

THE STEAM SHOVEL

The soph electricals fear that their gift of memorandum pencil to Professor Richardson was not fully appreciated. While the original purpose of the gift was to provide a pencil which the estimable prof could not fail to find readily, the suffering sophs are afraid the pencil will be used too readily in marking quizzes. Won't some fearless Tech-wack please retrieve the dangerous weapon?

Pipsqueak Hoyer, Junior, had Archie Anders at his feet!... as Archie told Hoyer a pair of shoes at Cutler's. (Ed. Note) This is not an advertisement.

Half the seniors are worried about graduating—they don't want to leave the gym crew. But maybe Bill Kraft will relent and give them credit for ping pong or bridge.

Flash from the civil drafting room. Senior civils discover what Jimmie C. Castanes' middle initial stands for. C for Casanova. And if you don't believe it, just ask Helen.

WHEATON AND BIEGLER had their first actual experience with fire prevention last week. The boys finally came through, but they're still looking for the "vilyuns" that emptied their fire extinguisher.

MATRIMONIAL BUREAU AND ADVICE TO THE LOVELORN, CONSOLIDATED.

Dear Matrimonial Bureau: I wish to notify you that Sadie from Summit has no designs on the "tall, dark, handsome, etc." I merely thought him a good type for the Arab Siskels I've been raving about to my pupils in geography (the kiddies are on Arabia). So please put the bashful Arab at ease—he doesn't have to miss his regular street car any more. (Signed) Sadie from Summit.

Dear Sadie: Why Sadie, are you accusing an Armourite of being bashful? And the Arab hasn't missed any street cars intentionally. Since he heard you think he's an Arabian, he's been so busy learning how to ride a horse, he hasn't had a chance to come to school. But the geezer promised me confidentially to come down on his regular car starting tomorrow. So Abyssinia, Sadie.

Love Editor.

Dear Matrimonial Bureau: My father just bought me a new Cadillac for my birthday, and I would like to get a nice handsome Armourite with a mustache to go with it. Can you recommend one to me?

(Signed) Sally of Cicero.

Dear Sally: Armourites don't have mustaches. But if you're not kidding about that Cadillac, we'll stage a mustache growing contest or maybe you'd rather have some ready made professional mustaches? By the way, which birthday is it?

Love Editor.

SIDELINES

(Continued from page 1)
together with absolute folly. Consider the present army in conflict. Victory in the air would be a desirable factor, but instead of losses being recorded as "army plane shot down" present indications would justify the recordings as "army plane falls down"—the pilots, army trained, can't even maintain so much as a straight course in flight. National defense—its flaws protrude rather sharply.

...
The formulation of plans for an exhibit of Armour Institute at A Century of Progress Exposition is indeed a step in the right direction toward making known the why and whereof of an engineering education. To portray more specifically the part played by the Institute in the local industrial system, would be the highest objective desired. The student body looks forward with interest to the objectives of the exhibit, and the administration should rest assured that cooperation will be extended from that source.

Arx News

Yesterday was a big day for our class B archs. These juniors have been making the most of their time and presented to the jury "the best summer residences ever designed." The sophs turned in their projects Monday and are still "praying."

"CHISELER" SCHWARTZ, who sometimes answers to the name of Ray Schwab, won the prize in Monday's modeling problem. The award—he has to chisel his design out of a solid piece of stone. The time limit—say about a year or more, Ray? None other than ADREANI won the award in the Thursday modeling class. Let's see how good you chiselers are now!

Last week seemed to be a week for falls. Mrs. Sanders fell down some stairs and not one but three handsome gentlemen came to her rescue. Her injuries were but a few bruises and she is again helping the students find books.

Miss Rawls the other day, helped the library to look like a young hospital. She had a very bad toothache which swelled her jaw until it looked like she had "two bits" worth of "chaw" in her mouth.

Yours truly broke all existing records for falling off stoves in life, the other day. The number—just five. Don't worry boys, I'll try to do a little better next time.

And the frosh are kept busy on their composition renderings. The seniors took their IV course last Saturday. The subject was "A Small Catholic Chapel." If I must say so, they turned out some darn good sketches.

B. R. Buchhauser doesn't get this mech-i-nickel equipment it seems. What's the matter Buch, won't you tell your daddy?

Snooping Sam.

The Honoraries

ETA KAPPA NU
Honorary Electrical Engineering

Eta Kappa Nu, national honorary electrical engineering fraternity, was organized by a group of students in the department of electrical engineering at the University of Illinois on October 28, 1904. During the year 1909 students in the electrical engineering department at Armour petitioned Eta Kappa Nu and on May 4, 1909 the Delta chapter at Armour was chartered and is, today, a member of a society that is composed of twenty-two active chapters and nine alumni chapters.

Eta Kappa Nu has as its purpose the bringing together of those who by their attainments in college or in professional work have manifested a deep interest and marked ability in electrical engineering. The union is intended to bestow mutual benefits by binding together the outstanding members of each class.

The Election of Members

The election of candidates to membership in Eta Kappa Nu is based on scholarship as a prime requisite and secondarily the interest and leadership shown by the candidates outside the classroom, or it is the standard of scholarship defined in its broadest sense.

The twenty-ninth national convention of Eta Kappa Nu was held last October 20 and 21 with the Armour chapter as the host. These conventions are held annually and the representatives from the active and alumni chapters are present to lay the plans for the forthcoming year. The business transactions were carried out in the Allerton Hotel, the headquarters of the convention, and the remainder of the time was spent

Fraternity Notes

THETA XI

Alpha Gamma of Theta Xi takes great pleasure in announcing the formal initiation of the following men on Saturday, March 17:

Harold Aebischer
John Graf
John Roberts
John Schultz
Arthur Wobig
Arting Wolf

and in the pledging of Fred Anderson.

Interfraternity ping-pong competition began with a four to one victory over Phi Pi Phi last Friday. The match consisted of three games of

in showing the out-of-town guests through the World's Fair.

Chapter Has Yearly Contest

Each year an essay contest open to the sophomore class in electrical engineering is conducted by the society, the winner of the contest being presented with a "Standard Handbook of Electrical Engineering" as a prize for his endeavors. Last year's winner, Leo Galbraith, wrote the prize winning essay, "Photoelectric Cells and Their Applications," and it is to be read in the current issue of the Armour Engineer.

There are two honorary members of Eta Kappa Nu at Armour; they are Professors Freeman and Snow. The faculty members are Professors Morston, Richardson, and Teach; Professor Richardson, a graduate of the class of 1924, was president of the Delta chapter during his senior year.

The active members of Delta chapter are: P. J. Thompson, president, S. J. Lehmann, G. F. Graham, W. W. Laemmer, E. G. Lundin, T. F. Murphy, and J. Pawlowski, the seniors. The juniors are W. B. Abern, A. M. Wolf, and D. E. Young.

singles and two of doubles. The singles were played by Brothers Christensen, Korish and Reed. The doubles teams were Korish and Reed, and Kreft and Stevens.

PHI KAPPA SIGMA

The house won their first match in the inter-fraternity ping-pong tournament by defeating Rho Delta Rho, last Thursday night, March 15. The team was composed of Louis Bieglar, Art Marvay, Bill Savage, Eddie Skeppstrom and "Butch" Stehman.

The Alpha Epsilon chapter had the extreme pleasure of having Brother "Artie" Jens, A. E. '04 for lunch Friday, March 16, after his talk on Life Insurance.

Brother Bob Van Dyke is now working with a downtown law office and brother Johnny Hufschmidt is working with the CWA in Milwaukee.

DELTA TAU DELTA

The first round of the ping-pong tournament is over and, being the victors, we are looking forward to meeting our next opponents. The team is practicing hard and will be in even better shape for the next match.

Brother Harwood of Gamma Beta dropped in at the house last Tuesday evening and joined us in our meeting. The chapter hopes that he will call again soon and that he has set an example for some of the other alumni we haven't seen for some time.

BETA PSI

The new ping-pong table installed last week, has seen quite a bit of service. The match in which Lyford of Triangle and Wittekindt participated, was quite humorous to watch. The billiard tournament has entered the semi-finals and some good

games are promised. Brother Stevens may do big things, even if he is little.

We offer our congratulations to brother Morrison on his being pledged by Salamander, honorary fire protection engineering fraternity.

Alpha chapter will present their Black and Gold dance at the Lake Shore Athletic Club on March 31. Music will be furnished by George Devron's orchestra.

TRIANGLE

Last Friday evening, the newly elected chapter of Triangle, Kappa Phi Gamma, entertained the Armour chapter at their house on the Northwestern campus.

Last week we won our first round in the ping-pong tournament by eliminating Beta Psi. Our next games are with Theta Xi.

SIGMA ALPHA MU

A house party, which was attended by the entire chapter as well as several alumni, was held a week ago last Saturday.

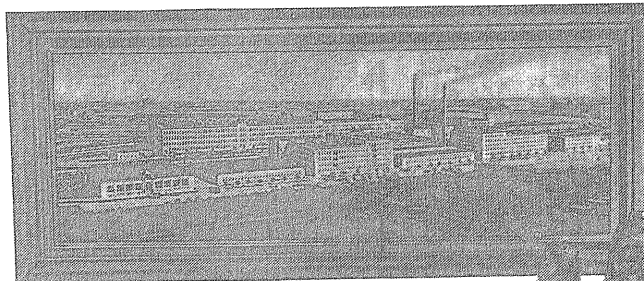

Last Sunday, at a stag get-together, it was decided that black-jack should never be played with a pin-ochle deck. This decision was reached after 30 minutes playing and it is thought that the discovery will revolutionize the pastime.

RHO DELTA RHO

Rho Delta Rho takes pleasure in announcing the pledging of the following men:

A. Madelovitz, M. E., '36
M. Holland, E. E., '36

The alumni and active chapters will hold a joint meeting March 29. A. Raymond Kats, the noted artist, will be the guest of the evening. He will give a short talk on Hebrew Art.

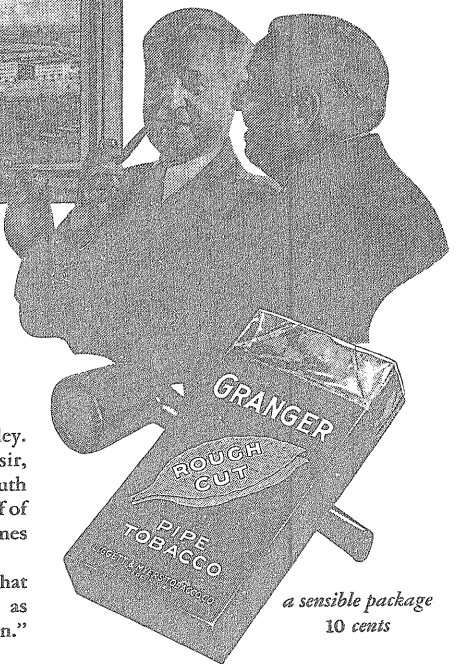

The Liggett & Myers Tobacco Company Plant, St. Louis, Mo. Manufacturers of fine smoking and plug chewing tobaccos.

"Yes sir.. it just makes your mouth water"

"THE next time you go out to St. Louis, I wish you could just go to this factory and see how they make Granger Rough Cut. "I tell you it beats anything you ever saw to watch them age and condition that

old ripe Kentucky Burley. "And aroma—well sir, it just makes your mouth water to get a good whiff of that tobacco when it comes out of those hot ovens. "Everything about that St. Louis factory is just as clean as your own kitchen."

a sensible package
