

SOPH BASKETEERS VANQUISH SENIOR TEAM 31 TO 13

Interclass Basketball Championship Determined

CHRISTOPH STARS

By the overwhelming score of 31 to 13, the sophomores again won the interclass basketball championship, defeating the seniors for the second time in two years. The final game was played in the school gym last Thursday. Christoph and Rummel were the sophs who also participated in last year's game.

Christoph was the star of the game, making seven baskets and three free throws, while Setterberg led the seniors with three baskets and two free throws.

Few Openings in First Quarter

The game opened with the sophs getting the tipoff, and after a short amount of maneuvering a basket was made by Christoph. The sophs continued with their offensive, but the seniors guarded closely, and few openings were afforded. Lukas stepped into a break to make another basket for the lower classmen, and the quarter ended with the score 4 to 0.

After a short offensive the sophomores again successfully attacked the seniors, Lukas ringing up two points and Casey neatly sidestepping his guards to sink a stepin shot. The end of the half found the seniors at the short end of a 9 to 2 score.

Sophs Run Wild

Most of the scoring was done in the third quarter. In this period Christoph sank four buckets and two free throws, Leichtenberg made a field goal, Casey sank two in succession, Setterberg did likewise and later made a third, and Anderson scored two points. When the smoke of that quarter died away it was found that the sophs were still in the lead, 27 to 10.

The sophs stalled in the fourth quarter. Lukas and Christoph each made a basket, while MacLennan of the seniors sank one, and Setterberg made a free throw. The final score showed the sophomores victors to the tune of 31-13.

BOX SCORE

Sophomores—31		Seniors—13	
	B. F.T. P.		B. F.T. P.

Musical Organization Holds First Meeting

Pi Nu Epsilon, honorary musical fraternity met Friday at two o'clock in the Tau Beta Pi rooms. Philip H. Korrell, president of the organization conducted the meeting.

New ideas for furthering the interest in music at Armour were discussed, especially in regard to the orchestra which is in need of new members. The activities of Stresses and Strains were reported upon to the members.

Membership in the Glee Club has reached 54, the largest enrollment ever attained. In addition to having so many men, it has unusual talent this year.

Schmier Awarded Ratner, Venema

It came to pass that the first and second Schmier-Chemiker awards of the semester were bestowed upon the proud and fittingly-modest recipients last week.

Like shoes and many other things in this world of ours, the Schmier-Chemiker is beginning to come in pairs. This time the lucky couple is Ratner and Venema.

The difference between the big flood and last Tuesday's episode, would, to the unprejudiced observer, seem to be in that the first named took much longer, although the effects on the principals must have been very similar in their degree of devastation.

When some people get a craving for the wide open spaces of water, they join the navy. Others are not forced to this extreme. Ratner belongs to the latter class. His maritime episode was very successful from a sailor's standpoint, and while the comments floating about were not strictly nautical, the inspiration was all there, and for a short time the laboratory resembled the deck of a steamer combating a heavy sea.

Ratner, who is evidently in a position to know, explains that a separatory funnel broke.

The second and heaviest blow fell on the following day.

In this incident the name of Mr. Venema figures most prominently. Wednesday afternoon, the occupants of Senior Chem Laboratory were momentarily misled into believing that an unheralded eclipse of the sun was occurring. Fumes of sulphur trioxide issuing from the crack in the door, however, soon dispelled this theory. Evidently all was not as it should have been in the Industrial Lab.

Those in a position to know claim that a delivery tube had given up under pressure and released this first class imitation of a smoke screen. The efficient ventilating system, however, averted an unpleasant experience by driving the fumes out of one window and into the one right next to it. Thus in two hours it was possible to distinguish the faint outline of various objects in the room.

A. I. E. E. Hears Talk On Electron Tubes

"Electron Tubes in Industry" was the subject of the talk delivered to the members of the A. I. E. E. at their second meeting of the semester held last Friday at 10:30 in D Mission.

A large crowd was present to hear Mr. Ludwigson, representative of the General Electric Co.

He told of the use of vacuum tubes in connection with the photo-electric cell. The photo-electric cell has been used in diverse fields, with purposes varying from the counting of sheets of paper to the sorting of beans. High vacuum tubes have the disadvantage of being able to carry only small currents and the power loss is tremendous. Therefore they can never replace rotating equipment.

A tube containing mercury vapor operates at a small loss in energy, and will carry up to 200 amperes. Such a tube is commercially called a thyatron. They are triodes used in pairs for current rectification. It also is important in regulating the speed of motors, dimming of lights, and in operating spot welding machines.

W. E. Jost, president of the Armour branch, A. I. E. E. announced that the first smoker would be held Dec. 9 at the Phi Kappa Sigma fraternity house.

ALUMNUS IS NAVY AVIATOR

V. V. Poupitch M.E., '29, has successfully completed the required examinations of the U. S. Government for a commission in Aeronautics and will participate in the commencement exercises to be held at March Field, Riverside, California on June 18.

UPPERCLASSMEN FAVOR CHAPEAUX FOR FROSH CLASS

Interest has been aroused in school circles during the past few weeks by the demand for some distinguishing feature for freshmen. The idea is gaining impetus and promises to sweep the school.

The entire upper classes are being canvassed and results up to the present indicate that all are in favor of some type of hat for freshmen.

The idea has spread with such velocity and fervor that the newspapers have taken it up and also indicates that the public is interested in the novelty of the experiment.

The Evening American photographer rushed over to school last Thursday to take pictures of the newly decorated freshmen but, unfortunately, was disappointed.

A large hat concern has offered to make any hat design at a low price if a sufficient number are ordered.

In order to coordinate the efforts of the upper classmen, the three class presidents met and a committee was chosen. W. H. Rudolf appointed J. R. Jackson Jr. to represent the Senior class. The Junior and Sophomore presidents are representatives of their classes. The three men are: J. R. Jackson Jr.—Senior, J. R. Fernbach—Junior, J. L. Lynch—Sophomore.

Each man will choose two members from his class.

The committee will invite J. J. Ahern to future committee meetings in order to bring out the ideas of the freshmen. The committee hopes that many suggestions will be forthcoming from the students.

Business Staff for Engineer Announced

A. R. Viel, Ch. E., '32, will head the business staff of the Engineer for the coming year, it was announced today. The following named men will assist him:

Business Adviser—W. S. Guyot, '32. Circulation Manager—S. A. Mil-evsky, '32.

Advertising Manager—V. J. Min-nick, '32.

Associate Bus. Mgr.—S. A. Wine-gar, '33.

Associate Bus. Advsr.—D. I. White, '32.

Associate Circ. Mgr.—S. Johan-nisson, '33.

Associate Adv. Mgr.—A. M. Ream, '33.

Assistants—R. Marty, C. Robson, E. Lomasney, G. H. Gray, A. Mun-ro, F. C. W. Noeremberg, H. A. Wil-liams, J. Sanchez, R. Patterson, C. N. Cannon, W. Krol, R. McFarland, A. Kapecki, and D. Ziegler.

There is still need for men in the advertising and circulation departments of the magazine, and the business manager urges those interested to come in. This invitation is extended particularly to the freshmen, who still have four years in which to get valuable business experience.

Glee Club Announces Officers for Season

Election of officers for the coming year was held at the last meeting of the Glee Club, Thursday, Oct. 22.

The new officers are: E. W. Carlton, president. E. G. Avery, secretary. G. E. Berglund, business manager.

Practice was also begun on two new selections entitled, "A Song of Ships", and "Jolly Fellows". With the addition of these selections, the number of new pieces totals five. Two of these will probably be sung at the Winter concert in addition to the usual Christmas Carols.

The officers for the past year were: J. E. Walker, president. M. E. Schramm, business manager. E. W. Carlton, secretary.

Tech Rifle Team Annexes Trophy

As the result of a win over Humboldt Park, at Fort Sheridan on Sunday, October 18, the Armour Tech Rifle Team will be presented with the silver cup which is the trophy contested by the two teams. The cup is being engraved by the losers, and the formal presentation will take place in the near future. If Armour wins the cup two more times, it will be a permanent acquisition.

In spite of a poor day, the Armour men shot good scores. A "fish-tailing" wind, which is one that blows fitfully in gusts, caused considerable annoyance to the men unaccustomed to outdoor shooting.

The outdoor meet was the third of the series for last year. Armour gained 14 points which added to the 66 points gained in the first two matches gave Armour a lead of 80 points for the year. The scores for the match follow:

Armour	
1. Wilson	388
2. Patla	388
3. Hackley	388
4. Sachs	381
5. Helmaick	381
Total	1926
6. Hollmann	381
7. Linnell	380
8. Dickey	378

Humboldt Park	
1. Henning	388
2. Stier	383
3. Shows	381
4. Montgomery	381
5. Gschwind	381
Total	1912
6. Boening	380
7. McIntyre	354
Average total: 1926—Average of 385.2 per man.	

Humboldt Park total: 1912—Average of 382.4 per man.

It will be noted that in case of a tie between two men in the total score, the one with the highest score for the 100 yard range gives the man the preference. Thus Wilson was high man, although Patla and Hackley both had the same total as he. The five high scores counted for the team total.

Automobile Accident Endangers Freshmen

Dearborn and Thirty-third streets have been feared for a long time by careful motorists and the automobile accident which occurred Friday at 4:10 P. M., jarring four freshmen, bore out the need of some sort of traffic regulation.

A Chevrolet sedan driven by Vernon Terp E. E. '35 and accompanied by George Sevidis C. E. '35 and John Hazelton F. P. E. '35 was struck while proceeding east on Thirty-third Street. The truck was proceeding north on Dearborn Street and was driven by one of the dark inhabitants of "Little Africa." Terp's car was completely overturned and considerable damage done to the car.

The occupants of the car were unharmed with the exception of Sevidis who suffered a cut on his right hand. Willing hands put the car back to its upright condition and strove to collect the large pieces of glass.

CALENDAR

Tuesday, October 27	
5:00 P. M.	Orchestra Practice, Assembly Hall.
Wednesday, October 28	
4:00 P. M.	Meeting of Candidates for Track Team.
5:00 P. M.	Stresses and Strains practice in Assembly Hall.
Thursday, October 29	
5:00 P. M.	Glee Club Practice in Assembly Hall.
Friday, October 30	
5:00 P. M.	Band Practice in Assembly Hall.
Monday, November 1	
5:00 P. M.	Boxing Practice in Gym.

Dramatic Club To Be Organized

There is a movement under way to bring the theater to Armour. A number of dramatically inclined students, at the suggestion of H. J. Monger, M.E., '33, have hit on the idea of a Dramatic Club.

Immediately following this announcement, five architects with S. H. Morris at their head volunteered to design all the scenery necessary for the contemplated plays. To insure a real theatrical company, Martin Fuhrer, M. E., '33, offered his services as property man.

Professor Hendricks when informed of this new activity gave it his heartiest approval and promised to help in every way.

Anyone who has any dramatic talent is earnestly requested to see either Monger or Professor Hendricks this week. Professor Hendricks can be seen in his office Tuesday or Thursday afternoon.

Several plays are under consideration now, and as soon as a suitable drama can be chosen, the work of selecting a cast will follow. This necessitates complete cooperation from the student body.

If the interest shown by the sponsors of this movement is any indication of the interest of the students, the Dramatical Society at Armour will attract noticeable attention.

Annual "Stampede" On Next Saturday

With popular dance tunes being played by the respective orchestras of Clyde McCoy, Bill Donahue, and Carson Donnelly, this year's "Stampede", as staged by the Order of Builders, promises to excel all of the past three dances which the same organization promoted. The entire fourth floor of the Palmer House has been secured for the occasion which is to be Hallowe'en night, Saturday, October 31.

This plan of dance is a continuation of an idea born four years ago to stage a large and impressive dance for the benefit of the Builders. The Intra-City-Dance commission was organized at that time and promoted a very successful dance which naturally made plans for the following year much easier to form. As in the past the commission will handle the affair with the greatest of ease.

Clyde McCoy, Bill Donahue and Carson Donnelly have become synonymous with syncopation and melody. The Stampede promises to furnish the best of music obtainable.

Dick Meagher and Bill Jost will reserve bids for those who will see there. Because of its central location the Palmer House is greatly desired for dances and the Commission carefully considered all factors concerning the dance. The dance undoubtedly will be well attended.

New Tech Band Still In Need of Musicians

Notwithstanding the lack of a few instruments the Armour band, under the direction of W. Hornberger, is slowly attaining proficiency. Its second appearance before the student body will be at the Armistice assembly next month. At this time it will present several marches and a medley, "Over There", consisting of many well known wartime songs.

Instrumentation is not complete as yet, and any man who plays a band instrument is urged to be present at Friday rehearsals. A snare drum was purchased by the Institute and a drum player, snare or bass is wanted. An urgent need exists for trumpet and French horn or alto horn players. Any person who can perform on the bass horn is requested to report, as there are two bass horns available and but one player. The reed section, including clarinets and saxophones is fairly strong, but more players on these instruments are welcome. A baritone player is also wanted, as there are two baritone horns available and one player.

J. J. AHERN MADE FROSH PRESIDENT BY LARGE MARGIN

Victors Experienced in Holding Class Offices

FACTIONS DIVIDE CLASS

John J. Ahern proved to be the outstanding presidential choice of the freshman class at the election held last Wednesday in Science Hall. He received 110 votes, which defeated Robert V. Smith and Stuart Jacobson, who received 36 and 20 votes respectively.

Because of the large number of candidates, and the political factions into which the freshman class was divided, a very close contest was anticipated. Contrary to expectations, the officers received a large majority of votes over their competitors.

Flanagan Vice-President

The most closely contested office was that of vice-president. Although each of the three candidates were well known in class affairs, Edward Flanagan was elected with 75 votes. Gustav Collatz and Joseph Stehno each received 44 votes.

Bernard Abrams is the secretary, Arthur Skjordahl the treasurer, and Ray Albans the sergeant-at-arms. Each of these offices was uncontested, as there was only one candidate for each of the respective offices.

Wheaton Is Social Chairman

The social chairman of the class is George Wheaton. He won by a great margin, receiving a total of 103 votes against 58 for Howard J. Zibble. Louis Biegler received 114 votes, which elected him Armour Athletic Association representative of the freshman class. Stanley Bernstein, his opponent, received 49 votes.

As several of the officers have seen service in high school at these same positions, the affairs of the class should be taken care of very efficiently.

The entire election and counting of ballots was conducted by a special committee appointed by the chairman of the petition committee.

H. K. N. Representative Goes to Convention

Morton Fagen, president of Delta Chapter of Eta Kappa Nu, national honorary electrical engineering fraternity, is to leave Thursday noon for the twenty-seventh annual convention of the fraternity at Cornell University, Ithaca, N. Y., the home of Kappa Chapter.

Representatives of the western chapters will meet in Chicago, and a special car of the Grand Trunk Railway will take them directly to Ithaca. At the convention, which will continue through Friday and Saturday, general business and changes in rules will be discussed.

In view of the world wide interest which will be centered on Chicago in the year of the Worlds Fair, Delta Chapter will extend an invitation for the 1933 convention to be held in Chicago.

Professor Moreton Is Placement Counselor

Mr. David P. Moreton, Professor of Direct and Alternating Current Machinery, has taken up Professor Richardson's duties as Placement Counselor.

The office may be considered a clearing house for Armour men seeking positions and for employers looking for men to fit in their organizations. This office is located at the north end of the hall second floor main building.

Professor Richardson has been granted a year's leave of absence, and will spend his entire time studying for a doctor's degree at the University of Chicago.

Vol. VIII OCTOBER 27, 1931 No. 6

"No man is justified in doing evil on the ground of expediency."
Theodore Roosevelt,
Born October 27, 1858.

Dramatics? Why Not?

That engineers in general know little and care less about art in its various forms is a statement that expresses more or less accurately the opinion held by the majority of people. That certain engineers, at least, are interested in the more artistic things in life is a statement that a group of Armour students is endeavoring to prove. Another column of this issue contains an article that tells the story of this group and their plans. Briefly, the facts are these.

A rather representative group of students of various courses and classes, with the advice and aid of Professor Hendricks, is enthusiastically engaged in organizing a drama club with the object of producing short plays from time to time. Already a number of students have offered their services in various capacities and it is expected that more applicants will be found when the enterprise becomes more generally known.

Such an organization would bring about a considerable addition to the all-too-meager social life at present in existence at Armour. With the acquisition of a drama club, Armour would rid itself of the dubious distinction of being one of the few schools in the country that has none. Massachusetts Institute of Technology, generally considered the foremost engineering college in the United States, has an excellent dramatic society that presents plays regularly. The majority of engineering schools have similar organizations.

Without doubt, the presentation of a student-acted play at the Freshman Handshake, at a departmental smoker, or at any other similar function would greatly enhance the evening's entertainment and make such gatherings more popular than they are at present.

In accordance with the policy of the Armour Tech News, as re-counted in the first issue of this semester, the paper will give its full support to this new undertaking and will aid it in every way it can. We feel sure that anyone cognizant of the facts will agree that, while the educational opportunities offered at Armour are of the highest quality, those of a social nature may well be improved. Granting, then, that this is the case and that a drama club would tend to bring about an increase in social activities, such an organization deserves the support of the entire school.

Therefore, if you who read this are interested in dramatics, if you have had any experience in that kind of work, if you have any suggestions as to how to go about the organization of such a club, why not get in touch with the men who are already working on this enterprise and offer them your aid? They will be glad to accept any help or advice you may be able to give them. Any new idea has a considerable amount of inertia to overcome in getting started. This can be accomplished only if all those who are interested in the adventure lend a hand and help push.

"The Slipstick"

Cleave to "The Slipstick"; let
the Slapstick fly where it may.

WE GOT THE GUY

Last week's Inquiring Reporter found one he-man FRESHMAN who said that if the Eugenie hats came in vogue at Tech there would not be a BIG ENOUGH man in the ENTIRE SCHOOL to make him don one.

Well, we looked him up and found just how BIG he is, and we think that there are plenty of men big enough to make him WEAR one.

We are just WAITING at present until someone brings one of those hats around, whence we will promptly PUT IT ON this freshman.

And if a Eugenie is not forthcoming, WE will procure one and DONATE it to the cause of this FRESHMAN who says that there is no one in the entire Institute BIG ENOUGH to make him wear one.

*Women's faults are many
Men have only two;
Every single thing they say
And every thing they do.*

While we are on the subject of Eugenie hats and freshmen, let us suggest that the sophomores wear baby bonnets, or wide brimmed sun hats, or, perhaps, something sophomoricated such as berets.

"I've changed my mind."
"Well, does it work any better."

AN ENGINEER??

Friend wife—Why don't you patch that hole in the screen door?
Friend husband—I'm waiting for it to get bigger so the bats can get in. Bats are death on mosquitoes.

Suppose we be so bold as to look into the future as far as Circus Day. After the soft-frosh fight there will be a mixture of green and red shirts as well as a few feathers, felt snatches, and other miscellaneous parts of Empress Eugenies. We could almost guarantee choice bargains in hats and incidentals.

We could have a booth for a salespoint and sell them for quite a bit less than \$1.85.

MIGHT AS WELL

In the first act of my play,—explained the young dramatist,—the scene is laid in a cemetery.

So I see,—said the manager, brutally turning the pages of the manuscript,—and you might as well lay the whole thing there.

And Joe helps along the CAUSE by suggesting that all the frosh be REQUIRED to wear the cute things at the FROSH DANCE.

A brilliant idea, Joe. My secretary will keep a note of all further SUGGESTIONS.

Sportsman (riding to the hunt)—Out of my way, wretch. I'm riding to the hounds.

Hobo—Give us a lift. I'm going to the dogs myself.

And one freshman who was given a chance to AIR HIS OPINION on the subject said that if he were a senior he would COMPEL all freshmen to wear green ones, and if they appeared WITHOUT THEM, they would merit a PADDLING.

Good for you, son, and I hope you have the biggest and the GREENEST one.

Why don't you start a PRO-EUGENIE movement. You'll find plenty of support OUTSIDE of your class.

And then some big HATTER would take the order for 250 green Eugenies, and perhaps open a factory in the vicinity.

Here is the opportunity for some ambitious freshman. Go into the HAT BUSINESS and pay your way through college, for the frosh in following years would also be required to CARRY ON the tradition.

Slubgullion—What made that fellow faint in the drug store?

Spermophile—Oh, he went in, asked for the druggist, and was told that he was in the rear filling a prescription.

—Chemiker.

But of course we would INSIST that they wear the dear little hats in wood shop, forge shop, and in the foundry. The Eugenie and the coal-black cover-alls would make a STUNNING ENSEMBLE. This would be very appropriate for OPEN HOUSE NITE. The visitors would certainly find amusement in the new SPRING CREATION.

Editor—I'll give you \$2 for this anecdote about President Hoover.

Writer—What's the matter. You gave me \$4 for it when it was about President Wilson.

And, by the way, AL would have more room in the CLOAKROOM if all he had to contend with was a bunch of those small hats. Perhaps a decrease in labor at this point could be realized, thus saving the Institute some bucks.

Say, maybe we could get official recognition after all.

And the beloved men of the CLASS OF '35 could then hang one of the green hats on the end of the main building FLAGPOLE and dare the sophs to remove it. BONGINEER.

"None so good as LUCKIES"

"I've tried all cigarettes and there's none so good as LUCKIES. And incidentally I'm careful in my choice of cigarettes. I have to be because of my throat. Put me down as one who always reaches for a LUCKY. It's a real delight to find a Cellophane wrapper that opens without an ice pick."

Jean Harlow

Jean Harlow first set the screen ablaze in "Hell's Angels," the great air film, and she almost stole the show from a fleet of fifty planes. See her "Goldie," a Fox film and Columbia's "Platinum Blonde."

Made of the finest tobaccos —
The Cream of many Crops — LUCKY STRIKE alone offers the throat protection of the exclusive "TOASTING" Process which includes the use of modern Ultra Violet Rays — the process that expels certain harsh, biting irritants naturally present in every tobacco leaf. These expelled irritants are not present in your LUCKY STRIKE. "They're out—so they can't be in!" No wonder LUCKIES are always kind to your throat.

"It's toasted"

Your Throat Protection—against irritation—against cough

And Moisture-Proof Cellophane Keeps that "Toasted" Flavor Ever Fresh

TUNE IN—The Lucky Strike Dance Orchestra, every Tuesday, Thursday and Saturday evening over N. B. C. networks.

*Is Miss Harlow's Statement Paid For?

You may be interested in knowing that not one cent was paid to Miss Harlow to make the above statement. Miss Harlow has been a smoker of LUCKY STRIKE cigarettes for 2 years. We hope the publicity herewith given will be as beneficial to her and to Fox and Columbia, her producers, as her endorsement of LUCKIES is to you and to us.

MOISTURE-PROOF CELLOPHANE Sealed Tight—Ever Right The Unique Humidor Package Zip—And it's open!

See the new notched tab on the top of the package. Hold down one half with your thumb. Tear off the other half. Simple. Quick. Zip! That's all. Unique! Wrapped in dust-proof, moisture-proof, germ-proof Cellophane. Clean, protected, neat, FRESH!—what could be more modern than LUCKIES' improved Humidor package—so easy to open! Ladies—the LUCKY TAB is—your finger nail protection.

REVIEWS

THE LIVES OF A BENGAL LANCER

By Francis Yeats-Brown

"The Lives of a Bengal Lancer" is really an unusual book. In its sense as a biography, it is thrillingly alive; as a tale of travel and lands far away, it is entrancing in its vividness and reality; as a story of adventure and action, it is in a class of its own.

To indicate how an author could treat his subject matter in such a varied manner and still enhance it with the most desirable features of each classification is perhaps best done by an analysis of his method. Yeats-Brown has the power of complete absorption and concentration. When it's polo or pig-sticking, it's that — with plenty of quotation marks, dashes, sharp-bitten words, flying dust, written to the cadence of the beat of horses hoofs. When it's fighting in the Indian hills or the Arabian desert, it's that—yelling men, crash of gunfire, killing, maiming, terror. When it's time to tell of his prison life in Constantinople, we get it—stark misery, privation, disease, filth, heart-rending agonies. And finally, when he tells us of his quest for the meaning of the mystic faith of Yoga, we are led slowly and calmly, step-by-step just as he was, into the realm of the imagination.

So you see the reason for the title, "Lives of a Bengal Lancer." Lives they were, all of them interesting. To me, the most entrancing of them was the last; that of a hard-riding English Major as an Indian mystic. Sounds a bit cock-eyed, doesn't it? Then blame your reviewer for his inability to provide the background that in the book itself makes the apparent incongruity a quite natural step, brought about by strange conditions working on an intelligent and sensitive mind. The author offers as an excuse or apology his desire for recording a Hindu philosophy which the people of all the world need, but from his forceful, really inspired "recording" we see that there is something more. Without doubt it is reverence, convincing and beautiful. He makes us see that it should be.

Yoga, the orderly process of self-realization from without, is no danger new to the western world since the advent of psychoanalysis. This faith, practiced for thousands of years in India, has as its object a mental outreaching to attain the qualities of forbearance, courage, concentration, self-control, and faith. We may be befuddled by the expressions of ideas in the Indian manner, by "individual souls communing with the cosmos," "the writhing self the reflection of the true Self," "the confident serenity of Unity." We may

Social Orchestra To Begin Practice

Another of the musical organizations breaks into full swing when Stresses and Strains holds its first meeting and practice for the year tomorrow afternoon at 5 o'clock in the Assembly Hall. Although many of last year's men will be back, there are vacancies to be filled due to graduation. First year men and new students who play instruments are urged to attend and try for a position in the orchestra. For further particulars, new men may consult Andy Weston, Jimmy Clear, Dave Cornwell and Stan Grundstrom.

The annual battle between the lawyers and engineers at the University of Missouri is called a football game to prevent intervention.

be amused by the physical exercises attendant upon its practice: standing on one's head, rapid and deep breathing until the pulse rises above 140, shakings and writhings. But the aims we certainly can appreciate; there is nothing far-fetched or impractical about them.

"The Lives of a Bengal Lancer" is the sort of thing we all like to read. You may go through it in an hour or two and enjoy some exciting adventure but if you take a few days to do the job a little more carefully, there is going to be one more enthusiastic admirer of this book. As you wish.

Morton Fagen.

P. C. HUNTLY NOW CONDUCTING TEST UPON AUTO TIRES

Professor P. C. Huntly has been busily engaged for the last three months on a tire test at Akron.

The test has been running since the 30th of July. There are six automobiles making the test, namely, a Lincoln, a large Nash, large Chrysler, Hupmobile, small Chrysler, and a small Nash. The cars are run twenty-four hours a day and each car carries a set of five tires, each of a different make. The tests will be conducted until three sets of tires or fifteen tires per car have been worn out.

The 385 miles used as testing ground is in the near vicinity of Akron, Ohio, where driving conditions are found that are on the average found anywhere, both in road conditions and in traffic. There are about twenty-three men working on these tests. Twelve of these men are drivers, who work in twelve hour shifts.

In addition to the road tests, there are also laboratory tests being made on one-hundred sixty tires. These tires are put under complete physical and chemical tests in the laboratory.

Next week the fleet of cars will move on to Phoenix, Arizona where the tests will be continued during the winter months. The course traversed in Arizona will be from Phoenix to

FRATERNITY NOTES

PHI KAPPA SIGMA

Brother "Mac" Larkin, '31, was seriously injured in an automobile accident a week ago. He has the wish of a speedy recovery from every Phi Kap as well as former classmates and instructors.

Brother "Walt" King has left Chicago with his bride of a few months to take a position in Nebraska.

TRIANGLE

Last Saturday saw the holding of the annual Firemans' Ball at the Illinois chapter of Triangle. Several of the fellows went down to attend the affair and reported having a fine time, which also included a football game.

Friday night a smoker and get-together was held at the house. Nearly the whole chapter attended and an enjoyable evening was spent playing cards, pool, and telling stories.

SIGMA ALPHA MU

Sigma Epsilon of Sigma Alpha Mu takes pleasure in announcing the pledging of the following men:

- Bernard Abrams, C.E., '35. Irving Addis, Arch., '35. Stanley Bernstein, C.E., '35. Melvin Grossman, Arch., '35. Isadore Shapiro, Arch., '35.

DELTA TAU DELTA

Last Friday evening, Norman MacLeod, president of the Delta Tau Delta Fraternity, was at the house for dinner and the evening.

Gamma Beta Chapter takes pleasure in announcing the pledging of Ray Kellogg, Arch '35.

We are glad to announce that Robert Cheatham, a Chi Psi architect from North Carolina, is now living at the house.

BETA PSI

Now that rushing is over and conditions are returning to normal, old Demon Homework again rules supreme. In spite of his return, the ping-pong table is in constant use, and we expect to issue a challenge to all houses as soon as the team is organized.

It is with great pleasure that we announce the pledging of R. H. Wittekindt, Ch. E. '35.

Washington State College is said to report that college yells and cigarettes are bringing about a definite lowering of girls' voices.

Sophomore Chemical Alarms Classmates

There wasn't enough excitement in the lives of the sophomore chemicals. Things were going along too smoothly for their buoyant nature. The result—a piping hot fire.

It was shortly after 3 P. M. last Tuesday when Dan Mullane, the first aspirant for a Schmier Chemiker award, started the commotion. The alarm was given with a loud cry of "fire", that penetrated the entire fourth floor. Captain Frank Cerman led his trusty squad to the scene of action and subdued the mighty flames single-handed.

The only casualty of the afternoon was the slightly burned forearm of the aforementioned Mullane, also a broken Glinesky tube which has a price of \$5.00 on it's head.

Let's talk Straight from the Shoulder

WHAT you want in a cigarette is taste. You want mildness... smoothness... and satisfying pleasure when you smoke.

All right then... get this straight.

CHESTERFIELD pays top prices... yes, and a premium for the ripest, mellowest, sweetest-tasting leaf that grows.

The curing and conditioning is done by specialists... men carefully trained in handling these fine tobaccos.

IN BLENDING, also, Chesterfields are different... Instead of merely mixing the tobaccos together... we cross-blend them. It's like making a new and better-tasting kind of tobacco. That's how we get that Chesterfield flavor. Milder... and a more pleasing aroma.

Cigarette paper? Only the purest that's made is good enough for Chesterfield.

PICK UP a package. Note its clean appearance... free from heavy inks. It's moisture-proof, too.

And three big factories at Richmond, Durham and San Francisco—operating under the strictest sanitary standards—rush them fresh to you.

Good... they've got to be good. Because they're made that way. And most important of all... you can taste this goodness in the cigarette. You can tell it in the smoke.

Light up, Mister! Try Chesterfield.

Let the cigarette do its own talking.

You'll get the whole thrilling story, in just two words... "They Satisfy"!

"Yes Sir - Mild yet they Satisfy"

BASKETEERS TO BEGIN PRACTICE NEXT TUESDAY

Six Regulars Return to Squad from Last Season

ROSSING TO LEAD TEAM

The first practice of the regular basketball squad will begin Nov. 3 at the Armour gym. All men expecting to try out for the team should report at the first meeting.

Practice will be held in the Armour Tech gym Tuesday, Wednesday, and Thursday nights for the first two weeks. Monday, Nov. 16, the basketeers will move over to the 8th Regiment Armory gym, and practice sessions will be held every evening from then on. While practicing at the Tech gym the players are requested to bring their own suits.

Jack Owen, Manager

John Owen has been appointed manager of the basketball team for the coming season. All men trying out for assistant manager should make their application to Coach Krafft in writing before Nov. 16.

Armour will present a strong basketball squad this year and will in all probability be even better than last year's aggregation.

Captain H. C. Rossing will lead the team and he will be ably assisted by ex-Capt. Robin (back for the first semester only), Setterberg and Lind, all forwards; Beemsterboer, center; and Rummel, guard.

Guards Will Be Needed

The greatest problem for Coach Krafft is to develop guards as all his regular guards of last season will be missing this year. Therefore Gustafson, Rutkowski and Yuknis will probably have to be replaced by guards built over from the forward material.

The tentative schedule of games for the 1931-1932 season is as follows:

- December 1—Alumni at Armour
- December 3—Open
- December 10—Armour vs. American P. E. College
- December 15—Armour at North Central
- December 17—Crane Jr. College at Armour
- January 5—Open
- January 7—Open
- January 12—"Y" College at Armour
- January 16—Armour at Augustana
- January 21—Wheaton at Armour
- February 5-8—Michigan trip (pending)
- February 13—Armour at "Y" College
- February 17—Armour at Crane
- February 19—Augustana at Armour

Track Squad to Meet Wednesday

The indoor track season will get under way Wednesday, when a meeting of all track aspirants has been scheduled for 4 o'clock. Coach Stagg and Prof. Schommer will speak at this meeting, and equipment will be given out.

Tentative schedules have been arranged with the following schools: North Central, Loyola, Crane Junior College, Chicago Normal, and Lake Forest.

Late particulars concerning the meeting will be posted on the bulletin board.

The Tech indoor track squad is expected to win the majority of the meets this season, for an even better squad than last year will be in the competition.

The first track meet will be the inter-class meet, but the exact time has not been set as yet.

Last year the class of '31 won the meet for their third consecutive year. The sophomores, juniors, and freshmen finished in the order named. George Nelson, a freshman, starred, scoring nine points and breaking the high jump record.

The winners of the first three places in each event will be awarded ribbons and the point winners on the winning aggregation will be given medals.

Seniors and Sophs Are First Winners

The seniors defeated the juniors, and the sophomores beat the freshmen in the first encounter of the interclass basketball tournament held last week.

The seniors entered the game with a rush, so that by the end of the first quarter, each of the seniors had contributed a basket and the score stood 10-0.

In the second quarter, the juniors turned to the defensive and as a result, the seniors made only three more shots count. However, in the third quarter, the juniors went on a scoring spree, which brought the score to 16-12. The seniors staged a rally in the final quarter which netted them six points, and when the final whistle blew the score stood 22-15, in favor of the seniors.

Sophs Win 29-5

Early in the second quarter of the freshman-sophomore basketball game the sophomores crashed through the freshman defense, and from that time until the end of the game a mad orgy of point-making was pursued by the sophs.

The second half was a complete rout with Anderson and Christoph putting in the shots after Pflum and Christoph had taken the ball away from the slipping frosh. Nicolai and Reed were in the game for only a few minutes at the finish, but aided their team by scoring a few more points to make the final score read 29-5 in favor of the sophs, last year's champs.

Gridiron Queries

By Professor John J. Schommer

Editor's Note: Professor John J. Schommer, star player, conference umpire, and leading football authority, will answer through this column any questions on football which are puzzling our readers. Questions may be submitted to the Sports Editor, H. P. Richter, or they may be placed in the Armour Tech News box, which is located in the main building adjacent to the elevator on the first floor.

Question 5. What members of the offensive team are eligible to receive forward passes?

Answer. The men playing at the ends of the line of scrimmage and those playing one yard or more back at the time the ball is passed from the center are eligible to receive forward passes.

Question 6. What members of the defensive team are eligible to intercept forward passes?

Answer. Any member of the defensive team may intercept a forward pass.

Question 7. Team A has the ball and starts an end run. The runner is tackled and the ball is downed at the line of scrimmage. He is released by players of team B whereupon he gets up and runs 40 yards for a touchdown. Should the touchdown be allowed? The referee states that he forgot to blow his whistle.

Answer. The touchdown should not be allowed if any part of the runner's body other than his legs or arms touched the ground while he was in the grasp of an opponent. If he was momentarily stopped by an opponent but not downed according to the conditions stated above, the touchdown would be legal.

Question 8. How far from the goal line is the ball placed when playing for the point after touchdown?

Answer. The ball is placed two yards from the goal line.

Fraternities to Begin Practice

Interfraternity basketball will get under way tonight when the practice schedule begins. It will continue until November 30, each fraternity having one night for practice. The basketball should be obtained from Coach Krafft at noon of the practice day. Practice will be from 4:30 to 6 P. M.

For thirteen years the Phi Pi Phi's have won the title. Altho they are confident of continuing the string of successes, they will be strenuously opposed by the other fraternities. Last year Sigma Kappa Delta nearly defeated them, losing 18-14.

Veteran Swimmers Form Team Nucleus

Since the swimming season has not opened yet for Armour's natators, no definite movements have been made to organize the team except a general meeting, at which the old members and new candidates were welcomed by the new captain, Andy Weston.

The veterans returning for competition are Capt. Weston, Cavanagh, Byanskas, Carlstrom, Thompson, Givyan, Kolve, Davison, Davidson, and Pfeiler. Brockman, another veteran, is out for a few weeks with a twisted ankle obtained in a basketball game.

The end of last season found the team with a .500 average. Weston was high-point man of the season and can be depended upon for the speed distances again this season and three members of the 160 yard relay team, which brought the Tech record down to 1 minute 21 seconds flat, have returned.

TECH SHORTS

Interclass Champs

Last Thursday night, the class of '31 won their second consecutive interclass basketball title by defeating the class of '32 again by a large score, 31-13. Last year they won 23-10. Although we predicted the seniors to win, we still have a .667 average in the six baseball and basketball predictions.

Coach Krafft is kept busy in his spare time umpiring the football and basketball games in the Little Nineteen, Six Six, and the City High School Leagues.

We noticed that the baseball diamond is now being renovated for next spring. The track will also need fixing to get the lumps and bumps out of it.

Wrestling Back Again

Wrestling is again coming to the front in the list of Armour's sports. It was discontinued during the season of 1927-28. All men interested in

this sport should report to Coach Weissman on Monday or Friday nights in the Tech gym.

Applications for the position of manager of the swimming and basketball teams should be turned in to Professor Schommer. Manager's awards and sweaters are given to the men receiving the appointment.

The 1931-32 basketball season will start on Tuesday, December 1, when the alumni have their annual game with Tech's varsity. Last year, the regulars won by a 44-18 score. The Honor "A" Society has their annual banquet at one of the leading hotels right after the game. Membership in the Society is open to seniors and juniors who have won athletic awards.

KEEP KISSABLE

WITH OLD GOLDS

The twenty cigarettes in your package of OLD GOLDS reach you in prime condition, as fresh as twenty cherries just picked from the tree. The finest of moisture-proof Cellophane wrapping insures that.

But OLD GOLDS are not merely fresh; they are refreshingly different. Blended from pure tobacco . . . free of oily, foreign flavorings . . . OLD GOLDS do not taint the breath with lingering odors, and do not discolor the teeth with needless stains.

To be in good taste, as well as for their good taste . . . smoke natural-flavored OLD GOLDS. They'll give you a finer smoke, without any unpleasant after-maths of any kind.

NO "ARTIFICIAL FLAVORS" TO TAINT THE BREATH OR STAIN THE TEETH . . . NOT A COUGH IN A CARLOAD

Wrestling Team Will Be Organized Soon

After several attempts in the past few years at the organization of a wrestling team, a call this year brought out a squad of 25 candidates, who applied to Professor Schommer for recognition. Upon being informed that they would have to prove their sincerity in forming a team, the candidates set out Monday and Friday as practice days and have put all efforts into getting themselves in shape for competition.

All of the candidates have had some experience in wrestling, and the majority of them are champs in their respective divisions.

Professor Schommer put Frank Talaber in charge of the team as temporary manager, and he appointed Arvid Tiensuu as temporary captain.

After the members have organized and shown their caliber, a manager will be appointed, and the team will be allowed to elect a captain and carry out a schedule.

Boxing Squad Ready For Opposing Teams

Boxing is breaking into the limelight again as an important Tech sport.

Coach Weissman is trying out the new men in rebuilding his team, and as there are 35 new candidates, the competition for places on the varsity team will be keen. Of the four veterans returning this season, three are lightweights and the fourth is Sandstrom, captain of the team.

A tournament for the purpose of sounding out the ability of the various candidates will be held in about two weeks. New equipment is being obtained for use of the team. Coach Weissman is attempting to have several professional boxers come to the practice sessions of the team to give the Armour pugs some pointers in this art.
