

JUNIOR INFORMAL PLANS COMPLETED FOR NEXT FRIDAY

Music Furnished by Doug Peppard's Orchestra
SUCCESS IS ASSURED

Just a few days and nights more and the Junior Informal will swing into action. The junior social committee has completed all its preparations, and Ray Pflum the social chairman enthusiastically promises an affair which "will be some dance, and how." No efforts have been spared, and everything is in readiness for the sweet music which will emanate from the orchestra of Doug Peppard and for the pretty girls who will grace the main ballroom of the Illinois Women's Athletic Club.

Doug Is College Trained

It is well known that a good orchestra is one of the prime factors for a successful dance. After a great deal of scouting the committee finally selected Doug Peppard and his Northwestern University Troshadors. Doug is one of the famous company of college educated orchestra leaders. Strangely enough college trained band leaders are so predominant as nationally known entertainers that it seems as if a college education is a requisite for a man to be a successful leader. A surprising number of men at the head of prominent orchestras started playing at fraternity and house dances as the "school jazz band." Probably the fact that they absorbed the collegiate atmosphere accounts for their success.

Was Drum Major at N. U.

Friday night, therefore, the best known middle western collegiate orchestra will play for the Armour Technicians and their "dates." Peppard's orchestra consists of thirteen pieces, featuring five brasses, four saxophones and four rhythmic instruments. They have just come back from Minneapolis, where the orchestra was heard from NSTP and NBC at the Marjorie in Minneapolis. In Chicago the Argosy, the Opera Club, the New Chateau, and in fact the majority of exclusive supper clubs in our own "Windy City" have been played to by Doug Peppard and his musicians.

Knowing that atmosphere as well as good music is essential for the best outcome of a dance such as this, the social committee chose the ballroom where it will be held only after as much deliberation as that attended by the selection of the orchestra. And

(Continued on page 3)

Faculty Club Enjoys Big Christmas Party

Armour was enveloped with a spirit of festivity December 14, when the Faculty Club gave a Christmas party in its new rooms, which had been appropriately decorated for the occasion. Two Christmas trees added their note of festivity, one being placed in the dining room, and the other one in the rooms of the club.

A true Christmas dinner, including turkey and cranberry sauce, was served, after which the Musical Clubs entertained the members of the club. Cards were played, and the evening climaxed by a lecture and demonstration by Doctor Thompson, who discussed the phenomena governing conduction of electricity through gases.

The success of the party was directly due to Professor Moreton, president of the Faculty Club, who devoted much of his time to making it an outstanding affair, and to the dinner committee which was composed of Professors Moreton, Nash, Freud, Spencer, and Peebles.

The party fostered a feeling of fraternalism among the departments, which only a meeting of the different units at such an occasion could foster.

RIFLE TEAM WINS MATCH AGAINST HUMBOLDT PARK

By FRANKLIN W. PAINE

Two points gave the Tech Rifle Team a victory over Humboldt Park last Thursday night by a score of 1334 to 1316. The meet was held at the opponent's range.

Thursday's match gives Armour an almost unbroken lead toward the silver cup, prominent possession of which will be determined by the two remaining matches for 1932. Having won the series for two consecutive years, the home club is looking forward to winning a third, although the deciding match which will be held in the fall will see the absence of four men who are graduates.

Three new men featured in the Humboldt match, and all of them showed promise. Fenstrom, who has been playing regularly in postal

(Continued on page 2)

Einstein to Talk on Economic Situation

On January 21 in Pasadena, the Southern California Student Body Presidents Association will sponsor a discussion on "The World Economic Situation," the featured speaker being Dr. Albert Einstein, the noted scientist. Over 3,000 college men and women will attend the meeting, and the program will be broadcast over a national live-up.

This is the second meeting of its kind to be presented by the Southern California Student Body Presidents Association, the first discussion having been on "World Arrangements." Dr. Albert Einstein was also the principal speaker on this program, although other prominent persons also gave their viewpoints. These included Dr. Charles A. Beard, noted government and American history authority; Dr. Robert A. Millikan, winner of the Nobel Prize; and Dean McHenry, the student president of the University of California at Los Angeles last year. The meeting was so enthusiastically received that another one was planned.

The purpose of these meetings is to present an intelligent answer to the problems of world-wide importance. Although Dr. Einstein is principally a scientist, his influence has extended beyond this sphere; by presenting his reactions to the present international situations, he has helped to stimulate the interest of the American public in international affairs.

NOTICE

Students in the Department of Science may register for next semester with Professor C. E. Paul on Wednesday, Thursday, and Friday, January 25, 26 and 27th, and on Monday and Tuesday, Jan. 30th and 31st between the hours of 9:30 a. m. and 1:00 p. m.

Davies Conducts Work on Nozzle

For the last two weeks, Professor L. E. Davies has been carrying on some experimental work, with a certain type of nozzle, for the Chapman Pneumatic Machinery Company.

These nozzles, which are being developed by Sanford A. Moss, are to be used in the company's lubricators to test their air compressors.

The experiment is being undertaken to determine whether the same coefficient of the large size nozzle, upon which Mr. Moss has been conducting most of his experiments, is applicable to smaller size nozzles. Results of Professor Davies' experiments have shown the contrary to be the case, and there is a distinct decrease in the coefficient as the diameter of the nozzle becomes less than one inch.

Because of the small volume of air flowing through these nozzles, it has been necessary to resort to rather unusual methods of calibration. This is done by connecting a large air-tight tank filled with water to a second air-tight chamber into which air is admitted through the nozzle being calibrated. The water is then drawn from the first tank, caught, and weighed. As this is done, the pressure in the two tanks is held constant by means of properly connected valves. Under these conditions the volume of air passing through the nozzle will be equal to the volume of water displaced, thus giving an accurate measurement of the rate of flow through the nozzle.

TRUSS CLUB INITIATION

The Truss Club announces the formal initiation of Ralph W. Stahl, M. E. '34, on Tuesday, December 20, and the pledging of Loy H. Callen, C. E. '34; Anthony Stachulis, C. E. '34; Carl Lippincott, C. E. '34; and William Nuetzel, C. E. '34.

Beaker to Table Top to Pants as Barnett Wins the Schmier

BY ORVILLE T. BARNETT

It is with bowed and bent (not broken) spirit that your chronicler takes his typewriter in hand and begins his weekly message. Ah, yes, again has the weird shadow of the Schmier Chemiker trophy crossed the path of one of the senior chemists.

The presence of this evil omen was felt by one of the peripatetic ministrant attendants, "Broken Beaker" Barnett (Orville T. in the bulletin), at a very inopportune time. But why attempt to "beat about the bush" when all the facts are available.

This healthy lad (cough, cough) insisted upon extracting some metallic acid from a mess of iron filings by boiling the mixture and filtering. Unfortunately (Remember, I am not prejudiced) the iron filings decided to collect upon the bottom of the beaker which contained nearly a gallon of solution and crack the vessel in a most insidious manner. Here comes the climax—the owner

SENIOR JEWELRY NOW ON DISPLAY IN MAIN BUILDING

At the beginning of the school year, the senior class appointed a number of committees to look after its many needs. Some of these committees have completed their work while others are still busy.

The social committee with W. W. Davies as its chairman, managed to make the senior dance a success. The possibility of a senior banquet has not as yet been decided on, and the question as to whether one will be held or not will be settled at a later time.

The senior jackets around the school show that the jacket committee has been busy. Its work is finished and the sale of the jackets is no longer open.

The jewelry committee has obtained samples of rings and keys, both in silver and gold, which are now on display in the main building, first floor. At present, about fifty pieces have been sold, consisting mostly of gold keys.

The cap and gown committee will not start work until next semester when it will know who is to graduate.

The announcements, according to B. Larson, chairman of the committee, are to be approximately the same as in previous years with the exception of the design which will be a little different.

C. K. Simon, chairman of the photography committee, set last Saturday, Jan. 14, as the deadline for individual pictures. A date for the group pictures for the year will be set some time in the near future.

Chess Club Members Start Beginners Club

Several matters were brought up and discussed at the weekly meeting of the Chess Club on Thursday at 3 o'clock in the Campus Club rooms. The formation of a beginner's class in chess was greeted with enthusiasm by the members, several of whom knew men interested in learning the game of chess. Anyone wanting to learn chess is cordially invited to come up to the rooms set aside in the Campus Club for the use of the Chess Club members. Here they will meet members of the Chess Club who will be glad to teach the new players the game of chess.

The Chess Tournament has been progressing very favorably. Many of the games have already been played off and the results posted on the bulletin board in Main Building.

Robert Loderki, second president of the Chess Club, has taken over the duties of the secretary-treasurer due to the resignation of Barry Kostenko who is unable to devote the necessary time.

NEWS STAFF APPOINTEES FOR NEXT YEAR SELECTED BY PUBLICATION BOARD

Managing Board Consists of N. E. Colburn, Jr., C. W. Clarkson, Jr., H. W. A. Davidson, and R. A. Fleissner

NEW STAFF BEGINS WORK IMMEDIATELY

BY ORVILLE T. BARNETT

At a meeting of the Board of Publications held last Friday appointments for the staff positions of the *Armour Tech News* were approved. Norman E. Colburn was appointed to the position of editor-in-chief. Colburn has worked on the staff of the *News* from his freshman year advancing from a reporter to associate news editor assisting E. E. Eberth.

The new business manager will be Clarence Clarkson who has been assisting Raymond E. Nelson for some time. The managing board of the paper will consist of Raymond A.

Fleissner, the new sports editor, and Harold W. A. Davidson, the new managing editor, as well as the two other new appointees and the three faculty advisers, Professors Hendricks, Colvert, and Grafton.

Davidson will be in complete charge of the editorial department. Working in close conjunction with him will be E. N. Searl, news editor, and E. G. Avery, copy editor. The slipstick will be handled by E. C. Kenner, who has been running the column for the past semester. The other members of this department will be associate editors: R. D. Armstrong, L. J. Beckman, R. L. Ellis, O. P. Freilinger, A. J. Rosen, R. H. Tague, and P. J. Thompson.

New Advertising Manager

In the business department of the newspaper K. M. Hanson will take over the duties of advertising manager assisted by J. Paslawski. There will be two circulation managers in the persons of J. Schroiner and E. A. Svoboda.

The reporters for the coming year will be W. Ahorn, C. R. Bristol, C. Christensen, K. Dunn, A. Hjeltnan, T. F. Jones, B. M. Kostenko, W. P. Krol, J. Land, H. Levin, L. Marcus, E. P. Mozera, W. Scharringhausen, D. O. Schwennson, E. Urback, and P. Waichunas. The assistants in the business department will be G. L. McKibben, F. Noerberg and C. B. Sommer.

These recommendations were all approved by the Board of Publications according to the new system instituted this year. Although it was formerly the custom to announce the appointments of the *Armour Engineer* some time in May, the news of these appointments will be presented in a following issue.

As has been the custom in the past, the senior members will be available for another six months should the new incumbents at any time experience any difficulty. The seniors who are retiring are O. T. Barnett, J. W. Juvinal, R. F. Rycklik, R. E. Nelson, E. E. Eberth, F. W. Paine, W. T. Dunner, H. W. Bodinson, S. H. Morris, E. C. Kubick, H. Menger, H. Fishman, H. F. Becker, M. A. Collick, J. L. Kampwirth, and M. J. Erieman.

New Staff Begins Work

The new staff will take charge of the publication of the *News* commencing with the next issue. Appointments to the Board of Publications will be made some time in May. The new set-up, the mechanics of which will be more clear after a look at the revised masthead, has been designed to aid in a more perfect organization with a close supervision and check upon every detail of the work.

F. P. E. S. to Hear Talk on New Developments

An enlightening lecture on "The Underwriting of the Sprinklered Risk" was delivered by Mr. Hill, an examiner for the Springfield Fire and Marine Insurance Company, to the members of F. P. E. S. last Friday.

At the next meeting January 20, Mr. R. E. Maginnis will speak on the new developments in the service of the A. D. T. system. His lecture will include a display of operating models.

The annual smoker is to be held sometime in March, according to Earl T. Sorenson, president of the F. P. E. S.

Musical Fraternity to Initiate Members

The initiation of Clarkson, Collick, Brennan and Reardon as members of Pi Nu Epsilon, the honorary musical fraternity, will be held tonight at the Beta Psi fraternity house at 7 o'clock. After the ceremonies the members are planning to attend a theatre, and the play decided upon is "The Cat and the Fiddle."

A. I. Ch. E. Hears Talk on Pickling Industry

Mr. Dillman, head of the pickling works of Libby, McNeil and Libby spoke before the A. I. Ch. E. last Friday, January 13, at 10:30 a. m. The speaker was introduced by A. Helmick, president of the A. I. Ch. E.

The differences in the qualities of the various sorts of dill pickles (the name did not originate from his own, the speaker informed his audience) arises from the different proportions of salt and water used in the pickling process. The brine controls the concentration of lactic acid, which is formed in the pickles by a fermentation process which is due to enzymes. According to the speaker it is the enzymes which, after some time, cause the spoiling of pickles. According to others, the lactic acid is the cause of the spoiling.

Will Hold Junior Informal Friday

(Continued from page 1)
 The main ballroom of the Illinois Women's Athletic Club was finally selected for the event. The ballroom is spacious as well as beautiful and can easily accommodate the maximum of 325 couples for which beds have been printed. The affair will be conducted on the table dance style. There will be tables at which various groups may congregate, and an important novelty will be the fact that punch will be served free, absolutely free, at a buffet. The social committee wish it emphasized that they have made the cost of the affair a minimum by eliminating the serving of food at the tables during the progress of the dance.

In MELVILLE BAKER WELLS' eleven-thirty strength class, he suggested that the students put their heads under pressure. Perhaps this is the only way he can bring out the results.

The knack of transforming a balancer set to a super-speed motor was successfully accomplished by HOWARD REICHEL. He made the amazing discovery, that by removing the field circuit of a motor, its speed increases, uniformly accelerating, to infinity.

"When winter comes can spring be far behind?"
 "In the spring a young man's fancy lightly turns to—" **Ask Ed Flanagan!**

Some people are like blottens—they soak up everything, but get it all backwards.
GEORGE GLOS, the Clark Gable of Maywood, was seen with the "belle" of Maloney. In private life, George is an *lee-man*.

Incidentally, for information about red-heads, see "UNCLE" JOE STENO, the ball-pen pitcher of Armour, who can't control his arms, much less his emotions.

Famous last words—A week and a half before finals.

FRANK SMETANA, one of our industrious cheer-leaders, fell asleep three times last Thursday during glee club practice.

Then there's the student who hasn't yet been asked to buy a bid to the Junior Dance. He's been absent for two weeks.

Over the week-end, JOE FERMBACH and WES DUMSER studied up on bridge theory, and it wasn't for homework either. (See either for further information about the girls.)

Those in the know report that the Adams of the Jr. Ch. E. class (Mullane) is extremely infatuated by one said Rosalie especially since receiving a perfumed letter from her daily filled with passionate phrases smothering in words of ardent affection.

MAURICE ERISMAN remarks that the Japs are a smart race—consider how fluently they speak Japanese.

Senior Mechanicals are visiting breweries for purposes of studying design. Or so they say! See Johnson or Buehne—they may need assistants (assistance?)

VAN BAUMAN claims that a light fixture was the cause of the bandage on his head. But we wonder if the aim of one of Teach's students wasn't exceptionally good.

The Steamshovel Goes Frankenstein
 This colyum turns around and bites its originator (poor papa). His center nomenclature is EMORY. The whole thing is Ellsworth Emory Eberth, E. E. We don't think it is so worse but he has kept it a profound secret for 22 years (he claims) so what could we do but publish it.

Fraternity Notes

THETA XI

A good crowd attended the radio dance at the house on Saturday evening, January 14. This was the last house function of the semester, although quite a few are planning to attend the Junior Informal.

Our travelling Secretary, Brother Selsam, paid the house a visit over the week-end.

PHI KAPPA SIGMA

On Sunday the actives and pledges entertained guests at dinner and bridge. Everyone had an exceptionally good time.

Plans are being formulated for an interfraternity ping-pong tournament to be held at the various houses in the near future.

RHO DELTA RHO

The semester's ending will be celebrated by a "radio dance" to be given Saturday evening, February 4.

The Christmas Party proved to be a huge success and a congenial time was had by all present. There was plenty of money present—in the form of phoney manna—and everybody attempted to banish the wobbly croupier, Brother Louis D'Alba. The odds were all against them. A cheery blaze in the fireplace spread its mellow light and radiant heat over the surroundings during the entire affair.

and was the source of an old-fashioned corn pop, with Brother Ira Krawitz as chief popper. Alumnus Sam Milevsky prearranged a hypnotic act with Brother D'Alba and drew many a laugh from the crowd.

Our basketball team lost a tough game to that of Beta Psi fraternity by a score of 17-16. The game was tight throughout and a last minute rally failed by one count to tie the score.

PHI PI PHI

The chapters at Chicago, North-western and Armour will hold their first annual Tri-Chapter Formal Dinner Dance on Saturday evening, Jan. 21, in the main ballroom of the Illinois Women's Athletic Club.

The basketball team put the third and final leg on their fifth straight cup by beating Delta Tau Delta in the final game. The score was 18 to 10.

SIGMA KAPPA DELTA

On Tuesday evening, January 11, Sigma Kappa Delta held its annual election of officers. The following are the men elected to office for the coming year.

- George M. Reed—President.
- Joseph Stahon, Jr.—Vice President.
- Emmett H. Eubank—Treasurer.
- Alexander Kulpan—Recording Secretary.
- Bertel Hanson—Corresponding Secretary.
- Victor B. Cassidy—Social Chairman.

Trackmen Meet Maroons Friday

Friday, January 20, will witness the debut of the Armour track squad in Big Ten circles in dual meets. Another innovation is the setting of the time of the meet for seven-thirty o'clock in the evening. It is expected that the student body and faculty are going to show their approval of this time setting by a great turnout.

Junior Dance Delayed

Even the students who have bought bids to the Junior Dance will have opportunity to see the meet as the time for the beginning of the dance has been postponed until later in the evening. The suggestion has been made that the dance bound students bring their girl friends along to give the University of Chicago coeds some competition, and their home team some support. This suggestion may be followed by the rest of the student body also.

You know the girls are all agog over this track business since the Olympic meets of last summer. So bring your girl friends along, boys, and show them a good time, with economy at a maximum. There is no admittance charge to the Armour games.

PHI PI PHI TEAM WINS FIFTEENTH FRATERNITY TITLE

For fourteen years, now, it has been the custom of Phi Pi Phi to win the interfraternity basketball tournament at Armour; and since a custom is a custom at Armour, they came through the fifteenth year. In so doing they won their fifth consecutive basketball trophy, which goes to the fraternity winning the tourney three years in a row. Next year the fraternity cage teams will be fighting for the first leg on the sixth cup.

The Phi Pi team in their march to the championship defeated Triangle in a very close game 16 to 13; won from the Phi Kaps by a score of 38 to 6; and won the final game with Delta Tau Delta 18 to 10. The box scores of the games follow.

ILLUSTRATION:
 One of Houdini's most spectacular escape feats was performed with a huge milk can filled with water. He invited persons of the audience to bring paddles and lock him into the can. He got into the can, the lid was put on and fastened with several paddles. A screen was placed in front of the can. Amateurs stood by with stop watches and fire arms to save him from drowning after a certain time. About a minute later, the screen was removed, Houdini was seen paddling and slipping—the paddles remaining intact!

EXPLANATION:
 The usual method of escaping from a milk can is as follows: The lid of the can is apparently securely padlocked to the lower portion, but actually this metal band to which the staples are attached is the top of a short inner lining. The performer, after being locked into the can, pushes the lid upward with his head and the short inner lining is forced out of place, permitting his escape. The screen is then removed.

IT'S FUN TO BE FOOLED
...IT'S MORE FUN TO KNOW

What exciting magic there is in cigarette advertising!
 Let's look at one of its greatest illusions...that cigarettes can be mysteriously given superior "FLAVOR."
THE EXPLANATION: Just three factors control the flavor of a cigarette. The addition of artificial flavoring...the blending of various tobaccos...and the quality of the tobaccos themselves. Quality is the most important. Artificial flavoring can never wholly disguise the poor flavor of cheap tobaccos.

The blending of several cheap, raw tobaccos cannot improve the flavor of any of them. A fine cigarette is a cigarette blended from costly, ripe tobaccos.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

This is why the Camel flavor has never been rivaled... why Camels have given more pleasure to more people than any other cigarette ever made.

In more costly tobaccos lies the secret of Camels' delicate "bouquet"...of their rich, cool flavor—of their non-irritating mildness. It's the tobacco that counts.

All the natural goodness of Camel's tobacco is kept fresh and rich for you by the air-tight, welded Humidor Pack. Don't remove it. Its moisture-proof cellophane also protects your Camels from dust and germs. Put a pack in your pocket today.

NO TRICKS

CAMELS

CRANE SWIMMERS CONQUER ARMOUR BY 44-31 SCORE

First Meet of Season Shows Strength in Tech Squad

CHI. NORMAL NEXT FOE

Armour lost the first swimming meet of the year to Crane Junior College by a score of 44 to 31. The team, although it was defeated, showed promising possibilities for the next meets. The squad is stronger than last year's and with practice should be able to offer stiff resistance to its opponents.

The last year's stars of the squad along with several capable freshmen make up the squad this year. The new men who performed well in the meet are Knauss, Burson, Tallafus who are due to make the veterans of the squad extend themselves.

Carlstrom Is Tech High Point Man
Anderson of Crane was the high point man of the meet making a total of 12 points. Carlstrom gathered 9 points to be high point man for Armour.

The new equipment that the swimming team acquired recently was proudly displayed by the men. The suits are of tight fitting glove silk with red woolen zipper jackets to wear over them.

Summaries

100 Yd. Free Style—Won by Anderson, C.; second, Carlstrom, A.; third, Ahern, A. Time, 0:59.6.

100 Yd. Breast Stroke—Won by Knauss, A.; second, Kolve, A.; Marcus, C. Time, 1:17.

220 Yd. Free Style—Won by Christian, C.; second, Burson, A.; third, Tallafus, A. Time, 2:42.5.

160 Yd. Relay—Won by Crane (Mohr, Keenig, Bielienski, Christian); second, Armour (LaForce, Gavan, Ahern, Carlstrom). Time, 1:24.

100 Yd. Back Stroke—Won by Anderson, C.; tied for second, Bernstein, A and Koenig, C. Time, 1:15.

40 Yd. Free Style—Won by Carlstrom, A.; second, Bielienski, C.; third, Mohr, C. Time, 0:21.2.

180 Yd. Medley Relay—Won by Crane (Koenig, Marcus, Anderson); second, Armour (Bernstein, Knauss, Davison).

Fancy Diving—Won by McComville, C.; second, Collins, C.; third, Reed, A.

Tech Varsity Cagers Defeat Alumni Team

Tech, showing the best basketball form of the season, easily defeated the Alumni by a score of 47 to 27. Al Lauchiskis, playing center for the Armour team, was high point man, sinking six baskets and four free throws for a total of sixteen points. Rowing, last year's captain, starred for the Alumni collecting five baskets and two free throws.

The varsity led the Alumni 12-11 at the end of the first half. Coach Kuehn's men exhibited the best basketball playing of the season in the second half, scoring fourteen baskets and seven free throws while holding the Alumni to but sixteen points. The game ended with Armour far in the lead 47 to 27.

TECH SHORTS

By H. F. BECKER
Track Season Opens

This Friday the trackmen, headed by Captain Sademan, will meet the University of Chicago team at the U. of C. Fieldhouse. The meet will start at 7:30 and all students are urged to be present.

Incidentally, after some comment and threats, we retract the nickname of "Snowshoe" with which we dubbed Captain Sademan last week. In fact, after seeing him run, he should be called something else.

The swimming team will engage in its second meet of the season when it meets the Chicago Normal squad this Friday.

Thursday the basketball team will journey to Wheaton to battle them for the first time this season. Two days later they will meet "Y" College on the latter's floor.

The Alumni were beaten, 47 to 27, on January 9 by the Varsity basketball team. Coach Kuehn shifted all the players from their regular positions and they showed up well.

The Phi Psi Phi's won their fifteenth consecutive basketball title by defeating Delta Tau Delta, 18 to 10.

Last Friday the Tech boxers showed some spirited boxing in the annual tournament. There was some good scrapping and two technical knockouts were registered.

FURIOUS FIGHTING FEATURES FINALS OF BOXING MEET

The final matches of the boxing tournament were held before an interested crowd, last Friday at 5 o'clock in the Tech gymnasium. These bouts were an indication of the best boxing material available and also gave Coach Weisman a chance to notice their abilities and weak points.

Intensive organization and training will begin immediately after these bouts in preparation for the coming meets. In the first bout of the evening, in the 125 pound class, Castanes won a decision over Straas in a fast battle. Heavy, wild swinging featured the first round in which Castanes started Straas' nose to bleeding when he landed with hard punches to the face. In the second round the fighting was more cautious, each man seeking an opening for some heavy damage. Castanes' aggressiveness and harder punching finally gave him the decision.

Breh Defeats Suman

The second bout of the evening was in the 135 pound class between Breh and Suman. The first round was fast and furious with both

The swimmers were defeated, 44 to 31, at the Crane pool last Thursday. It was the first meet of the year, and the trackmen vow that they will average this loss. Several freshmen made good times in the contest, good scrapping and two technical knockouts were registered.

parties guilty of wild swinging. The second round was slower with Breh and Suman landing hard blows with a possible advantage going to Breh. Breh had Suman slightly groggy with hard, well placed punches. The decision went to Breh.

In the 145 class Jones won a very close fight over Norris. Cautious fighting featured the first round with fast clever foot-work on the part of Jones. The fighting became still faster with Jones landing the better blows. Norris retaliated with a hard right that sent Jones to the floor for no counts. The third round gave Jones the fight by his quick jabs to the head.

Hough Wins by Technical K. O.

The match between Hough and Phillips was one of the best bouts of the evening. The first round opened fast with some hard and accurate punching that had each contestant reeling back to the ropes more than once. The terrific punching of Hough in the second round had Phillips in such distress that it caused Ex-captain Sandstrom who was refereeing the bouts to raise Hough's hand in token of a technical knockout.

Heavyweight Battle Features K. O.

Balswick defeated Frateschi in the final bout on the program by a technical knockout in the third round.

This bout started out slow with each man feeling out the other. Balswick talked frequently with his opponent's head bobbing back. In the second round Frateschi landed a terrific blow to send Balswick to the floor for a second. Balswick's hard rights to the head finally caused Sandstrom to stop the bout.

"I'm working and Smoking overtime—
hence a *Milder Cigarette*

"WHEN I work hard, I usually smoke more; and when I smoke more, I usually work harder—and that's why I want a cigarette that's milder."

We use in Chesterfield Cigarettes mild, ripe Domestic and Turkish tobaccos which have been aged and re-aged.

These good tobaccos in Chesterfield are used in the right proportions—that's a very important matter.

These good tobaccos in Chesterfield are blended and cross-blended—welded together; that, too, helps to make a milder cigarette with better taste.

THEY'RE MILD—THEY TASTE BETTER
