Armour Institute of Technology, Chicago, Illinois

SIDELINES

By LEROY BECKMAN

FOREMOST among the considera-tions to be placed before the third special session of the state legisla-ture beginning today, will be the bill ture beginning today, will be the but authorizing A Century of Progress Exposition to operate this year. With only a little more than three months, months of frequent unfavorable weather conditions, remaining for fundamental preparations necessary for the heralded opening, we wonder why the legislature became lax and did not complete its work in this matter at an earlier date.

OFFICIALS of the exposition have orricings of the exposition have pointed out that until the legislature acts, little can be done to prepare for the 1934 World's Fair. This state-ment is, unfortunately, true to the letter. Delay in Springfield is detrimental because Congress cannot appropriate money for a federal ex-hibit at the fair, the other states of the Union will not prepare exhibits, the State Department at Washington cannot extend foreign invitations, the cannot extend toreign invications, the exposition is restrained from building due to lack of necessary permission, contracts cannot be made finally binding, and the advance sale of tickets cannot begin. All of these results time.

PROGRESS in science and engineering will be the theme of this year's exposition. These fields are a part of public enterprise. They are responsible for living conditions. Yet, evidently, they don't amount to much in the eyes of a state legislature. That same legislature will spend weeks arguing over whether a man should sit or stand when partaking of his liquor, and then postpone an educational project for lack of time as in the second session. Question: Wherein do the interests of a state

DESPITE the progress made in the science of lighting in the last twenty years the civilized world is still grop-ing through inadequately lighted in-teriors with the result that eyes are strained and weakened because of poor illumination. Such was the as-sertion made last week by Dr. Mat-thew Luckeish, director of the lighting research laboratory of the General Electric Company, who spoke before members of the Chicago As-sociation of Commerce.

DR. LUCKEISH made known the fact that the ideal reading light has been found to be approximately 1,000 footcandles. Yet, he declared, much of our reading at home is done under only one, two, or three foot candles of light and that five foot candles of of light is an exception. Something to check up on. Good eye sight is a valuable asset.

HARVARD UNIVERSITY wants the case of Huey Long, senator from Louisiana, settled for good or for bad. The Harvard Crimson, undergraduate publication, says that let-ters were mailed to more than 100 liberal clubs in universities and colleges throughout the country asking them to request a Senate committee to investigate "thoroughly" charges against Huey Long.

Rifle Club Prepares For State Matches

The Armour Rifle Club members in anticipation of the Illinois Rifle Association matches from February 17 to March 31, have been preparing themselves by a number of practice sessions. The association offers a special prize to the team having the largest number of points in the series, which is to consist of four matches. In previous years the team has been

In previous years the team has been successful in the fifty foot event with iron sights, and the present team is hoping to repeat this year.

Members of the student body who are interested in the rifle club are urged to take advantage of an oportantiv of making the team, as several members will be lost by the next

Parker Appointed Faculty Member

Mr. Kent H. Parker of the Western Actuarial Bureau has been ap-pointed to take the place of Professor Charles P. Holmes, who has resigned as Assistant Professor of Fire In-surance because of his numerous other engagements.

Professor Holmes, a graduate of Massachusetts Institute of Technology with an S. B. degree in Chemical Engineering, has been on the Armour faculty since 1925. For a part of this time he also served as instructor in Insurance in the Northwestern School of Commerce. He spent three years in Annapolis and during the war served as an officer in the Air Service. He is a recognized authority on rating problems connected with electrical hazards and oil risks.

Received Degree last June

Mr. Parker graduated from the De Mr. Parker graduated from the De-partment of Fire Protection Engi-neering in the class of '28 and re-ceived his F.P.E. degree last June. After leaving school, he worked for a year in the Fire Underwriters Inspec-tion Bureau at Minneapolis, Minn. He was then transferred to the Kentucky Actuarial Bureau where he worked for two years. In 1931, he came to the Western Actuarial Bu-reau, where he has since been em-

Board of Publications Elects Year's Officers

The first meeting of the Board of Publications attended by the entire group of newly elected members was held in Tau Beta Pi rooms on Friday, January 26. The Armour Engineer will be represented for the coming year by Ellis Doane, Leonard Hausyear by Ellis Doane, Leonard Haus-ner, and Harry Nachman. The News is represented by Edwin Searl, Rich-ard Armsbury, and Robert White. The present faculty members, Pro-fessors W. W. Colvert, J. B. Finne-gan, E. C. Grafton, W. Hendricks, C. E. Paul, and J. C. Peebles, will con-tinue in office.

Hendricks and Colvert Reelected In order to effect an alteration in the constitution so that the terms of the officers of the board would coincide with the terms of the staffs of the two publications, Professors Hendricks and Colvert resigned their positions as chairman and treasurer, respectively, of the body. They were promptly reelected to their old offices for a one-year term. Searl was elected vice-chairman to succeed Norman Colburn and Doane was elected secretary to succeed Harold David-

son.

The retiring student members of the board, Herbert Kreisman, John the board, Herbert Kreisman, John Brenner, and Barry Kostenko of the Engineer staff and Norman Colburn, Harold Davidson, and Clarence Clarkson of the News staff were in-vited to attend the meetings of the board for the remainder of the school

Faculty Women's Club Plans Informal Dinner

The Faculty Women's Club has arranged an informal subscription din-ner for all members of the fac-ulty and their wives, on Saturday evening, February 24, at 6:30 in Zeis ler Hall of the Chicago Woman's Club, 72 East 11th Street. A fea-ture of the evening will be "Shakes-pearean Grand Opera." Tickets for one dollar each may be had from Mrs. Arthur Sear, 8142 Chappel Avenue, until Friday at 9:00 A. M., February

Amsbary Is Injured by Auto in Accident

Professor W. B. Amsbary, who was injured by an automobile recently, is still in the hospital, although his condition is considerably better. A ma-jor operation for an injury to his knee was to have been performed yesterday, but he was so improved as to make it doubtful whether this would be necessary. Because scarlet fever was discovered in his ward, he s quarantined and can not receive

During Professor Amshary's absence, Professor Hendricks is meeting his classes. The accident occurred on January 22.

Cycle Pictures to Be Taken To-day

Individual and group pictures for se 1934 Cucle are to be taken at Armour today and the remainder of this week. The individual photos are not to be taken at the downtown studio as has been done in the past. Group pictures are to be taken to-day and Wednesday in the gymna-sium. The schedule for the various class, team, and organization pictures is as follows:

Tuosday, February 13th

9:00 Junior Class 9:30 Sophomore Class 10:09 Freshmen Class

10:30 A. S. M. E. 10:45 A. I. E. E. 11:00 W. S. E.

... 14≰55 Indoor Track, Group

12:05 Outdoor Track, Group 12:15 Stray Greeks

Individual pictures are to be taken Thursday and Friday in one of the rooms off the assembly hall in Mission. Although all seniors have had their pictures taken at the downtown studio, those who are eligible for in-dividual photos, as officers of classes and organizations and members o honoraries, are asked to have an additional photo made at school. These

Psychology Is Deadly Weapon in the Hands of This Modern Frankenstein

Editor's Note: With due apologies | spoke almost of disaster. Eattor's Note: With all apologies (or thanks) to Mrs. Shelley for the headlines on this short story, we present Mr. Hoebel's description of a fictional, successful experiment in psychology.

By Harold W. Hoebel

Of course public sentiment was against him. But then O'Lear knew that when he joined Kelly's squad of dry snoopers. Why had he joined? Well, nineteen thirty-two was a fair-

depressed year, and even an ish detective had to eat. "A quick-triggered dry snooper". That's That's what the papers called him, for he had shot and killed Raymond Poule in a raid on Samano's. The jury appeared hard and looked as if it was going to convict him, too. But how was he to know Poule was reaching for a hip-flask and not a reaching for a hip-lisks and not agun? His job had been to protect his chief while the latter conducted the search.. O'Lear had merely been on his toes, just doing his duty.

The court adjourned for the day, asked her. No, she hadrt—nothing Well, that meant another night of except her typewriter cover. "Well, uncertainty, a night of wondering don't," he ordered, and phoned the what tomorrow would bring; and to-police.

In the sparsely settled suburb of place," he said. "Break into one's Oak Row, Simon E. Thompson, real-tor, walked briskly to his office in the morning to find his stenographer already before him. This fact alone did not cause him to quicken his already before him. This fact alone did not cause him to quicken his already rapid stride; she had been early before, but her frantic wavings and excited pointings to the door (Continued on page 3)

She evidently had a right to be excited, for Thompson found his office door badly damaged near the jamb—jimmied, apparently. His key worked, however, and he entered with the quick but cautious step of one expecting and fearing the worst.

Here again he was surprised. Everything seemed in order. The safe! He rushed to it, but it seemed perfectly oblivious to any disaster. Thompson spun the dial and swung open the door; a hasty check showed everything just as he had left it. His desk!—everything in order there also. Filing case?—unmolested. Well, that was strange. Someone

Well, that was strange. Someone immying his way in just to smoke? At that moment a little squeak from his stenographer took him to her desk. She had just uncovered her typewriter, and there, propped in the keys, was a manuscript en

I Killed Raymond Poule.
"Did you touch anything?" he asked her. No, she hadn't—nothing

NEWS STAFF FOR COMING YEAR SELECTED: TO TAKE OVER PUBLICATION AT ONCE

Managing Board Is Made Up of Edwin N. Searl, Richard D. Armsbury, William B. Ahern and Robert J. White

NEW STAFF APPOINTEES ARE EXPERIENCED

Searl, a junior fire protect, to the po-sition of editor-in-chief of the Armour Tech News for the next year mour Teen News for the next year to succeed Norman E. Colburn has been confirmed by the Board of Pub-lications. His appointment and those of the entire staff are to take effect immediately. During the past two and a half years, Searl has been ac-tive on the staff of the News, advancing from reporter to make-up editor, to news editor and now to editor-in-

chief.

Richard D. Armsbury, succeeding
Harold W. A. Davidson as managing
editor, has had previous experience on the sports staff of the News. Most recently he has held down the posi-tion of associate sports editor. Pre-vious to that he had been sports re-

There will be a meeting of the business staff of the News today at five o'clock in the News office, second floor, fourth entrance, Cha-pin Hall. Anyone interested in joining the staff is invited to be present at this meeting or come to the office at two o'clock Thursday.

The following elective courses in English will be given this

Music Clubs Play, Sing at Sherman

Stage Setting a Notable Feature of This Concert

The first concert of the Armour Tech Musical Clubs for this semester Tech Musical Clubs for this semester was presented last Friday noon at the meeting of the Executive Club of Chicago in the Grand Ballroom of the Sherman Hotel. Dr. Hotchkiss, Mr. Allison, and Professor Schommer were guests of honor for the occasion. This concert of the Musical Clubs is especially noteworthy because of the fine stage property that was used. Mr. Erickson, the director of the Musical Clubs is expecial Clubs we excelled the property of the Musical Clubs we excelled the second the property of the Musical Clubs we excelled the property of the Musical Clubs we were also the property of the Musical Clubs were property of the Musical Clubs were property of the Musical Clubs were property that the Musical Clubs were property of the Musical Clubs when the Musical Clubs were property of the Musical Clubs were property of the Musical Clubs were property of the Musical Clubs when the Musical Clubs were property of the Musical Clubs were

sical Clubs, prevailed upon the Sherman Hôtel authorities to leave the stage setting of the Fashion Show, which was recently held in the same which was recently heat in the same room, in its place for use in this con-cert. The setting consisted of a large circular entrance at the level of the

balcony.

For the first half of the fifty minute program the orchestra played : number of varied selections. At the number of varied selections. At the cut at the rear of the stage and on the wing steps to the front of the stage. The second half of the concert was presented by the Glec Club. After the concert, the members of the Musical Club had an enjoyable luncheon.

Broadcast over WGN At 3:15 o'clock in the afternoon of the next day, last Saturday, the Gloc Broadcast over WGN

At 3:15 octobek in the afternoon of
the next day, last Saturday, the Glee
Club broadcasted a fifteen minute
reprogram over station W.G.N. The
search chemists and chemical engi-Club broadcasted a fifteen minute ments made in the past-occase of program over station W.G.N. The sprogram consisted of the following selections: "The Viking Song" by selections: "The Viking Song" by selections: "The Viking Song" by selections: "Sheep, Kentucky have had on the industrial world. Bahe" by Gelible; "Plantation" by The fields of light metals and alloys. Steiner; and "I Love Life" by Man-namely magnesium and aluminum programs. These na-Zucea. The combined organizations are

now preparing for two performances in the near future: one the oft-post-poned concert at the Kankakee High School, and the second at the Bel-mont Hotel on March 16.

The appointment of Edwin N. porter and assistant sports editor. earl, a junior fire protect, to the potion of editor-in-chief of the Ar-Ahern, has had a year and a half of experience on the sports staff, being

experience on the sports start, being for the past year under the guidance of Raymond A. Fleissner to whose post he has now been promoted. Robert J. White, who succeeds Clar-ence Clarkson as business manager, has been serving as advertising man-ager. These four, Searl, Armsbury, Ahern and White constitute the managing board of the News for the com-

aging soard of the News for the con-ing year, and as such, will determine the policy of the paper.

The gathering of news for the pa-per will be handled by L. J. Beckman, newly appointed news editor, and his three assistants, F. D. Cot-terman, R. R. Johnson, and R. S. Kercher. In addition to the assignment cher. In addition to the assignment of stories to the news reporters, these men will judge the news value of the stories in order to determine the weight of headlines to be given and to place the stories in the dummy. The news reporters will be directly responsible to these men. One or two more men in this department may be automated in conditions were all the stories and the stories in the summary of the stories of the st

O. P. Freilinger, who takes the place of E. G. Avery as copy editor, will, with an assistant, check the stories for journalistic style, clearness and grammatical accuracy. J. F. Humiston in the newly created posi-tion of proof editor will fill a need for supervision of the work of proof eading done at the print shop on Saturday morning.

The feature department, beaded by

Saturoay morning.

The feature department, byaded by C. R. Bristol, will include the book reviews, the Steam Shovel, and all similar columns and departments. I. K. Addis will continue editing the Arx News and Henry Levin, the Steam Shovel.

E. F. Mczera, as assistant sports editor, will aid W. B. Ahern in the coverage of sports items and in the general operation of the department. In the business staff, E. W. Schmidt has been appointed circulation manager to replace the two ex-managers, J. F. Schriener and E. A. Svoboda, whom he has been assisting. R. H. Hedin has been appointed to the post of advertising manager, left vacant by the promotion of White to busi-

or according manager, set valcant by the promotion of White to business manager.

Although no longer officially connected with the News, the retiring managing board will be available to act in an advisory capacity as un-usual problems arise.

McCormack Talks at Loop Meeting

"Chemical Engineering Contribu-"Chemical Engineering Contribu-tions to Business" was the subject of a lecture given Monday evening, Feb-tuary 5, by Professor Harry McCor-mack, head of the department of themical engineering, before a meet-ing of the Western Society of Engi-neers. The talk was one of a series of science lectures which the society is heaving this winter. is hearing this winter.

The fields of light metals and alloys, namely magnesium and aluminum alloys; cellulose products, consisting of cellophane and artificial silk; syn-thetic plastics and molded materials; synthetic organic solvents; and cov-cring and protective materials were the important fields discussed in the lecture.
