Advertising Manager.....R. H. Hedin
Business Assistant.....E. F. Dudley,
E. Simok, F. A. Wertzler.

Vol. XIII. May 29, 1934 No. 16

Good-bye, Armour?

Congratulations, graduating seniors! Your four years of college life are over and you are now about to enter the fields of engineering for which you have been training. You have completed your first task and are now, supposedly at least, equipped with the necessary tools and extras which should enable you to make a success in the business world.

For the last four years, Armour has occupied your minds for the major portion of your waking hours. It is here that you have spent the four most cherished years of your life, or so alumni say. It is here that you have received the guidance of men experienced in the various fields of engineering; and it is here that your thoughts will return when you think of college days.

In your daily school routine you have made contacts with the deans and professors who are all members of the Armour Alumni association, an important Armour organization. This association has played an important part in your school career, a fact that is often overlooked.

First of all they have placed before the public the facts that Armour is an outstanding engineering college of high repute and that Armour graduates are qualified men. They have contributed in a large part to the support and maintenance of the school. In their meetings, the association has served to bring into close contact old and new classmates, professors, deans, directors, and fraternity brothers. In other words, this association enables the graduates of the school to maintain their previous connections and to keep in close contact with recent developments in the curriculum of the Institute.

For some reason there is an idea which prevails among graduates that the alumni group themselves according to their classes, thus causing divisions in the group as a whole. The prevalence of this idea has caused the association considerable concern due to the fact that they do not want any divisions or distinctions to arise between the old and new alumni. They have been trying for some time to have the graduates enter the association as a body, to have each and every one become acquainted with the old members and in this way break down any artificial barriers existing between the groups. The alumni have hoped that commencement would come to mean the beginning of activity of the graduate in the alumni group.

For this reason primarily, the association has arranged a banquet which is to be held at the Medinah-Michigan Avenue Club Tuesday evening, June 5, at 6:30. Every graduating class of both the Armour Academy and Institute has been working hard to get a good turnout and to give the latest crop of graduates a grand welcome. For your own benefit and enjoyment as well as the furthering of the purpose of the association, you should attend.

"The Slipstick"

Cleave to "The Slipstick"; let the Slapstick fly where it may.

Soda Clerk: "I can't give you further credit, sir. Your bill is bigger now than it should be."
Customer: "I know that. Just make it out for what it should be and I'll pay it."

No? Well, Try It

"There's no difficulty in this world that cannot be overcome."
"Is zat so! Say, did you ever try to push the tooth paste back in the tube?"

If a fellow tries to kiss a woman and gets away with it he's a man; if he tries and doesn't get away with it he's a brute; if he doesn't try but would get away with it if he tried he's a coward; but if he doesn't try and wouldn't have gotten away with it if he tried he's wise.

No Surface Scratch

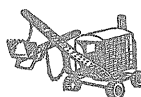

Judge: "Well, here you are again, Rastus."
Rastus: "Yassuh, boss, I've back afore you again, but dis time Ah got a cause."
Judge: "Well, what is it, Rastus?"
Rastus: "Judge, what would you do if someone steal your gal?"
Judge: "I'd cut her company, Rastus."
Rastus: "Dat's jes' what Ah did—and Ah cut him deep!"

"Doesn't it madden you when a girl is slow about getting ready to go to dinner with you?"
"Yes, the longer she takes the hungrier she gets."

So long, fellows, I hope you hit the exams, (and get a job this summer).

R. H.

THE STEAM SHOVEL

And now that NELLE STEELE has crashed the gates of movie land, we suppose NELL is going to get hoity-toity and forget all her senior mech pals. Oh well, life is just a bowl of "BUBBLES."

So Myron Stevens is stepping out, huh! Well, how do you like your taste of fast life, Myron? And don't forget not to burn the candle at both ends.

Pretty lucky for about six or seven junior E. E.'s that the price of eggs is what it is, because if the price was lower the geezers who ditched the E. E. PICNIC would have looked more like scrambled eggs than just the chased egg variety.

And Jake Bard attributes his non-eggness (so far) to his success as an open field runner.

"Hey, I made a mistake!" yells Wattie Davis...and the class promptly wakes up!

Well, boys and Miss Steele, this is the last Steam Shovel paragraph this year, and if you're glad.....
SO ARE WE!

FINAL EXAMINATIONS SATURDAY, JUNE 2, 1934

8:30-10:20	Hydromechanics	Mech. Instr.	Gymnasium
	Applied Mechanics		
	Descriptive Geometry	Foster, Swineford, Seegrist, Sear	Drafting Room 5th Floor, Main
10:30-12:20	General Physics	Physics Instr.	Gymnasium

MONDAY, JUNE 4, 1934

8:30-10:20	Calculus II (A-H)	Math. Instr.	Drafting Room 5th Floor, Main
	Differential Equations		
	Calculus II (I-Z)		
	Calculus I		
	Math. Analysis	Math. Instr.	Gymnasium
	Math. Theory of Investments		
	Steel Construction		
10:30-12:20	Analytic Geometry (A-G)	Math. Instr.	Drafting Room 5th Floor, Main
	Review Algebra		
	Analytic Geometry (H-Z)	Math. Instr.	Gymnasium
	College Algebra		
	Structural Design		
	Masonry and Foundations	Spears	D. Mission
1:10-3:00	Engineering Mechanics	Mech. Instr.	Gymnasium
3:10-5:00	Analytical Chemistry	Chem. Instr.	Gymnasium
	Organic Chemistry	Freud	D. Mission
	Electricity	Freeman	Drafting Room

TUESDAY, JUNE 5, 1934

8:30-10:20	Social Science	Hillhouse, Locking	Gymnasium
	Social Science	Blough	Drafting Room
	Railway and Highway Location	Vagtborg	D. Mission
	Machine Design (M. E. only)	Winston	C. Mission
10:30-12:20	Steam Power Plants	Nachman	A. Mach. Hall
	Engineering Problems		
	Machine Design (non-Mech.)	Soc. Sc. Instr.	Gymnasium
		Swineford	Drafting Room
		Winston	5th Floor, Main

NEWS! Science reveals important new Facts for Smokers!

YOUR ENERGY VARIES DURING THE DAY

Camel Smokers can verify these facts!

A famous New York research laboratory announces a basic discovery that throws new light on your past knowledge of cigarettes. It embodies an "energizing effect"—a quick restoration of the flow of natural body energy...an experience well known to Camel smokers. When you smoke a Camel you feel an

almost immediate relief from fatigue. You have released and made available the latent energy in your body. You've helped your body to help itself. During the day your energy curve hits certain low points. Camels raise your flow of energy...quickly, conveniently, and without jangling your nerves.

There's a "Lift" in CAMELS that drives away Fatigue and Irritability

Feel "all in"? Then light a Camel.

It's cool and fragrant and delightful...but far more important than that, it brings your flow of energy up from the depths!

You feel fatigue vanish. Irritability seems to slip away. And you go back to work—or to play—with the energy that is *naturally* yours.

This experience is no news to Camel smokers. But the explanation is news—and good news—to everyone.

The "lift" you get from smoking Camels is simply a release of the natural latent energy in your body. You have helped your body to help itself...easily, naturally.

Remember this explanation when your energy curve is "down"...times when you're irritable and your brain just doesn't seem to work and you feel too tired to move.

Camel fans smoke frequently—and they can—as often as they like. Camel's costlier tobaccos never get on the nerves.

Keep your flow of energy at a higher level with Camels.

TOO TIRED FOR FUN...and then she smoked a Camel!

CAMELS
Costlier Tobaccos
never get on
your Nerves

Camels are made from finer, MORE EXPENSIVE TOBACCOS—Turkish and Domestic—than any other popular brand.

KNOW THIS FEELING? The feeling of being too "all in" to respond to the gaiety of the crowd? No taste for the pleasure and fun of the sort of social evening that you would ordinarily look forward to? That's one of the many times to light a Camel, enjoying its rich flavor while your flow of natural, healthful energy is restored. You'll like Camels—a carefree blend of costlier tobaccos!
