SIDELINES

By LEROY BECKMAN "OUR PRESENT educational sys tem largely unfits young people to deal with the actual necessities of those who are to earn their own liv-

ing. It takes away self-reliance, begets conceit, and draws attention to gets conceit, and draws attention to what is ornamental rather than what is fundamental." Yes, Thomas Bicknell delivered that quotation in 1884 from a newspaper while discussing "the matter of attacks on the common school." That was in 1884 — what

WITHOUT QUESTION, there do exist some fallacies of one type of another in present educational schemes—but there is no doubt but another schemes—but there is no doubt but what they so exist entirely because of political intervention. Eliminate political "interest" and we have an educational system of the highest degree. And more significant, one not worthy of the quotation related by Thomas Bicknell. When government, good clean government, sponsors edu-cational activities there is every as-surance of desirable results.

to assist needy college students, there own choosing in Section 7-A of the war revealed the work of the United National Industrial Recovery Act. States Commissioner of Education along with that of the Federal Advissions with that of the Federal Advissions or Committee on Emergency Aid in growth of standard unions and of Education. The student aid program company unions which has greatly has provided a hundred thousand augmented the membership in both young men and women with the nec-essary help to continue their advancro learning for the present term, and yet, people are encountered quite fre-quently who denounce this action on ed learning for the present term, and quently who denounce this action on the part of the administration as a misappropriation. They insist that it misappropriation. They make that it would be more proper to feed mouths, instead of the brain. We might inform those people with one-hundred percent sarcasm, that the brain feeds

CONSIDERATION of the student relief solution is worthwhile. rener solution is working. State emergency relief administrations have been authorized to provide part-time jobs at the colleges and universities for needy students up to 10 percent of their regular enrollment of full-time students. The program provides for that employment to the end of the current academic year, but not including the 1934 summer session. Nearly \$7,000,000 are being applied to aid those students who have been compelled to drop out of college for financial reasons and students who have not been able to enter because of no funds. Institutions qualifying under the program are required to be (Continued on page 3)

To Hold Easter Service Sunday

On Easter Sunday Dr. George L. On Laster Sunday II. Courte I. Scherger will conduct a religious Easter service in the Mission. He will deliver the address, and has planned a quiet inspirational service which is sure to be enjoyed by all those attending. The Armour Musical Clubs will furnish appropriate music ate music.

In the past when the Armour Mission Sunday School met, the Easter services were second only to those on Christmas. On Easter Sunday all persons who had ever been connected with the Mission made a special attempt to be present. It was a tra-ditional reunion. It is hoped that many of those members of long ago will come back this Easter and re-new their friendship with Dr. Scher-ger, who has been in charge of services at the Mission for the past

ices at the Mission for the past twenty years.

The Armour Mission was organ-ized and endowed by Phillip D. Ar-mour before Armour institute orig-inated. Mr. Armour himself was present every Sunday at 3 o'clock. The few services now held there are to uphold the traditional standing of the Mission. All persons now or formerly connected with Armour In-stitute or Armour Mission, and their families, are invited to attend the

HOTCHKISS GIVES VIEWS ON LABOR RILL AT HEARING

Opposes Expansion of Labor Board at This Time

MAY BE NEEDED LATER

Following is the substance of tes timony which President Willard E. Hotchkiss of Armour Institute of Technology gave before the United States Senate Committee on Education and Labor on March 15, 1934, in reference to Senate Bill 2926, the so-called Wagner Bill making permanent and increasing the powers of the Labor Board. This testimony is especially pertinent to the threatened strike in the automobile industry which was reported as having been narrowly averted at the time the News went to press.

"This bill, I take it," said Dr.

surance of desirable results,
WHEN FEDERAL Relief Administrator Hopkins made known a plan
to assats needy college students, there
was revealed the words of the transfer of their own choosing in Northon 2.8

"The right of the National Labor Board to intercede in disputes be-tween industry and labor unions is challenged and Bill S-2926 is pro-posed as a remedy for this situation. My own view is that any further leg islation on this subject at this time is likely to make the whole situation worse instead of better. The president already has enormous power to influence in the public interest situa-

tions of this kind.
"Among specific comments which occur to me in reference to Senate Bill S-2926 the following are out-

Magnitude and Scope of Pro-

vides. At the present moment, how-ever, I am inclined to think the dan ger that such government agencies will be unduly multiplied is a danger which the average citizen dreads. Politically as well as logically it apnears to me highly unwise to antici pears to he many divine to another pate the issue by creating at this time so formidable a board as the one provided for in this bill.

2. Definition of an Employee

"The definition is of course in-tended to bar so-called "scabs' from the privileges enjoyed by employees. However, this kind of a definition is a two-edged sword. As I read the bill it would equally bar members of an (Continued on page 3)

Interhonorary Frolic to Be Dinner Dance

At a meeting of the Interhonorary At a meeting of the interioriorary Council it was tentatively decided that the dance to be given in the near future by the honorary fraternities should be a dinner dance. The date should be a dinner dance. The dath has not yet been set, but will prob-ably be announced soon. According to Norman E. Colburn, president of the council, the presidents of Tau Beta Pi, Sphinx, Pi Nu Epsilon, and the various departmental fraternities are busy looking over all of the possible locations for the dance.

Five Men Pledged at Pi Tau Sigma Smoker

Pi Tau Sigma, honorary mechanical engineering fraternity, pledged a number of juniors at a smoker held Thursday evening at the Truss Club

The following men were those upon whom the honor was conferred: J. Birdsong, A. Christoph, M. Fotter, W. Henning, and B. Messinger.

Green Hat Rules Given by Court

The freshman class is hereby informed that those green hats, w were laid aside as old man winter apwere faild aside as out man wheel appeared, are scheduled for reappearance after April 1. This might be a startling revelation to many wearers of the green, but the student body has een fit to retain the custom so recent-

ly introduced at Armour.

The idea was inaugurated at the in sistance of the students last fall, after a public ballot revealed a widespread interest and support. However, it was poorly founded; for actual statutes to which the freshmen and also the zealous upper classmen could be held, did not exist. This spring efforts have been made to renew the custom on a

mour "campus" are presented. From the west side of Wentworth, to the east side of Michigan, and from the north side of 31st to the south side of 35th Street, the freshmen must keep their heads potted.

Adds to Junior Week

Secondly, the freshmen are to keep their green hats on their heads from the first day of school in April until the Frosh-Soph Rush during Junior Week. On this day, if the freshmen win the Rush, they may cease to wear the green pots and deposit them in their chest of college memories. But, if they lose the Rush, they are reof the present school year.

These rules are set forth because it

is helieved they will add to the effectis believed they will add to the elect-iveness of Junior Week and Rush Day. They have been made by the Court of Freshman Control, which was formed by the various class presidents as a result of the student presidents as a result o ballot mentioned above.

The court consists of M. A. Lukas, nan air to remain in a room.

Six Men Pledged to Tau Beta Pi

hall, Tau Beta Pi, honorary engineering fraternity, pledged six men in its semi-annual ceremony. The men pledged were A. J. Anderson and G. T. Korink, seniors, and W. B.

Professor Spears, fraternity faculty advisor, gave a short history of the fraternity and some of the requirements for eligibilty for mem-ship. He stated that to become eligible a student must be in the upper quarter of the senior class or in the upper eighth of the junior class. He must have a good scholastic standing, true integrity and outbeen made to renew the custom on a standard, to be integrity and obtains that might insure its foundation standing character. He must also be as an Armour formality.

Primarily, the bounds of the Artivities.

A.S.M.E. Hears Talk On Air Conditioning

"Applications of Air Conditioning" was the subject of the talk by Mr. Ivan Purinton before the A. S.

M. E. last Friday.
Mr. Purinton, who is sales engineer for the Frigidaire Corporation, was secured through the efforts of Pro-fessor E. S. Libby. His talk was on ungrateful audience. fessor E. S. Libby. His talk was on the application of air conditioning to the specific needs of the public rather than on the theoretical side

involving thermodynamics.

Mr. Purinton gave a definition of air conditioning. "Air conditioning." he said, "is the simultaneous control of temperature, humidity, air motion, air distribution, and air cleansing." on a dry winter day moisture must be added to a dwelling place and on a humid summer day it should be removed. The process of air condi-tioning allows no dust, odors, or stag-

From the two greatest purposes funded and page 3 work efficiently in any season.

"Possibly present trends in the government's industrial activity will ultimately require some such national labor board as this bill pro-Years in Russia, Gives Impressions Henry Levin By Henry Levi

Russia-the land of poet and peasant, vodka and pumpernickel living is low—much lower than that and herring, poor trains and worse in America. Because of the buildroads, no cigarette ads, and women working side by side with menthat is the land that Waldemar Pore, M. E. '30, has returned from after working in an engineering ca-pacity for a Russian railroad for about two years. And as a result of a long and interesting conversation with the twenty-eight year old Armour alumnus, first hand in-formation was gleaned upon such moot points as the standard of living of the Russian people, their cus-toms, their educational policy, the relative position of women in their scheme of things, and the prospects of engineers in the Union of Social-ist Soviet Republics.

ist Soviet Republies.

Traveling as a tourist over a considerable portion of western and southern Russia before accepting a job in Leningrad, Mr. Pore spoke with familiarity of such cities as Moscow, Rostov, and Dnieperpetrovsk. And the truth about Russian and the control of the company of the control of the company of sia, at least as far as one man's opinion can be called truth, lies re between the glowing which George Bernard somewhere Utonia Shaw pictures, and the pitiless sup-pressor of individual effort and hap-piness so universally conceived by

onservatives and opponents.

No atrocities came to Mr. Porc's attention in the course of his two years in the land of the Soviets. In years in the land of the Soviets. In fact, despite every effort on the part of the News reporter to tack such adjectives as 'thrilling', 'hazard-ous' or 'adventurous' onto any phase of Mr. Pore's experiences, the lowed b much traveled engineer still insisted Charlie that excessive use of we

Ahern, A. Lauchiskis, E. N. Searl and G. W. Wheaton, juniors.

Beyond a doubt the standard of ing of large industrial centers and the consequent centralization of population, most of the poorer fam-ilies live crowded together in large apartment buildings. And that there are poorer as well as richer families is a fact—despite the pre-vailing belief that all people in Rus-sia are financially equal. People still get paid in accordance with the work they do-there as elsewhere! Their foods? Well, it's just one round of herring after anotherround of herring after another— and onions for desert. But you can't forget good old vodka — the national drink. If one bases his judgment on the standpoint of pop-ularity, then drinking vodka—and that means drinking to the point of drunkenness - is the national

Conveniences a Rarity

Conveniences a Rarity
Luxuries are unknown there, and even what Americans call conveniences are rarities. Hot and cold running water?—well, lots of cold, but not so hot! Automobiles? Only the officials was them. but not so hot! Automobiles? Only the officials use them—though there are a considerable number of taxis in the cities. The masses of the people have a long time to wait before they can expect to match the American standard of one car for every five persons. The cinema is one form of luxury, how-ever, which is really commonplace. It the Soviets. In effort on the part Foreign movies are nearly as pre-ter to tack such prilling, hazard cause of the expense of buying the rous onto any se experiences, the lowed by at least free year hale, incer still insisted of words would and Dong Fairbanke are still the (Continued on page 3)

Players Present Short Irish Play

By Myron B. Stevens Under the direction of Professor

Under the direction of Professor Walter Hendricks, the Armour Players presented a one act play, "The Rising of the Moon," by Lady Gregory last Friday. The scene of the play was a quay in an Irish scaport, the scenery being set up in such a manner as to give a definite effect of the presence of the sea. The wharf was brought into full view by inclining the platform, and the sea inclining the platform, and the sea and wharf posts were effectively blended to produce the impression desired.

Unusual Reception of Cast

To produce a night scene, blue lights were used, and the moonlight was afforded by an overhead spotwas anorace by an overhead spot-light, ingeniously arranged by J. L. Brenner. Those in charge of pro-ducing the desired stage effects were H. A. Bisbee, E. Hoyer, S. Kreiman, R. P. Lischer, M. Pantone, and R. B. Tague.

Amid a shower of pennies, air planes made from programs, and small pieces of unrecognizable substances, the play was presented. Credit is due to Armour's own croon-er, Walter Sobel, for the way he took

Play Well Presented

The policemen and sergeant pursuit of the fugitive were J. Graf, Jr., J. Haase, and D. Suhr. The ser-geant was the only one who really appeared to enjoy his pipe. These fellows played their parts well, con-sidering the handicaps in the practice and presentation of the play.

The play afforded a pleasure which rarely comes in the routine affairs of Armour. Besides the student body. there were numerous guests present, including some of the professors' wives, and particularly Professor Hendricks' family. The school and the News extend their thanks to the Armour Players for their labors.

Scarab Pledges Five Armour Architects

The Edfou Temple of Scarab, pro Company. An announcement of the pledging of the following men was also made: W. H. Larson, '34, M. C. Forsyth, '35, L. H. Mayfield, '36, I. Viehe-Naess, '36, and W. S. Wieting,

Newly elected officers of Scarab are: R. J. Schwab, president; L. W. Davidson, vice-president; R. E. Esbensen, secretary; B. R. Buchhauser, treasurer; and L. O. Johnson, sergeant-at-arms.

Sophs Are to Place More Jacket Orders

Another chance to obtain jackets will be given the sophomores this week by their jacket committee, which has arranged to place an order for duplicates of the present jackets with a new firm. Orders may be placed in the civil drafting room on Tuesday and Thursday afternoons, or any day

at noon.

If more than 25 orders are placed, the price will be \$5.25, as before, otherwise it will be \$5.50. However, all orders must be placed this week. In the words of John Larson, president of the sophomore class, "Speak (this week) or hold your peace for-

Musical Honorary to Have Smoker Tonight

FRIEDE, HENNING. JONES MADE 1934 JUNIOR WARSHALS

Three Men Honored as Class Plans for Junior Week

DISCUSS FORMAL DANCE

R. L. Friede, W. W. Henning and T. F. Jones were elected 1934 Junior Marshals by popular acclaim as the junior class met to lay the first plans for its official week of activities in May. For the benefit of uninformed green toppers, the Junior Marshals conduct all athletic activities held during Junior Week. These include the interclass and interfraternity relays and other events culminating in the traditional class rush.

Most of the hour was given to discussion regarding the annual junior formal dance. Whether or not it is to be in summer formal or the real "soup and fish" was the point in question, and strong differences of opinion prevented a final decision on the question. The formal, held tra-ditionally on Friday of Junior Week, closes all social events of the school

The type of junior jacket which the class had decided to order was rejected because the price was felt excessive. The old jacket was supexcessive. The old jacket was sup-planted by a new model of garment which will be in a lower price field. It is being supplied by Marshall Field and Company, which organization is making a jacket for a class at North-western University. The Armour jacket will have similar lines, but it will be of a different color.

Vice-President Visits Phi Lambda Upsilon

The national vice-president of Phi Lambda Upsilon, Dr. Coleman of the Iowa State university, paid the local chapter of Phi Lambda Upsilon, honorary chemical engineering society, an official visit. Professor Bentley, the chapter counselor, conducted Dr. Coleman on an inspection tour of the Institute. After the tour an informal meeting of the chapter was held at which current problems and policies were discussed.

Professors McCormack and Bentley Professors McCormack and Bentley then took Dr. Coleman and several of the student members to dinner at the University Club, after which the group toured the club, which has many facilities. Dr. Coleman was then taken to Northwestern University to visit its local chapter.

Milwaukee Alumni Are Active Group

An active Armour alumni association, organized about a year and a half ago, is in existence in Milwau-kee, having for its purpose the fos-tering of good fellowship and the receiving and disseminating of useful and constructive information concerning Armour Institute. During its short life it has held a total of fourteen meetings, varying from noon luncheons to dinner affairs. Several bowling tournaments have been promoted.

promoted.

Some of the guests of the association at its meetings have been Dr. W.

E. Hotchkiss, who spoke at one gathering soon after his inception as president of Armour; Professor Schommer, who has been present at two of the meetings; Dean Heald; and Professor Paul.

Of the approximately fifty Armour Pi Nu Epsilon, honorary musical graduates in the Miwauke region, fraternity, is to hold a smoker this about forty have been active in the evening at the Theta Xi fraternity alumni association. Other alumni house, 3305 S. Michigan Ave, start. groups have organized in various ing at seven-thirty. All active mem-sections of the country, but the Milbers of the fraternity are invited to wakee group claim to be the first attend. This meeting will probably be to organize a permanent seciety with the forerunner of some pledging activity in the near future.
