

HOOVER - HORNER COMBINE LEADS IN STRAW VOTE

Horner Noses Out Zilch By Merely 413 Votes

H. BODINSON ALSO RUNS

Armour's candidates, Jack Gilpin and Stan Livingston, trailed the long list of men on the ballot for president of the United States and governor of Illinois. Balloting was conducted by the *Tech News* with the following results:

- President**
- Hoover—335.
 - Roosevelt—219.
 - Thomas—71.
 - Foster—2.
 - Gilpin—1.
- Governor**
- Horner—414.
 - Small—113.
 - Livingston—3.
 - Bodinson—2.
 - O. Zilch—1.
 - A. Gump—1.

College Voting Varies

Previous to the straw vote, there was some doubt as to how Armour men would vote, but regardless of the results, they do not serve as an indication of the final national election to be held on November 8, 1932. The University of Chicago and Northwestern University conducted similar balloting for the presidency, naming Thomas as their choice. On the other hand, the typical universities of the east chose Roosevelt, while western universities gave Hoover the majority of votes.

It is interesting to note that the popularity and the platform of Armour's candidate for presidency, Jack Gilpin, surpasses that of Foster.

(Continued on page 3)

MUSICAL CLUBS BEING ORGANIZED BY NEW LEADER

All musical organizations are now well under way in the semester's work under the direction of Mr. Erickson.

Stresses and Strains has been devoting considerable of its time to practice for the selections played at the banquet held last Thursday, though regular meetings will commence this week.

The orchestra practiced several numbers previously learned in preparation for future assemblies in which it will participate. A new selection has been chosen, "In a Chinese Garden," and a great amount of time is being devoted to its practice.

Mr. Erickson is still testing the quality of the tones of the various sections of the glee club. The Armour Fight Song was rehearsed in preparation for the banquet.

The quartet and octet, which are to be composed of members of the glee club, met a week ago last Monday, at 5 o'clock. Due to the practice of Stresses and the orchestra, several members were absent, and the real organization was postponed until yesterday.

F. P. E. S. Hears Talk On Fire Prevention

Mr. F. J. Prindle of the Chicago Fire Prevention Bureau spoke before the members of the Fire Protection Engineering Society last Friday morning. The topic presented was "Municipal Phases of Fire Prevention and New Practices of the Chicago Fire Department."

A meeting will be held on Friday, October 28, will bring as speaker, Chief McDonald of the Fire Prevention Committee of A Century of Progress. The topic for this occasion will be "Protection and Fire Prevention at the World's Fair." All students interested are invited to attend.

Elect Buehne Senior Prexy; Koko To Lead Juniors; Armsbury, Ormsby Chosen Soph, Frosh Class Heads; Davies, Pflum, Ahern, Hughes Are Social Chairmen

One of the hardest fought elections ever held at Armour was conducted last Wednesday, when candidates for all offices in the four classes were selected by narrow margins.

Willis Buehne won the senior class presidency by defeating George Helton, his only opponent, two to one. Buehne is a student in mechanical engineering and has won his major letter in baseball.

The vice-presidency went to George Beemsterboer, a civil, in one of the closest decisions in the election. Beemsterboer defeated Ellsworth Elberth, an electrical, by only two votes, the final count being 74 to 72. Beemsterboer will captain the basketball team this year.

Another close race was that for treasurer, Charles Schommer defeating Bradford Larson by four votes. V. J. Galvani was elected secretary; Wilfrid Davies, social chairman; and Edwin Kemper was unanimously selected as sergeant-at-arms, there being no other candidate.

The election for presidency of the junior class was won by Frank Koko of the civil engineering department.

Koko defeated his only opponent, Arthur Oberbeck, by a large majority. As a sophomore, Koko led his class in the annual freshman-sophomore class rush. Last winter he was instrumental in organizing a hockey team at Armour.

A close race was run for the vice-presidency of the class, Joe Baetz, a civil, defeated George Mayer the runner-up by a small margin. Another close contest was run for treasurer, J. Arthur Lauson defeated his closest rival, John Schreiner, by a small margin. Donald Chadwick was an uncontested nomination for secretary.

Raymond Pflum defeated Berthel Peterson for the social chairmanship of the junior class. James Manly won an uncontested election for sergeant-at-arms.

Three athletes vied for the presidency of the sophomore class, Richard Armsbury defeating Frank Talaber by ten votes. John Roberts finished a close third. Armsbury made the Tech tennis team in his freshman year playing in second position. Talaber just won the C. A. U. wrestling

championship, and Roberts was one of the few freshmen to win a major letter last year.

The vice presidency went to J. R. Lang, defeating E. Flanagan and N. Maurer by a large majority. Bernard Abrams was elected secretary; George Wheaton, treasurer; John Ahern, social chairman; and R. Albano, sergeant-at-arms.

The presidential race for the freshman class was another hard fought contest. Five men ran for that office with only twenty-one votes separating the winner from the one who finished last, George W. Ormsby, E. E., a graduate of Hyde Park high school won, and Donald Neal finished second only five votes behind.

Donald C. Harris was elected vice-president by a large majority, and George Browning treasurer. Fred L. Smith won another class race for secretary.

The election for social chairman of the freshman class was uncontested, Murray Hughes being the only man nominated. Joe Lascheber will represent the class in the Armour Tech Athletic Association.

FIRST SOPHOMORE SCHMIER CHOSEN

For some time, the sophomore chemists had been wondering whom to elect and select for membership into their division of the Schmier chemists honorary fraternity. Last Wednesday all the constitutents settled their differences to agree unanimously upon Charles George Thompson as their first representative—their first charter member—in the great and established Order of the Schmier.

Wednesday Thompson demonstrated that no man stood before him in line for the honor. In organic lab, Thompson performed an experiment that wasn't in the books; he showed scientifically that the same water used in the roasting jackets of condensers in wet-and-wet. In the course of the formal distillation procedure the water hose connection decided to come loose—by design or otherwise—and the water made a bull's eye for those of Thompson's neighbors who couldn't jump fast enough, also getting the innocent Professors Bredt and Pincogan in their necks. The professors were much surprised as they had done nothing to Mr. Thompson as yet.

Anyway, with the success of his first independent venture in the realm of science sharing his classmates in the face, and while lower honors were in the making in the hall that was downstairs, the estimable Chemist Thompson modestly received the badge of the jokers at the hands of Professor Freud.

The left wing of the class insists that Healy, Thompson's partner, performed an equal share of the work and deserved a similar recognition.

Beta Omicron Soon To Be at Armour

A group of Armour men is forming a chapter of the Beta Omicron fraternity at the Institute. The signers of the petition consisted of thirteen upper classmen who were selected with appropriate pomp and ceremony by E. E. Nelson, Business Manager of the *News*.

High schools may have their "Clean Life" clubs but we'll smoke and keep clean at the same time with good old Beta Omicron. Initiation ceremonies will be held soon and more shiny fraternity pins will shine forth from many vests—or is it chests? But why tell all?—More anon . . .

CAMPUS CLUB ELECTION

The Campus Club elected the following men last Thursday. A. R. Viel, president; F. W. Noerenberg, vice-president; and L. J. Beckman, publicity man.

E. P. Lomasney continues his term of office as executive secretary and B. M. Kostenko as recording secretary.

FEMINE HAZARD NOW ENDANGERS TECH NEWS STAFF

Last Friday night the *News* was a long time in the making because of a very unusual source of distraction in the person of Mary Collins, sister of the beloved Associate News Editor Norman R. Collins.

The cause of the delay was rather apparent. No longer did the customary irrelevant quips upon the ears of expiring hard workers. The editor ate all his finger nails while trying to settle questions without even cursing out the dumb questioners.

Elberth selected his column, altogether while promising thoroughly to write it at home and bring it to the printer's shop in person. During the time he should have been working on the "Steamshovel," he was very sweetly explaining the why, where, and whether of the paper as now printed.

Fishman popped his left eye back at the fair darsel and it took three reporters, one hard worker, and the associate editor to put it back. Quod Erat Demonstrandum Juvinall says in a scintillating and manly voice, "Tish, tish!"

Salamander Pledges Three Fire Protects

Members of Salamander, honorary Fire Protection Engineering society, met in the Salamander rooms on Monday evening, October 17, for the purpose of pledging. They are pleased to announce the pledging of: E. A. Vanderpoorten, F. P. E. '33; H. Bannasch, F. P. E. '34; and C. A. Cunningham, F. P. E. '34.

The pledges are writing a thesis on the field of work concerning fire protection and insurance which is due in the near future. S. A. Vanderpoorten and H. Bannasch are working in conjunction on a thesis concerning the field of fire protection and the exhibition to be held at the Century of Progress Exposition.

Armour Tech News Calls for Freshmen

A student has written us a note complimenting *The News*. He desires to know if freshmen in their first semester in school are allowed to take part in student activities. In answer to his request, and to inform any of his classmates who may also be in his position, we desire to say that any freshmen who wish to work on the *News* will be given a trial if they come up to the newspaper office.

PI NU EPSILON TO PLEDGE NEW MEN

Pi Nu Epsilon, honorary musical fraternity, has planned several affairs to occur in the near future. First and most prominent of these is the pledging, to take place this week, at which time new men will be taken in. The active members are carefully considering the qualifications of such men eligible and will select only those whom they deem most fitted for the honor.

Included also on the program of this organization are a smoker and two theatre parties which will be held at short intervals so as to combat most effectively the dullness brought on by over-application to academic work.

Carl Clanton, president of Pi Nu Epsilon, is engaged in making a set of bells to augment the instrumentation of the orchestra during the playing of "In a Chinese Garden," a new orchestral selection.

Maiers Talks on Air Conditioning

Mr. M. J. Maiers of the Central Station Institute addressed the Armour branch of the A. I. E. E. on the subject of air conditioning last Friday at 10:30 in the Electricity Lecture room.

Mr. Maiers divided his talk into two parts. In the first part he discussed the various impurities present in air, and in the second he discussed methods of improving, or conditioning, the air. Air is disagreeable because of dust particles, pollen, smoke, or fumes, and also because of an improper degree of humidity.

Air is conditioned by filtering through dry filters, and then by washing, by passing it through a fine spray of water. The humidity is controlled by evaporating water into the air.

When Mr. Maiers had finished, the meeting was adjourned, since there was no business to be discussed.

Engineer Staff Is Busy on New Edition

Members of the editorial staff of the *Armour Engineer*, are now busily engaged in completing the first issue of the recently improved magazine. Jarl T. Sorensen, editor-in-chief, states that the new issue will be a forward step in publications at Armour.

The subject matter of this publication will be of particular interest to engineering students as the leading articles will deal with engineering practice. It is expected that the members of the student body shall contribute to the text of the *Engineer* in greater measure than in the past.

OVER TWO THOUSAND MEN ASSEMBLE AT ARMORY FOR ALUMNI REUNION BANQUET

Schommer Receives First Alumni Service Key; Rossing Honored With Award As Prominent Senior

ANNOUNCE SELECTION OF NEW SCHOOL COLORS

Last Thursday, October 20, Armour's men and alumni from all parts of the country crowded into the Naval Reserve Armory in Grant Park to make the Reunion Banquet the greatest affair of its kind ever to be staged by any college or university in the middle west. An attendance of 2,000 men had previously been expected, but by reliable reports there were actually more than the expected quota present. The alumni and students were seated in the dining hall according to classes, and the faculty marched in a little later and were greeted with loud cheers. The trustees entered next and were greeted by louder cheers, if that were possible.

Absentees Send Telegrams

Many of the men who could not be present at the reunion sent telegrams. Among those were trustee Vincent Bendix, who was in London at the time, and trustee Sterling Merton, also in Europe. Former president Raymond was missed at the banquet. Dr. Raymond is at Grass Lake, Michigan, recuperating from his illness, and could not make the trip. However, the absence of notables was compensated somewhat by the presence of the first student to enroll at Armour "way back

H. HAMLIN WINS MAJESTIC RADIO AT TECH REUNION

A new system of awards to alumni and students was inaugurated at the First Armour Reunion.

The first award was a certificate of merit which was presented by Mr. Harold Munday to Mr. F. G. Fense, E. E. '01 for "Distinguished Achievement in the Field of Astronomy."

Then, a plan to reward the most distinguished student in each class was begun when Harvey C. Rossing, C. E. '32 was given a certificate in recognition of his service in school. The first "Alumni Service Key" was then presented to our "Jawn" Schommer. This key was awarded for his untiring efforts on the behalf of the Alumni Association and the choice was heartily applauded by the student body.

Mr. Charles W. Hills, Jr., received a presentation signed by all the members of the Reunion Committee. This presentation was awarded for his work as chairman of the Reunion Committee.

Prizes Announced

Next, Mr. Munday announced the winners of the various prizes which were drawn from the numbers of the tickets. The grand prize, a Majestic radio, was won by H. Hamlin. There was a slight mix-up due to the presence of two men of this name, but the radio was won by the one who is an electrical class of '32.

Then, the next fifteen prizes were awarded as follows:

- C. R. Johnson, M. E. '34; a pen and pencil set from The Harris Company.
- L. E. Schairer, E. E. '36; six Kopper golf balls from A. Friend.
- Joseph Thomas, E. E. '36; a Segal Safety Razor from A. Friend.

(Continued on page 3)

ARMISTICE ASSEMBLY

As has been the custom in years past, there will be a general assembly on Armistice Day, November 11. This year, the speaker will be General Parker. General Parker is Commander of the Sixth Corps Area, and also has command of the Second Field Army of the United States.

when, Mr. Frederick E. Moskovics, Mr. Moskovics is vice president of the F. H. Levy Co. and former president of the Stutz Motor Corporation.

Awards Given

The chairmanship of the proceedings was shared by Harold W. Munday, Professor Schommer, and James D. Cunningham. Harold Munday started the program after the dinner with the presentation of awards. This is the first time in the history of Armour that any such awards have been given. As a matter of fact, they mark the first step in the enlargement of the educational scope of the Institute and came as a direct result of the Armour Development Plan.

James Gladheim Pease, '01 received the Alumni Association Distinguished Service award for his work in astronomy. He is connected with the Mt. Wilson Observatory in California. Mr. Pease was not present to receive his honor, but his speech of acceptance was delivered by proxy.

The next Distinguished Service award was given to Harvey Cyril Rossing '32 as the most outstanding senior of the last graduating class. Rossing was the first student so honored; next year there will be awards to one man from each of the four classes.

The next presentation was an Alumni Association Service Key to Professor John Schommer. No man, in school or out, is more generally popular than John Schommer. The bedlam which arose at the announcement attested to the fact. The chairman said "no difficulties at all" were encountered in the choice, it being made easy by his outstanding "qualities of fair play, courage, and fearlessness."

The Alumni Reunion committee presented a testimonial to trustee Charles W. Hills Jr. in appreciation of his efforts to make the reunion the great success that it was.

Heads of Committees Make Speeches

The heads of the various trustee committees presented their reports before the 2,000 Armour men. The reports all dealt with organizations which "have been formed," and plans which "have been drawn up," and work that is "being done" in connection with the great Armour Development Plan. In short, a prospectus of the work, past and present, done to make Armour the leading technical school in the country was presented. In the words of Mr. Cunningham, "The plan is a reality without any shadow of doubt."

The Plan

Trustee George W. Rosseter presented a talk on the "Plan" itself.

(Continued on page 3)

A. S. M. E. Members Prepare Lectures

The A. S. M. E. has developed a new policy in their meetings. The society has decided that more good will be given the individual members by having them prepare speeches and give them at the weekly meetings. At the next meeting there will be two student talks given. One of these will be given by Ray DuFour on the "History of Gas Manufacture" and the other by Harold Monger on "The Linotype."

On Friday, October 7, Mr. Erisman, father of the senior mechanical, gave a two-hour lecture on Link Belt Company products. The lecture was illustrated with lantern slides showing the various processes. The talk extended over into the 11:30 class and the excellent excuse for not attending the class added to the general enjoyment of the meeting.

News Straw Vote

The straw vote held by the Armour Tech News brought out some interesting discrepancies along the lines of our national politics. In the national campaign things of interest to the political analyst were made clear, while the state campaign did not show these same results due to the difference in character of the men running.

The fact that Hoover won by a good margin shows the trend of thinking of a highly trained group of intelligent men whose life work will be closely allied with conservatism. The conservative voters in the field of industry are choosing Hoover for their candidate in large numbers. Industrial leaders of the type exemplified by Henry Ford are urging the return of the Republican party to lead our national affairs. It is only natural that engineering students who are looking forward to positions in industry should vote as do the industrialists.

On the campuses of both the University of Chicago and Northwestern University a large plurality was rolled up for Norman Thomas, the Socialist candidate. At Indiana where there is no Socialist organization the sentiment is running decidedly Republican and Democratic even as it did at Armour. The aims and ideals of the Socialist party seem to find fertile ground in the "arts and lets" schools while the engineering schools lean towards the established parties.

Whether the Armour men vote for Hoover or Roosevelt is not the concern of this editorial. But whether or not those who are so qualified do vote is decidedly the problem involved. It is our duty to vote for the candidate that we feel is beyond all doubt in our mind the best man. In order to vote intelligently it will be necessary for us to familiarize ourselves with both the candidates and their platforms. Not much time remains, and so we must seize upon every opportunity that presents itself to us to learn about our candidates during the coming two weeks.

O. T. B.

"The Slipstick"

Cleave to "The Slipstick"; let the Slipstick fly where it may.

We have sold the SLIPSTICK down the river. In other words a new columnist is about to take up the burden. That is if we can chain him to the job. He has successfully eluded us for several weeks now. HERE'S TO BIGGER AND BETTER SLIPSTICKS.

Speaking of bigger and better slipsticks Stan Livingstone had one in the boot store that was twenty inches long. And selling for a mere \$75.00.

A merchant closed his store for remodeling and over the front door he hung this sign:
"We are not transacting business this week as usual."

A scientist states that the main cause of seasickness is the motion of the ship. It sounds reasonable.

Jaywalker: "Many people are struck by autos in alighting from the street cars."
Billboard Expert: "Well, yes, but those people have paid their fares. It's the running over of people who are waiting to get on the cars that makes me mad."

Prof. Doubt—"What is the mechanical advantage in having a pump with a long handle?"
Avery—"So's you can have someone help you pump."

A sick suffering sophomore wistfully wails: "What is a word and why? What is work, is work wait?—and why work?"

"I take a cold shower every morning."
"Take one today!"
"No. There was no hot water."

FICTION

Foreigner: "What is your name?"
Foreigner: "Chwitzziska."
Foreigner: "I don't quite understand. Will you repeat it?"
Foreigner: "Chwitzziska!"
Foreigner: "I am very sorry, my friend, that I cannot understand you. The name sounded like Chwitzziska to me."

A Belleville man answered an advertisement offering a device to keep down gas bills, and received a paper weight, by return mail.—Belleville Telescope.

Speaking of dentists, they have the larger cavities to be filled by the professors!

Probably London
Maxine—"What kind of a fellow is he?"
Lucille—"Well, when we were together last night the lights went out and he spent the rest of the evening repainting the face."

"Now I've got you in my grip," said the villain as he threw in a tube of toothpaste.

THESE STURDY ENGINEERS

"You going to eat?"
"Yes, where'll we go?"
"Oh, let's eat up the street."

"What book you got dere, Einstein?"
"Do Las' Days of Pompeii."
"What? Pompeii dead? What did he die ob?"
"Ah ain't she but Ah thinks it wuz some kind ob' traption."

WEAKLY DUMBBELL POEM NO. 6

Breathes there a man with soul so dead
Who to himself hath never said
As he stubbed his toe on the end of a bed.
ceeXhel—4** 1!

A college graduate is a genius who had a chance to get an education.

This lesson is for the contract beginner. South has five aces but has to leave the game in two minutes. West bids three no trump on reading the hands of his partner's cards (all deuces and treys). Northwest has a nail in his shoe, hay fever, and is getting hungry. East doubles his partner's bid and lays his six-shooter on the table. What will South lead if libelizing is allowed, encouraged, and each player provided with one? Each player has two extra decks, and deuces and higher cards are wild.

Foolish Questions

If flour costs eleven dollars and a half per barrel how much does a nickel loaf of bread cost?

A Friendly Enemy

Irate Father: "I'll teach you to kiss my daughter!"

QUESTION

Did you ever try to spell RENTNER backwards?

Teacher: "How old would a person be who was born in 1890?"
Kostenko: "Man or woman?"

Thanxalot for all the contributions. If yours didn't get printed—just keep on trying.

DIAMOND.

Movie Notes

"The Big Broadcast," an all-star radio comedy, on the screen of the Chicago Theater.

"The Big Broadcast" has in its cast, several familiar names including Bing Crosby, Kate Smith, Burns & Allen, Mills Brothers, Boswell Sisters Arthur Tracy (the Street Singer), Vincent Lopez and his orchestra and Cab Calloway and his orchestra. Stuart Erwin, Leila Hyams and Sharon Lynne, Hollywood favorites, also play active parts in "The Big Broadcast."

"The Big Broadcast" is the story of Erwin's purchase of a radio station, at behest of Miss Hyams, who has jilted him and fallen for Crosby, and wants Erwin to give Bing a job. Erwin complies, with results as amusing as they are romantic.

"Payment Deferred," stage play of last year, can be seen in screen form at the Oriental Theater.

Charles Laughton, who played "The Devil and the Deep," has the same role he had on the stage—the role of the poor banker who suddenly acquired riches through a crime which almost drives him to desperation.

His knowledge of dramatics and his ability to present them on the screen affords theater audiences the opportunity to watch emotional acting rarely seen on the screen.

Assisting Charles Laughton in "Payment Deferred" is a cast, which includes Maureen O'Sullivan, Verne Tennant, Dorothy Peterson, Ray Milland and many others portraying important parts.

Joan Crawford is starring in "Rain," which had its mid-western premiere at the United Artists Theater last Friday.

The entire picture was filmed on the Isthmus of Catalina Island, where the company remained for

INSTRUCTIONS FOR FIRE DRILL

Fire Drills are now required in all schools and colleges. The ultimate penalty for their non-observance is the closing of the buildings. On the sounding of a fire signal the buildings must be vacated at once.

The fire alarm is a prolonged blast of the siren in all buildings. On hearing the alarm, vacate the buildings at once.

"Safety First" is most important, and therefore all should remember to proceed as follows when vacating the buildings:

1. From Main Building, cross the street to the sidewalk on the east side of Federal Street.
2. From Mission Building, remain on sidewalk on the south side of 33rd Street and proceed some distance east of the entrance.
3. From Machinery Hall, remain on the sidewalk on the north side of 33rd Street and proceed some distance west of the entrance.
4. From Chapin Hall, remain on the sidewalk on the east side of Federal Street and proceed some distance north of the entrance.

The above rules are necessary in order to avoid interference with the operations of the fire department.

Your full cooperation in the above duties will be deeply appreciated.

JOHN G. PENN,
Dean of Engineering.

DEBATING CLUB ARGUES CAUSES FOR DEPRESSION

Last Friday, the debating club which is conducted by Dr. Scherger held its third weekly meeting. Several speakers presented their views on the causes of the present depression. This topic provides ample material for a lively and interesting discussion. The members are given an opportunity to voice their own criticism and opinion on the speeches and the speakers. Dr. Scherger is well pleased with the enthusiasm and interest shown by the class.

At the next meeting three members will present their speeches on the remedies for depression. Dr. Scherger hopes that those students who couldn't attend the class because of other meetings will be present at the next class.

The debating club is something new at Armour, being in existence only a short time and the response by the student body is very encouraging.

You don't Need to Pay fancy Prices for Correct Stationery

50% Bigger THE NEW "450 PACKAGE"

You can't buy any stationery at any price better suited to your informal correspondence than the new "450 Package." It is correct note sheet size, 6"x7". The quality is actually better than found in many boxes of high-priced stationery.

Give American Stationery for Christmas. It's a better gift than ever this year. Make up your list now and have your Christmas shopping done—early, economically and thoughtfully.

THE AMERICAN STATIONERY CO.
Originator & World's Largest Manufacturer of Printed Note Paper
700 PARK AVENUE
PERU, IND.

THIS note paper is correct for informal correspondence. We have supplied it for 18 years to many of America's most prominent families. It has been a favorite also among college men and women.

With the introduction of the new "450 Package" the cost of this fine note paper is made lower than ever. It actually costs less than cheap stationery.

It's the same style note paper we have sold for 18 years—same printed name and address—same prompt delivery—same price. But the quantity is 50% greater!

Send one dollar (\$1.10 west of Denver and outside of U. S.) and get one of the biggest bargains in fine merchandise offered in America. Your package printed and on its way to you within 3 days of receipt of your order. No agents or dealers. Sold by mail only. Absolute satisfaction guaranteed.

REUNION BANQUET STAGED THURSDAY AT NAVAL ARMORY

(Continued from page 1)

Upper classmen already know of the plan. New students may not know. The plan is essentially simple, consisting of the binding together into a cooperative system of Armour Institute, its alumni, and the industries of the middle west which require engineers as employees. It is a producer — product — consumer combination which means satisfaction for all three elements. While the necessity of such a combination seems almost fundamental, no such system now exists, with the possible exception of the University of Pittsburgh and its Mellon Institute which operates on a somewhat similar basis. The details of the plan involve the publicizing of our school, the creation of the new Department of Science, the formulation of an educational policy, and the formation of a personnel and placement service second to none in the country. A more precise account of the plan may be found in the library where there is literature totaling 300 pages.

Mr. Rossetter said the plan meant for Armour a new location, new buildings, a campus with "grass", and possibly a football team as a tidbit for Schommer. Professor Schommer in a previous speech likened the faculty, students, trustees, and alumni of Armour to a football team. The goal line is a "new" Armour Institute and a touchdown is inevitable.

Name to Be Kept

Morris W. Lee '29 reported on the findings of the name committee. After a thorough investigation, and in response to popular sentiment, it was decided to retain the name "Armour Institute of Technology" for all time. As to the school colors, the committee chose red, black and gold. The design of a seal was also mentioned, and the one seen at the back of the speakers' platform represents the first design. It will be developed further in the future.

The great success of the reunion banquet was fostered by the aid given the reunion committee by several organizations. The loud speaker system was installed through the courtesy of Lawrence T. King of the Overado Corporation, St. Charles, Illinois. The Western Electric Company, The Bell Telephone Company, Albert Wilds '31, and of course the architects, who did such a good job of decorating, all gave their efforts in the preparations for the affair. The armory, itself, was secured through the aid of John V. Lizars '29.

In the last analysis, however, the real credit for everything must go to the reunion "committee of 5407", and George W. Hills and Harold W. Munday who directed the way to a climax.

ARX NEWS

This column was written at the Armour Reunion Banquet. And what a banquet this one was, on the whole school knows. It was no fun writing copy between the tomato juice and Mr. Erwin Schwab.

By the time we went home we were convinced that in the morning or at least real quick, we'd find a brand new home for the architects with nice clean drawing boards. Well anyway here's hoping we get some new boards soon.

The Seniors are charting on their synagogues, and it's day and night work over the boards for the boys.

The Juniors are calling on all of their nurses these days. The motive... A Sanatorium cottage is the current class "B" project.

The bulk of the decorations at the Armory was executed by the senior archs, under the able supervision of Al Mell and Al DeLong, both of '31.

The Grab-Bag platform of the Senior class went through 100 percent. Bill Davies was elected social chairman while Chuck Sommer will handle the pesos.

In the Junior Specs. class, Mr. Willmans stated that everything com-

L. P. Farney, Ch. E. '36, a heavy wool sweater from H. L. Johnson.

Name unknown, (ticket number 3941), P. P. E., an Engineering Handbook from Mr. Thompson of McGraw-Hill Company.

Robert Warner, E. E. '36, a Precision set of drawing instruments from the Chicago Blue Print Company.

Hoover, Horner Win In News Straw Vote

(Continued from page 1)

ten, a national candidate, as far as the Armour student body is concerned.

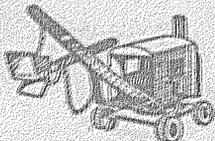

Zelig Lays Popularity

The votes accumulated by Hoover, Democratic candidate for governor, give an impression of a one sided race. Previous assumptions were that Stan Livingston would surpass Small in votes, however, the results seem to indicate that Stan had a platform composed largely of disparages.

For some unknown reason, Oscar Zelig is rapidly losing his prestige on the campus. Having taken first place in the popularity contest sponsored by the *Cyber* last year and then finishing last on the straw ballot, we begin to wonder what will happen at his next public appearance.

Comparing election figures and registration total, a hundred and fifty failed to vote. Apparently they were too young.

THE STEAM SHOVEL

And coffee is served in the chemical laboratory in between hours. The usual nominal fee will be charged.

The civils either have cheap washes or else somebody's wrong. The last observation of these was two and three-quarter hours ahead.

Speaking of absent minded professors, DAVE MORETON forgot to come to his eleven-thirty class until twelve o'clock.

And to add to the chaos, Don Richardson tried to repeat his sophomore juice lecture in the juniors.

We wonder in the blond of the Midway Rifle Club has warped AL HEELMUCK into joining her forces.

Armour's coed mysteriously received a note in her chemistry locker. Fast workers those Armourites.

The black maria (to those who don't understand, paddy wagon) paid our alma mater a visit. GLEN PEN-EL was wise enough to hide in the book store.

Dick Harwood has been kindly requested not to partake of food in his economics class. As special information to such students, Armour has a lunch room.

ing into the architect's office should be dated. The class is still wondering how broadly this can be interpreted.

Fraternity Notes

PHI KAPPA SIGMA

The members of the Alpha Xi chapter, who were in Chicago for the Purdue-Northwestern game, gave a dance at the Inter-Fraternity Club last Saturday night. Many of the fellows from our chapter were there and enjoyed themselves greatly.

There will be a Radio dance at the home on Saturday evening, Oct. 29. Bob Van Dyke, our Social Chairman, is making the plans and assures us a good time.

A ping-pong tournament is in progress among the fellows to determine who will make up the team, to play a match with Sigma Kappa Delta. This match will be held sometime this week. Any other houses who would like a match with us should see Johnny Walker.

THETA XI

Alpha Gamma of Theta Xi takes pleasure in announcing the pledging of E. P. Nelson, M.E., '34, and C. A. Parsons, M.E., '36.

The annual Halloween party has been set for Saturday evening, November 5. As usual the fellows from Theta chapter at Purdue chapter will attend as well as many from Alpha Kappa chapter at Northwestern.

The fellows who attended the Illinois Homecoming report a very good time. Plans are all made for the formal

installation of Alpha Kappa chapter at Northwestern. This is to take place at the Evanston Masonic Temple on Saturday, Oct. 29.

DELTA TAU DELTA

Gamma Beta of Delta Tau Delta announces with pleasure the pledging of J. C. Trayner, P.P.E., '36.

Brother Marshall Beal was in town during the last week-end and Brothers Hills, Bradley, Prebensen, and Erickson visited the shelter during the week.

We are glad to state that the actives and pledges were present one hundred percent at the Alumni banquet. Our senior architects lent able assistance in the decoration of the hall.

SIGMA ALPHA MU

Sigma Epsilon of Sigma Alpha Mu is pleased to announce the pledging of Julius Frank, E.E., '36.

A large number of alumni gathered under the crest after the banquet to swap a goodly number of stories.

Note Rosen and Al Averbach were looking quite sporty with their blue ties and shirts which had nothing to do with the fact that the former did some of the decorations for the "Latin Quarter" at the Architects' Ball.

BETA PSI

Last Friday copies of the Lamp were distributed to all members. The

Beta chapter section naturally attracted most interest.

A pledge meeting was held last night. A good time was had by all, anyway by all actives.

RHO DELTA RHO

All our members are agreed that the recent Alumni Reunion was one of the most successful affairs ever held in the history of Armour Institute. The fraternity attended the affair in full force.

Among the alumni members present were Brother Sid Schwartz who journeyed from Madison, Wisconsin for the occasion, and Brother Al Weisberg. Al is the latest member to fall into the holy bonds of matrimony, his wife being the former Theresa Herbert. After their marriage on July 17, they spent three months of their honeymoon visiting many European countries.

Athletic activities for this year will be under the direction of Brother Mill Heller. He has announced that basketball practice will begin the first of next month.

TRIANGLE

At the active meeting last week, Brother Bodinson was elected chapter editor and corresponding secretary. Brother Oberbeck was appointed social chairman to succeed the new editor.

Lew Allaire '27 came in from Iowa for the Reunion Banquet. Congratulations are in order to Brother Harold Munday for his work in organizing the Reunion, also for Brother Harve Rossing '32 for being chosen the honor student of last year's seniors.

SIGMA KAPPA DELTA

At the Grand Armour Reunion Banquet there was a turnout of approximately seventy alumni members of Sigma Kappa Delta. After the banquet a short meeting was held in the Radio Drill Room.

The house is at the present undergoing minor alterations. Pledge William H. Krause is at present staying at the house.

66 "What on earth are you up to now?"

"FINDING things out, smarty! I thought I'd examine the tobacco in a cigarette.

"Look here...this is Chesterfield tobacco. Notice its lighter color...you don't see any dark heavy types, do you? I guess that's why Chesterfields are milder.

"I'm told that uniformly lighter color is due to cross-blending. It sort of welds all the tobaccos into one.

"And here's something else. Notice that these long shreds are all cut the same width. It stands to reason they burn smoother and cooler.

"I don't pretend to be an expert but it looks to me as if they make Chesterfields right.

"Here, light one. That's the best test after all. They Satisfy."

The Cigarette that's MILDER and TASTES BETTER

Chesterfield

TECH BASKETBALL TEAM ANNOUNCES YEAR'S SCHEDULE

To Have New Uniforms For the Coming Season

BEGIN PRACTICE SOON

With the change of the Tech colors, the basketball team will profit to the extent of new suits. They will be a combination of all three new colors, the shirts red with black letters, and black pants with gold striping.

Initial practice for the basketball squad will begin on or about November 1 after the interclass and interfraternity basketball series will be out of the way. Coach Krafft made the call for candidates for the position of assistant manager of the basketball team last week, and all men who wish to try out for the job should send in applications in the near future.

Schedule Nearly Complete

The schedule for the coming season is nearly completed, there being only one open date. Coach Krafft and Manager I. C. Johnson are attempting to arrange a game with either the University of Chicago or with DePaul University for that date. Of the twelve games regularly scheduled to date, just one half of these will be played on the home floor. This will give the Armour rosters plenty of chances to see the varsity team in action. The schedule for the coming season is as follows:

- Dec. 7—Open.
- Dec. 10—Armour at North Central.
- Dec. 13—Y College at Armour.
- Dec. 15—Crane College at Armour.
- Jan. 6—North Central at Armour.
- Jan. 12—Michigan State Normal at Armour.
- Jan. 19—Armour at Wheaton College.
- Jan. 21—Armour at Y College.
- Feb. 3—Armour at Michigan State Normal.
- Feb. 4—Armour at Detroit University.
- Feb. 8—Wheaton at Armour.
- Feb. 11—Armour at Crane College.
- Feb. 21—Chicago Normal at Armour.

As can be seen from the schedule, the Tech team will travel over the week-end of February 3 to play the annual games with Michigan State Normal and with Detroit University. As a whole the squad will have a tough schedule to face during the coming season.

Swimming Practice Begins for Tech Men

Now is the time for Armour men who like swimming to come out and practice for the Tech team. Practice can be held any day at the University of Chicago pool. There is ample time for the regulars and new candidates to get in shape for the coming season, for Capt. Carlstrom announced that there are no meets scheduled until the first part of December.

TECH SHORTS

Today the seniors and juniors meet in the first game of the interclass basketball series. The fresh and sophs will battle it out tomorrow and the winners of these preliminary tilts will play for the championship of the school. All games will start on or before five o'clock and should prove to be good.

We will make no predictions as to the outcome of the interclass games this week. The reason is the dope upset in the interclass baseball series of two weeks ago.

Speaking of baseball, Archie Evans '35, just received his award from Coach Krafft for batting over .350 last season. He was the only man to perform that feat, his average being .355. The fellows must have appreciated the fact that the depression affected Coach Krafft also.

Applications for assistant basketball manager should be turned in by interested juniors to Coach Krafft before November 10.

The basketball team is going to get new uniforms for the coming season involving the new school colors, red, gold and black. The shirts will be red with black letters and the pants black with gold trimmings.

The third and fourth rounds of the tennis tournament should be played before Saturday, October 29. Some of the men defeated their matches to finish up the first round by last Saturday.

The Varsity basketball schedule has been made up almost completely and practice will begin about November 1.

The boxers and wrestlers are in summer practice for the tournament to be held after the Thanksgiving holidays.

Trench football is becoming more and more popular every day, and not a day passes without at least one game in progress on Ogden Field. There are about six footballs in use by the various groups who play in their spare time.

Evans Receives Baseball Award

Archie Evans '35, received a gold baseball charm last week, an annual award given by Coach Krafft to the baseball batsman ending the season with a batting average of .350 or better. Although five men received the award the previous year, Evans was the only player to bat above the necessary percentage in the 1932 season.

The award, a beautiful baseball with a black A adorning the front together with engraved data, has been a personal gift from Coach Krafft to .350 hitters for the past six years. He was afraid that the men were rather easy on him this year.

TECH WRESTLERS, BOXERS PRACTICE FOR TOURNAMENT

With the rapid approach of Thanksgiving heralding the annual boxing tournament at Armour, the men in training have renewed their semi-weekly workouts with redoubled vigor. Ably piloted by Captain L. McDonald, the squad of forty men has been putting in two nights a week—Tuesdays and Fridays—in the process of getting in shape and learning the important points of boxing technique.

One can safely predict a successful season for the Tech boxing squad because four veterans of last year's team have returned. They are Captain L. McDonald, L. Marcus, J. Schaville, and W. Behmer. Besides these dependable there are several more men who were out with the team last year but did not get a letter.

A great number of the new men who are out for the team have also had previous experience, so that all in all about two-thirds of the team has seen action. Some of the new men have come out this year for the express purpose of learning how to box. The intense interest shown has been highly satisfactory to the coach, and it is helping to create a greater interest in boxing and wrestling throughout Armour.

The preliminary bouts of the tournament will be started immediately after Thanksgiving. This tourney is held in the gymnasium and is open to all who wish to enter. Watch the bulletin board for further particulars. There will be one innovation this year, because of the large number of bouts, the time of the bouts will be reduced from two minutes to one and one-half minutes.

Coach Weissman is in charge of the boxing tournament and Frank Talaber is in charge of the wrestling tournament. They have announced that the finals of each tournament will be staged at the same time.

Armour Man Is New Middleweight Champ

Armour Tech now has a representative in the amateur ranks of the C. A. A. U. wrestlers. Frank Talaber '35, the new middleweight champion, successfully wrestled the title from Van Herick, the ex-champ on Monday, October 7.

Three years ago, Talaber and Herick met in a similar match for the championship of the 160 pound division. The latter won the crown on a decision and has held it for the past three years. However, he was forced to defend his title by the C. A. A. U. commissioners last Monday at the Marigold Gardens on an amateur card of boxing and wrestling bouts. His opponent again was Frank Talaber, but the result of the match was a different story. After eleven minutes of the scheduled twelve minutes had passed, Talaber pinned the champion with a crotch, half-nelson and body slam. The crown now belongs to him to hold and successfully defend.

ately after Thanksgiving. This tourney is held in the gymnasium and is open to all who wish to enter. Watch the bulletin board for further particulars. There will be one innovation this year, because of the large number of bouts, the time of the bouts will be reduced from two minutes to one and one-half minutes.

Coach Weissman is in charge of the boxing tournament and Frank Talaber is in charge of the wrestling tournament. They have announced that the finals of each tournament will be staged at the same time.

TEAMS READY TO COMMENCE PLAY IN CAGE TOURNEY

Sophomore and freshman basketball teams meet Wednesday, October 20 to decide who will play the winner of the Senior-Junior game, which will be played tonight. Due to a large turnout, and to the talent to be seen on the freshman squad they are confident of victory. The members who are most likely to see action are Laschober, captain, Malinowski, Concolino, Traynor, Quadee, Stone, Sramek, Warner, Dworsky, manager.

The freshman opposition consists of a squad picked from twenty aspirants. Captain LePodus is to have Biegler, Lauchiskis, Lyford, Adamec, O'Connor, Armsbury, Levy, Rosenthal, Smith, and Uzunnis to call on to stop the freshmen. Captain LePodus is hopeful of knocking the freshmen loose of the confidence they obtained in their successful baseball campaign.

Tonight the seniors and juniors will clash in the first game of the interclass basketball series at five o'clock in the gym. The game should be good, as both teams have very good material, and interclass spirit will prevail.

Golf Tournament in First Round

The eight qualifiers in the annual golf tournament for the 1932 season have engaged in only three matches to date. This slow start has been partly due to the disappointing turnout for the tournament and indifferent weather conditions. The small turnout could be attributed to the unexpected absence of the past season's promising material and few new men.

The eight qualifiers were paired and to date three of the four pairings have been played. Although the players are handicapped by awkward schedules, and unreliable weather together with the hazards of the Evergreen Golf course, 92nd street and Western avenue, creditable scores have been turned in.

The results of the three matches in the first round were, Richards won from O'Hara by default, Engstrom defeated Zibbe and W. B. Ahorn defeated Lang 9 and 7.

Under favorable weather conditions the final game should be played in the near future. Further results will be published in coming issues of the Armour Tech News.

WITH CLIVE IN INDIA
"Nature in the Raw"—as portrayed by the noted artist, Karl Godwin... inspired by the fierce and brilliant assault by Clive and a handful of followers, outnumbered 20 to 1 by savage hordes of bloodthirsty natives, at the Battle of Plassey—the birth of the British Indian Empire—as described in the famous Henty book, "With Clive in India."

—and raw tobaccos have no place in cigarettes

They are *not* present in Luckies... the mildest cigarette you ever smoked

these fine tobaccos, after proper aging and mellowing, are then given the benefit of that Lucky Strike purifying process, described by the words—"It's toasted". That's why folks in every city, town and hamlet say that Luckies are such mild cigarettes.

WE buy the finest, the very finest tobaccos in all the world—but that does not explain why folks everywhere regard Lucky Strike as the mildest cigarette. The fact is, we never overlook the truth that "Nature in the Raw is Seldom Mild"—so

"It's toasted"
That package of mild Luckies

"If a man writes a better book, preaches a better sermon, or makes a better mouse-trap than his neighbor, the ho build his house in the woods, the world will make a beaten path to his door."—RALPH WALDO EMERSON.
Does not this explain the world-wide acceptance and approval of Lucky Strike?
