Vol. XIII No. 4

Armour Institute of Technology, Chicago, Illinois

SIDELINES

By LEROY BECKMAN

JUST RECENTLY, the house of JUST RECENTLY, the house of representatives in Washington made it definitely known that the national government would not enter further into establishing federal competition with private enterprise when it rejected by a president of the property of the president of the property of the president of the property of the president of t with private enterprise when it re-jected by a margin of 165 votes the bill sponsored by Mrs. Franklin D. Roosevelt—providing for the con-struction and operation of a furni-ture factory in the coal fields of West Viccinia. Virginia.

CONSIDERING the project, there was contemplated the construction of a furniture factory to be operated in conjunction with a government sub-sistence homestead development at Reedsville, West Virginia, Idle Coal miners would be given subsistence homesteads and furnished with part time employment in the factory, turning out equipment for federal postoffices throughout the country.

INCLUDED in Mrs. Roosevelt's proposal were two points. A good point and, unfortunately, a bad point. Benefit for the idle coal miner is a topic of considerable extent and is worthy of just consideration. It was only natural that such a proposal be only natural that such a proposal be made after viewing existing condi-tions in that particular field. There is no doubt but what the suggested form of solution would prove to be of benefit to the individual in need, but—how about the private enter-

ESTABLISHING competition with private enterprise on the part of the government is equivalent to breaking the industrial backbone of the nation. In that congressional bill, there existed the problem of either sustaining or destroying the injurious federal competition. To bring a furniture factory to the coal fields would in-volve considerable in federal expendi-tures. Also, to install and maintain desirable management to cope with unskilled labor in the manufacture of the furniture, would indeed be a prob-lem requiring further and extensive

WE CAN SEE where the members of the house of representatives pic-tured the small contemplation collat-eral with the bill as ridiculous in its stand. Private enterprises involved (Continued on page 4)

Dr. Protheroe, of Choral Fame, Dies

Daniel William Protheroe oted Chicago choral leader and com-poser, died suddenly of heart disease, Sunday, February 25, in his home at

5021 Dorchester Avenue, in Chicago. With his death Armour Institute loses one of its oldest and best friends. He and his daughter, Mrs. Helen Axtell, furnished the music at Helen Axtell, furnished the music at Armour commencement exercises for over twenty years. He was an inti-mate friend of Dr. Gunsaulus, the first president of Armour, who afterward brought him to sing at assemblies. For five or six years he was director of the Armour Glee Club.

A Welshman by birth, Dr. Protheroe was considered by the Welsh as their foremost composer and director. He generally made a trip to Wales in the summer and adjudicated at the Eisteddoford, the Welsh National Musical Festivals.

Musical Festivals.

Dr. Protheroe came to the United States in 1886. He received musical degrees from Trinity college, the Grand Conservatory of New York, and was given an honorary degree of doctor of music by the University of Wales. He came to Chicago in the '90's and founded the Welsh Male Choir. He has been director of music at Central Church for twenty-five years, and made the chorus there one of the finest in the country.

Dr. Protheroe was a prolific composer of songs, cantatas, and chorus-

poser of songs, cantatas, and choruses, and many of his compositions are widely known among chorus groups.

Amon_k the most widely known of his compositions is his "Crusader's

Registration Data | F. E. R. A. PROVIDES Shows Small Drop

The dean's office has issued a schedule of the enrollment of students in day school at Armour in which the students are classified according to their department and class. The data discloses that total enrollment is 815 as compared with 845 for last emester.

The department having the great est number of members is the Electrical Department which boasts of 160 adherents. The Mechanicals, Civils, Chemicals, Architects, Fire protects and Science men follow in the order named. There are 12 graduate students this semester. There are four less special students this

semester.

Since all freshmen are taking the same courses, their enrollment in separate departments is only tentative. The engineering and science division is for freshmen who have not yet de-cided which department they are most interested in.

Another department that looks rather meek on the score sheet is the science department. This may be explained by the fact that the science course was inaugurated in September 1932, and consequently there are no juniors or seniors taking it. As yet no freshmen have adopted it. The chemical department seems to be the haven of a majority of the members of the freshman class.

of the freshman class.

Figures covering the registration cents an hour. The money alloted by departments are as follows: elec- will be enough to pay 90 students trical, 160; mechanical, 151; civil, 815 a month, the maximum any one 143; chemical, 142; fire protection, student can earn in a month being 65; architects, 98; seience, 7; and en- \$520, and the minimum \$10. gineering and science, 49.

Seniors Rush to Get New Jewelry

Proof of the fact that the seniors are satisfied with the jewelry selected is found in the large number of orders that have been placed since the inception of the newly designed Armour ring and key. Samples of the jewelry are on dis-

play in the lobby at the present time play in the lobby at the present time and the prices are as follows: a ten carat, eight pennyweight, solid yel-idow or green gold ring is listed at \$12.80. A "two tone" ring, which is a gold ring with about two penny-tion of the play of the play is riced at \$3. A sterling silver ring priced at \$3. A sterling silver ring priced at \$9. will cost \$6.5 will cost \$6.50 while the price of a solid gold key is \$5.50. The above prices include an onyx

stone, but blue spinell, garnet, or ruby stones can be had with an additional cost of \$1.25. The Spies Brothers, a Chicago firm, is furnishing the jewelry, the low price being made possi ble through the cooperation of all the classes, and because the contract was awarded before the Jeweler's Code

signed. All seniors who desire the jewelry All seniors who desire the jewelry are urged to place their orders as soon as possible with any of the following members of the senior jewelry committee: J. A. Bacci, chairman; F. W. Koko, A. J. Morelli, D. J. Mullane, R. P. Nelson, G. M. Reed, and W. E. Robinette. Robinette.

Insurance Lectures Given by A. M. Jens

Dr. Hotchkiss has arranged to have Dr. Hotchkiss has arranged to have Mr. Arthur M. Jens of the class of 04 deliver two lectures to the stu-dent body on life insurance, one on Priday, March 9, and the second on Priday, March 16. Mr. Jens, president of the firm of Jens, Murray and Company and a prominent individual in the insurance field during the past thirty years has been associated with several broker-

been associated with several broker-age concerns. He is a well qualified lecturer.

Mr. Jens graduated from Armour in 1904 with a B. S. in Electrical Engineering, and was awarded the degree of Fire Protection Engineer

EMPLOYMENT FOR EIGHTY STUDENTS

to Do General Men Work Around Institute

NEEDY GIVEN HELP

Funds of the Federal Emergency Relief Administration have made 80 positions available for students of Armour. This is the result of the application made by Armour author-ities to Washington. Funds are also available for students of many other colleges in the United States.

colleges in the United States.

The only requirement of the F.
E. R. A. is that the money be paid
for work that is socially useful. The
work that will be done at Armour
Tech will be beneficial as it will permit work to be done that the Institute has wanted accomplished in the past, but has not had the time or help to do.

To Compile Statistical Data This work will consist of co This work will consist of compil-ing statistical data for the dean's ofing statistical data for the dean fice, library and laboratories; assisting professors, and doing clerical and general work about the campus. Work in the line of athletics will be distributed to certain appointed stu-dents by Professor Schommer.

The remuneration for this work

done by the students will be forty cents an hour. The money alloted will be enough to pay 80 students

Needy Students Selected
There will be no jobs provided by
the F. E. R. A. that will interfere with the present jobs that have been furnished to students by the Armour

authorities. The men for these new jobs will be selected on the basis of need for help and ability to do satisfactory school work. President Hotchkiss is directly re-

sponsible for carrying out the work. He has delegated it to Dean Penn, Dean Heald, and Mr. Allison, who in turn have given authority to certain members of the faculty.

A report must be sent to the local office of the F. E. R. A. in Illinois, in charge of Mr. Reynolds, comprising detailed information on the kind Physics Classes of work done and the money paid out. As far as is known at the pres-ent time, this work will continue until the end of the present school year. No more jobs, however, are available. The quota has been filled, and there are still several applications on file that cannot be taken care of

Tech Musical Clubs Schedule Concerts

The Armour Tech Musical Clubs will continue their series of concerts for this season with two perform-ances scheduled for March 16 and 20. Friday, March 16, the combined organizations will present their second annual concert at the Belmont Hotel. It will be given under the auspices of the Alumni Association of the Chiago Teachers College of which Mrs. eago reachers conege of which aris-Erickson is president. The associa-tion was so satisfied with last year's concert that it decided to make it an annual affair. The concert will begin at 8 o'clock and will last about two hours. After the concert a dance will be held, music for which will be furnished by an eight piece orchestra hired for the occasion.

Tuesday, March 20, both organiza-tions will give a concert in the Grand Ballroom of the Sherman Hotel for the Rotary Club of Chicago. The

working hard both at regular and special rehearsals to make these two

Armour Players Rehearsing Scenes Without Presence of Leading Man

that stemar aggregation, Thomselvan star hams, better known as the Armour Players, is in a quandary. The cause of this crisis is Sidney Miner, cause of this crisis is Sidney Miner, who has fallen a victim to that institution disease, the mumps. This is no minor difficulty, however, because "Sid" has the male lead in "The Romancers," the three act play to be presented in the latter part of April. However, Miner is rapidly memorizing his lines, so that when his quarantine is lifted, he will take his place in the production as if nothing had have not

Those seniors who have not as yet checked their credits are

wested to do so in the dean's of-

Tech Rifle Team Beats Ohio State

The Rifle Club has again proved itself to be one of the best in the sport, by decisively defeating Ohio State university to the tune of 1393-1354 on February 20. The match was 1304 on reprusty 20. In matter with the di via postal and further signifies the superiority of Armour's team over others on a 50 foot range. There is added a moral glory in this victory, as the Ohio sharpshooters are tory, as the Unic snarpsnotcers are members of the Ohio State Univer-sity Military Unit, an organization of exceptional marksmen. E. Rensaty antitary Unit, an organization exceptional marksmen. E. Renstrom and C. Sachs shot two of the best matches of their careers, as attested to by their respective scores of 282 and 284 out of a possible 300. These scores are very seldom exceed-ed in match play.

Seek Big Ten Competition

Several attempts have been made by manager R. Harwood to engage more Big Ten competition, a task which seems difficult to do. Although he has succeeded in the past with lowa and Minnesota (both of these matches ending in Armour's favor) Illinois, Northwestern, Purdue and Wisconsin show a reluctance to en-gage Tech teams which is a tribute

(Continued on page 4)

To Visit Museum

Introducing a little novelty int the ordinary hundrum of the study of the college course, Professor Thompson of the physics department at Armour has arranged for this at Armour has arranged for this year's physics classes to visit the physics museum at the University of Chicago this Friday, March 9. On this day all physics classes and physics laboratory will be dismissed, and all students in physics 201 and 202 will be expected to attend this

exhibition.

To avoid the possibility of large crowds being in the museum for any crowns being in the instant are to travel in small groups to the hall throughout the day. In order that this scheme will work smoothly, the students are to inform Professor Thompson, not later than Wednes-day, of the time they expect to be

at the museum. An important feature of this mu seun, which is modeled after the Deutches Museum in Germany, is that practically all of the exhibibits are working models. Since the apparatus is permanently set up here, much bet-ter results can be obtained from an experiment than is possible in the

Ballroom of the Sherman Hotel for the Rotary Club of Chicago. The museum is in Belfield Hall, concert will begin at 12:15 o'clock and which is on Kimbark avenue because the concert was arranged through Mr. G. L. Treadwell, secretary of the Rotary Club.

Members of the clubs have been working hard both at regular any special rehearsals to make these two concerts as successful as those in the next working hard both at regular any special rehearsals to make these two concerts as successful as those in the past have been. lecture room.

That stellar aggregation, Armour's Kreiman, Carl Shermer, and Harry

Tice are diligently rehearing scenes so that a finished product is assured. In addition, "The Rising of the Moon," the one-act play to be presented to the student body March 23, marks the debut of three new mem-bers of the Armour Players: William Haas, Walter Sobel, and Donald Suhr. The stage manager for this

production is Mike Pantone.

While the principal roles have all been chosen in the above plays, and amine is liked, ne will take me place of the production as if nothing had happened.

Meanwhile the other members of the cast, Clarence Clarkson, Sidney of the cast, Clarence Clarence Clarkson, Sidney of the cast, Clarence Clarkson, Sidney of the cast, Clarence Clarkson, Sidney of the cast, Clarence Clarence Clarence Clarkson, Sidney of the cast, Clarence Clarkson, Si

Frolic Committee To Hold Contest

All of the members of the freshman and sophomore social committees are hard at work, and, as a result, plans are rapidly being com-pleted for the Frosh-Soph Frolic.

The date for the affair has been definitely set at Friday, April 27. Al-though the location for the dance has not been decided upon, the Knicknot been decided upon, the Knick-erbocker Hotel will probably be chos-en. The ballroom under considera-tion at the Knickerbocker, the Oriental room, has several very de-sirable features, among which are an illuminated glass dance floor and a style of architecture which is everything that the room's name im-plies. The committees have not chosen an orchestra as vet, but several popular bands are being considered and the choice will probably be an-nounced in the near future.

Announce Bid Design Contest The joint social committees an-nounce a bid and program contest. The winner will receive a free bid to the Frolic. Entries will be judged as to looks, originality, and practibility.

The following rules will govern the e contest:

1. The contest is open to every-

one. All designs must be submitted to the office of the Dean of Freshmen on or before noon, friday,

4. The design of the bid and the design of the accompanying program cover will consist of individual sketches (each to be governed by rule 3) but both designs will be con sidered as an entry for the purposes of judging.

5. Participants may submit as many entries as they desire.

6. Participants will print clearly on the back of each design the fol-

lowing:

Name

March 9.

b. Address c. Registration number and department.

department.
(This applies only to students of the Institute).
For any further information see Murray Hughes, sophomore social chairman, or Paul Reh, freshman social chairman. cial chairman.

Tau Bete to Sponsor Joint Honorary Dance

Tau Beta Pi, honorary engineering fraternity at Armour, will sponsor an all honorary fraternity dance next Saturday night at the Theta Xi fraternity house.

The honorary fraternities invited are Sphinx, honorary Literary; Eta Kappa Nu. honorary Electrical; Kappa Scarab, honorary Architectural; Phi Lambda Upsilon, honorary Chem-ical; Chi Epsilon, honorary Civil; Salamander, honorary Fire Pro-tection; Pi Tau Sigma, honorary Mechanical; Pi Nu Epsilon, honor-ary Musical; and Honor A. All members of the faculty are also invited to attend.

This is the first time an honorary fraternity has sponsored a dance at

ARCHS PRESENT NEXT INFORMAL DANCE OF YEAR

Event is Scheduled for Coming Friday Evening

BIDS ARE REASONABLE

Opening the second semester's social season, the Armour Architec-tural Society announces formally "A Spring Rendu," a dance to be held at the Tower and Town Club. 111 E. Pearson Court, on March 9, at 9 o'clock. Every effort has been made to present the largest and finest social function run by the Archi-

est social intension in by the Archi-tects in the history of the school. Music by Wilson and Barnett "Rendu," according to the Archs, eans "finished product," and they hears "mished product," and they hope to make this dance finished in every sense of the word. On the thirteenth floor of the Tower and Town Club, a Gothic style, high ceil-inged ballroom, awaits an influx of dancing Armourites. The dance platform will be occupied by the music masters of Wilson and Barnett, a group of proved popularity at Ar-

Beside the music of the orchestra. entertainment will be provided, not-ably the singing of Armour's own tenor, Marshall Nystrom.

The engineers are cordially invit-ed to attend the dance, and may obtain bids in the lobby of the main building during the lunch hour this week. Bids are \$1.25.

Not to Be Table Dance

The ballroom chosen is to be sec-onded by a spacious lounge and a promenade. There will be no tables, as the committee has decided that the chairs in the lounge will be suf-

The poster contest was participated in by a number of Architects. The winning poster is on display in the lobby of the main building.

A number of guests have been invited, among them Dean and Mrs. Heald, Mr. and Mrs. McCaughey, Miss Dodge, Mr. and Mrs. Saunders, Mr. and Mrs. Spears, and Mr. and

o. The nnished designs must not exceed the bounds of a rectangle 3 A.S.M.E. Arranges inches by 4 inches. 4. The design of the bid and the Inspection Trips Inspection Trips

Student members of the Armour branch of the American Society of Mechanical Engineers held a business meeting last Friday under the direc-tion of president R. W. Suman, and made arrangements for an inspection trip to be held on Thursday, March

Visit Large Plant

Visit Large Plant
The inspection trip will start at
about nine o'clock. Thursday morning at the Peoples Gas, Light, and
Coke Company's pumping station
which is located at 98th Street and
Baltimore avenue. The equipment in
this pumping station is among the
largest and most modern in the country and features a new type of water-less container and a high grade com-

pressor.

The Ford Motor Company and the Great takes Drop Forge Company will be visited in the afternoon. The men will divide into two sections, and alternate so that each group can be handled easily.

handled easily. Classes of the junior and s mechanicals will be excused for the entire day for this inspection trip. All members of the mechanical de-partment are invited to attend.

Mrs. Huntley Very Ill In St. Luke's Hospital

Bedridden for ten months with a rheumatic affliction, Mrs. Huntley, wife of Professor Huntley, shows only slight improvement. Returning only sight improvement, seturning from the Mayo Brothers Institution at Rochester, Minnesota, the patient entered St. Luke's Hospital and is there at present. The faculty and student body sincerely hope for Mrs. Huntley's speedy recovery
