

ENGLISH CLASSES STRENGTHENED BY FACULTY ADDITION

Fulghum from Michigan, Olson from Oberlin to Instruct

VARIED EXPERIENCE

The Department of English at Armour Institute has been greatly strengthened by the addition of two new instructors, W. B. Fulghum and Clair C. Olson, who are to aid Professor Hendricks, head of the department, in teaching English composition and literature. Both are well qualified to teach and have had varied experiences before coming to Armour.

Mr. Fulghum received his Bachelor of Arts degree at the University of Michigan in 1930 and his Master of Arts degrees at the Southern Methodist University in Dallas, Texas in 1932. He took a nine months tour around the world with a "Floating University" in 1926. At present he is studying for the degree of Doctor of Philosophy at the University of Chicago.

Mr. Olson received his Bachelor of Arts degree at Oberlin College in 1923 and his Master of Arts degree at the University of Chicago in 1926. He has had seven years of teaching experience having taught at Iowa State College in Ames, Iowa from 1923 to 1925 and at the University of Rochester in Rochester, New York from 1926 to 1932. He traveled considerably in Europe in 1930 and worked in the Bodleian Library at Oxford and also in the British Museum at London while there. Professor Olson is also studying for the Doctor of Philosophy degree at the University of Chicago.

To Play Organ at A Century of Progress

T. W. Wallschlaeger, an Armour Tech senior, has been asked to play the organ in the Hall of Religion at A Century of Progress on Columbus Day, October 12. His recital is to consist of a series of numbers of his own selection and is to take place at 2 o'clock.

The Phire Protect in Fysics Lab or All Is Well That Terminates Nicely

It seems that Otto Freilinger has done it again. No, he didn't use the skew chisel upside down nor kick his brief case off the rear platform of the commuters' special. After having started, it seems as if the entire tale must be told.

Otto is a great student of experimental physics. At least he spends most of his free time in the Physics Lab and some of his operations seem to be perpetually in the experimental stage.

Last Wednesday (you see he signed up for the Wednesday period so he could start the course on the first day of school) he cavorted about the lab in mid-season form.

Otto Desires a Watch

Now, Mr. Freilinger needed a watch on account of the lab manual called for one and he was not one to disappoint a lab manual. Assuming a trustworthy countenance he approached Mr. X, a fellow with little knowledge of the harsh realities of life and returned with a watch.

After Reynolds' "Last Call" for the seventh time, Otto realized that the period was over, quit his pretense of work, rescued Reynolds from nervous insanity by relinquishing his apparatus and headed for home.

A street car appeared as if just to accommodate the hurrying commuter, swallowed him up, and went on. No stops marred the quiet harmony of the Chicago Surface Lines. The sun filtered thru the slight smoke pall as if all things were as they should be. But an uneasiness was spreading

Music Clubs to Meet This Week

Another year of activities will be commenced by the Armour Tech Musical Clubs tonight when the orchestra holds its first practice at five o'clock in Assembly Hall. Tomorrow evening they will make their first appearance of the fall season playing at the Freshman Handshake. The glee club will hold their first meeting on Thursday evening at five o'clock in the same place.

All freshmen who are interested in music, either vocal or instrumental, are urged to attend one of the meetings. Prospective members are asked to join now before the clubs are organized for the year.

New students playing the French horn, alto, oboe, bassoon, and cello and bass violins, are especially needed. There is also a need for a snare drum player in order that the orchestra might have a full orchestration.

Last year under the able leadership of Mr. Erickson, who was spending his first year as musical director here, the Musical Clubs achieved a high degree of success giving several outside programs and concerts in addition to those here at school. In February they participated in the Edgewater Beach Hotel's Twilight Musical Hour in connection with Mark Fisher's orchestra. The program was broadcast over station KYW.

This was followed by a program over station WGN a week later and by a concert at the North Shore Hotel in Evanston in March. Later in the same month a concert was presented for the Chicago Teachers College at the Belmont Hotel on the north side.

A program given over station WBBM and the annual spring concert brought the year to a conclusion.

This fall the prospects of an even better year are very bright. The wide experience which the members received last year should be reflected in this year's work. They are very fortunate in having Mr. Erickson as director for he is well known in the musical world. He studied at the University of Chicago where he directed the glee club and the Blackfriars. He later was director of the Chicago Sunday Evening Club, and subsequently went to the Birmingham Southern University whose glee club won nation wide fame under his direction.

throughout Otto's emotional system. What was wrong? No quizzes had been flunked because none had been given. The slight misunderstanding which had threatened to blight his week-end had been cleared away at last night's date.

Mercy sakes! The lab book! Also the watch he had borrowed from—whose was it? He didn't even remember that! They must be back in the lab. Off the car at Twenty-second. Back to school. The door locked? Yes. The caretaker? Ah! Is it or is it not? Care!

Homeward Otto plods his weary way, pondering ways and means to satisfy the wrath of he who had lent his watch without collateral. Who was that fellow anyway? Night came. So did the next day. The trains were still running so our once-proud hero returns to the scene.

The Climax Approaches

Then did our central character show the stuff of which he was made. Did he hesitate? Straight into the mouth of ridicule did he go—direct to Professor Colvert. Then was another fine spirit shown to be a man of rare tact. Without a word, anyway not many, but with an expression which spoke volumes, did the professor bring forth the missing watch and manual. Then did the missing owner dash forth and reveal himself, untangling the last skein of Otto's mental perplexities.

So what? Well, people in glass houses should raise early radishes and Freilingers should be provided with personal secretaries.

SECOND SEMESTER RATINGS RELEASED BY DEAN'S OFFICE

Juvinall and Gunderson Lead Classes Again

AVERAGES HIGHER

Statistics of the scholastic averages for the second semester of the school year 1932-33, as compiled by the Office of the Deans, show that the scholastic leaders of the different classes for the previous semester have retained their roles as pace-makers for their fellow-classmen. J. W. Juvinall led the Senior Class with an average of 95.8%, making it a grand slam by leading his class for the four years at Armour. W. E. Gunderson continues as pace-maker for the Junior Class with an average of 96.1%, while the Sophomore Class has R. Maci for its first-ranker with an average of 96.5%. R. Johnson, besides topping the Freshman Class, is also the high man of all the students at Armour, having an average of 97.0%.

In the class ranking, an unusual result was tabulated when the Freshman Class surpassed the Sophomore Class.

The Senior Class.....87.4%
The Junior Class.....86.7%
The Sophomore Class.....85.4%
The Freshman Class.....86.2%

Departmental ranking is as follows:

Mechanical Engineering.....86.1%
Electrical Engineering.....87.1%
Civil Engineering.....86.0%
Chemical Engineering.....87.5%
Fire Protection Engineering.....88.1%
Architecture.....84.0%
Science.....88.3%

The averages of the following fraternities are arranged according to the seniority of their establishment at Armour Tech:

HONORARY FRATERNITIES Scholastic

Tau Beta Pi.....92.4%
Pi Tau Sigma.....91.5%
Eta Kappa Nu.....92.4%
Chi Epsilon.....90.0%
Phi Lambda Upsilon.....91.6%
Salamander.....92.4%

HONORARY FRATERNITY Non-Scholastic

Pi Nu Epsilon.....87.3%

Honor Society

Sphinx.....89.2%

Professional Fraternities

Scarab.....88.4%
Alpha Chi Sigma.....88.8%

Social Fraternities

Phi Kappa Sigma.....88.1%
Delta Tau Delta.....84.0%
Theta Xi.....84.4%
Sigma Kappa Delta.....85.6%
Phi Pi Phi.....84.4%
Rho Delta Rho.....88.0%
Sigma Alpha Mu.....82.4%
Triangle.....86.0%
Beta Psi.....85.3%
Kappa Delta Upsilon.....87.4%

The average of all students belonging to the Phi Kappa Sigma, Delta Tau Delta, Theta Xi, Sigma Kappa Delta, Phi Pi Phi, Triangle, and Beta Psi fraternities (fraternities that rent or own their own chapter house) is 85.3% while the average of all the other students is 86.7%.

In computing these averages the system was used in which the numerical grade is multiplied by the semester hours accredited to the subject, and the sum of these products is divided by the total number of semester hours to obtain the final average. The grades received in Physical Training were omitted in these computations. Letter grades were given the following numerical values:

CHI EPSILON

Chi Epsilon, honorary civil engineering fraternity, elected the following officers at a recent meeting: Pres.—J. E. Schreiner, '34. Vice Pres.—W. H. Kuehn, '34. Sec.—C. L. Shermer, '34. Treas.—G. A. Nelson, '34. G. T. Korink was elected as Editor of the Transit, official organ of the fraternity.

Call Issued For New Reporters

Freshmen who are interested in newspaper work, either business or editorial, are invited to try out for the *Armour Tech News* this week.

Editorial staff applicants are requested to call today at 12:30 o'clock at the offices, fourth entrance, Chapin Hall, second floor, while those who wish to try out for the business staff call Friday morning from 9:30 to 11:30 o'clock at the same place.

The editorial work includes the obtaining and writing of news and sport stories, writing of headlines, and proof reading. Previous journalistic work is preferred but not required.

The work of the business staff includes the solicitation of advertisements and the distribution of the copies.

It is recommended that men who desire to work on the *News* try out for the paper in their freshman year.

Honorary Fraternity to Entertain Guests

Recently installed officers of Pi Tau Sigma, national honorary mechanical engineering fraternity, are undertaking rather early in their term a task of unusual magnitude, that of entertaining between 40 and 50 delegates from chapters throughout the nation at the annual convention. A program has already been prepared for the meeting, which will be held on October 21 and 22.

Business meetings will occupy most of the first day, with a grand banquet in the evening. The next day, after a final business meeting, will be devoted to seeing the World's Fair.

The Armour chapter of Pi Tau Sigma held its annual initiation ceremonies and election of officers last May 31. E. W. Gossweiler was elected president; R. W. Suman, vice president; F. E. Headen, treasurer; C. E. Hillman, recording secretary; and P. P. Polko, corresponding secretary. Previous to the election of officers the following men were initiated into the chapter: C. E. Dahlgren, F. E. Headen, C. E. Hillman, I. A. Kolve, J. B. Lukey, L. J. McDonald, P. P. Polko and E. R. Wood. The term was ended with a banquet in honor of the initiates and the departing seniors.

Scherger Arranges Courses in German

Professor Scherger has arranged the following classes in Elementary and Chemical German and Political Science. There are to be three sections in Elementary German. The first will meet on Tuesday and Thursday at 11:30 in Room C, Main Building; the second on Wednesday and Friday at 10:30 in Science Hall; and the third on Monday and Tuesday at 9:30 in A, Mission.

There is one section in Chemical German, which will meet on Tuesday and Thursday at 10:30 in Room C, Main Building. The course in Political Science will meet on Friday at 11:30 in the Electrical Lecture Room.

Students desiring courses in History of Civilization and French are requested to see Professor Scherger in his office on the fourth floor of the Main Building at once.

Chess Club Will Meet on Friday

The first meeting of the school year for the Armour Tech Chess Club will be held on next Friday, September 29 at 12:30 in the Campus Club rooms. These rooms are in the third entrance of Chapin Hall.

Everyone interested in chess is invited to attend. Plans have been formulated for a very active year in which meets with different colleges will take place.

Last year the first intercollegiate meets were held. These were the matches with Wheaton College and Crane College.

UPPER CLASSMEN SPONSOR ANNUAL FROSH HANDSHAKE PLANNED FOR TOMORROW

Annual Social Event Is Set for 7:30, Professors Amsbary and Schommer to Speak

PEP MEETING IS FEATURE OF PROGRAM

O'Connor Chosen Junior Manager

A Junior Class meeting was held last Friday for the purpose of electing a manager for the Junior Inter-class Baseball team. Richard D. Armsbary conducted the class meeting and after a close contest Joe "Bucky" O'Connor was elected. It was decided that another meeting be called for arranging the class election.

Under the guidance of the very able manager a practice session was officially announced and it is to be held tonight. O'Connor made a plea before the class exhorting the members of the class to support the team. It was believed that expert organization was essential in order for the juniors to put over a winning combination; therefore the manager will be vested with full power.

Classes Held in Remodeled Shop

Additional space in which to hold classes has recently been made available by the completion of a classroom in the pattern shop on the third floor of Machinery Hall. The room was constructed by partitioning off the east end of the shop, thereby permitting the wood-working machinery to be available if put into operation again. At present social science courses under various professors are held in this room. Remodeling of the other shops is not contemplated at this time.

Appointments Made for Armour Cycle

Work on the new Armour Cycle is already getting under way. The following men have been appointed to the editorial staff: George Wheaton, Associate Editor; Don Jacobson, assistant to the Editor; Louis Streb, Fraternity Editor; Louis Biegler, Athletic Editor; and John Davis, Organization Editor.

Law School Professor Compares Foreign With American Papers

"Foreign newspapers say very little about their own crime, but play up American crime to a very great extent," said W. L. Burdick, vice-president of the University of Kansas, and professor in the School of Law, who has recently returned from a fourteen months' trip around the world in which he studied law procedure in many countries, both in Europe and the Orient.

Law procedure in other countries, according to Dr. Burdick, is a great deal simpler than ours. Often a criminal trial takes only half a day, and seldom lasts more than a day or two, while ours often drag out for weeks. There is also a much shorter time between the apprehension of the criminal and the trial, than we find in the United States, and sentences are passed just a few days before the actual hanging.

"Often a man is accused, tried, and hung for murder in England without a word being in the paper," says Dr. Burdick. "In France, however, the papers play up crime more, but American crime rather than their own, has the front page in the papers."

An interview with Dr. Burdick in Kansas City about two weeks ago, in which he made statements about the

Tomorrow night at 7:30 the annual Freshman Handshake will be held in Assembly Hall, and all freshmen are invited to come out and get acquainted with their classmates as well as the upper classmen. This year's Handshake which is being run by a committee of juniors and seniors instead of by individual organizations as in previous years will offer a program including some new events.

Pep Meeting on Program

A pep meeting featuring short talks by the athletic coaches at Armour, the school songs and cheers led by the cheerleaders, embody the Handshake program this year. Professor Amsbary, always a big drawing card at student gatherings, will read some of his poems including the indispensable "Captain of the Marguerite", and several other professors will give informal talks.

Schommer to Speak

Professor Schommer, who is probably best known around Armour as a narrator of funny stories, will act as master of ceremonies for the occasion and will introduce the speakers. He promises a real treat for those who come as he has recently laid in a supply of stories having been on several fishing trips during the course of the summer.

Refreshments Planned

Following the entertainment in assembly hall the group will adjourn to the basement of the Mission building for a social hour. Although no prize is to be awarded to the student who puts away the most cider and doughnuts, the committee have felt it advisable to lay in an ample supply of both. Previous experience with the gastronomic ability of the Tech-hawks has led to the stand taken by those in charge of the refreshments.

Both the Freshmen Handshake and the freshman assembly and meetings of last week are being conducted by a group of upperclassmen consisting of J. J. Ahern, R. D. Armsbary, C. Clarkson, N. E. Colburn, H. W. Davidson, R. A. Fleissner, L. Fratreschi, S. M. Lillis and R. J. Pflum.

crime situation brought to him an anonymous letter, which, although it was written on Eureka, Kansas hotel stationery, was mailed in Kansas City.

"I noted an article about you and your trip, and your remarks about crime in the United States," the writer, who signed himself "Socialist," said.

"It is to laugh. Don't you know what would stop these Italians, racketeers, bandits, and all the rest of it? Kill the lawyers. That would be the effective method. Let all criminals take care of themselves when arrested. Have no bondsmen, bailors, political influence, and especially no lawyer! Education, white collars, teachers, and LAWYERS are the bane and nuisance of present existence."

When asked his action to the letter, Dr. Burdick smiled. "It says to laugh. Well, I did.

"Of course, I do not agree with the man. Law schools are doing good work." When asked his reaction to the letter, of law compared with those of other countries, Dr. Burdick pointed out that each was best in its way, because each prepares lawyers for different court systems, different legal procedures, and different sets of laws.

Freshman Handshake

Tomorrow evening the traditional Freshmen Handshake will be held in the Armour Mission. For a great number of years freshmen and the upper classmen have taken this occasion to become acquainted with each other. Here is the opportunity for the freshmen to form extremely valuable friendships with their classmates and with the upper classes. These friendships will last a lifetime and may have a much more profound influence on their futures than the school itself. If these opportunities are not taken advantage of a correspondence school would serve the same purpose to an average student. The Handshake is the first social event in the school year and comes at a time just before each and all of us become too immersed in our school work to enjoy ourselves to the fullest.

This year the Handshake is under the sponsorship of the "group leaders," a body of ten students who were appointed by the Dean of Freshmen to act as advisers to the new incoming students. Previous to this year the Campus Club conducted the event. There is no reflection meant on the Campus Club because a different organization has been appointed this year. The gatherings in past years have been very successful and all who have attended them in the past have been pleased by the way they have been conducted. In fact it is largely due to the Campus Club that this tradition has been carried forward. However there are several important reasons why a change has been made.

The sponsoring group this year has already made the acquaintance of a large number of freshmen. More important to the purpose of a meeting of this kind all the freshmen know at least one of the group with whom he may feel acquainted. This should help to "break the ice." Therefore it seems a logical and fitting choice that these men should act as hosts of the Handshake.

Again, practically all the various organizations at Armour are represented by these group leaders. Athletics, fraternities, publications, clubs, and societies have their unofficial representatives in at least one of the group. Since the actual cost of the Handshake comes out of the school treasury it seems more correct to have a group represented by all the organizations conduct the meeting than to ask one single society to carry the responsibility.

Another qualification of the group is that it does not derive its membership at all from the freshman class, so that one organization or group will not be placed in a more favorable light in the eyes of the newcomers than another when they decide to become active in any organization.

"The Slipstick"

Cleave to "The Slipstick"; let the Slapstick fly where it may.

Now that things have settled down, and the proverbial wheel is once again revolving at its ever-increasing rate, let us relax a bit and settle down to a few moments of leisure and silly prattle.

Next, to you who are new to The SLIPSTICK we extend greetings, belated, but nevertheless sincere. And we also wish you the best of luck and hope that you will SLIPSTICK right along with us.

ADVICE TO FRESHMEN

To succeed you must stick to it,
What you do hang right on through it,
Be persistent, sonny
Take a lesson from the bee
Who spends his life devotedly,
Trying to make his honey.

Haze: "Why the sad look?"

Daze: "I've just enrolled in a correspondence school and now I get a letter from the Sophs telling me to haze myself."

Phileas Fogg.

From a small town in one of the dry states we received this from friend Telita Sweeney, "It is so dry in this town that we have fish here, fish, mind you, four years old that have never learned to swim."

"How much does your mother and father and little brother make?"

"Two, and one to carry."

A. B. C.

T'WONT BE LONG SOON

Frosh, (when alarm rings in the A. M.)—"Oh, why do I have to get up in the morning as long as I've strength enough to sleep."

Math Prof.: Now, if I subtract 25 from 37 what's the difference?

SILLY POEM

Paul swat the mule with a maul
While stealing with stealth past his stall.
The mule put his heels
Where Paul put his meals
And as far as we know that is all.

SAD CASE

A speaker was addressing an assembly in an Insane Asylum. He began the address—"Why are we all here, why are we all here!"

A nit wit at the rear of the hall rose and said: "We're all here because we're not all there."

Soph: What are seasoned troops?

Frosh: They are mustered by the officers and then peppered by the enemy.

Ask the Professor

Do you believe in the enactment of the National Recovery Act, or the enactment of the statement—No Relief Available—as far as homework is concerned? The answer will probably be: "yes and no."

Grimming—like a flivver—makes some folks look silly, but it gets them there.

—The Union Leader.

PRIZE ADVERTISING

Smart Hats

Wife: "But you had the right of way—Why stop?"
Hubby: "Don't be silly. That was the alderman."

FOREWARNED

First Visitor: "My dear, these cakes are as hard as stone."

Second visitor: "I know. Didn't you hear her say, 'Take your pick,' when she passed them around?"

The Season's Song Hit

You go home and pack your brief case,
I'll be saying good-bye at my place,
Then away we'll go—

(chant): Economics, Calculus, Economics,
Economics, Physics, Economics,
Economics, Juice, Economics,
Economics, Surveying, Economics,
and

ECONOMICS.

Tourist—"Why do these trees in the orchard bend over so low?"

Farmer—"You'd bend over too if you were full of green apples."

It seems that one day when a group of small boys were punctuating their marble shots with profanity a minister chanced to pass. Of course since he was a good man and not given to such lewd speech he reprimanded the boys and asked them what they thought would happen to them if they continued the use of such language. When so addressed one of the group promptly spoke up and informed the minister that they would probably grow up to be golf players.

"What is your occupation?"

"It isn't an occupation, it's a pursuit. I'm a bill collector."

It Has Happened to Better Men

"Sam, don't make a fool of yourself!"
"Too late, dearie, I did that when I married you."

Shoemaker:—Here are the shoes for your new polar expedition. Were you satisfied with the shoes I made Explorer.—Yes, they were the best shoes I ever ate on a polar expedition.

Dumb as Techawk frosh may be, there are none as dumb as the coed who thought assets were little donkeys.

Hubby (looking over the bills): You're driving me to the poorhouse!

Wife: No, you'll have to walk. The finance company has taken the car.

The prevalent lightness of spirit lasted through the week but its a safe bet that faces will have different expressions soon enough.

However, those first few days did spare us the odors of the Schmiers who run rampage on the fourth floor with no regard for the rules of neighborliness.

Little (And innocent too) Miss Muffet
Sat on a t(ack) uffet, (How provincial)
Eating some cards and whey (Hey, hey, boop boop a-doop)
Along came a spider (The rat)
And sat down beside her (With his slick city ways)
And frightened (That's what she said)
Miss Muffet Away. (So she walked home).
Minnie of Minnesota.

The average woman's idea of intelligent driving is to stick a hand out each side of the car so she can turn either way she wants to.

Things may go from bad to worse
When blokes like me try to make verse
But if you'd like to make things better
Stick your contrib in a letter.

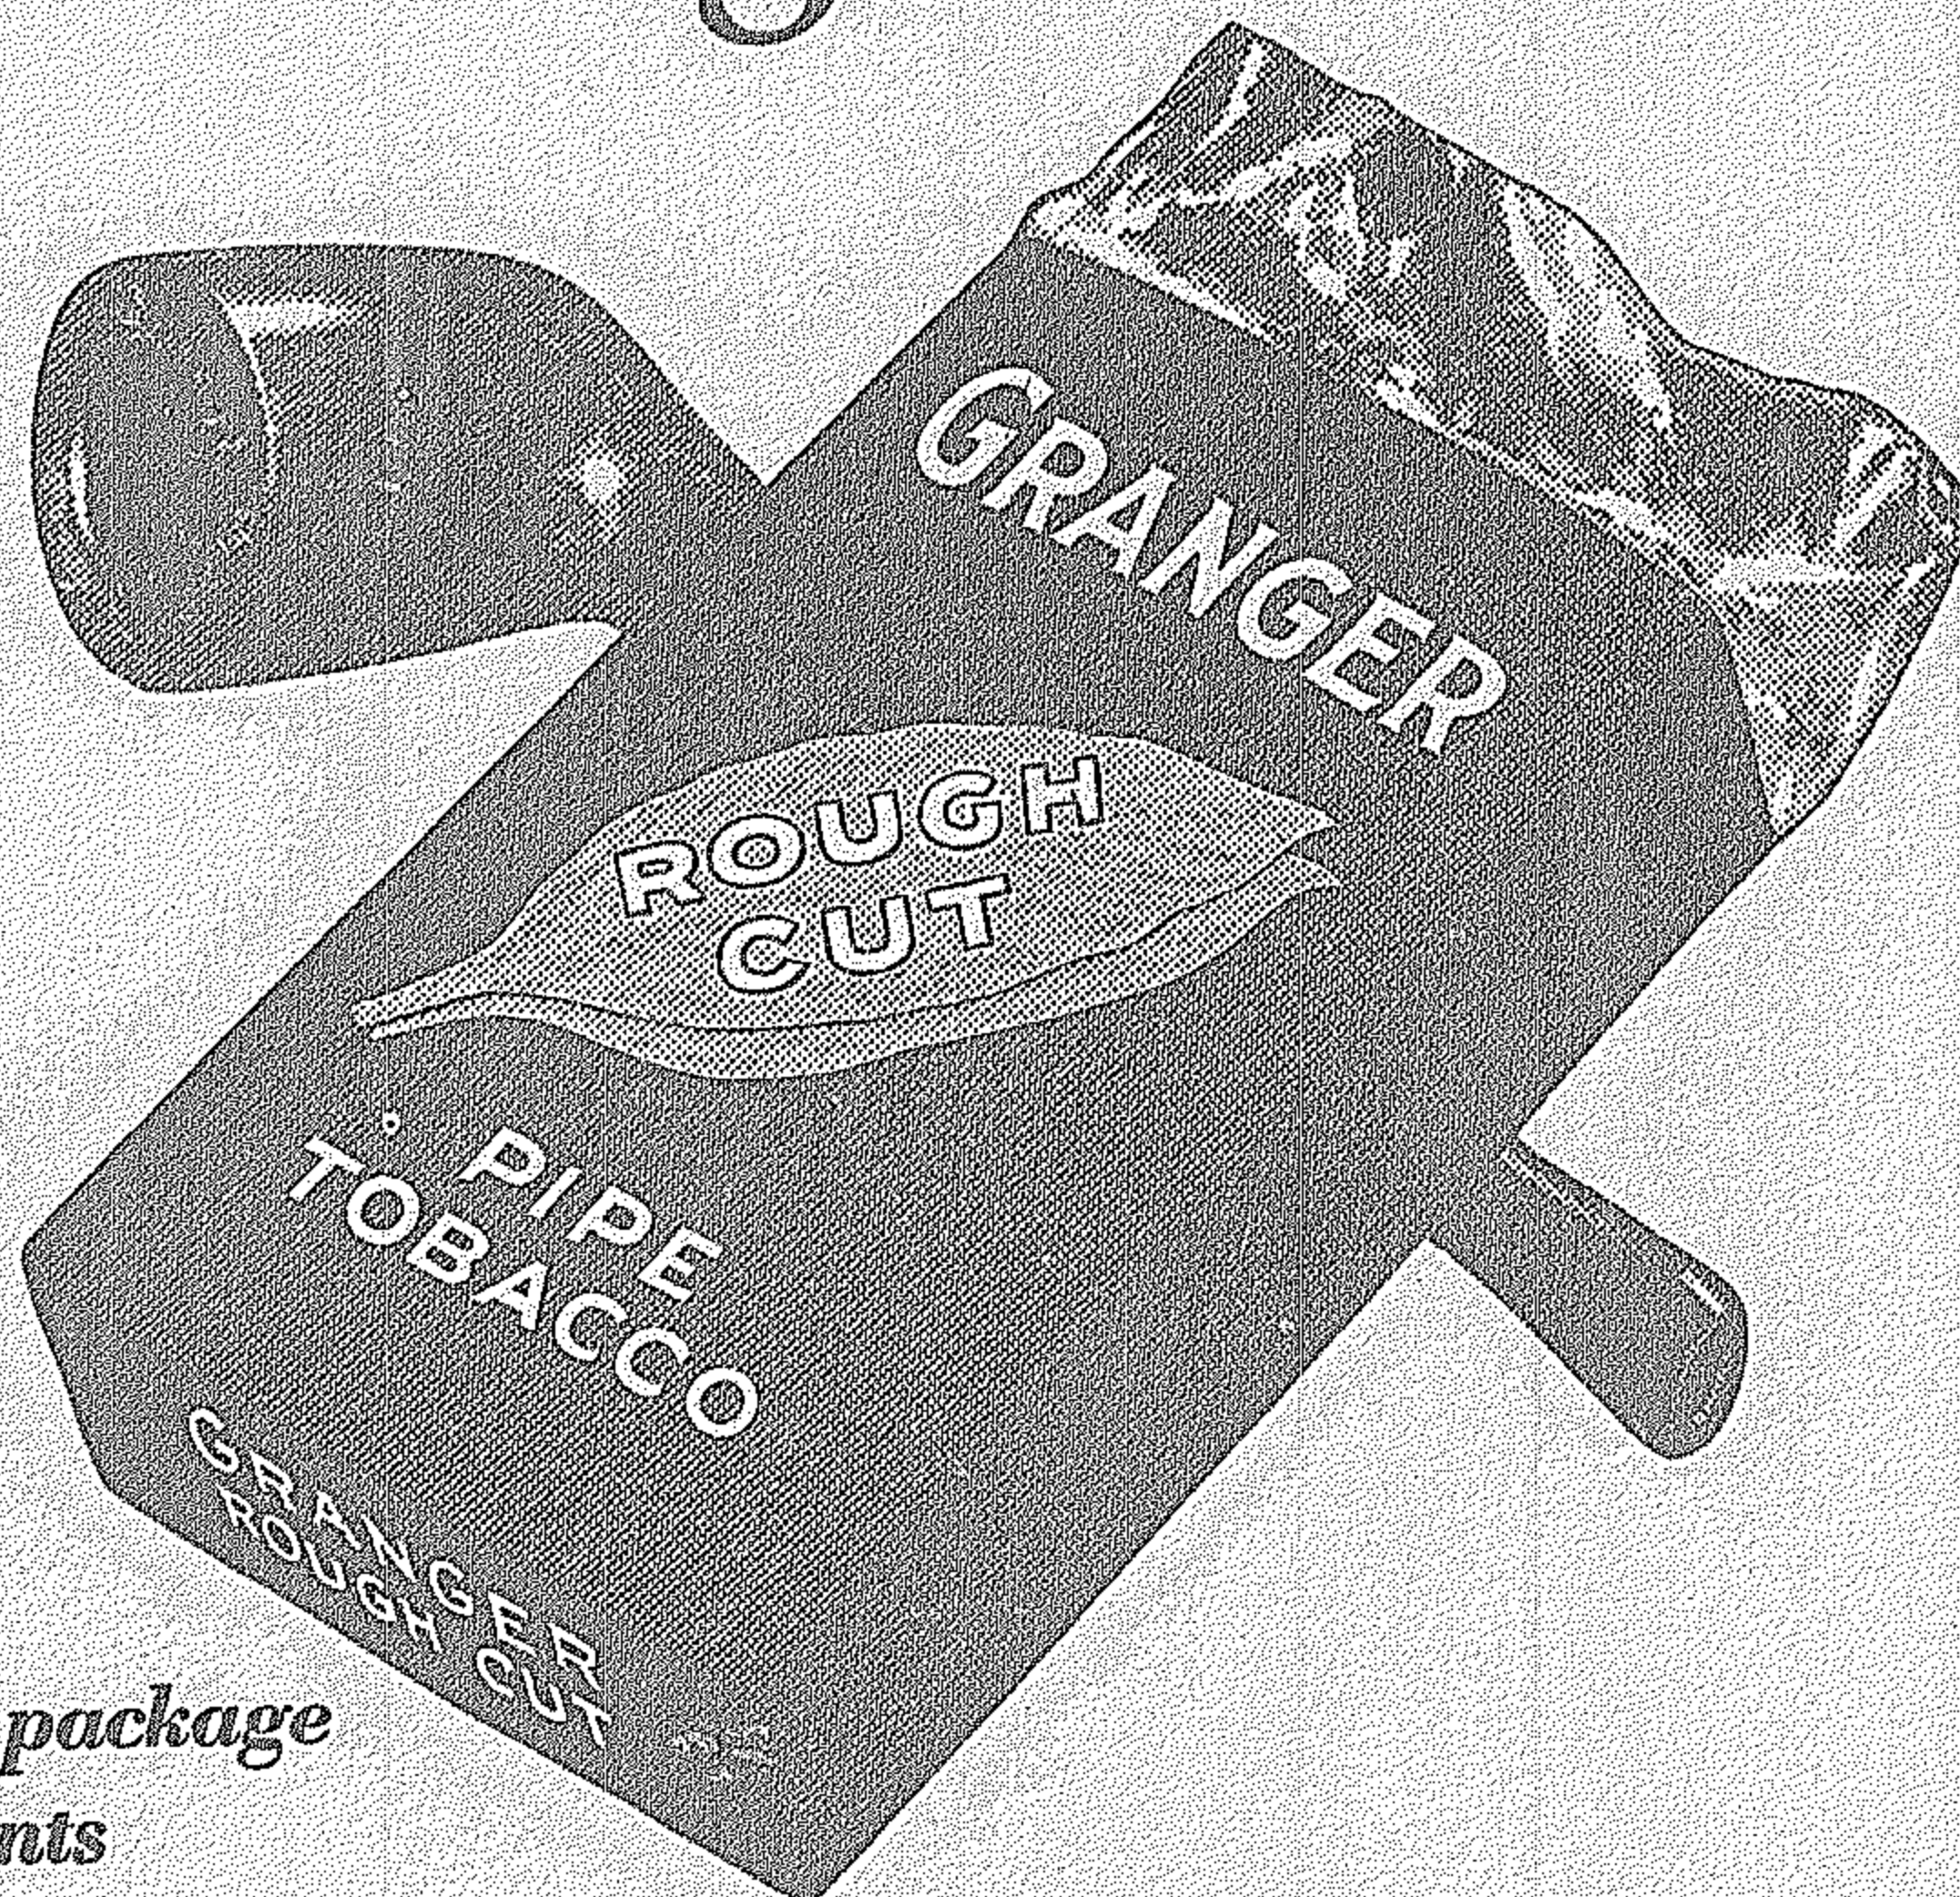

And then drop it in the Tech News box on the first floor.

Zeppo.

Granger smokes right in a pipe

... because it is made to smoke in a pipe. It is the right cut. It has the right flavor and aroma. Granger is what it says it is — pipe tobacco — made to smoke in a pipe. And folks seem to like it.

a sensible package

—the tobacco that's MADE FOR PIPES

OTHER CAMPUSES

The passing of physical examinations and excellence in studies are requirements for a coed's staying out until 12 o'clock on week nights and until 1:30 o'clock Saturday nights at Stanford University.

Says the Purdue Exponent: "Freshmen caps are worn, not as a mark of humiliation. The green cap is merely a mark of loyalty to the freshman class—a bond which gives each freshman something in common with every other freshman." Isn't it the truth though?

From the Co-No Press of the Cortland State Normal School comes the news that "love is an ocean of emotion surrounded by expenses."

California Agricultural College boasts the invention of a machine that measures the changes in flavor of milk due to oxidation.

For the purpose of advancing education, the University of Kentucky is collecting discarded radio sets to be used in establishing listening centers in the mountain regions of the state.

Transylvania College, located at Lexington, Kentucky, is the oldest college west of the Allegheny mountains.

Instead of following the single volume, album—catalogue type standard for college yearbooks, the Jayhawker, Kansas University yearbook, will be presented in magazine form, appearing in five sections, each section being published at a regular interval throughout the college year.

The University of Southern California Daily Trojan claims that "more college graduates among the nudists claim Harvard as their alma mater than all other colleges."

The faculty of the University of Southern California has been diminished by 15 members this year.

The Kentucky Kernel states this: Definition of a slobber (a kiss, you freshman)—an anatomical juxtaposition of two orbicular muscles in the state of contraction.

Fraternity Notes

PHI PI PHI

The Sixth Biennial Convention of Phi Pi Phi was held on Sept. 4-6, at University of Chicago in Judson Hall. The three Chicago chapters were hosts to delegates from the seventeen other chapters. Brother Otto Kuehn '22, Convention Chairman and Tech basketball coach last year, was elected National Executive Secretary of Phi Pi Phi. Gamma extends to Brother Kuehn its congratulations and best wishes. Brother Simpson, Gamma's delegate reports Phi Pi Phi is looking forward to another active and prosperous year.

During the Summer the active and Alumni Chapter held smokers and dances at the house and a good time was had by all in spite of the heat.

Brother C. Robin, '32, former Tech all honor man, was married this summer and is residing in Alabama.

TRIANGLE

It is with great pleasure that the Armour Chapter of Triangle announces the pledging of Robert W. Schmidt, M.E., '36.

During the past summer months many Triangle men throughout the country have made the Chapter House their home while visiting the Century of Progress. Among the men were Tibor Gyengo of Budapest, Hungary, Brothers Robinson and Steen of the Purdue Chapter are now working in the city.

Former President Oberbeck entered West Point this June.

After a week of hard work getting the house in shape the boys topped it off with a radio dance last Friday.

PHI KAPPA SIGMA

Alpha Epsilon will begin its social season Saturday evening, September 30 with the annual fall dance to be held at the chapter house.

Brother Phillips and Pledge Brother Anderson have left Armour this fall to matriculate in Clemson College down in South Carolina. They report the football prospects for the school have improved quite materially because of their arrival.

Brother Jim Juvinal is back at school this semester for work on his master's degree in electrical engineering. His work is in connection with a scholarship he received from the Ilg Ventilating Company.

SIGMA KAPPA DELTA

The fellows are all back at school after spending the summer in various ways. We finished our annual fall house cleaning last week with only one mishap. In the course of the house cleaning, we did some painting. Brother George Reed found out that he would not make a very good painter. Much to his chagrin, he spilled a whole can of paint on his pants.

Brother Roy Kercher received an appointment to Annapolis, but is back at school at present. Brother Diamond Dickey is back to finish his

senior year. He was out for a while due to illness.

DELTA TAU DELTA

Now that fall house cleaning is over for this year, the chapter is settling down to the normal routine of business. Hal Pearson dropped in at the house for several days. Hal is still connected with Commonwealth Edison and we hope he will be a frequent visitor. Brother Prebenson is now living at the house for an

indefinite period of time. Due to the large number of actives returning to school the chapter is looking forward to one of its most successful years.

BETA PSI

Fall house cleaning, which has been the main issue for the past week, is nearing an end and the house is again taking on its natural appearance. Brother McBride who had planned to start this year at Illinois has returned to the house and

is taking up his studies again at Armour.

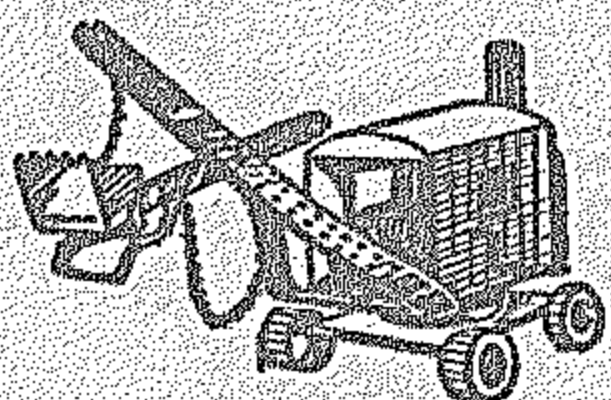

Brother Even, '28, who has been living in Chicago has taken up his residence in Aurora.

THETA XI

The Alpha Gamma chapter house is all ready for the rushing period which begins Thursday, September 28.

Brother R. E. Long is now working in Chicago and living at the house.

THE STEAM SHOVEL

Leo MacDonald is used to carrying weighty problems, (blonds, or what have you), and even talks about it.

To those frosh who are uninformed, we have a committee known as the barber committee whose express purpose is to remove the peach fuzz below the nose.

Has to be Seen to be Appreciated! Johnny Hazleton smoking a cigarette.

It is definitely known that George West is that way about a maiden who goes by the name of Virginia.

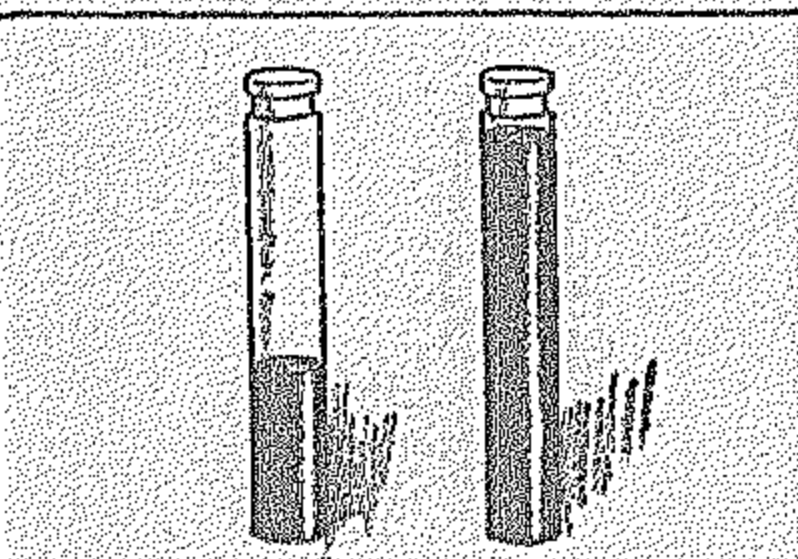

We predict June weddings for the following senior fire-protects: W. C. Freitag, C. P. Kuffel, W. R. Mills and R. W. Swanson. B. H. Peterson and W. E. Robinette just can't make up their minds.

"Parker's Utterly New Vacuumatic Filler" REVOLUTIONIZES FOUNTAIN PENS

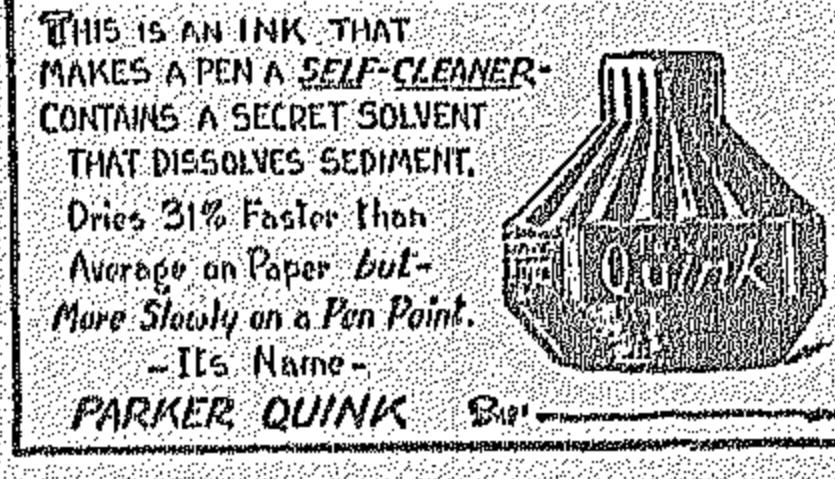

The Success, Ultra-Smart, Laminated Pearl Beauty that holds 102% more ink. Tells you when to refill, hence ends running dry.

Geo. S. Parker now announces a marvelous new Pen development in the Parker Vacuumatic Filler—a development that forever ends the nuisance of having your pen run dry at some critical moment.

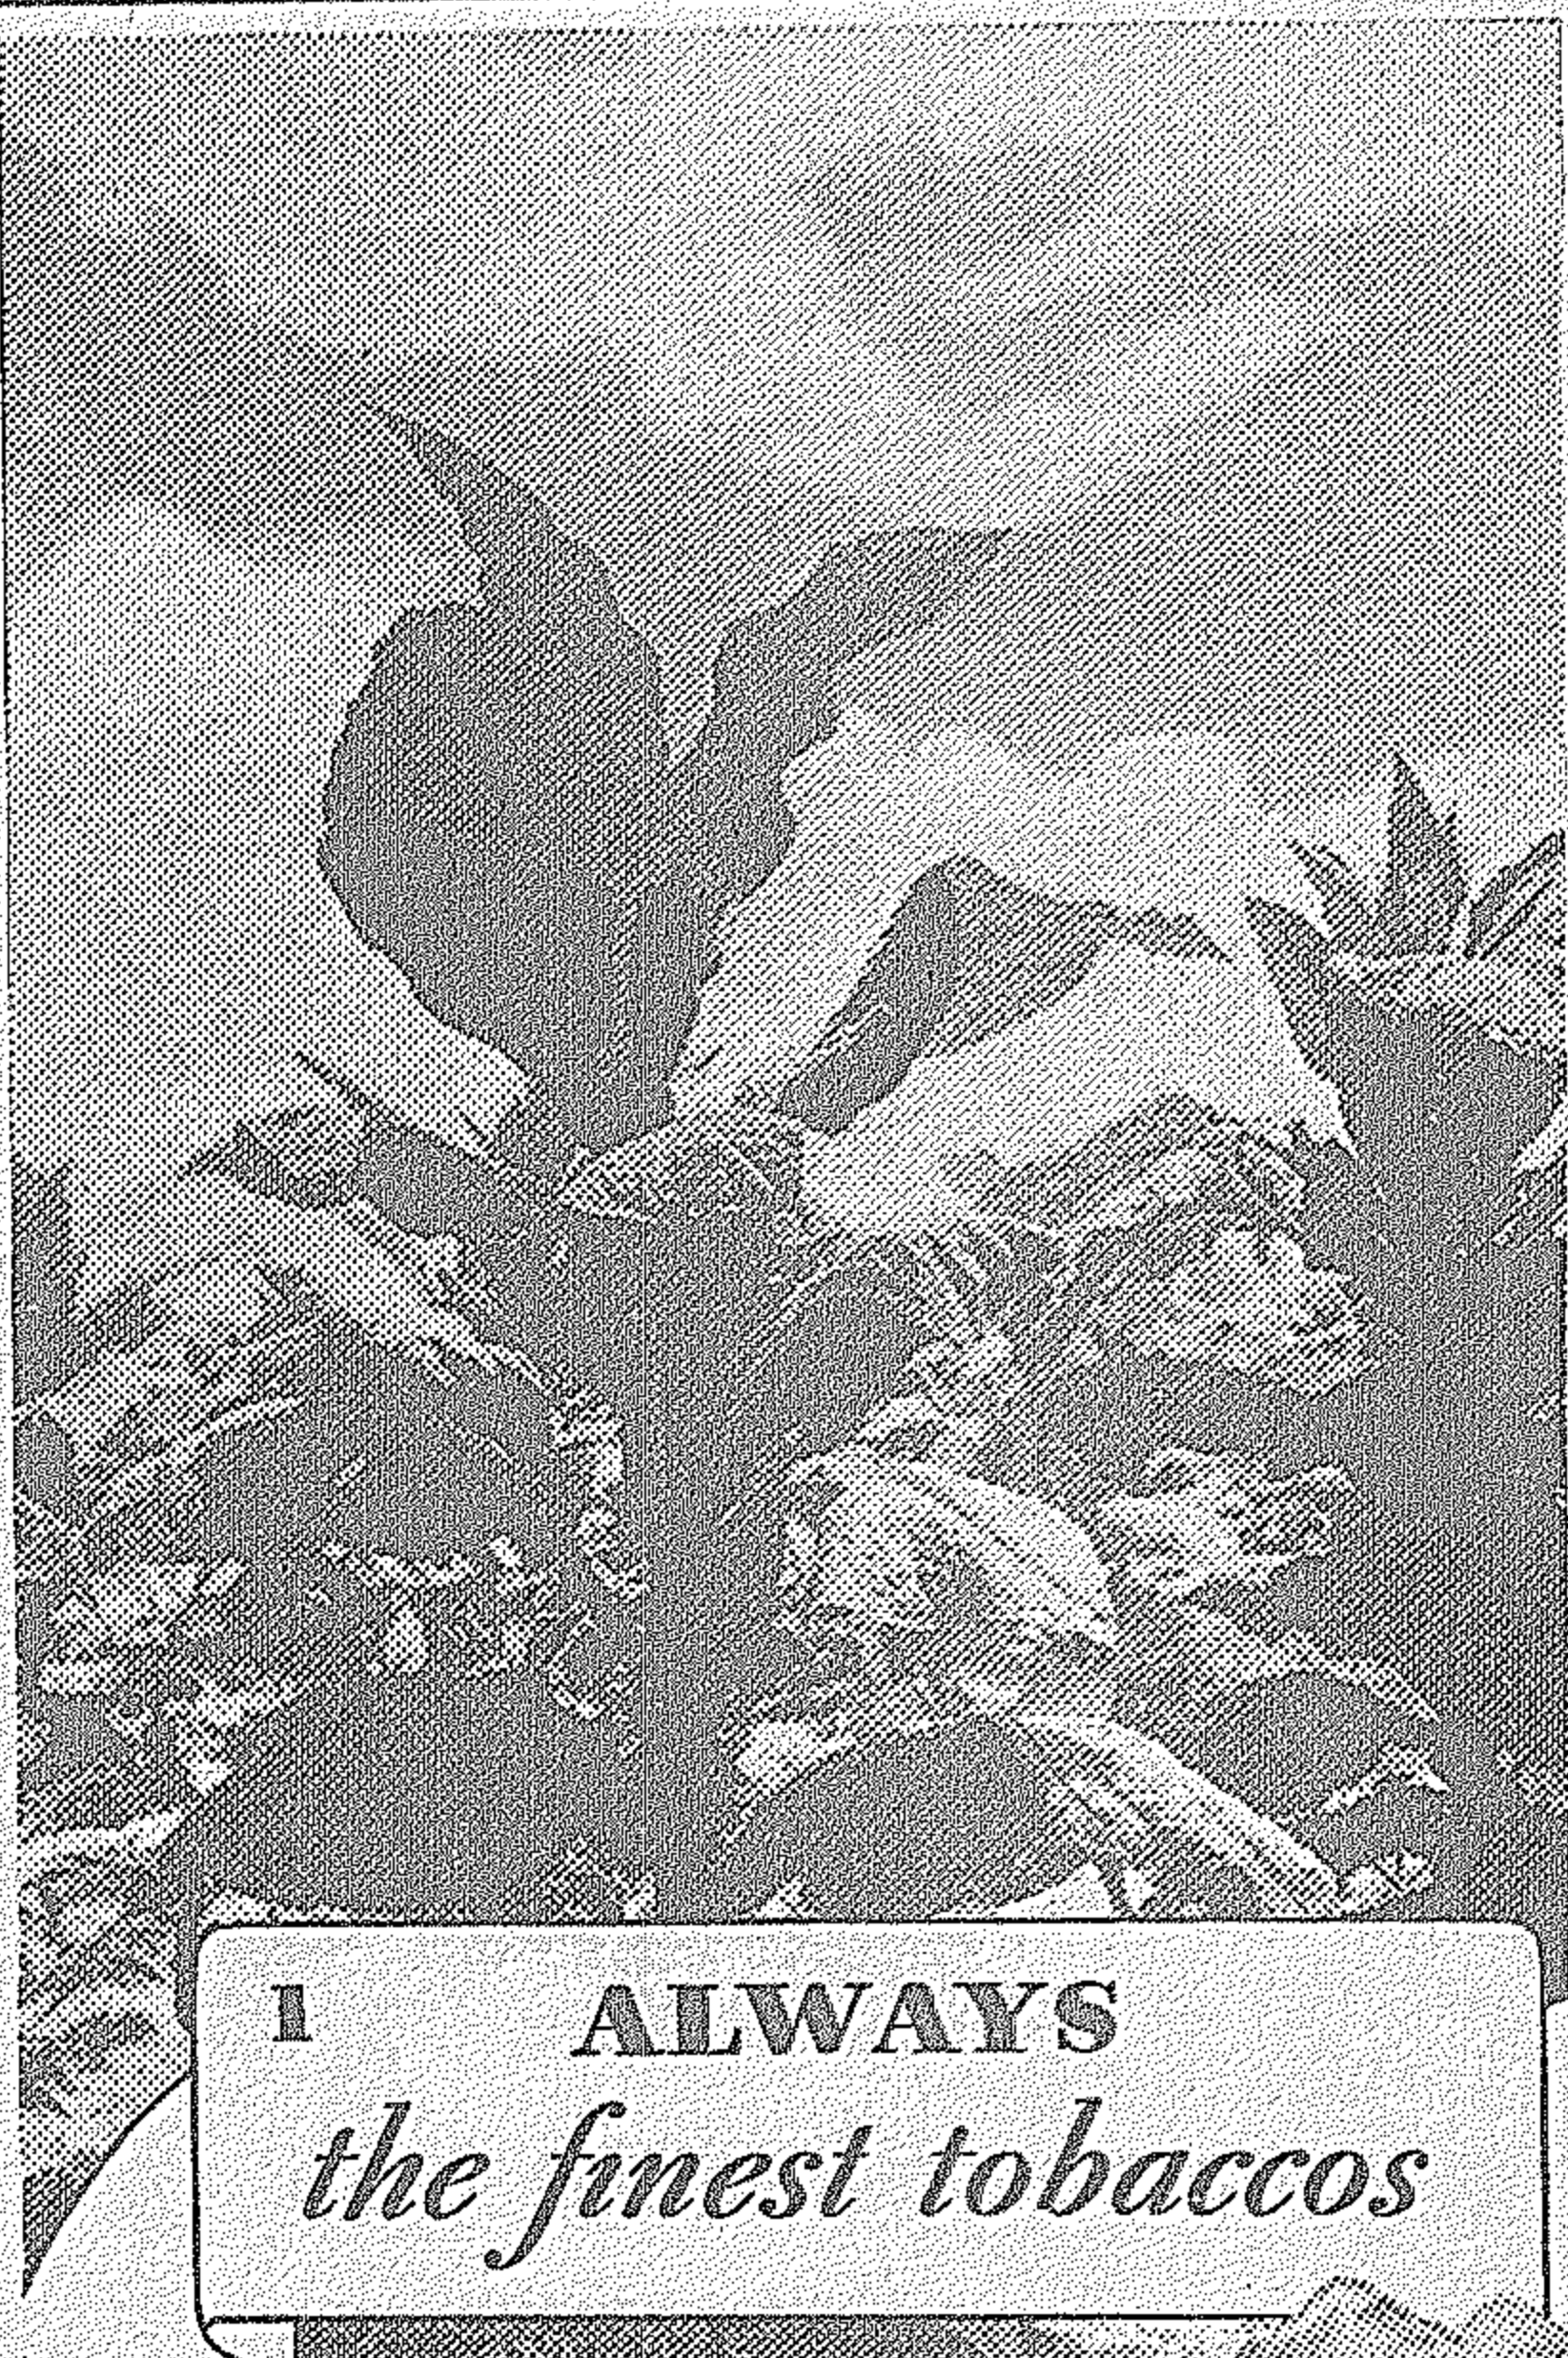

Invented by a scientist at the University of Wisconsin, and developed by Parker, the Vacuumatic Filler is the first success pen containing no piston pump or valves—nothing to render it useless later. And it holds 102% more ink with no

increase in size. Go right now and see this new-day writer. See how it fills by vacuum—see the ink within through the clear-vision rings—see

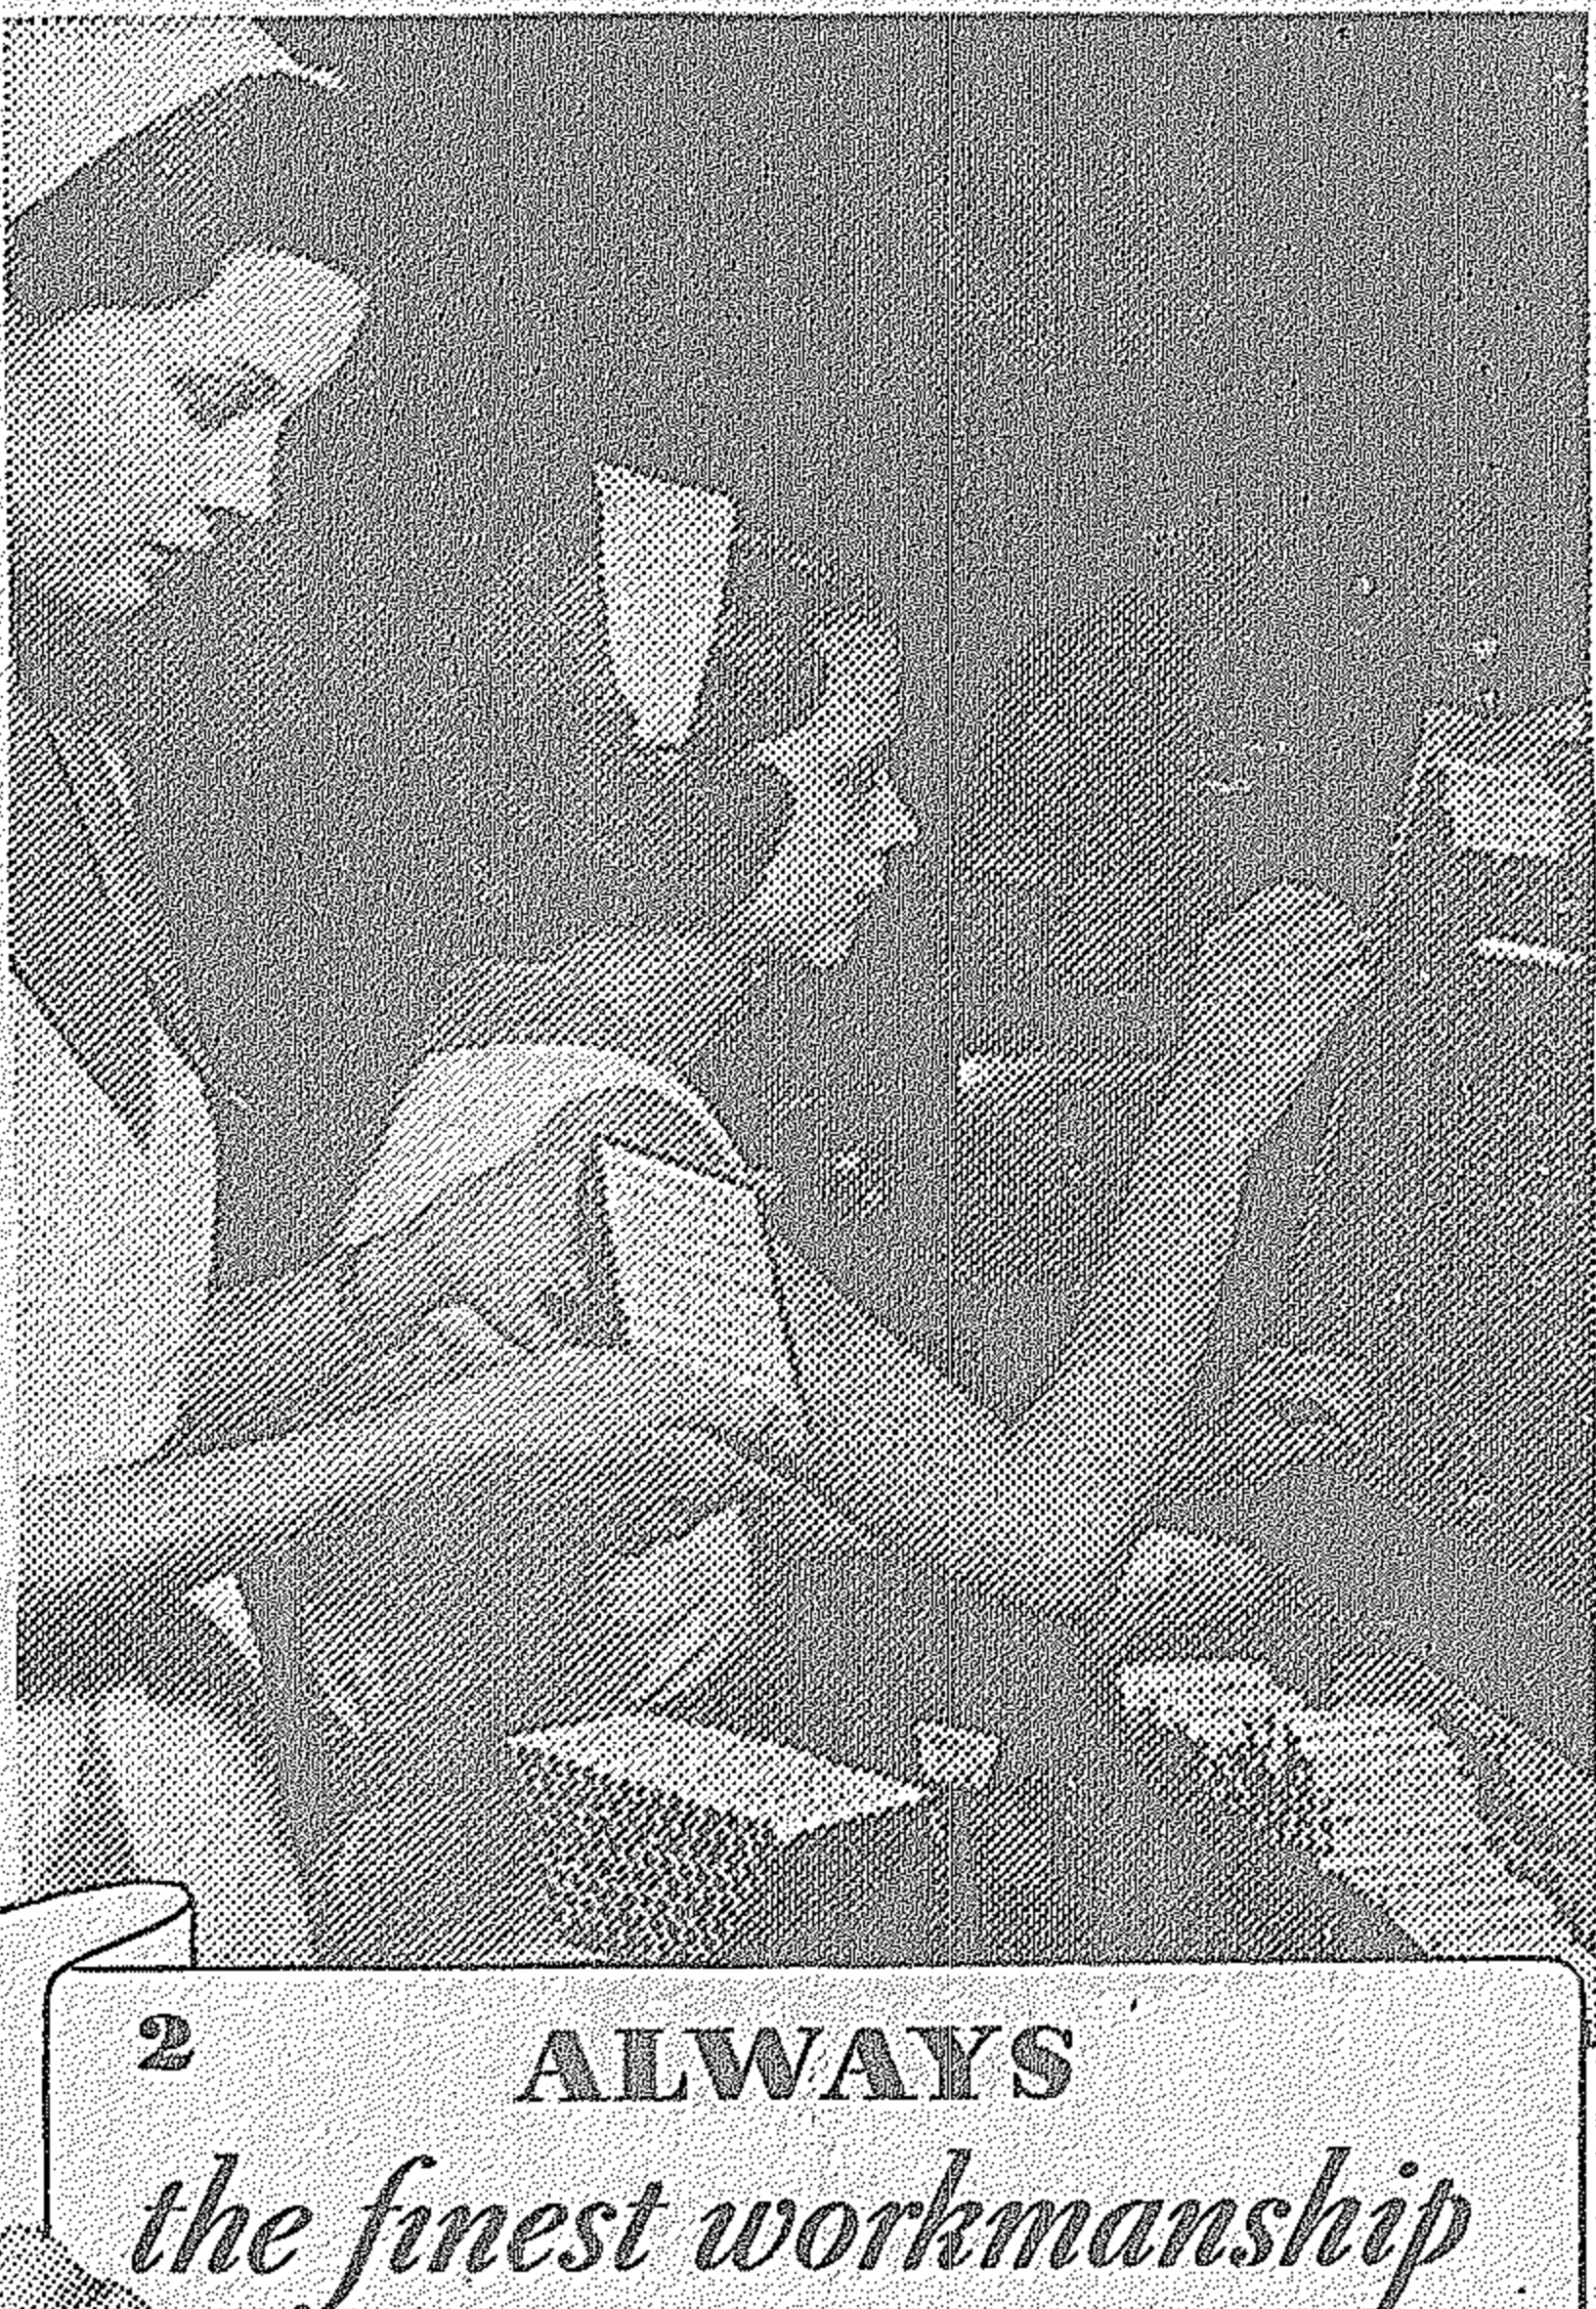

the double quantity—try writing two ways with this one Reversible Point. All good pen counters are demonstrating. The Parker Pen Co., Janesville, Wis.

THIS IS AN INK THAT MAKES A PEN A SELF-CLEANER—CONTAINS A SECRET SOLVENT THAT DISSOLVES SEDIMENT. Dries 31% Faster than Average on Paper—but—More Shiny on a Pen Point. —Its Name— PARKER QUINK

1 ALWAYS the finest tobaccos

2 ALWAYS the finest workmanship

3 ALWAYS LUCKIES PLEASE

Why do we say "Always Luckies Please"? Well, one reason is that every Lucky is made of choice, ripe tobaccos—the Cream of the Crop. Another reason—Luckies are always round, firm, fully packed—with no loose ends to sputter and spark.

Careful examination and inspection by over 60 precision instruments and 17 alert scientists guarantee unfailing uniformity. That's why Luckies draw so easily, burn so evenly—always mild and smooth. And that's why—"Always Luckies Please!"

"it's toasted" FOR THROAT PROTECTION—FOR BETTER TASTE

INTERCLASS BASEBALL ACTIVITIES START THIS WEEK

Class Teams Allowed One Evening for Practice

EACH CLASS CONFIDENT

Once again Ogden Field was the scene of feverish activities when the seniors took the field last night for their lone practice session in preparation for the annual interclass baseball tournament. In this little Tech series each class team is allotted just one night to practice before the scheduled games. Managers for the various teams have already been chosen by their classmates to conduct practice, arrange for equipment, umpires, etc. The managers are also asked to report to Coach Krafft's office by 12:30 o'clock the day of practice. Don Jacobson, varsity baseball manager, will distribute the balls and bats. No equipment except baseballs, bats, and catchers paraphernalia will be furnished.

Winners to Receive Awards

Varsity men in baseball are eligible as usual but are not allowed to play their regular positions. All players will appear with their own suits, shoes, and gloves. Freshmen and new students are urged to get up some class spirit and come out for their respective teams.

These annual interclass affairs will enable an ambitious student to collect activity points. For the benefit of the freshmen and the incoming students it may be explained that ten Honor Cycles, the Armour Tech year book, are awarded to the graduating seniors who have gathered the highest number of points through activities in all manner of sports, publications, clubs, fraternities, and scholarship during their four years here at Armour.

This series also enables a student to show his ability on the baseball diamond and gives Coach Krafft an opportunity of looking over some of the new material available next spring. Charms will be awarded to each member of the championship team.

Freshmen Interclass Champs

The statistics show that the frosh came out victorious last year. It took the strong freshmen squad two games before they downed the surprised seniors.

The final tabulations show Frosh 5, Seniors 4 after the freshmen came through with four runs in the last inning.

The games will begin promptly at 4:00 o'clock sharp and will be four innings in length. If rain interferes the schedule will be moved back one day.

Practice Schedule

- SeniorsMonday, Sept. 25
- JuniorsTuesday, Sept. 26
- Sophomores ...Wednesday, Sept. 27
- FreshmenThursday, Sept. 28

Game Schedule

- Seniors vs. Juniors Friday, Sept. 29
- Sophs vs. Freshmen Monday, Oct. 2
- Championship Game (5 innings)Tuesday, Oct. 3

Each Class Confident

When members of the respective classes were interviewed by this News sports reporter it was found that if all their predictions come true there will undoubtedly be four interclass baseball champions at Armour this fall. However, our better sense (Please! No Cracks) tells us that this can't happen and so we hope the best team wins.

Following the coming of the Marlene Dietrich trousers fad, a husband reports that he recently woke up in the middle of the night to find his wife absent mindedly going through her own trousers.

"A very handsome woman, that Mrs. Waldorf."

"Yes, you should have seen her fifteen or twenty years ago, when she was ten years younger."

Armour Tennis Season Reviewed

Despite the Century of Progress, bad weather, and accidents (to say nothing of academic difficulties) last spring, the Armour tennis team of the 1933 season finished the year with an average which was better than fifty percent. The statistics of the last tennis season show that out of ten matches scheduled, eight were played; and of the eight which were played, four were won, three were lost, and one was tied.

Coach Colvert's men opened the tennis season at Northwestern on April 24 where they were defeated by the Wildcat tennis team, six matches to three. Two days after the Northwestern match, the Armour team decisively beat Loyola, seven matches to two. May 4 the strong University of Chicago tennis team handed the Tech men a loss by winning six matches to Armour's three.

Win Four, Lose Three

The Armour team then registered three victories by defeating DePaul in one match and George Williams College twice. In the last two matches of the season Wheaton College proved to be very tough opposition and the best the Tech team could do was to tie them on the Armour courts and lose to the Crusaders on their home courts.

Captain Streb, Armsbury, Paine, McDonnough, Lammers, and Esbensen were the tennis players who did battle for Armour Tech on the tennis courts.

Paine is the only one of the six men who is not expected back in school this year.

THE WEARING OF THE GREEN

The best news of the week comes from the most unexpected source. The freshman class is putting it all over the rest of us in this green hat business by taking the project by storm. Already a majority of the first year men are wearing the symbolic headdress and by the time the Freshmen Handshake begins tomorrow evening, they are all expected to have them. The newcomers are requested to wear them throughout that assemblage, even when the cider and doughnuts are dished out.

The appearance of green hats on our campus has greatly enhanced its beauty and cheerfulness. In fact, one of the administrative officers of the Institute was heard to remark something to the effect that the color almost matched that of the surrounding lawns. From all evidences, the project should help immensely to install the proper college spirit.

Another surprise! It looks as though the tennis tournament will not only start early this year, but will also be completed. The first round is now in progress and all contestants are urged to play it out before the date of technical elimination. To help matters along, the winner of the tourney will receive a loving cup. (Empty. It doesn't hold very much anyway.) It is hoped that some shining new material is uncovered before the meet is completed.

You Can't Keep a Good Man Down!
If you run across a chap who starts to brag about the appendicitis operation he underwent this summer, you have an introduction to Johnny Roberts, Tech's southpaw track star. A week after the operation was completed, the young man was out playing tennis. He'll soon tell us that he doesn't know what a cradle looks like.

The annual interclass baseball tourney is getting under way, with the usual team predictions coming thru from all the classes. However, from all standpoints, the senior team should win, claiming a large number of veterans. The opposing juniors claim the higher-ups haven't a chance just because. Then come along the smooty sophs hollering "Brains before Brawn" but it wouldn't make any difference. They just want to make noise. Anyway the poor Frosh will probably win the championship again, and they have the red-coats behind them. I mean the green caps.

We'll have to invent a name for those Irish-colored haberdashery adornments.

SERIES!

Mathematics has its series. The electrical engineer sooner or later hears of the word series. And, of course, some Americans have heard of the World Series. Which leads us to the particular series in which we are more interested, that annual fall classic at Armour, the Interclass Baseball Series.

Each year that this series of contests is held it becomes more evident that the battle for the title is a wide open one. This certainly doesn't detract from the excitement and interest in the contests; and just to add

Golf Tournament Begins Saturday

The annual Armour Tech Golf tournament is to be staged Saturday, September 30. It will be played as follows: Eighteen hole qualification Saturday on the Evergreen Golf Course, 91st St. and Western, followed by match play. The matches can be played at the convenience of the players on whatever course they choose.

Evergreen is situated so that it is easily reached by automobile and the surface lines. The special greens fee of fifty cents will be allowed to all participants in the tournament. Play will begin at 9:00 A. M. Saturday.

Entries for the tourney can be made by placing your signature on the entry blank that is posted on the bulletin board, or you can leave your name with Professor Leigh, the golf coach. Make your entry at once so as to insure the success of the tournament.

our little bit of interest arousing propaganda we hope the seniors as winners of the Interclass Games and we wish to go on record as saying that the Giants will win the World's Series if the Senators don't. (This last clause is due to our usual policy of betting only on a sure thing.)

Pairings Made in Tennis Tourney

Pairings for the Annual Tech Tennis tournament are posted on the bulletin board. The response shown for the tournament was the best shown in recent years, about forty players in all. This year marks the first time in the history of the tourney that a trophy is to be awarded to the victor.

A deadline is to be declared for the preliminary fights if any of the contestants are slow in playing their matches. It will be necessary to resort to this since the number of favorable tennis days is limited.

Trophy for Winner

As an incentive for the racketeers a beautiful trophy that is offered will be the envy of the school. Rumor has it that the prize is to be well worth the effort put forth. For the information of the freshmen this tournament offers an opportunity to make a showing that will merit a consideration when the tennis squad is picked this spring.

Why—

Tobaccos grown in this country are "seasoned" with tobaccos from Turkey and Greece

THE ANSWER IS VERY SIMPLE:

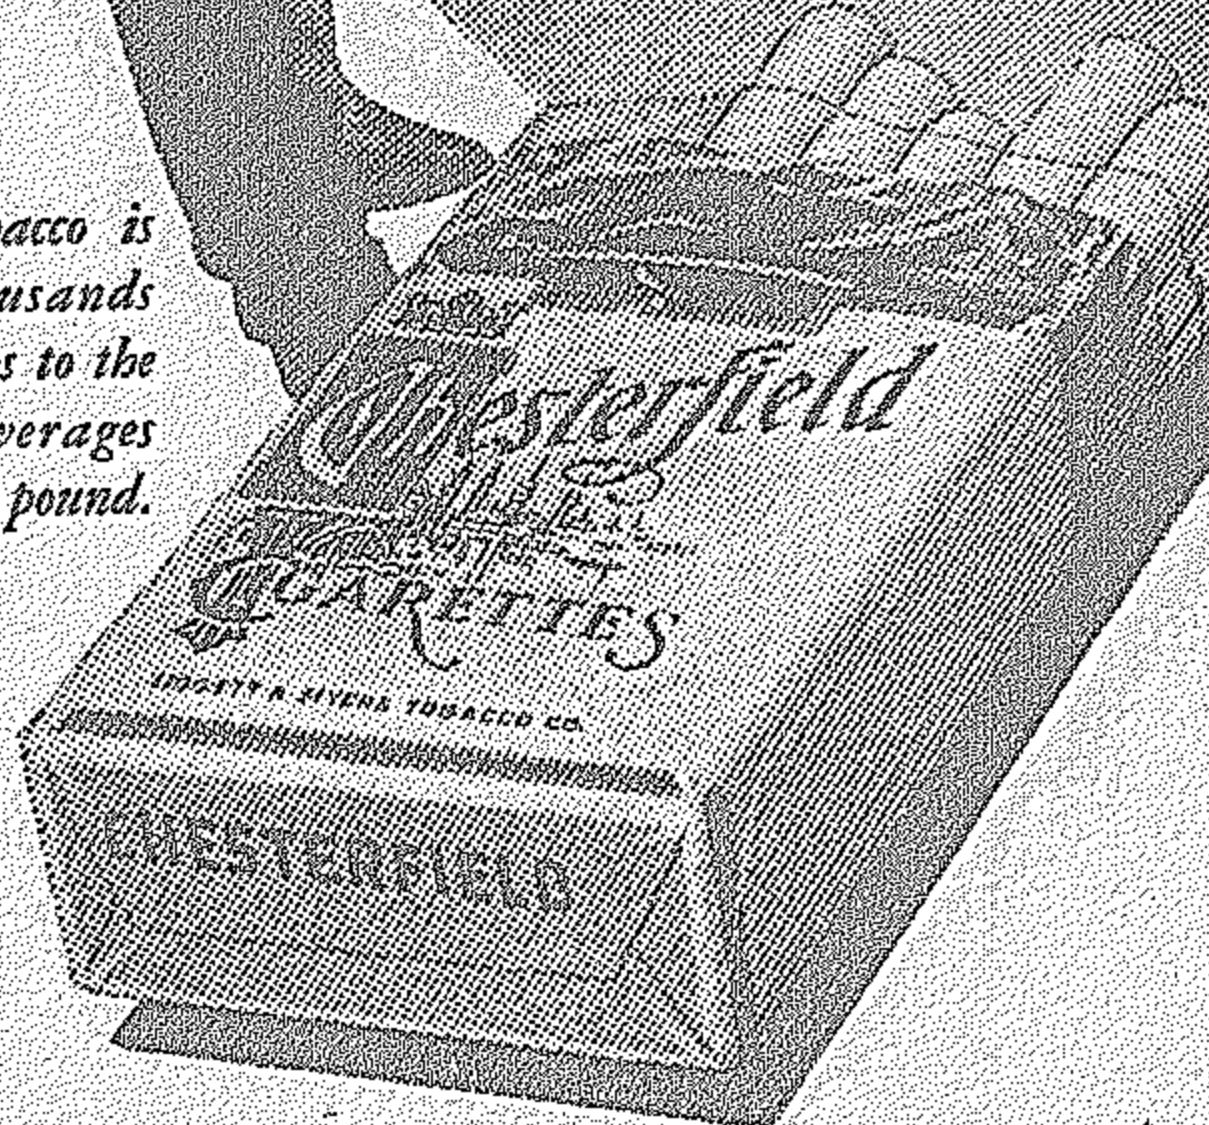

TOBACCOS to taste right in a cigarette need to be flavored or seasoned just the same as you might season a steak or a pudding.

No tobaccos have ever been found that equal the spicy aromatic tobaccos of Turkey and Greece for this purpose. That's why we send 4000 miles for aromatic tobaccos from Sam-soun and Smyrna, Xanthi and Cavalla.

When blended and cross-blended in just the right amounts with Chesterfield's mild ripe Domestic tobaccos, the result is a rich flavor and a fine fragrance.

Chesterfields are seasoned right—they taste right. May we suggest you try them.

Turkish tobacco is packed thousands of tiny leaves to the bale. It averages 400 leaves a pound.
