

Program for Junior Week Is Completed

Striving to make this year's Junior Week more interesting than it has ever been, the junior marshalls have most of the necessary preparations under way. A tentative program featuring new events is scheduled for May 14 to 18.

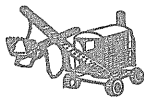

Open House Held May 14
Open House will be held on Monday evening, while Tuesday's preliminary events include the pentathlon, and softball preliminaries. The softball finals, interfraternity relays, a baseball game with North Central, and the annual spring concert will take place Wednesday, while the interfraternity track meet will be on Thursday.

Friday's events include the interclass relays, a baseball contest or tug-of-war between seniors and juniors, the class rush between the sophomores and freshmen, the interfraternity circus stunts, and will wind up with the Junior Formal.

Will Award Place, Show Ribbons

Instead of having only one award in the pentathlon, ribbons will be given to those finishing second and third. The softball games which will be strictly interclass will feature fast pitching, a winner to be decided after 3 games.

THE STEAM SHOVEL

A bomb tossed by some freshman grenadiers in the freshman drafting room missed taking effect upon Chuck Tuma by about an inch and three-eighths. The bomb was in the shape of a bag filled with water. And Chuck says he wouldn't have moved as he did, but he just took a bath the day before.

When it came to thoroughness, ROY WITTEKINDT has no competitors. ROY turned in two finals for one certain physics experiment, just to make sure he'd get one accepted. Well, the first one was O. K., but now he's wondering what he's going to do in case the second one gets marked up.

Believe it or not, "Daan" Earl W. Gossweiler got the mumps, and so the solicitous senior mechs sent him a telegram telling him that they were sending him a nice wholesome barrel of dill pickles to build up his resistance... and "Mumps the word", sez they.

Al (Lugan) Lauchiskis and Emil (Check and double Check) Adamec were accusing each other of tying knots in each other's pants in the field house. However, Dick Tracy informs us that he's sure they both were framed!

Harold W. A. Davidson had better get a new alarm clock or else learn to check the readings of his old one. This business of getting up at 7:20 and arriving at school at 7:10 is bewildering, even to an engineer.

SIDELINES

(Continued from page 1)

week Japanese newspapers have been filled with articles declaring that the inefficiency of the American naval forces was shown by the fact that it required 47 hours for the fleet to pass through the Panama canal. Why is Japan interested in the efficiency of the United States naval forces? It must mean something to her.

ON FRIDAY, May 11, the Armour Players will present the three-act play entitled "The Romanancers." We are in a position to inform you that this production will be the best ever presented at Armour Tech, and is worthy of full student attendance. Perhaps if a few nickles intended for the candy counter were directed toward the purchase of tickets, a one-hundred per cent attendance would result.

The Armour players have supported you in entertainment. It's your turn to make it a fifty-fifty proposition. Support the players—see "The Romanancers."

Dean of University Is Graduate of Armour

The College of Engineering of the University of Oklahoma is gaining fame as an institute which is steadily producing well-developed, competent engineers. Dean of the school of engineering is James Huston Felgar, Armour '05. After a year of graduate study at Armour he went to the University of Oklahoma as an instructor in mechanical engineering. In 1911 he received a M. E. degree from Armour, and in 1929 a D. Sc. degree.

The course at the University of Oklahoma closely resembles the curriculum at Armour, with all students following the same program of studies in the freshman year, and then branching out into the various departments.

Fraternity Notes

PHI KAPPA SIGMA

Last week the election of officers was held and the results are as follows:

George W. Wheaton, president; Louis W. Biegler, vice-president; Arthur Marow, treasurer; Willard C. McCarty, recording secretary; Edwin J. Skeppstrom, corresponding secretary; Charles R. Ford and Frank A. Hefner, sergeants-at-arms; Harold E. Stehman, social chairman; William H. Fogle, house manager.

Plans for the dance to be held May 5 are in full swing and the Social Chairman and committee promise to make the event "different."

Pledge Brother Baker has returned to school after a week of illness. Welcome back!

The baseball team has been putting in strenuous practice under the

able eye of Don Jacobson. He seems to believe that the outlook is very rosy. Hope you're right, Jake!

THETA XI

The annual Founder's Day banquet was held on Friday, April 27, at the Yale-Princeton-Harvard Club. This is one of the biggest events of the year, and was well attended by the active members. There was also a large turnout of alumni and members of the other chapters in the Chicago area. The banquet was one of the best to date, and the committee in charge is to be congratulated on its success.

Brother Johannsen and Brother Davidson, president and secretary of the Grand Lodge, visited the house last week. Brothers Russ Long and Walsh Tyler were also in for a visit.

The ping-pong team put up a good fight, but lost the final match of the series with Triangle. The score was 3-2.

We have started practice for the Interfraternity Slug, and are out to repeat our victory of last year.

DELTA TAU DELTA

Gamma Beta's ping-pong team defeated the Phi Kaps last Wednesday night, and we are now preparing for our match with Triangle in the finals.

All of those present at the dance last Saturday enjoyed themselves very much.

The house is anticipating the annual banquet which is to be held May 10. The banquet is being held to celebrate Gamma Beta's thirty-third birthday. A large number of alumni are expected to be present.

Baseball practice is being continued as usual. A practice game with Phi Kappa Sigma to be played to-night.

Four Faculty Members Witness Gibbs Award

For his distinguished work in the discovery of "heavy hydrogen" Dr. H. C. Urey was presented last week with the Willard E. Gibbs medal. The ceremonies, which were held at the Stevens Hotel, were witnessed by President Hotchkiss and Professors Freud, Tibbals, and Doubt.

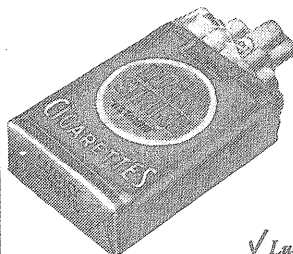

The clean Center Leaves are the mildest leaves

They Taste Better!

Luckies are all-ways kind to your throat

WHEREVER the finest tobaccos grow—in our own Southland, in Turkey, in Greece—all over the world, we gather the very Cream of the tobacco Crops for Lucky Strike. And that means only the clean center leaves. The center leaves are the mildest leaves—they taste better and farmers are paid higher prices for them. These clean center leaves are the only ones used

in making Luckies. Then "It's toasted"—for throat protection. And every Lucky is fully packed with these choice tobaccos—made round and firm, free from loose ends—that's why Luckies "keep in condition"—why you'll find that Luckies do not dry out—an important point to every smoker. Naturally, Luckies are always in all-ways kind to your throat.
