

Theta Xi Gains Baseball Crown

Beat Sigma Kappa Delta by 10-8 Score

Theta Xi defeated Sigma Kappa Delta for the interfraternity softball championship by a score of 10 to 8 in ten innings, played last Thursday. Both teams played tight ball and only one error was chalked up throughout the game.

Game Goes Extra Inning

In spite of the absence of several of its stars, the Theta Xi team took a six run lead in the first two innings while Smith, T. X. pitcher, held the opponents hitless. However, the S. K. D. team tightened up and made two runs in the fourth and sixth innings to bring the score to 6-4. Theta Xi scored twice in the seventh, but S. K. D. came back with three runs in the same inning and another counter in the eighth to tie the score. Neither team scored in the ninth but two runs in the tenth gave Theta Xi a margin and the game.

In winning the interfraternity softball title, Theta Xi had to put the Phi Pi team out of the running in the quarter finals, thus ending domination by the latter for the past ten years. In the final game, Smith, Theta Xi pitcher, struck out seventeen opponents, including Stehno, S.K.D. slugger. However, Luke Cosme made up for him by swatting out a triple, two doubles and a single in five trips to the plate.

BOX SCORE:

OTHER CAMPUSES

The old Blue Key organization at the University of Oklahoma has become so small that a new club, the Skeleton Key, has been organized.

Freshmen at the University of Denver are forcibly ejected from all football and basketball games if they are discovered bringing dates.

Iowa State College requires that student cars be tested, in an effort to reduce campus accidents.

Coeds at the University of Minnesota are liable to a fine of ten dollars or a jail sentence of six days if they are seen wearing a fraternity pin.

The Purdue Exponent calls to the attention of the reader the fact that in 1898, the school year started in March and ended in November, because of the difficulty of heating the college buildings during the winter months.

Down in a Carolina college the students are allowed to smoke in class and even during exams, because the college is largely supported by the tobacco crop.

A freshman at Marshall college raised a minor rumpus when he wrote an authoritative theme on "How to Make Moonshine."

Six students of the University of Denver were suspended after attending classes in bathing suits.

Well fellows! This column does not return as a function of the News until next semester. Since the creation of this strip, seventy different colleges and universities have been knocked around.

Year's Activities Pass In Review

With Junior Week over and the Alumni Reunion and Commencement the only remaining items on the Armour Calendar for 1932-33, a busy and successful year of college activities is drawing to a close. Athletic teams, college publications, and dramatic, musical, and social organizations have all had active programs throughout the year.

The track season was featured again this year by the Armour Relay Carnival on April 1st, which drew more than three hundred athletes from thirty-five of the leading colleges and universities in the middle west. Armour's team made a good showing in the Carnival, taking second place in two of the relays and scoring in several individual events.

The basketball team, after dropping a few games early in the season, won seven of the last ten contests on the schedule to finish well up in the Northern Intercollegiate Conference. The Armour swimmers, although they were not successful in winning a majority of their dual meets, pushed their opponents hard in every contest, and broke a number of Armour records during the season. Captain Roy Carlstrom, Kolve, and Bernstein were the outstanding stars of the team.

The boxing and wrestling teams both came through hard winter schedules with fine records. The boxers were led by Captain Leo McDonald, who won every bout he fought throughout the season, and the wrestling team was guided by Frank Talaber, Central A. A. U. Middleweight Champion.

The spring sports schedules, with baseball, tennis, and golf teams engaged in active programs, found Armour again making a good showing in intercollegiate competition. The baseball team started its season by winning two games from the University of Chicago, and continued through the season with a number of league victories. The tennis team chalked up wins over two old Tech rivals, Lake Forest and Loyola.

Undergraduate activities were not by any means confined to athletics. The Armour Engineer appeared quarterly throughout the year and drew favorable comment from many alumni and friends of the Institute, as well as from the publications staffs of other schools. In a year when many colleges have dropped the publication of an annual, the 1933 Cycle appears as a noteworthy summary of the college year published at Armour.

The Orchestra and Glee Club thoroughly discounted the idea that engineering and art cannot be combined. The Glee Club gave a number of successful public concerts, and sang several times on radio programs, from WGN, WMAQ, and KYW.

The Commencement Week program which will close the college year starts with the Baccalaureate Service at Orchestra Hall on Sunday morning, June 4th. The Service is to be followed by a reception in the foyer of Orchestra Hall, where Dr. and Mrs. Hotchkiss will meet members of the Graduating Class. The Commencement Exercises on Thursday afternoon, June 8th, when degrees will be awarded to one hundred and forty members of the class of nineteen hundred and thirty-three, will be the final event of the year. Dr. Hotchkiss will deliver the Commencement Address.

We can think of no excuse for this thing but we had to fill this space.

"HIAWATHAD"

In the land of Arrow Collars, by the valley of Corona
Where the lover, Instant Postum, met his sweetheart, Cuticura,
By the mountains of Fels-Naptha, in the hut of Beaverboard,
Dwelt they them with Aunt Jemima, mother of Cuticura.

On the shores of Euralyptol, hard unto the liquid tar soap,
Aunt Jemima, with her Kodak, stood and pointed to the Crisco.
"Yonder dwells the Locomobile, in the forest of O-Cedar;
He it was who slew Van Heusen, slew him with his Kuppenheimer."

Boldly then did Instant Postum seize his trusty Biflex Bumper.
Gave his bride her one last Djer-kiss, kissed her on the Coco-cola.
"On a long and tedious journey I am going, Cuticura,
Where the names of Skinner's satin and Palmolive are unknown.

Guard you well our daughter, Jello, and our last born baby, New-skin."

Then he launched his Evenrude bark on the shining Pluto Water.
Stood she then and munched her Grapenuts, as he chug-chugged toward the Sunkist,

And she smiled the smile of Pepsodent, wept she tears of Listerine.

BOOK REVIEW

BRITISH AGENT—By R. H. Bruce Lockhart. New York: G. P. Putnam's Sons, 1933.

R. H. Bruce Lockhart's book, "British Agent," is all that the publisher's blurbs on the jacket claim for it. "Amazingly candid revelation," "thrilling story of adventure," "indispensable record of a crisis in world affairs," much as these phrases resemble the sub-titles of a movie pre-view, they are a reasonably accurate description.

British Agent is the autobiography of a brilliant young Scotchman who started his career as manager of a rubber plantation in the Malay States. This job he was forced to relinquish when an affair with a native girl exploded, so to speak, in his face. He returned home, and at the behest of his father but with no particular ambition of his own, took examinations for the consular service.

He passed the examinations with first honors, was shortly appointed vice-consul to Moscow, and was left in charge of the consulate at the age of twenty-seven when the consul-general retired at the outbreak of the War. He returned to England during the early stages of the Russian revolution, was sent back to Moscow as a special representative of the British government under the Soviet regime, was jailed there in the Kremlin for an alleged plot against the Soviet government, and was finally ushered out of Russia, generally imputed with every crime in the international catalogue!

As a story of adventure, British Agent is superb. As an outline of political intrigue which would have shamed Machiavelli, it is intensely interesting. And while it remains a personal narrative, it is perhaps best recommended as a lucid picture of the Russian revolution and the international interests relating to it.

From Kevensky to Trotsky, Lockhart knew the leading figures of the revolution; he knew their ambitions and fears, their strengths and weaknesses. He pictures them simply, not as historical characters but as men whom he knew, in whose offices he held conference. Men of lesser importance are drawn in bold caricature. The American ambassador, for example, knows all about poker and banking practice, but he "doesn't know a Left Social Revolutionary from a potato." There are more of these, equally entertaining.

Particularly enlightening, too, is his treatment of the interventionist policies of various Allied and Central powers, and of the effect of those policies on the progress of revolution.

Throughout, the story is told straightforwardly. The author is sparing neither of praise nor blame in his self-judgments, and thus we are constrained to believe in him. The accuracy of his foreknowledge of political effect from cause was partly responsible for his ultimate downfall. He was dangerous, and he was "framed."

If a fault must be declared, it is only that we wish for more detail in the intimate personal story. Of Mrs. Lockhart, who was around some of the time, we learn but little; of Moura, the Russian girl who was around a good bit more, even less. If it is an indication of Lockhart's sincerity of purpose that he restrained this theme in favor of its political setting, it is no less an indication of the appealing character of his prose that we wish he had not done so.

ARX NEWS

Although the sophs and juniors turned in their "Beach Clubs" at the same time, only the results of junior judgment were available in time for this issue. Do you think you can wait till September for the sophomore decisions? Back to the juniors—GERHARDT and SCHWAB topped a couple of first mentions, and a pair of second mentions were dished out to EKROTH and STOERMER.

Phil Faro met with tough luck when a red light "goer-througher" struck him down and broke his leg. Come on Phil, show 'em you can take it! And accept our hearty hopes for a speedy recovery.

The highest award in form of a mention was given to Tom LUCKETT in a recent judgment of a clay modelling problem. Have you noticed, how he's "clicking"?

Mr. Henry K. Hosman, a fellow of the American Institute of Architects lectured to a group of senior architects on the subject, "Problems of Architectural Practice." His lecture replaced the regular class in Building Law.

Another instructive lecture was given to the sophs by Prof. Joseph B. FINNEGAN of the department of fire protection engineering. Prof. Finnegan's talk concerned fire protection in connection with architecture and it was very sincerely appreciated and received by Prof. WILMANN and the class.

Following a mighty charette on the Beach clubs the sophs, juniors, and a couple of ambitious seniors released some pent-up energy on the frosh, who looked just too sweet to resist paddling. The occasion—freshman initiation to A. A. S.—the scene—Grant Park—the result—that well-known "tingling" sensation.

In spite of the physical nature of the initiation the frosh attended the annual architect's banquet that night. All present especially enjoyed the impressive talk given by the speaker of the evening, Mr. Ely Jacques KAHN, of the Beaux Arts Institute of Design.

And with this, gentlemen, it looks like farewell for another year. Our cencit is getting the best of us and we think you will be looking for ARX NEWS again next year; nevertheless, your ARX NEWSED will be out EAGLE EYE-ing in spite of you. But until then—good-bye—and good luck.

EAGLE EYE.

Fraternity Notes

THETA XI

The Annual Picnic was held last Sunday at the Indiana dunes. Four of the seniors, Brothers Baumann, Belton, Collick, and Jackson are working at the Fair. Brother Reason from Sigma Chapter at the University of Michigan, is staying at the house and working at the Fair. Brother Tansley of the Alpha Beta chapter at University of Illinois is working in the city and is staying at the house.

The house baseball team, led by Captain Smethells, continued its winning by defeating the S. K. D.'s in the final game by the score of 10 to 8. The game was 10 innings and was nip and tuck from start to finish. Pitcher Smith struck out 16 men.

PHI PI PHI

Gamma chapter of Phi Pi Phi takes great pleasure in presenting our newly initiated members. On May 24, in the presence of the Alumni chapter and active chapter the following men were initiated:

L. A. Callen, C. E. '34.
C. Clark, M. E. '34.
G. Hanes, M. E. '34.
R. Hansel, M. E. '36.
N. H. Kuehn, C. E. '34.
G. Savidis, C. E. '36.
A. P. Stasiulis, C. E. '34.
D. G. Storey, C. E. '34.
F. Talaber, E. E. '35.
W. Tallafus, Ch. E. '36.

Gamma of Phi Pi Phi closes this semester heartily wishing a happy vacation to all.

BETA PSI

The newly organized Mothers club of Beta chapter held their second meeting last Tuesday at which they selected their officers for the coming year. They are Mrs. Wm. Snashall, president, Mrs. J. M. Humiston, vice president, Mrs. G. W. Dunn, secretary and Mrs. W. A. Kraemer, treasurer. The club was an outgrowth of the recent Parents' day.

The fact that Brothers Lange and Young had lost their pins was made

known last Friday as the customary ice cream and cake was served.

The annual Farewell dance for the graduating seniors was well attended last Saturday evening. The house was decorated for the occasion.

DELTA TAU DELTA

Now that the finals are almost with us most of the boys at the house are burning the midnight oil. With Junior Week activities over all the spare is being devoted to the books.

Several of the boys from Beta Upsilon Chapter at the University of Illinois were at the house last week. Ralph Emerson of this chapter is staying at the house for the duration of the World's Fair.

SIGMA KAPPA DELTA

The pledges finished Hell Week and were initiated on Saturday, May 27. We are pleased to announce the initiation of the following men:

Nick C. Giovan '33.
Henry J. Koeber '35.

Arthur J. Skjorland '35.
The baseball team lost to Theta Xi in the final game. The game was a battle to the finish and went ten innings. We overtook an early lead to tie the score, but lost the game in the extra inning.
Brother Joe Stehno has a job at the World's Fair that is keeping him busy. Brother Al Kulpak was elected vice-president of the Musical Clubs at the smoker held at the Theta Xi house last Thursday.

SIGMA ALPHA MU

This year's summer formal is to be held May 9 and will probably take place on one of Chicago's many open air roof gardens.

Most of the fraternity's activities have been called off until after exams and the boys are studying hard to "hit those quizzes."
