LEADING SEMORS TO BE AWARDED ENGRAVED CYCLES

Scholastic Average and Activities Basis Of Awards

CHOSEN BY A.T.A.A.

Ten seniors chosen by the Armour Tech Athletic Association as honor men, will be presented with specially engraved copies of the Cycle. These awards have been given annually to honor men of the senior class.

The Cycles which will be given them have engraved upon the cover, the name of the person receiving it, his ranking, as decided by the athletic association, with the inscription "Honor Edition Award." The following men have been awarded the coveted cycles, the number indicating their ranking;

1. Arthur Henry Jens.....F.P.E. 2. Charles Theodore Link....M. E. 3. Frederick Branham

4. Alvin Berthold Auerbach....C. E. 5. Richard Ray Eddy.....F. P. E. 6. Frank Marshall James...F. P. E. 7. Edward John Stehno.....E. E. 8. Walter Martin Miran....F. P. E. 9. Walter Edwin Schirmer. F. P. E. 10.Ralph Alvin

Timmermans......F. P. E. The board of control of The Armour Tech Athletic Association is composed of faculty and student representatives the faculty members being Dean Penn, Professors Huntly, Leigh, and Schommer, Mr. Allison, and Coach Krafft. Five student representatives are elected by the association.

The records of various men of the senior class in scholarship and extracurriculum activities are considered. Twenty students are selected and their names are given to the board of control. This association also looks over their scholarship records and due consideration is given every man in the prospective balloting. As stated before they are ranked according to the balloting.

Honor Marshals

The honor marshals taking part in the annual commencement exercises and baccalaureate services Armour Institute of Technology have been selected. These men are representatives from the freshman, sophomore and junior classes, the choice being due, mainly, to their scholastic standing. The following honor men have been choosen by the Dean's office:

A. Bachman, E. G. Beard, A. Bogot, W. G. Buehne, R. W. Carlstrom, J. O. Cavanagh, C. O. Cunningham, H. R. Davis, W. A. Janssen, J. W. Juvinall, G. A. Nelson, F. W. Paine, H. P. Richter, and M. J. Schinke.

Representatives from the Armour faculty are: Charles Anson Nash, marshal; William White Colvert, assistant marshall; Arthur William Sear, assistant marshal.

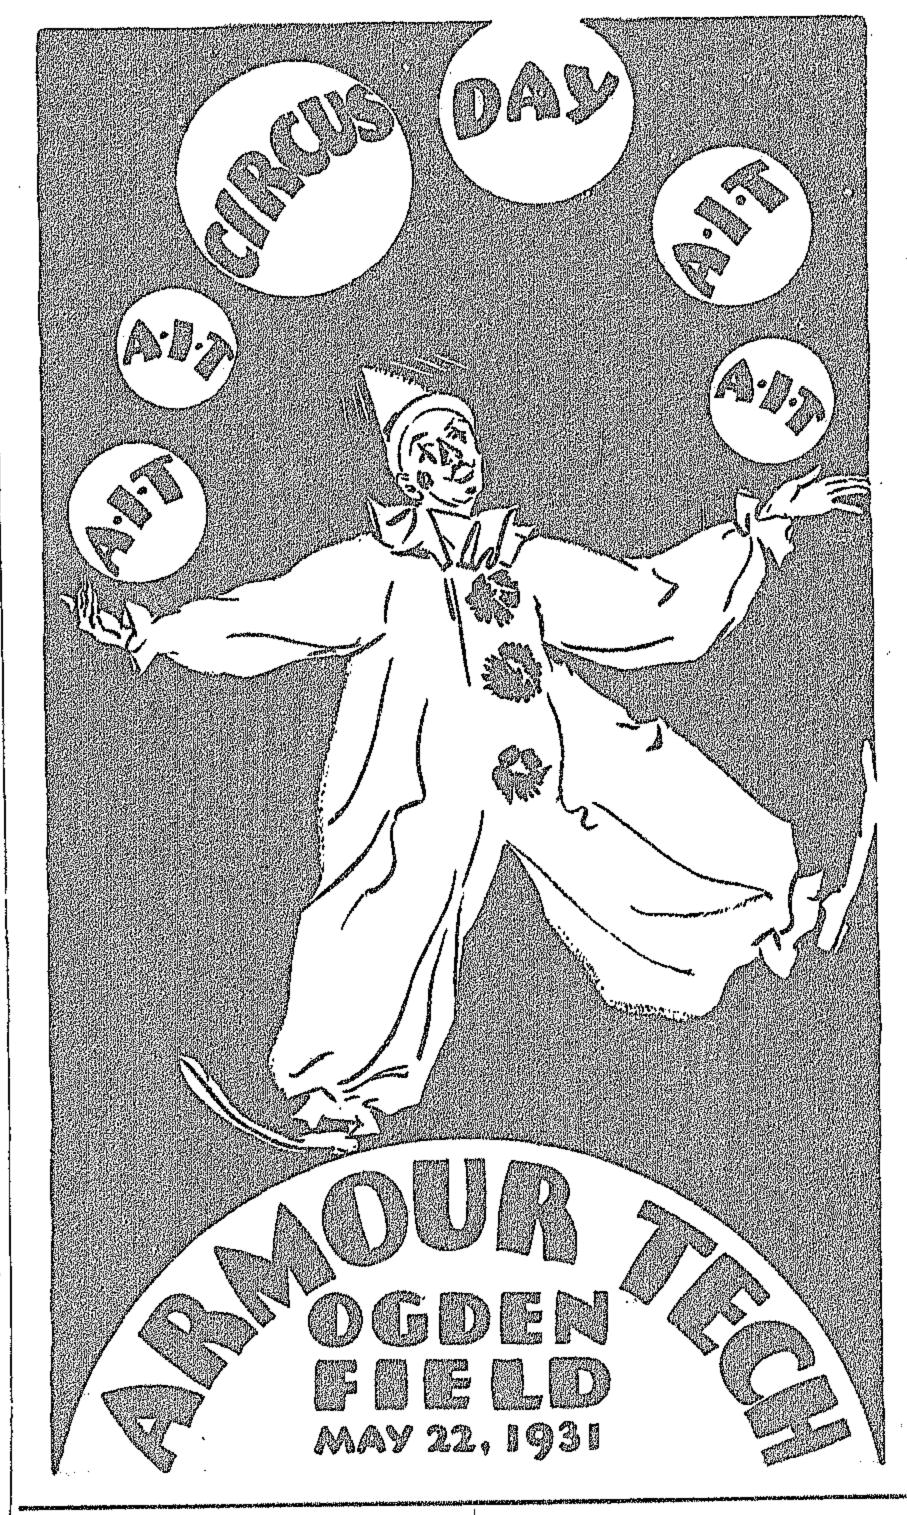

The baccalaureate services will be held at Central Church in Orchestra Hall, June 7, at 11 a. m. Commencement exercises will take place Thursday, June 11, at 4 p. m., in the Institute assembly hall.

Circus Day to Climax Annual Junior Week

On Friday of Junior Week will come that famous day in Armour annals known as Circus Day. Once a year all the pent-up respect for law, order, dignity, and whatnot is thrown to the winds. On May 22 it is permissable for the thin veneer of civilization to be discarded for the nobler pursuits of track and shirt-ripping | spectacular events of the year. The Chosen by Office | pursuits of track and shirt-ripping spectacular events of the whole idea is at least | Armour tradition was expressed

> An interview with President Raymond indicated the fact that the present generation of students has none of the spirit of the men of old. No longer are the class leaders for the rush kidnapped. Today it is practically unknown for the whole Freshman Class to be locked up in a barn so that the Sophomores could win the rush without a bit of resistance. No, these pranks required the hardier constitutions of the men who graduated years ago. Do you accept the challenge? We shall see.

To Present Dance

Plans are now complete for the Junior Formal dance, which dance promises to be a fitting climax to Junior Week and to the entire social season of Armour Tech. The junior social chairman and his committee have spent much time and effort in preparing for this affair, and have, as a goal, the wish to make both dinner and dance the finest that have yet been held.

Junior week will last from Monand will be crammed with exciting M. R. Beal New events and interesting stunts. The dinner dance will be on the night of Friday, May 22, from 9 till 2. This is the last night of Junior Week and is the peak of the fun and hilarity of this "Spring Spasm."

Several places were considered as to being good locations for the dance, but after some debate the Oriental Room of the Knickerbocker Hotel was finally chosen as the most beautifiul and attractive setting for the formal.

Syncopation will be provided by Doug Peppard and his Northwestern Troubadors whose seductive strains will fit in closely with the colorful and bizarre surroundings of the Orient. This band is composed of ten pieces and is well known for its fine music.

The bids are priced at \$8.00 and may be obtained from any member of the committee, which is composed of: J. J. Casey, chairman, J. E. Bryant, J. B. Dirkers, O. G. Linnell, and G. W. Schodde. One of these men should be seen immediately, for only 125 bids are to be sold and this limit will soon be reached.

The Junior Formal Dinner Dance every year is the big affair, the finish of the year and the one this year promises to be the biggest and best ever given, so bids should be bought promptly and preparation should be made for a wonderful time.

The program and favors selected are from new designs which are being introduced into the activity

"From a little spark may burst a mighty flame." ---Dante Born May, 1265.

A Gala Week for All

Junior Week is without doubt the outstanding collegiate event of the school year. It is observed by faculty and students alike as a breathing spell, a time of relaxation in the midst of the serious task of education. And as such this respite has been recognized and enjoyed by our predecessors for years. Soon we will once more plunge into this week embracing activities of interest to all of

By its very name Junior Week is identified with but one class among the four. A junior has general charge of the activities of the entire week, other juniors plan athletic and social events and referee the annual class rush, while it is still another junior who supervises arrangements for the formal dinner-dance which closes the week.

The predominance of any one class in the activities of this week might lead the uninformed to think that the other three classes were relatively uninterested. That this idea is erroneous and is entertained by but few Armour men is shown by the number of seniors, sophomores, and freshmen who participate in the various events. Those colorful interfraternity pageants and highly competitive track activities have only attained the present high place in the opinion of the Armour students and faculty because they involve a hearty cooperative participation of all the classes. Certainly if the interest of even one class was lacking the stiff competition of the interclass track meet, the traditional display of spirit and class rivalry to be found in the annual sack rush would be

missing. It is easily seen, then, that a successful Junior Week requires the cooperation of all classes and organizations. Also many of the events are so dependent on the weather that postponements are not at all impossible. Such an occurrence is always unpleasant but, if the men or organizations concerned are really interested and willing, the rearranged program may be carried out with no diminution of success. It is undoubtedly because of such a feeling of cooperation that Armour's Junior Weeks in the past have been so satisfactory to all.

We feel sure no one will deny that the celebration of Junior Week is a distinct benefit to the entire school. It gives the freshmen a chance to prove to the world in general that they are no longer in the adolescent age, and it offers all the classes a greater opportunity for athletic competiton than is afforded by any of the other school functions.

In previous years Junior Week has been remarkably successful, as a rule, and consequently the present one has a reputation to uphold. If we follow the same plan of cooperation we are sure to reach just as high a goal as has been attained in former times if not a higher one. W. H. R.

No Danger

"Hello, Jones. I want to insure my coal-yard. What | Mechanicals to Visit will the premium be on a \$200,000 policy?"

"What kind of coal is it? Is it the same as the last five tons you sent me?"

"Yes, that's right."

"Don't bother insuring it. It won't burn."

PREPAREDNESS PAYS (???)

It was a tall, mysterious-looking man who applied for a room at a local hotel. Among the many pieces of luggage which he carried the clerk noticed a large coil of heavy rope.

"And may I ask why you carry such a formidable coil of rope?" "I always carry such a coil in case of fire. In the event

of a conflagration I can let myself down without bothering anyone." "A glood plan, I do agree, but people who carry fire

escapes pay in advance at this hotel." Skiff.

Did you ever go out to the links with your club clubs? It sounds funny, perhaps even silly, but if you didn't know it you took out your club clubs. This repetition is not absolutely the best of English, but the word "golf" is derived from the Dutch "kolf," which means "club." Hence the bag of "club clubs."

Well, well, here's Junior Week again next week. Baseball game, Open House Night, Musical Concert, Inter-fraternity Sing, Circus Day, and the best of all, the Junior Formal. Pity the poor freshman who has only sixty-two calc problems per night.

(Not the seniors, the drawings). Local judgment was held on them Tuesday, but alas the jury must have just purchased themselves a nice new shiny red pencil for the successful grades utilizes the plant employees as the were few and far between. The only medal which was a 2nd Medal, was given to Tom Carter. This boy Tom has an unusual knack of rating it seems.

> If you glanced in the Metropolitan section last Sunday, the third, which you probably did; and you saw the picture of Dave Chapman and Charley Goldman looking at you, which you probably did; and now you read this and you think we're boasting, you're probably right. But how can we help it, we are proud. Anyhow, save the picture; you might boast about it someday.

Open House Night To Be Held Monday

(Continued from page 1) tors, as well as to speak to parents about their sons, the entire faculty will be available. The students working on the various exhibits will also be glad to answer questions and make things more comprehensive to the strangers.

Students are asked to bring parents and friends to the exhibit. A large crowd is expected to be present thousand people has not been unthey are to take control immediately. tins advertising the exhibit have been sent to various educational institutions in the vicinity, and to students seeking admission to Armour next year.

The electricals are planning a spectacular show, featuring the Testa coil, which is being enlarged. A spark seven and one half feet long is expected to be obtained with a potential foot spark from the coil gave the spectators quite a thrill.

Other displays in the Electrical Department will demonstrate the use Trip See Coke Plant of old and new types of telephones, photo-electric cells, television, and Professor Bentley accompanied the some of the more recent developments

In the Organic and Quantitative About ten more inspection trips display, since they represent the re-

> It is rumored that several ambiout of an electric oscillator, to attract the crowds. In case it is necessary to clear the buildings in a short time, the sophomore chemicals promise to have available sufficient amounts of carbylamine and other tear gases.

Be at Phi Kap House

There will be a Fire Protection Engineering Society smoker at the Phi Kappa Sigma fraternity house this Wednesday, May 13, at 8 p. m. As has been the custom in the past, an evening loaded with smoke, eats and gambling games will be "on tap". Men of F. P. E. fame as Smoky Rogers have been present in past years and will undoubtedly be there tomorrow. Professors Finnegan and Holmes will attend also.

Roy V. Wright Addresses Men On 'Opportunity'

"The Engineer's Opportunity" was the title of an address given to Armour students at an assembly held Wednesday, May 6, by Roy V. Wright, who is president of the A. S. M. E. and editor of the Railroad Age. He is a prominent engineer and his talk was of great value to the embryo engineers. He gave the following accepted definition of engineering: "Engineering is the science of controlling the forces and utilizing the materials of nature, and directing the human activities in connection with these processes."

Mr. Wright mentioned that great demand was being made for engineers as executives. City managers are almost exclusively engineers and a need for this type of man has become felt for other high positions. Engineers have a large field in salesmanship. Firms realize the value of sending a trained man to discuss their product and problems connected with its use, with the prospective customer.

The intelligent use of an engineering society was also discussed. The contacts obtained by this means are invaluable, especially with the older men in the field whose encouragement means much to the young engineers.

"There is an art," stated Mr. Wright, "to conducting a good meeting." This art may be acquired through the student branch of an engineering society. One of the most vital things to be obtained from such meetings is ability to express ideas clearly and concisely. Self expression is of tremendous importance to the engineer. The successful man is the one who can produce the facts; also engineers may have the facts but they have to "tell the world about it."

The publications of the various the story. societies are criticized because much of the information contained may not be of interest to a man in some particular field. To the intelligent reader, these magazines should indicate the trend of the times. For example, work is being done at the present time to determine the status of the engineer, which is comparatively a new profession and its place in society is not yet completely determined.

that the engineer of the nineteenth century provided the materials and built the machinery, whereas the engineer of the twentieth century continues this work but his greatest efforts will be in "Humanics." Dealing with people forms the greatest part of his work. Mr. Wright closed his talk by reminding the engineers of the words of Einstein who cautioned that in our work in science we must not forget humanity.

The orchestra offered several numbers and were complimented on them | imaginable type of bridge both of by Mr. Wright. After thanking the ancient and modern principle. Rope speakers for his splendid address, and stone bridges, cantilever swing, President Raymond urged the stu- and bascule bridges were shown, dents to bring their parents and while Mr. Gayton both described friends to Open House Night which them in detail and related many inwill be held May 22.

Professor Bentley Elected Treasurer

Professor W. J. Bentley of the Chemical Engineering department has been elected treasurer of the Chicago Section of the American Chemical Society. He formerly was chairman of the House Committee of the local section. Dr. B. Schaar of the Schaar Chemical Company was elected chairman of the section for the coming year.

Professor Bentley recently was elected to another important office in a local chemical society; that of vicepresident of the Chemists' Club.

REVIEWS

THIS THING CALLED BROADCASTING

Goldsmith and Lescarboura

Not one of you but at some time or another has wondered at the inner workings of the organization that presents the radio programs that are spread over the entire country by means of telephone wires and then by the radio to every home in every town that possesses a radio receiving set.

"This Thing Called Broadcasting" is a popularly written, non-technical account of the rise of radio from its crudest beginnings as an experiment in the use of radio waves to transmit the human voice, to the modern status which it now occupies as one of the country's leading industries.

First of all this is a story that, while it puts a veritable encyclopaedia of information before the reader, is one that is pulsating with facetious humor, purple patches of eloquence and many anecdotes from the author's own experiences that gather into the narrative all its outlying connections from the earliest stages bridge, in calculating the size and May 2 at the Edgwater Beach Hotel. to its possible future.

There is not one of you who did not wish, at one time or another, to drama is presented, who did not wish | Practice. to see the workings of the vast coordinated system that makes possible the broadcasting of events national interest such as the inaugural address or major sporting events, or understand the affiliations between the national broadcasting companies and the individual stations that comprise the chain in the broadcasting of such inimitable features as Amos and Andy. All of these things are set down in such an entertaining way that one is hardly aware of the technical subjects that are being covered in the course of

In short, "This Thing Called Broadcasting" presents the inside story of the evolution of broadcasting from a mere stunt into an art with its own unique technique most admirably told.

It is recommended that this book be read by anyone who listens to national or local features presented daily over our many stations as only with a full understanding of the inner complexities of the vast organ-Dr. Davis of Stevens Institute said | ization now necessary to present a program, can it be fully appreciated. Raul Frye.

City Engineer Gayton

That bridges have gone through a succession of evolutionary stages was vividly demonstrated by City Engineer Loren D. Gayton in an illustrated lecture given before the W. S. E. last Friday morning.

His color slides portrayed every teresting items concerning them.

Not the least to receive his attention were the various spans in Chicago. The Michigan Avenue bridge, he mentioned as being the busiest bridge in the world.

The hours of labor are from 7:30 to 4:30 with an hour off for lunch at noon. The remainder of the time is spent swimming, fishing, hiking and at the weekly dances in State House, Wisconsin, nearby.

The camp fee is \$45 plus \$50 for board. The round trip fare to Trout Lake is \$19.

Information for benefit of some: first bell at 5:50 A. M.

Math Professors Go To Peoria Convention

On Friday and Saturday, May 1 and 2, the twelfth annual meeting of the Illinois Section of the Mathematical Association of America was held at Bradley Polytechnical Institute in Peoria. Professor Spencer, Prof. and Mrs. Teach, and Prof. and Mrs. Krathwohl and their son attended this annual convention of mahhematics teachers from high schools and colleges all over Illinois.

An interesting talk on the "Reorganization of Freshman Mathe-Lectures on Bridges matics" by Prof. Logsdon of the U. look on Teaching the Einstein Theory by Dr. Louise Lange of Crane were given on Friday afternoon.

Friday night, a banquet was held. At the business meeting which followed, Professor Krathwohl was elected Vice-President for next year.

After the banquet, an illustrated lecture was given by Prof. MacMillan of the U. of C. on the subject "Stellar Systems." On Saturday morning, two more talks were given after which the convention was closed.

Bradley Polytech, where the convention was held, is a coeducational school of about the same size as Armour. It has only two years of technical school. It was the first school in the country to organize a school of Horology or watch making.

Campus Club Meets To Talk Over Plans

At a meeting of the Armour Tech Campus Club in the club quarters in Chapin Hall last Thursday May 7, the question of the annual banquet was entertained. After much discussion the idea was voted down and a plan for an outing this summer offered. Although no definite arrangements were made the suggestion appealed to several who are trying to put it over.

At the present time the club rooms are the scene of the school chess tournament, which is nearing its end at the present time.

A large Campus Club monogram, the work of the last ex-pledges was cast in bronze and now adorns the door of the club. It consists of the raised bronze lettering, A. T. C. C. on a black enamelled field.

Chemicals Produce Synthetic Fog in Lab

The Daily "Smoker" held in the Organic Laboratory on the 4th floor each afternoon proved to be a miniature smoke screen Friday, May 1st. A dense fog permeated the atmosphere at the entrance, which attracted the attention of Frank Oster, Custodian of Armour Institute, who hastily sought to investigate the source of trouble. Upon entering not a person was visible, only a "pea soup" fog blanketed the laboratory. In due time a face appeared and Oster hastily apprehended him. This fellow had worked in fogs before and offered assistance.

After considerable grilling the culprits responsible for the dreary situation confessed. A few embryo engineers were performing quantitative experiments which reacted chemically with one another. A few beakers of ammonia and hydrochloric acid were boiling away merrily and their vapors reacted to form ammonium chloride, a fine white powder, produced the aforesaid fog. In the future these chemicals hope to pro-

Fraternity Tennis Matches Under Way

Tournament play in Interfraternity Tennis was started one week ago. The opening matches were played between Sigma Kappa Delta and Delta Tau Delta.

the doubles being left for this week because of the short available playing time. The winner of the two out of three matches will play Sigma Alpha Mu, this fraternity (having drawn a bye for first round play.

Tau Delta while F. O'Coner and Timmermans upheld the honor of Sigma Kappa Delta. Streb defeated F. O'Conor while Timmermans | will journey to Valparaiso to meet emerged victor over Cone. This gives each fraternity one match and the doubles match will decide who will play Sigma Alpha Mu.

Progress in the tennis tournament has been about at a standstill the past week. Inclement weather was the major reason for this.

to play their matches at the earliest possible time. This tournament was started with the avowed intention of selecting men to play on the varsity tennis team. In a short period of time school will be out for the summer vacation and therefore the tournament will be useless unless finished finish the matches.

In another overtime game, 11 | Coach Krafft's baseball performers innings this time, Armour defeated | will serve as guests to another pair Wheaton on their own field by a score of menacing opponents this week when Wheaton College and Michigan Tech was held hitless until the fifth | State Normal make their appearance

Wheaton College, victims of an eleven inning battle with Armour Moskowitz and Pepe singled, while on May 5, will form the opposition this Wednesday. They are coupling their invasion with grim determination to offset that earlier loss, and show promise that they will offer Krafft's proteges a good blow of adversity.

Tech. Favored to Win

opponents down with only two earned runs. Wheaton's ball thrower had displayed his sense of greediness by keeping our men in action in two overtime innings before he finally relinquished the winning run. A good e deal of color to the game will no o doubt be provided by the opposing

o hurlers. Krafit in practically all respects will place the same men in action 0 | who have started the season. There is | Thurs., May 21 — Interfraternity some soubt as to whether Omiecinski's injury will keep him on the Fri., May 22-Track, Marquette Rebench. During this home run slugger's absence Krafft found a valuable substitute in Gene Galvani. Although Sat., May 23-Baseball, Armour vs. Galvani may not be gifted with the 43 5 10 33 9 2 prowess to hammer a hit and score a run with one swing of the bat, his fielding performance coupled with a e one or two hit contribution will go a long way towards making the Tues., May 26-Baseball, Armour vs. season a success.

Strong Competition Friday

On Friday of this week Michigan State Normal will make its annual appearance at the home grounds. Although Krafft's teams have enjoyed quite successful campaigns against 0 this team in the past they have always faced stubborn competition.

Michigan State falls in line as a team on par with Western State, Wheaton, and Lake Forest. This fact serves as good evidence that Armour fandom will be given an opportunity to see another feature contest.

Golf Team to Play St. John's of Toledo

St. John's of Toledo will arrive in Chicago tomorrow to clash with the Two single matches were played. Tech golfers at the Evergreen golf course. Armour's team is out to continue their string of victories over the Toledo aggregation. Two years ago they defeated St. John's twice. Last year they were unable to meet so this year they should be able to Streb and Cone represented Delta chalk up two more. Armour will be able to play the return engagement Saturday, May 23.

On Friday, May 15, the golf team the Lutheran team. If past victories have anything to do with it Armour should come out the victor. Captain Weis and Johannisson are back to

repeat their victories this year. Crane College will be the final opponent for the Tech team on the home grounds, the Evergreen Golf All men who are entered are urged | Course, May 16. This promises to be one of the closest contests of the season. Crane has a surprisingly good team this year and our men will have to go some to make the score come out in our favor.

Love, dumbness, and faculty intelvery quickly. If all will cooperate with ligence are the reasons for freshmen these men in every way possible, one flunking out of school, according to week should be sufficient time to a dean at the University of Nebraska.

Tech Nine Plays

Armour's baseballers will at last have one easy game after sojourning under pressure during the greater part of this season when they face the alumni next Monday.

There is some probability that King Simpson, Armour's demon pitching ace of '29, will do the hurling. In case King does decide to shoulder the job, victory may not be attained as easily as is anticipated at present.

Just now, Krafft feels confident that his youngsters will run circles all over the ancient performers, and to prove that the 1931 team is as good as any that he has had he is willing to spot the alumni as many runs as they desire.

Last year's game terminated in an upset as Armour's regulars lost. John Yount, '28, teamed with graduates of '96 and others, turned the regulars down in a seven inning contest.

ni game is that many of the gradu- | Sears-Roebuck Y, little is known of ates, who have abandoned baseball the class of competition to be exfor a number of years are able to pected here. W S. K. D. in Finals Of Ball Tourney

Sigma Kappa Delta won the right to meet Phi Pi Phi for the interfraternity baseball title by defeating Kappa Delta Tau 13 to 0. Only two hits were allowed by C Jeus, the ophits were allowed by E. Jens, the opposing batters usually hitting pop ies or easy grounders. Kappa Delta Tau made a threat at scoring in the 5th inning, when two men reached base on errors, but the next three men failed to connect with the

Sigma Kappa Delta connected heavily with Goldman's pitching, and taking advantage of errors made at critical times, drove in 5 runs before being retired. In the second inning they again pounded the pitcher, and Tuchinsky stepped into the box when it became apparent that Goldman couldn't get out of the hole. It took time for the new pitcher to get warmed up, and four runs crossed the plate. The next three innings were a different story, as Tuchinsky hurled a nice brand of ball, allowing only three scattered hits.

What should have been two singles in the 6th inning turned out to be circuit trips because of a series of errors by the K.D.T.'s. Not until four runs had crossed the plate did the team tighten up. At that, only two putouts were made, a mistake in recording by the umpire retiring the

Tennis Team to Have Two Games This Week

One travelling and one home meet will comprise this week's program versity of Notre Dame will be met

Armour cannot hope for more than "Big Ten." The task of scoring two victories resolves itself into an arduous one, and one victory would well satisfy our netmen.

Although the team has a somewhat pessimistic viewpoint towards their future possibilities it can be favorcessful teams of past years.

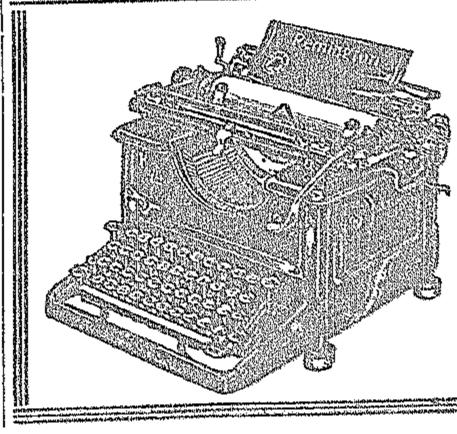

Captain Eddy, W. Schirmer, R. Timmermans, S. Lind, Hendricks and Streb form a well coordinated team which has the capacity to turn in a number of victories.

Following the Loyola meet, A famous last line might be ap- Armour will have Valparaiso, Y. M. propriate this week. "Sir, here is | C. A. College and another meet with Loyola remaining on their schedule.
