years, and wishing his collection were more complete. He is also a keen golf enthusiast, although, as he admits, possibly handicapped by having to stand on the wrong side of the ball.

Ultra Violet Ray Used As New Burglar Alarm

An invisible or ultra-violet ray light for the protection of valuables, or for a burglar alarms, is sciences' latest contribution to the law enforcement authorities. A demonstration of it was recently made by James L. McCoy, a research engineer of the Westinghouse Lamp Company, before an engineering society meeting in New York.

The device works on the principle of having a ray of ultra-violet light passing across in front of the object being protected, and falling on a photoelectric cell. Any interruption of the light affects the cell, which will then set off an alarm, release a cloud of tear gas, or anything else they wish.

Ordinary light may be used, but the burglar could then turn his flashlight on the cell, and fool the alarm. The same is true of infra-red rays; the ordinary mazda bulb gives off enough of them to energize the cell.

The boundary between Colombia and Panama has not yet been determined.

FRATERNITY NOTES

BETA PSI

Beta Chapter was host to friends and parents of the members last Monday and Thursday. Dancing was enjoyed and refreshments were served.

SIGMA ALPHA MU

A dinner dance is being planned some time in the near future, to be held in honor of the graduating seniors.

TRIANGLE

A Spring Initiation Banquet was held at the Chapter House Sunday, May 18, in honor of the initiation of James W. Thomson, '33, Ch. E., and Edwin A. Runge, '33, Arch.

KAPPA DELTA TAU

Plans are complete for the annual spring formal supper dance which will be held May 24. Many alumni are expected to attend.

Election of officers for the coming year was held last week. The following were elected:

P. P. Portnoy, president.
L. Wernicke, vice president.
E. Field, secretary.
J. Tuchinsky, treasurer.
J. Robbes, social chairman.

SIGMA KAPPA DELTA

Three men, Frank O'Connor, '31, M. E., Harold Davis, '32, M. E., and Luke Cosme, '33, C. E. were initiated into Sigma Kappa Delta fraternity last Saturday, after a week on probation. In honor of the new initiates, a banquet was held at the House in the evening.

Last Saturday evening also saw a farewell dance given in honor of the seniors who are leaving our midst after graduation.

PI TAU SIGMA

Pi Tau Sigma, honorary mechanical engineering fraternity, held inquisition for R. M. Krause, '31, and R. H. Stevenson, '31, at the Sigma Kappa Delta House last night. Professor Roesch was in charge. The formal initiation will take place some time during this week.

CLASS TO SEE ESCAPE

ON Friday, May 23, Professor Hendrick's class in Modern Drama will attend the current Goodman theater presentation as a body. John Galsworthy's play "Escape" is now showing at this unique theater on the lake front.

Any other students who wish to see the show at the special party rates should meet the group in the lobby of the Goodman at 8:15.

ESCAPE

A play by John Galsworthy
Presented at the Goodman Theater

The current presentation of "Escape" at the Goodman is undoubtedly one of the best that the theater has ever staged. This play of Galsworthy's is of a nature so as to interest one; the action is rapid, the story is modern in version, and all in all, the various elements are combined to form a really good production.

As one would suspect by the fact that Galsworthy wrote it, the dialogue in the play is excellent; it is crisp and witty; and the words are able to evoke both mirth and serious thought. "Escape" has a rather serious, underlying ideal to present, and the fact that it does so is enough to commend it. This may be summed as saying that the play tends to prove that a man with decent instincts will have them controlling his actions no matter how serious the consequences may be.

The play is well suited to the requirements of the Goodman theater; for the scenes called for are ably staged by means of the sky-dome; the realism of fog is created most cleverly by means of this piece of illumination engineering. Likewise, the roles are well suited; Bohnen as the gentlemen convict has a part that well suits his whimsical nature; and the others that fit thru the nine episodes of the escape are equally as well handled.

The play is essentially a vehicle for enabling the production of conversation on the subjects that Galsworthy was trying to stimulate; that is, while the plot structure is both engaging and rapid, the conversations in the various scenes is so brilliant that one cannot fail to come under the spell of it. Thru this conversation, the theme is developed; it is a most intriguing one to watch and hear. The play is short in duration, lasting but two hours, but it will prove to be two of the most interesting ones ever spent.

AFTER YOU, MAGELLAN

James Leys

What a college man can do is answered in "After You, Magellan!" This book is written by James Leys, a Harvard man, who gives his experience as an around-the-world bum. Being one of the millions of college graduates who find that they have plenty of brains but no industrial ambition, he decided to race a classmate around the world with no money.

So we start with James F. Leys and James Plumber to see the world and acquire nautical lore. Shipping as deckboys, stewards, quartermasters, or what have you, they were initiated into the profession of the sailor. In citing their experiences on their first cruise, Leys tells of the many varied customs of the sailors, of their habits, their likes, their dislikes, and finally, of their love affairs.

Having reached Seattle, they next were tricked into shipping to Alaska, and we are told the tales of the far north sailor. Perhaps the ideas we have of the sailor are mistaken when we consider them to be roughnecks. After reading this book that narrow notion is forever destroyed. A strike of the sailors is started when companies on the Pacific Coast begin to hire Chinese sailors for very low pay. By doing this they did away with the necessity of hiring whites. But to hurry along, Leys gets on a China-bound boat and he relates incidents of the trip across the ocean along with his experiences abroad. Here we get a dig, a laugh, and to top it all, learn some things about China that the histories neglect to tell.

From China, Leys goes to the Philippine Islands and here he is hired as a gang foreman. In telling of his strange trials with the control of Chinese labor, we are given a different slant at the life of our fellow citizens abroad and broke.

So on and on he traveled, until after a year of real life, the author returned to Harvard—to tell of his adventures.

SENIOR CHAIRMAN

Ray Shoon

Loyola, Valparaiso Beat Tech Net Team

The Tech tennis squad lost their sixth match last Tuesday when Loyola upset to the tune of 7 to 0. All of the individual matches were very close, only one of them not going to three sets.

RESULTS

Singles: Zwikstra (L) defeated Winkler (A), 6-3, 6-0; O'Connor (L) defeated Scott (A), 2-6, 7-5, 6-3; Dwyer (L) defeated Eddy (A), 0-6, 6-2, 6-3; Noolleman (L) defeated Schirmer (A), 6-4, 1-6, 6-3; Frisch (L) defeated Johnston (A), 6-3, 6-8, 7-5.

Doubles: Zwikstra and O'Connor (L) defeated Winkler and Johnston (A), 12-10, 8-6.

Dwyer and Noolleman (L) defeated Eddy and Schirmer (A), 3-6, 6-2, 7-5.

The Tech racquetballers lost another close match to Valparaiso last Thursday again to the score of 4 to 3. The matches were well played but Armour couldn't overcome their 1930 jinx and win their first meet.

RESULTS

Singles: Knake (V) defeated Winkler (A), 8-6, 6-3; Geising (V) defeated Scott (A), 6-3 6-4; Eddy (A) defeated Merz (V), 6-2 6-4; Hennig (V) defeated Schirmer (A), 1-6, 7-5, 6-3; Schultz (V) defeated Johnston (A), 6-1, 1-6, 10-8.

Doubles: Winkler and Johnston (A) defeated Knake and Merz (V), 1-6, 6-4, 6-1; Eddy and Schirmer (A) defeated Geising and Hennig (V), 8-6, 6-4.

The tennis team will attempt to win their first match of the season when they take on the fast "Y" college team at the University of Chicago today.

Juniors Visit Hotel Stevens

Last Tuesday afternoon, May 13, the Junior Electrical Class went on an inspection trip to the Stevens Hotel. The trip was conducted by Prof. D. P. Moreton, and was for the purpose of investigating the power plant.

The Stevens Hotel is one of the largest hotels in the world and as a consequence requires a large heating plant. The heating plant consists of seven boilers—three 600 horsepower boilers and four 700 horsepower boilers. As a by-product of this heating plant they furnish steam to generate all the electricity they use and for refrigerating and auxiliary purposes.

The electrical equipment is quite considerable and consists mainly of two 750 K.W. generators driven by two large compound Corliss engines having cylinders 24 by 42 in. and 42 by 42 in., a 500 K.W. generator and a 350 K.W. generator each driven by a Corliss engine.

All of the power plant equipment with the exception of the elevator equipment, is below the street level. When one sees the size of the plant it can easily be imagined that it extends four stories below the street.

GEORGE JENNINGS TO WRITE A SERIES OF TENNIS NOTES

This is the first of a series of articles on tennis by George Jennings, former student at Armour, former captain of the Armour tennis team, and present National Public Parks Tennis Champion. The articles following will be of a similar nature on other points of the game. Serving, using the back-hand stroke, and volleying are some of the topics to be given.

BY GEORGE JENNINGS

The first problem which confronts a person when he plays tennis is the selection of a suitable racket. I have found that a racket weighing 13½ ounces and slightly heavy in the head and tightly strung the best for my style of play. However, this has been found generally true of all of the leading players with the possible exception of William Johnston who used a 14½ ounce racket with a large handle. The handle circumference should measure about 4 and 7/8 to 5 inches. The handle which is too large tends to cramp the style and slow up the movement of changing grips.

Keep Eye on Ball

One of the principal ideas in learning the game of tennis is to keep the eye on the ball. This is true of any sport where a ball is used, and especially in tennis for each stroke depends on one's ability to watch the ball. The easiest way to learn this is to practically see the ball on the face of the racket. By following this your game should improve 50 per cent. Next thing to be considered are the strokes and the proper method of executing them. This is rather a difficult task for many great players have written really fine books on this subject.

The Forehand Drive

I shall try to describe the forehand drive. The grip of the hand for this stroke is similar to the handshake grip and may be accomplished as follows: Place the racket on the ground with the face in a perpendicular position. Then pick up the racket so that the leather fits into the base of the hand with the fingers and thumb encircling the handle. The thumb is placed between the first and second fingers. When this has been done there should be formed a straight line with the extended racket and the arm.

When making a forehand drive the face of the racket should be slightly ahead of the wrist. A follow through motion on this stroke tends to give "top" to the ball. Follow through is a very important item in tennis and should be practiced to perfection. Most players find that at the end of their swing that the racket is pointing straight behind them.

Stroke at Top of Bound

When hitting the ball on a return serve or other play the stroke should be completed if possible before the top of the bound of the ball is reached. I attempt this whenever possible for it tends to keep my opponent on the defensive rather than on the offensive.

In summing up the drive the following should be remembered:

1. Keep the eye on the ball.
2. Left foot should be advanced; feet spread wide apart; knees slightly bent.
3. Swing racket well back keeping racket horizontal.
4. Shoulder sweeps forward as weight is shifted from right to left foot at the moment of impact.
5. Complete follow through with racket.
6. "Practice makes perfect."

A. I. Ch. E. to Meet in Detroit June 4

The semi-annual meeting of the American Institute of Chemical Engineers will be held in Detroit, from June 4th to 7th, inclusive.

Professors McCormack and Schommer, and John E. Tarman, president of the Armour Branch, expect to attend. At this meeting all the sponsors, student presidents, and department heads will be in attendance.

The object of this session is to discuss ways and means by which the student chapters and the Institute can be brought in close relations.

There has been dissatisfaction on the part of the Institute and students as to the relationship between the parent body and the student chapters.

The chapters felt that they received too little attention from the parent organization. There has been no contribution from the students towards the advancement of the Institute.

Two years ago Dr. Edward Bartow, Professor of Chemical Engineering at Iowa State University, was made chairman of the committee on student branches and there were also two members of the Institute appointed to act as sponsors for the student branch.

This has assisted somewhat in clearing up the relations between the two. The Institute, however, feels that more can yet be done for the betterment of these conditions.

2500 Persons See Annual Open House

An estimated crowd of 2500 persons attended the Open House Night held at the Institute on Monday, May 12. This estimate, which was based on actual count of persons entering the building before 9 o'clock, exceeds by far any crowd which attended in previous years.

The four largest clocks in the world are in the United States with Big Ben in London ranking fifth.

ARX NEWS

ALUMNUS

Francis M. Baldwin, Arch., '21, was recently elected president of the Architectural Sketch Club of Chicago at the annual meeting of the organization.

Mr. Ralph Adams Cram of Boston spoke before the Architectural students in the Burnham Library on Tuesday, May 13th. Mr. Reed introduced Mr. Cram, who talked in a very informal manner. He explained that the basic principle of human life was beauty. The ugly things are those that are in the wrong shape. This principle is applicable to many things other than artistic as politics and science. Mr. Cram defined art as expression in a visible form in the universe. This expression of beauty was to be the work of the individual rather than the community. It is therefore a matter of self-expression.

The Cro-Magnon man was the first one touched on by Mr. Cram in his historical review. His opinion was that the work of these people was the first example of human art. This was in the form of wall paintings in their caves. After them came a period of darkness and then the period of reconstruction, occurring about 4000 B. C. Mr. Cram rather whimsically referred to the story of "Alice in Wonderland" when he said that one had to believe in some quite impossible things in order to enjoy life.

During the Dark Ages of Western Europe the art of Byzantium, Constantinople was at its highest. The Moors and Jews in Spain were able to keep alive the spirit by reason of the Pyrenees forming a bulwark for them against the barbarism of the rest of Europe. In Ireland at this time art was kept alive by illumination of manuscripts.

The present period, according to Mr. Cram, is the end of an Epoch rather than the beginning of one. This being the result of political and industrial revolutions. Previous to the period of 1828 the work done in the States could be rated as merely moderate, whereas the work done after that period and up to 1878 was abominable and barbaric, the worst since 4000 B. C. Mr. Cram said that this was putting it somewhat strongly, but they were his personal convictions. To balance this he explained that the last twenty years of American architecture was probably the highest of all the nations with the exception of perhaps the Scandinavian countries.

Mr. Cram is Supervising Architect at Princeton University. He is a member of the National Institute of Arts and Letters, the American Institute of Architects, Fellow of the American Academy of Arts and Sciences, a member of the North British Academy of Arts and many other societies and clubs.

He is the author of many books on architecture, principally on Gothic architecture on which subject he is an authority. E. C. K.

A. C. Soderholm, '25, is now working with Sargent and Lundy. He attended Professor Freeman's evening school class of Engineering Economics.

Fraternities Stage Novel Pageant

Theta Xi's under the direction of E. R. Rowley. This was followed by the Phi Kappa Sigma skit, "Sailor Beware," directed by C. P. Boynton.

S. K. D's Win Prizes

At 3:00 P. M. came the Triangle presentation, "The Rehearsal," directed by R. F. Waindle who was also the sophomore rush leader. Immediately following this was the Sigma Kappa Delta prize winning stunt called "The Annual Scramble," depicting the activities during rushing week each fall, and directed by B. Roffee with George Horras doing duty as barker.

The Phi Pi Phi's offering was the "Four Year Frolic" with Joe Bechtold as director. The last number of the series was "A Bull Fight," presented by the Delta Tau Delta's and directed by H. D. Marshall.

The judges were Dean Palmer, Professor Paul, Professor Wells, Bud Weldon, and Fred Attwood. The vote for the Sigma Kappa Delta stunt was unanimous.

Glee Club to Sing on Radio Tomorrow

The Glee Club has made arrangements for singing over the radio tomorrow night, Wednesday, May 21, through Station WCHI. They are scheduled to go on the air between 7:30 and 8 o'clock.

The members of the chorus are to report before 7:30 on the eighth floor of the Illinois Women's Athletic Club Building which is located at Pearson and Rush Sts. The program to be given will consist largely of those numbers given at the Annual Home Concert held last Thursday.

Junior Chemicals See Baking Powder Plant

Last Tuesday, May 13, the Junior students of the Chemical Engineering Department were conducted on an inspection trip through the plant of the Calumet Baking Powder Company. The tour took place in the morning under the supervision of Professor Bentley.

The students were taken throughout the plant and shown all operations, including the making of cans, treatment and preparation of the ingredients, their apportionment, packing, sealing and stamping. The students were also shown the control and research laboratory.

California scientists have invented a machine which makes snow. Up here we achieve the same result simply by having the car washed.

American metal furniture is popular in Latin America.

STELLAR PITCHING FEATURED IN THIRTEEN INNING DEADLOCK AGAINST LAKE FOREST COLLEGE

King Simpson Holds Visitors Hitless for Last Seven Innings of 1-1 Game

ALUMNI WIN ANNUAL BATTLE, 7-5

Last Monday afternoon the Armour baseball team, composed of a half-dozen rookies, was defeated by the Alumni 7-5 in a six-inning contest.

The game was slow, ragged and loosely played. The undergraduates expended but little effort on the field, always feeling that victory would result regardless of how they played.

As the game approached the final innings, both teams took matters a bit more seriously. The Alumni squad, however, maintained the lead while the undergraduates sought a rally in which they could pile up enough runs to clinch the game.

Coach Krafft's first moundsman was Cannell, a southpaw who occupied the bench all season. Cannell was the victim of six hits which netted the Alumni an equal number of runs. Sommers relieved Cannell in the fourth inning and allowed three hits and one run in his two-inning performance.

Yount Stellar Player

John Yount, '29, Armour former catcher in the seasons of '28 and '29, was largely responsible for the Alumni victory. Although Yount was never classed as a pitcher previously, he made himself an expert in this line of work Monday. Yount held the Armour team to five hits and struck out seven men. The five hits were collected by four of the regulars while the rookies were held hitless.

Otto Kuehn, playing first base for the Alumni featured with three two-base hits.

Armour Wins From Y College Saturday

In a nine inning baseball game played with Y. M. C. A. College last Saturday morning, Armour emerged victor by 15-3. Chief Stehno hurled effectively for seven innings when he was replaced by Cannell.

The final summary shows that Tech collected 15 runs on 20 hits against 3 runs and 8 hits for Y College. Only one error marked the Armour defense while four were committed by Y. Cross pitched for Y College.

Any new change or suggested change in rules for the basketball game are quickly tried out among teams playing in the national prep basketball tournament in Chicago.

Lake Forest and Armour met each other Wednesday evening on Ogden Field and entered into a thirteen inning baseball contest that ended with a 1-1 tie. The game was called off because of rain and darkness.

Armour scored its solitary run in the fifth inning, Lake Forest immediately followed in the sixth with the tying run, thus knotting the score that remained as it was until after sunset time.

Lake Forest was held hitless in the last seven innings, while Armour came through with an occasional single or a base on balls. In the 10th inning Armour had three men on base but failed in its scoring attempt when Robin struck out to retire the side.

Fans Show Pep

Yelling and cheering predominated throughout the thirteen inning embroilment. Every player's move was carefully watched, every batter was feared and more so when another man was on base. On several occasions a short drive over the right field fence would have broken up the ball game.

As the batters were retired, one by one, throughout the last seven innings, the frenzied fans would go into an uproar. If a man received a free pass to first base, words would pass to the effect that the pitcher was weakening and would soon be sent to the showers. Despite fandom's wishes and their anticipations neither team gave in and would have stopped at nothing had it not been for the approaching moonlight.

Simpson Strikes Out Nineteen
The big show was again around King Simpson. King piled up 19 strikeouts and above all limited Lake Forest to three hits. Two of these were doubles that were placed over the right field fence while one was a single. Ferzacca and pitcher Orth were the only two men who landed safe blows.

Simpson's hurling was so effective that only two men reached third base, incidentally one of these men scored. Only three other men reached second base. One man took the extra base on a sacrifice hit while the other two took the second stretch on infielders' errors.

In the very first inning of that game Armour demonstrated that it was out to put up a real performance. In this initial round, only three balls were pitched, yet two men reached first base safely, but the side was retired with no men on base. This may appear puzzling and is perhaps something of interest to Ripley, but here is how it happened. The very first ball that Simpson pitched was converted into a base hit by Ferzacca. The next batter hit the first ball to Simpson who in turn played it at second base forcing Ferzacca out, leaving Rostkowski safe on a fielders' choice. Before the third ball was sent across the plate, Simpson flung the sphere to Robin and caught the man off base. Orr was the third man up to bat, and like his teammates swung at the first pitched ball flying out to Robin.

Up until the fifth inning the game was scoreless. Orth, Lake Forest's hurler kept Armour at bay limiting them to one hit. In the fifth, however, after two men were out Mago walloped the ball for a three base hit. Link then followed with a hard hit grounder that passed through the second baseman, enabling Mago to score.

Lake Forest Hits Two Doubles
Lake Forest scored its run when Orth clouted a two base hit, and was followed by Ferzacca who imitated him with a similar blow thus giving Orth a free trip home. Rostkowski followed Ferzacca with a strikeout, Ferzacca taking third on

Inquiring Reporter

What the team captains think of sports at Armour this year.

Capt. Don Paul, track: Armour cannot show its true strength in sports as other schools can because of the fact that the men have practically no afternoons free. The laboratory courses take all afternoons. The school seldom, if ever makes any compensation for athletics when classes are cut; to attend a meet.

Capt. Al Winkler, tennis: Athletics do not receive enough support to bring them up to standard. When a student goes out for a team he usually signs his death warrant, so to speak, in some class or another.

Capt. King Simpson, baseball and basketball: There is plenty of material at Armour to make it stand out among the other colleges. Studies, however, prevent them from representing their school in the athletic division.

Capt. N. D. Buehling, boxing: The various athletic teams at Armour have been greatly handicapped by the lack of time in which to practice. Despite this condition, I believe more men should show an interest in school sports and come out for the teams as well as watch the games. Only in this way can Armour produce teams of high caliber.

an error. Orr reached first on a fielder's choice resulting when Ferzacca attempted to score on an infield hit. The next man flied out.

This inning appeared to be quite profitable for Lake Forest but only resulted in their downfall, for Simpson tightened up to such an extent that he held them hitless during the remainder of the game. In the very next inning that followed Simpson struck out three batters in succession, permitting but one man to touch the ball for a foul hit.

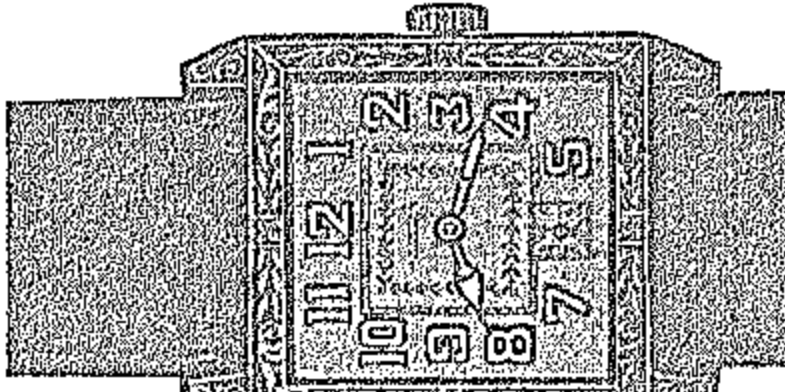

Armour's tenth inning was opened up with a single by Mago. He then stole second and third base. Link flied out to right field. Reichle walked, Miran came to bat next, hitting to the third basemen who in turn sent the ball to the catcher when Mago attempted to score. Hauser followed Miran with a base on balls, filling the bases. Robin retired the side with a strikeout.

Armour made no serious scoring threats in the remaining innings. Orth, Lake Forest's ace, much like Simpson, held the home team powerless. He only allowed six hits in the game and fanned 10 batters.

Crane College Beats Armour Golf Team

Armour Tech's golf team showed great promise and considerable talent when they met the strong aggregation from Crane College last Saturday at the popular Evergreen Golf Links. The meet was hotly contested throughout, being dropped by the Armour men by the close count of 9½ to 8½.

The splendid condition of the Evergreen course added considerably to making the meet a success, regardless of the unfortunate outcome for the Armour squad.

It seems as though the West Side golfers received a few lucky breaks, and only because of this fact, emerged victors in what seemed to be a very uncertain match.

Manager Sitzler states that a return match with the Crane team is contemplated in the near future.

The squad journeyed down to De Paul last Saturday to engage them in a meet, the results of which are unknown as this article goes to press.

The Tech squad is confident that it will find its stride after a few more unlimbering rounds.

The results of the Crane match are as follows, in the singles:

Sherwin, Crane, beat Pearson, Armour.

Johanason, Armour, took 2 points from Schlichtling, Crane.

Weis, Armour, and Elsenstein, Crane, halved.

Richman, Crane, beat Alexander, Armour.

Tech Expected to Down Coe College

Coach Krafft's coterie of fly chasers have been accelerating like No. 999 in an old-fashioned melodrama and it is expected that Tech shall subjugate the immediate opposition, Coe College and DeKalb, with the dispatch of a smooth running major league outfit.

We engineers shall plant our optics on the belligerency which will take place at Armour on Friday and 1,000 eyes should take advantage of the free contest, since this will be one of the last opportunities for the student body to watch our masterful pitcher, Captain King Simpson, in action on the knob. Incidentally, King probably will be operating with some big-time aggregation with the conclusion of commencement exercises. It is whispered that Simpson will wear the raiment of the Chicago Cubs. This is the first time Tech has ever engaged Coe College of Cedar Rapids.

Saturday morning the entire squad will invade DeKalb College for another engagement with the teachers. If you remember, the Yellow and Black had a hard time disposing of the pedagogues earlier in the season by a 4-3 count.

TRAILER
FOR SALE. Never used. Just the thing for camping or boat hauling. If interested drop slip of paper with name in News Box near elevator.

All Over But the Shouting

We'll have to forget about Junior week, proms and social events for a time now because soon the final exams are to be held. Oh, yes! Don't forget those reports that should have been written way back when.

Last week "Von" Miran proved himself an iron man. Besides practicing and playing baseball, "Von" practically won the fraternity track meet for Beta Psi. Then on the following day, Friday, he ran on the Junior relay team and won first place in the pentathlon. Miran won his letter in basketball last spring as a regular guard.

Captain Fox—Captain James

We now have two track captains to replace Don Paul. Harold Fox and Frank James will act as co-captains next year. One of these men will take care of indoor and the other the outdoor track season.

Lots of Baseball in One Game

Thirteen innings of baseball were played last Wednesday before it was decided that Armour and Lake Forest were on a par. King Simpson pitched the entire distance and was credited with 19 strikeouts.

The Big End of the Baseball Schedule

is being played this week. Iowa and Coe are to play at Armour on Monday and Friday. Saturday the team travels to DeKalb to meet the Teachers' team.

Old Graduates Win from Varsity

These alumni games usually attract quite a good deal of attention and this year's game was no exception. The main attraction was the pitching of Johnny Yount, who held the Varsity to five hits. Otto Kuhn of Mech. Lab. fame came through with three hits. Vic Hoefer, who usually plays air-tight baseball, was socked with an error.

On Friday, nine men of the Track Squad are to take part in the Marquette Relays held at Milwaukee. This meet is to be held at night under flood lights.

There is so much political harmony in Oklahoma that old-timers are getting uneasy. There is always a hush ahead of a twister.

PHI PI PHI'S BEAT BETA PSI MEN FOR INDOOR BALL TITLE

Good Pitching Features Championship Game on Tuesday

SCORE: 8-2

Another glaring demonstration that good pitching is half the ball game was evidenced last Tuesday, May 13, when the Phi Pi Phi indoor team trounced the Beta Psi contingent by a score of 8-2. This victory gives the winners permanent possession of the indoor trophy, which last year was in possession of Sigma Alpha Mu.

The score, however, is no indication that the game was a one-sided affair, in that up to the fifth inning, the champs were held to a few scattered hits and had a grand total of no runs in the scoring column against one run which their opponents picked up in the first chapter.

Phi Pi Phi's Have Big Inning

Up to the fifth inning, Johnson, of Beta Psi and Stan Ott were on a par and it was anybody's ball game. The break came in that period however, when the Phi Pi Phi's mustered their heavy artillery to the front and sent a barrage of hits that netted a total of six tallies. It was the same sort of an inning that has characterized previous games in which the present champions have competed.

Cassidy Hits Homer

Besides the pitching, which was good on both sides save for one bad inning, the hitting looked very good—in spots. Beta started right out and meant business in the very first session but almost sank into oblivion until the sixth when they put three men on the bags. The Phi Pi Phi's were not up to their standard of playing in the early part, only getting six safeties in the first four innings. Miran looked best in both hitting and fielding for the Psi's while Cassidy, Gregerson and Carlson shared high honors for the other Michigan Avenue aggregation. Cassidy's homer in the seventh brought in two more markers.

Line-up

Phi Pi Phi:	Beta Psi:
Gregerson, 2b.	Staib, ss.
Carlson, c.	Trauten, ss.
Leichtenberg, 3b.	Austin, c.
Grundstrom, 1b.	Miran, 3b.
Cassidy, 3b.	Mullins, 1b
Rosenquist, lf.	Johnson, p.
Meade, cf.	Setterberg, cf.
Finnegan, ss.	Rutkowski, rf.
Owen, ss.	Scafuli, 2b.
Ott, p.	Goldsborough, lf.
Beta Psi	100 001 000—2
Phi Pi Phi	000 060 20*—8
