

By Leroy Beckman

DURING THE past week we have come across the war-cry of the Department of Justice, "Shoot to kill."

WE HAVE heard severe criticism of the Department of Justice, as regards its recent shootings in "cold blood"

ARGUMENT has been well directed in defense of the Department of Justice. We still find individuals willing to admit that "law is right."

ONE FACT remains, fortunately. Whether we argue or not, the Department of Justice still has its duty to perform and will do so at its convenience.

New Instructor for Social Science Dept.

Professor Howard Berolzheimer has been appointed assistant Professor of Social Science to fill the vacancy left by the resignation of Professor Blough.

Mr. Berolzheimer is a graduate of Northwestern university. He is also teaching at Northwestern this semester in the Finance Department.

Professor Berolzheimer has been connected with several business concerns, among which was the Quaker Oats Company. He is also actively connected with the administration of two codes under the NRA, the Roofing Ganule code and the Flexible Insulation code.

Movie Sponsored by Armour Faculty Club

A movie entitled, "The Human Adventure," will be presented by the Armour Faculty Club at the Thorne Hall on McKinlock Campus, Superior street at the lake, Wednesday, December 19.

"The Human Adventure" depicts man's rise from prehistoric time down through the ancient civilizations to the modern age.

Tickets, which are now on sale, are available to all Armour students.

Junior Informal Dance Discussed

At the meeting of the Junior class, held in Science Hall last Thursday, a very spirited discussion of class plans, both social and practical, were held.

The plans for the Junior informal to be held on Jan. 11, 1935 were presented to the class by the social chairman, Don Graham.

The placement of the members of the class, on their graduation from Armour received a great deal of consideration. It was the opinion of a part of the class that a pamphlet, in which a page would be devoted to each member of the class should be sent to individuals and firms in the mid-west employing engineers.

The meeting was adjourned following the election of Rodger Knaus as captain of the class swimming team and of Donald Neal as captain of the junior's track team.

Chi Epsilon Will Hold Convention

Chi Epsilon delegates from all over the country will convene at the University of Illinois on December 15 for their bi-annual meeting.

Armour chapter of Chi Epsilon was the second to be admitted to the fraternity, which now consists of fourteen chapters having a membership numbering more than sixteen hundred.

The national convention, which is held every two years, was last held at the Penn State University Chapter. This year's convention, which will be held at the Triangle House at the University of Illinois, follows an old policy of allowing the various Chapters to act as hosts.

The Armour delegate to the convention will be George Nelson. He has made arrangements with two fellow Chi Epsilon members, J. M. O'Connor and K. O. Stocking, to drive to the convention immediately following the Semi-Annual W. S. E. meeting which is being held at the Triangle House on the eve of December 14.

New Society Formed by Junior Chemicals

"To further friendship of the 1936 class of chemical engineers of the Armour Institute of Technology in a social way, and after commencement to keep alive the friendships we have made," is the object stated in the "By-Laws" of an organization newly formed at Armour by the Junior Chemicals.

The formalities of organization were completed by the adoption of By-Laws, the payment of the initial fee, and the election of officers: Chairman, R. M. Paulsen; Master of Ceremonies, L. W. Robbie; Secretary-Treasurer, H. P. Milleville; Athletic Manager, O. E. Norris.

Although the group as yet has no name, a committee composed of T. M. Gilkison, W. S. Gray, and A. J. Ragan has been appointed by the chairman to find one.

RATING CARDS FOR SENIORS TO ASSIST PLACEMENT OFFICE

Will Contain Data Not Now Included in Records

PROFESSORS TO ASSIST

In a plan being put into effect by the faculty placement committee, headed by Professor Peebles, members of the present Armour senior class, and probably, all Armour students in the future, will be graded not only on their scholastic work, but on such personal characteristics as personality, temperament, health, and physique.

The object of the plan is to provide the placement officer, and through him, prospective employers, with information which, it is expected, will enable them to select the right man for every job with far more accuracy than ever before.

Use Familiar Grading System

Every instructor having senior classes will grade the seniors with whom he has contact on not more than ten personal characteristics, to be listed later. The grades will be on the well known A, B, or C basis, or something equivalent to it.

A complete statement by Professor Peebles follows:

"Among the activities which may properly fall within the sphere of the Placement Committee, one which has received considerable attention thus far is the placement of new graduates in industry. It has been the experience of those members of the committee who have had something to do with placement problems in the past that very often there is a lack of exact information about the various members of a graduating class. Such information is very desirable to enable the Placement Officer to

(Continued on page 5)

Pi Tau Sigma Holds Initiation for Four

Initiation rites were held two weeks ago, for H. Mayerowicz, senior; and W. Alt, F. Cotterman and H. Nachman, juniors, by Pi Tau Sigma, honorary Mechanical Engineering Fraternity, at a banquet held in the Faculty Grill.

Professor Nachman was made an honorary member at the banquet. After the initiations the members retired to the Pi Tau Sigma rooms in Chapin Hall for cards and other games.

Senior Mechanicals Go On Rampage, It's A Hair Raising Hobo Day Now

By Imus Walkontoe

Oh I'm a Hobo but who said I was a Bum? Yes sir! None other than the senior mechanicals have declared Tuesday, December 18, as Hobo Day at Armour. Of course, wise (dumb) cracks will come forth from the balance of the beloved seniors—but the mechanicals can take it.

As to the rules and regulations of the proposed spurge, the following is to be said: beginning with the senior dance held last Friday night, any senior mechanical guilty of applying ye noble razor upon ye beaming countenance will be declared outlawish in nature and said countenance will be made red for quite some time; any senior mechanical who fails to resemble a hobo in attirement on aforementioned date will be labeled an ass and promptly be made to resemble one (not an ass).

Whyfore, and unto what reason for this foolishness, askest thou? Simple (simple) enough. The senior photography committee desires suggestions for pictorial appearance—so the mechs oblige, with overalls and bearded pans.

Honoraries Plan Annual Banquet

Plans are now being developed for the annual interhonorary banquet sponsored by the interhonorary council. The banquet will be held Wednesday evening, January 16 at a place to be decided upon later.

Committees Chosen

The committees in charge of the banquet are as follows: Program Committee, H. J. Zibble and J. R. Lang; Place Committee, J. J. Ahern and W. B. Ahern; and Registration Committee, A. Lauchiskis and G. A. Nelson.

Interhonorary Council

The Interhonorary Council is composed of the presidents of the honor societies. Its purpose is to combine the honor societies in closer friendship and cooperation. The annual interhonorary banquet and interhonorary dance are held under its sponsorship. The council is composed of the following honor societies: Tau Beta Pi, Pi Tau Sigma, Eta Kappa Nu, Chi Epsilon, Phi Lambda Upsilon, Salamander, Pi Nu Epsilon, and Sphinx.

Salamander Admits Five Upperclassmen

Salamander, honorary fire protection engineering fraternity, initiated four seniors and one junior last Wednesday evening at the Phi Kappa Sigma house. The men honored at that time were C. R. Bristol, L. R. Kerlin, W. A. Trudelle, and H. J. Zibble of the senior class, and R. A. Peterson of the junior class.

Immediately following the very impressive initiation ceremony, Professor J. B. Finnegan introduced charter and alumni members of Salamander with a short history of their work in fire protection engineering since they left Armour. The charter members introduced were R. M. Beckwith and R. O. Matson. The other alumni present were H. J. Sannasch, J. T. Even, C. E. Herbst and K. H. Parker. Honorary members at the meeting were J. B. Finnegan, C. P. Holmes, J. V. Parker, O. L. Robinson, and F. Taylor.

ARMOUR BASKETBALL TEAM BEATS SOUTH SIDE COLLEGE TO WIN FIRST GAME 38-26

Game Doubtful During First Half Due to Opposition's Defense; Stage Rally to Net Twelve Baskets

MERZ AND HEIKE LEAD SCORING

By Bob Worcester

Armour's basketball team demonstrated their knowledge of the correct way to start a season by smothering South Side Junior College 38-26 last Thursday.

A strange feature of the opening half of the game was the predominance of free throws in the scoring of Armour while only three baskets were made. The situation was reversed, however, in the rest of the game, as only one free throw was sunk while twelve baskets were made.

First Half Slow

The men from the south side seemed headed toward success when one of their forwards, Conwill, made a basket immediately after the toss-up. Then Merz took the ball from Heike following quickly upon the second toss-up and scored one of the few baskets that Armour could get during the first half.

The invading team had a way of streaking toward their basket and striking quickly; their comparatively low score from such plays was due to the excellent guarding of "Pop" Warner and Dollenmaier.

White the players were resting between halves the extras on the team

(Continued on page 6)

The photography department of the Cycle urges those interested to see J. Bard, staff photographer, at once, about assistant positions.

Initiation Is Held by Eta Kappa Nu

Last Tuesday evening, the honorary Electrical Engineering fraternity, Eta Kappa Nu, held a banquet at the Medinah Club on Michigan Avenue. The meeting was conducted by Mr. H. Tear, president of the Alumni chapter.

Approximately forty alumni were present and all faculty members namely Professors Freeman, Moreton, Richardson, and Snow.

The affair brought the largest turnout in years and its success was generally considered to be due to the efforts of Professor Moreton, the faculty adviser of the fraternity.

Honor A Planning to Lead Pep Meetings

The meeting date of the Honor-A society has been changed from Friday to Wednesday, December 12, at 2:00 o'clock in the Tau Beta Pi fraternity rooms.

An election for the position of secretary-treasurer is to be held at this meeting. The president, John J. Ahern, was secretary-treasurer last year and was automatically placed in his present position this year.

The members of Honor-A are planning to supply pep-meeting leaders. These men will give a little pep talk, before the coming basketball games, sometime at the beginning of a class room period.

Possibilities for the presentation of letters to team members at a general assembly are also to be discussed at this meeting.

Scarab Hears Talk at Annual Pledging

Edfou Temple, Armour's chapter of Scarab, professional architectural fraternity, met at the Architect's club last Thursday for the purpose of pledging five new men.

Following the pledging ceremony, the group adjourned to the dining-room. A representative of General Houses, Inc., Mr. Prunyn, delivered a talk on the possibilities and the future of pre-fabricated houses.

Monte Carlo Smoker to Be Held by W.S.E.

"C'mon there seven!" - "The number 5 ball in the corner pocket!" - "Fifty (?) on the red number five" - "Raise you five and call." are probably only a few of the sounds which will emanate from the Triangle fraternity house next Friday, October 14 at 7:30.

Cards, craps, roulette, birdcage, pool and what have you, will comprise the entertainment. In spite of the huge sums that will exchange hands, the expense will be nominal.

Pi Nu Epsilon, Music Group, Pledges Three

G. W. Ormsby, R. H. Wittekindt, and H. J. Zibble were pledged last Thursday to Pi Nu Epsilon, honorary musical fraternity. Inquisition of the prospective pledges had previously been held on Tuesday, November 27, at the Triangle fraternity house.

Vol. XIV DECEMBER 11, 1934 No. 11

The Freedom of the College Press

Recently, our attention has been arrested by the publicity given to Huey Long's latest maneuver in his domain, Louisiana. This maneuver was the suppression of the college newspaper, the Reveille, at "his school", Louisiana State University.

The exact details of what happened to cause "Hooley" to wax suppressive make a long story, but they are interesting and we can not keep from drawing comparisons and conclusions. Briefly, the situation evolved in the following manner: Mr. Long in one of his generous moments offered the quarterback of the L. S. U. football team a position as state representative in the state legislature (or some office very similar to it). The young man refused the honor. That would have ended the matter if some student had not decided to write a letter to the Reveille criticizing Huey for making such an offer. Huey heard of it; procured a copy of the page proofs while the paper was going to press to make sure the rumors were correct; and then, with his bodyguard, proceeded to the print shop and destroyed all the copies of that issue.

As a result, the staff of the paper resigned; the president of the university, Dr. Smith, suspended several of them from school; and now the paper is under new management.

This situation, along with the material which has appeared in the Chicago daily papers in the last year concerning the freedom of the press, brings to our minds certain ideas and opinions on the relative freedom of the college press and the daily commercial press.

Obviously, the college press can not and should not be as free as the daily press in so far as financial structure and news-gathering organization are concerned. The very nature of the organization and method of subscription to the college paper makes certain freedoms impossible. However, the college press should not be deprived of its right to present student opinions and its own opinions any more than the daily commercial paper should.

It has always been the policy of the *Armour Tech News* to welcome student opinions in the column of the same name, and to declare a few of its own. Since the paper is fundamentally for the students at Armour, who pay for it, we feel they should have their own ideas expressed in it.

We know of one college daily (and there are probably more) which prints on its editorial page words to the effect that opinions expressed in its columns are not necessarily subscribed to by the institution at which the paper is published. This is understood to be the case at Armour also.

The *News* staff feels certain that there is, and will continue to be, ample opportunity for the expression of student opinion on the editorial page of this paper, without a hint of suppression by the administration or a political demagogue, such as the Honorable "Hooley".

"The Slipstick"

Cleave to "The Slipstick"; let
the Slapstick fly where it may.

Now, that all the trees
Have shed their leaves,
And Freshmen
Their green caps,
Yes, winter's here!
And dances, too,
I wonder
How many Seniors
Saw clearly
In Surveying last Saturday.
I wonder ? ? ? ? ?

And then there was the persistent lawyer who spent a whole evening trying to break a girl's will.

"Are they very strict at your college?"
"Huh! Are they? Why, when a man dies in a lecture there they prop him up until the end of the hour."

Sweet Young Thing: "What makes a train run?"
Engineer: "Say, if you had hot coals in your pants you'd run too."

"Where's the cashier?"
"Gone to the races."
"Gone to the races in business hours?"
"Yes, sir, it's his last chance to make the books balance."

MARY POME NO. 1,000,001.

Mary has a little hen—
Its actions are so queer—
It lays a lot when eggs are cheap,
And quits when they get dear.

A real executive is a man who can hand back a letter for a third re-typing to a red-headed stenographer.

A fellow took his girl for a ride. After driving a bit, he stopped the car on a dark and desolate road. The girl then asked him, "Well, what can we speak about?"
The fellow says, "Let's talk about the hereafter."
Perplexed, the girl asked, "Why what is there to discuss about the hereafter?"
With a quick retort the fellow says, "Well, this is what I meant. If I don't get what I'm hereafter you will be hereafter I'm gone."
B. Gamson.

Sonny: "Say, pa, who brings baby elephants, and don't hand me that stork story."

"Why did you run home last night?"
"I was being chaste."

There are meters iambic and meters trochaic,
And meters in musical tone.
But, the meter that's sweeter, completer and neater
Is to "meter" in the moonlight alone.

Professor: "Are you cheating on this examination?"
Student: "No, sir. I was only telling him that his nose was dripping on my paper."

Two couples entered a restaurant. The boys ordered chicken. The girls ordered fish. Fifteen minutes later the waitress entered.

"Shall I serve the fish?" she cried. Whereupon one of the girls answered, "Yes, they look hungry."
R. Weissman.

MARY POME NO. 1,000,002

Mary has a little calf
As clean and white as snow.
She has her dress slit up the side
And that is how I know.

WRONG DIRECTION

Stout Woman: "I want to return this washing machine."
Clerk: "Why, what's wrong with it?"
Stout Woman: "Every time I get in the thing the paddles knock me off my feet."

FICKLE FASHIONS

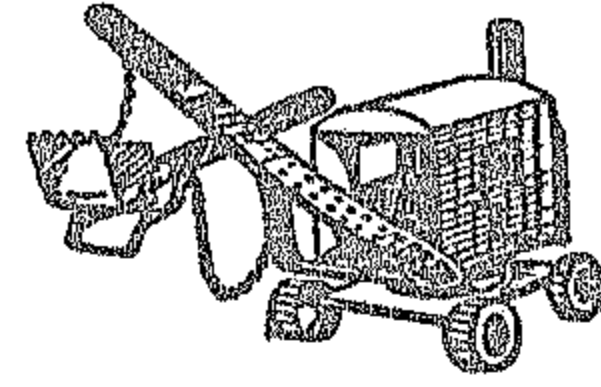

A month ago when I met Pat,
I said to her, "Why, where's your hat?"
"Why, on my head," she said quite flip,
And pointed to a poker chip.
Today I banged in to a hat
Which made me cry, "Why, where is Pat?"
"I'm underneath," so down I bent,
And there she was below a tent.

"Wilbur," said Dorsett, as he caught up with Wilbur on his way back to camp, "are all the rest of the boys out of the woods yet?"
"Yes," replied Wilbur.
"All six of them?"
"Yes, all six of them."
"And they're all safe?"
"Yep."
"Then," said Dorsett, his chest swelling, "I've shot a deer."

There is so much that is bad in the best of us,
And so much that is good in the worst of us
That it doesn't behoove any of us,
To talk about the rest of us.

R. H.

THE STEAM SHOVEL

What's this about our virile professors turning sissy! First Johnny Penn hints for a new Tinker Toy set for Christmas since his old one is worn out—and then we understand Benny Freud recites poetry in the chem. classes!
(Ed. Note) We exempt Wally Hendricks from the above category inasmuch as Wally gets paid for his recitations—and also especially inasmuch as we have to take his class next semester!

And (GEN.) AL RAGAN says that if he ever had to duplicate Robinson Crusoe's feat, he'd want only a copy of Arabian Nights or possibly a volume of BILL GRAY'S "GAY PARISIENNE".

By the way Prof. Snow, why not try floating power so you won't need a sinking fund!

Sven Thure Nylén, esquire, has been going in for some pretty cheap advertising lately. Well, Swede, how do you like this classy advertising. (Sixty cents per column inch . . . chalk it up!)

The junior schmiers, after taking their first—and last—look at the Underwriter's Lab, are organizing a Christmas fund for the purchase of hip boots for the senior fire-protects!

And JOHNNY ROBERTS, JOHNNY AHERN, and BILL (AMBY) TRUDELE threaten to better PAT KENNEDY'S worst efforts. Their

DEPARTSITIS

The Frosh and Sophs of Armour Tech,
With voices loud as thunder,
Have voiced their thanks so loud, by heck!
They tore their pants asunder!
Thanksgiving Day was one day off,
The wars were soon to stop.
The Sophs lined up—the Frosh lined up,
with each other the streets to mop.

Hot and fierce the battle raged,
while pants dropped left and right,
While water bombs expertly gauged
dropped from the building's
height.
Peace was established piece and piece,
They couldn't be reconciled.
For you know, by gosh—that Soph
and Frosh
in the raw are seldom mild.

They surged first in and then right out,
they milled around like ants.
They yelled and cursed 'till their eyes bulged out.
Their breath came in short pants.
The "Popper" had three pair of pants
shot from his manly legs.
The Sophs for once — had spiked their guns,
and tasted the bitter dregs.

Schuman, mighty Tarzan he was mobbed and fed the dirt.
And when he arose again, why whee—
He had on only a shirt!
The latest in men's underwear
Uniquely was displayed.
With many a stare—we watched the air
by a flanneled leg be flayed.

No mercy was shown the trouser seats,
pants were swiped at random.
And shamelessly they roamed the streets,
with trouserless abandon.
Bill Chelgren is a soldier true,
as he proved by his valiant scrap
With the Soph cohorts—he paraded his shorts
of U. S. army drab.

In preparation for next year, the Frosh have delegated a committee of Mech. Engineers to design some pants as rated: Triple-rivited they must be, of rough flexible steel,
With joined cleats—and cast iron seats,
that can stand the battle zeal.

rendition (?) of "HAIL TO THE ORANGE" was particularly juicy.

generally "remember where the face sat". YOU FLATTER US, PROF.

PROF. ART CARPENTER... We'd like to know whether BILL FOGLE broke his glasses while straining his 20" - 60 lb. eye (I).

For Students and Faculty Rail Fares Reduced

1/3

The railroads appreciate the enthusiastic responses of students and faculty to the "College Special" fares which combine economy with the great advantages of rail travel—safety, speed, comfort and convenience.

If you bought one of the reduced fare round-trip tickets when you came to school this Fall, the coupon is good returning home between December 10 and 25. When coming back after the Holiday, be sure to take advantage of this one and one-third fare ticket, the purchase date for which has been extended to January 16. Diagram below shows going and return dates.

GOING TO SCHOOL	RETURNING FROM SCHOOL		
	Christmas 1934	Spring 1935	Close 1935
Round-trip ticket may be purchased at Home Station during any one of the periods named below:	Return portion of ticket may be used to Home Station during any one of the periods named below:		
Dec. 25, 1934-Jan. 16, 1935	Dec. 10-25	Mar. 9-Apr. 20	May 15-June 30
Mar. 15-Apr. 23, 1935		Mar. 9-Apr. 20	May 15-June 30

Going trip must begin on date ticket is purchased—limited to reach school station within ten days. Return trip must begin on date of validation of ticket by railroad agent at school station—limited to reach home station within ten days. Tickets good over same route both ways. Stop-overs will be allowed in each direction. Tickets good in coaches, also in Pullman cars, upon payment of regular Pullman charges. Baggage will be checked under the usual regulations. No certificate or other form of identification necessary.

TRAVEL BY TRAIN

Assuring your comfort with speed
Your convenience with safety.

CENTRAL PASSENGER AND TRUNK LINE ASSOCIATION RAILROADS

19,000 miles per hour

By Long Distance telephone, a sales executive recently "covered" more than 153,000 miles in three business days. He spent a total of eight hours in talking with his agents in 194 cities — using Sequence Calling Service.

This service enables subscribers to place with the Long Distance operator any number of calls on which they wish to talk consecutively. Connections are completed rapidly with a minimum wait between calls.

Sequence Calling is just one of the many services developed to gear the telephone more and more closely to business needs.

Why not visit your folks tonight by telephone? For a lot of pleasure at bargain rates, use station-to-station service after 8:30 P. M.

BELL TELEPHONE SYSTEM

Air Conditioning Topic for A.S.M.E.

Friday's meeting of the A.S.M.E. was made interesting by a talk on the use of water as a refrigerant in modern air conditioning systems. The speaker was B. L. Messinger, a senior who hopes to enter that field upon his graduation.

Of the two methods in use one has proved to be unsuccessful in the Chicago area, but has worked well in the region of Arizona. The reason for this is that dry air of Arizona is able to evaporate and carry with it more water than the damp air of Chicago.

The other method, now being used quite extensively in both unit and air washing systems, is one of particular interest. It makes use of the low boiling point of water under the pressure of one-half an inch of mercury. The boiling point of water at this pressure is about forty degrees, and is sufficiently low for use in air conditioning. In the unit system this water is circulated in coils, through which the air of the room is blown. In the larger systems the cold water is sprayed into a washing chamber through which the air to be conditioned is blown. This air, after being saturated with moisture for that temperature, is mixed with unconditioned air and is then circulated through the building.

Messinger's talk took up most of the period, leaving insufficient time for H. L. Mayerowicz, the other speaker of the day. However, the latter's subject will be heard at the next meeting.

Seniors Present Informal Dance

Last Friday night marked the successful opening of Armour's social season as the seniors held their informal dance at the Shoreland Hotel. Bill Paden's 10-piece orchestra provided superlative music for the more than 150 couples present. The beautiful setting of the Crystal Ballroom heightened the enjoyment of the evening.

Because of the fine work of the social committee, of which W. A. Trudelle is chairman and of which J. J. Ahern, L. A. Cullen, M. C. Forsyth, F. J. Meyer, J. M. O'Connor, and R. H. Wittekindt are members, there was a smooth functioning of the details. The chaperons, Dean and Mrs. Heald, Professor and Mrs. Finnegan, and Professor and Mrs. Ensz, made the evening a cordial one. Enough bids were sold for the affair to cover the expenses incurred and to enrich slightly the class treasury. The success of this will make the social chairmen of the other classes sit up and take notice. At any rate the sophomore social chairman was there to take notice.

Present plans indicate that the sophomores will hold their dance after Christmas. The freshmen plan a smoker shortly after the beginning of next semester, while the juniors plan to have their dance January 11, 1935.

Penn and Snow Talk Before Camera Club

Interest in the Camera club is not lacking among the students at Armour, but a lack of consistency in attending the weekly meetings is in evidence.

Last Tuesday Professors Penn and Snow related some of their experiences in this field. Slides of early Armour sights were presented by the latter, while the former spoke of his experiences while taking pictures in the Tropics.

At each meeting general discussions on cameras and prints are held, while many added features are to be displayed on other occasions.

All meetings are held in the Electrical lecture room at five o'clock and last for an hour at the most. The club wishes to make an appeal to the interested students to attend meetings regularly so that some definite program may be launched for the future.

Many beautiful pictures are being prepared for the club's exhibit at open house. Judging from past exhibits, the next display should be particularly appealing to both students and visitors.

Executive Club to Hear Music Clubs

Christmas Concert to Be Given Dec. 19

Members of the Executive club, meeting at the Hotel Sherman at noon next Friday, will be entertained by the music and the songs of the Armour Tech orchestra and Glee club. This concert, like that for the Rotary club last Tuesday, is a return engagement.

The annual Christmas concert will be presented in the Armour Mission Wednesday morning, Dec. 19. As in the past, visitors are welcome to attend this presentation, although it is mainly for the student body. In anticipation of these two approaching concerts, several new selections are being earnestly prepared.

Another feature of the week before the Christmas Holidays will be the singing of Christmas songs by a group of Glee club members in the several campus buildings.

In regard to the recent concert for the Rotary Club, Mr. G. Erickson, director of the Musical clubs, received a letter of appreciation and thanks from George L. Treadwell, secretary for the Rotarians. The weekly paper of the Rotarians, "The Gyration," reported the concert as follows: "A truly remarkable entertainment program, both vocal and instrumental was staged by the Armour Tech Glee Club . . . and forty piece orchestra, all under the expert direction of Mr. Gordon Erickson. The orchestra regaled us with appropriate selections . . . and the Glee club rendered a number of delightful songs with all the rhythm and harmony of professionals. It was a real treat to hear and see this fine group of gifted young men. . ."

Faculty Women's Club Will Meet Tomorrow

Tomorrow afternoon the wives and daughters of the faculty members of Armour will hold a tea in the Faculty Club rooms. This will be the last meeting of the Women's club this year, so the Christmas theme will be carried out.

The faculty Women's club was organized to promote understanding and friendship among the wives of the faculty. This club cooperates with the Faculty club in various ways. They have a meeting on the second Wednesday of each month.

Anonymous Donor Befriends Library

Five books of fiction were donated to the library last week by a member of the faculty who wishes to keep his identity secret. This action was very welcome to the library because of the fact that its funds are very limited.

The selection of books in this latest donation shows a knowledge of the problems of a library in a purely technical school such as Armour. Too often, the great majority of books are highly technical and specialized. While this is of course necessary, the Armour library being primarily for reference of engineering students, the need for broader reading is being recognized. The popularity non-technical books have enjoyed in the past proves that the student body thoroughly appreciates this fact.

The titles of the recent additions are "The Babyons" by Clemence Dane, "Peppys—His Life and Character" by John Drinkwater, "Angel in the House" by Kathleen Norris, "Zest" by Charles G. Norris, and "Father" by Elizabeth.

Truss Club Installs Stragg As President

At a formal meeting of the Truss Club, Anthony J. Stragg was installed as president of the organization to fill the vacancy left by the withdrawal from school of Harvey Williams, former president.

The Annual Harvest Dance, held November 28, was a success, financially as well as socially.

The Club takes pleasure in announcing the pledging of Melvin Mezek, E.E. '37.

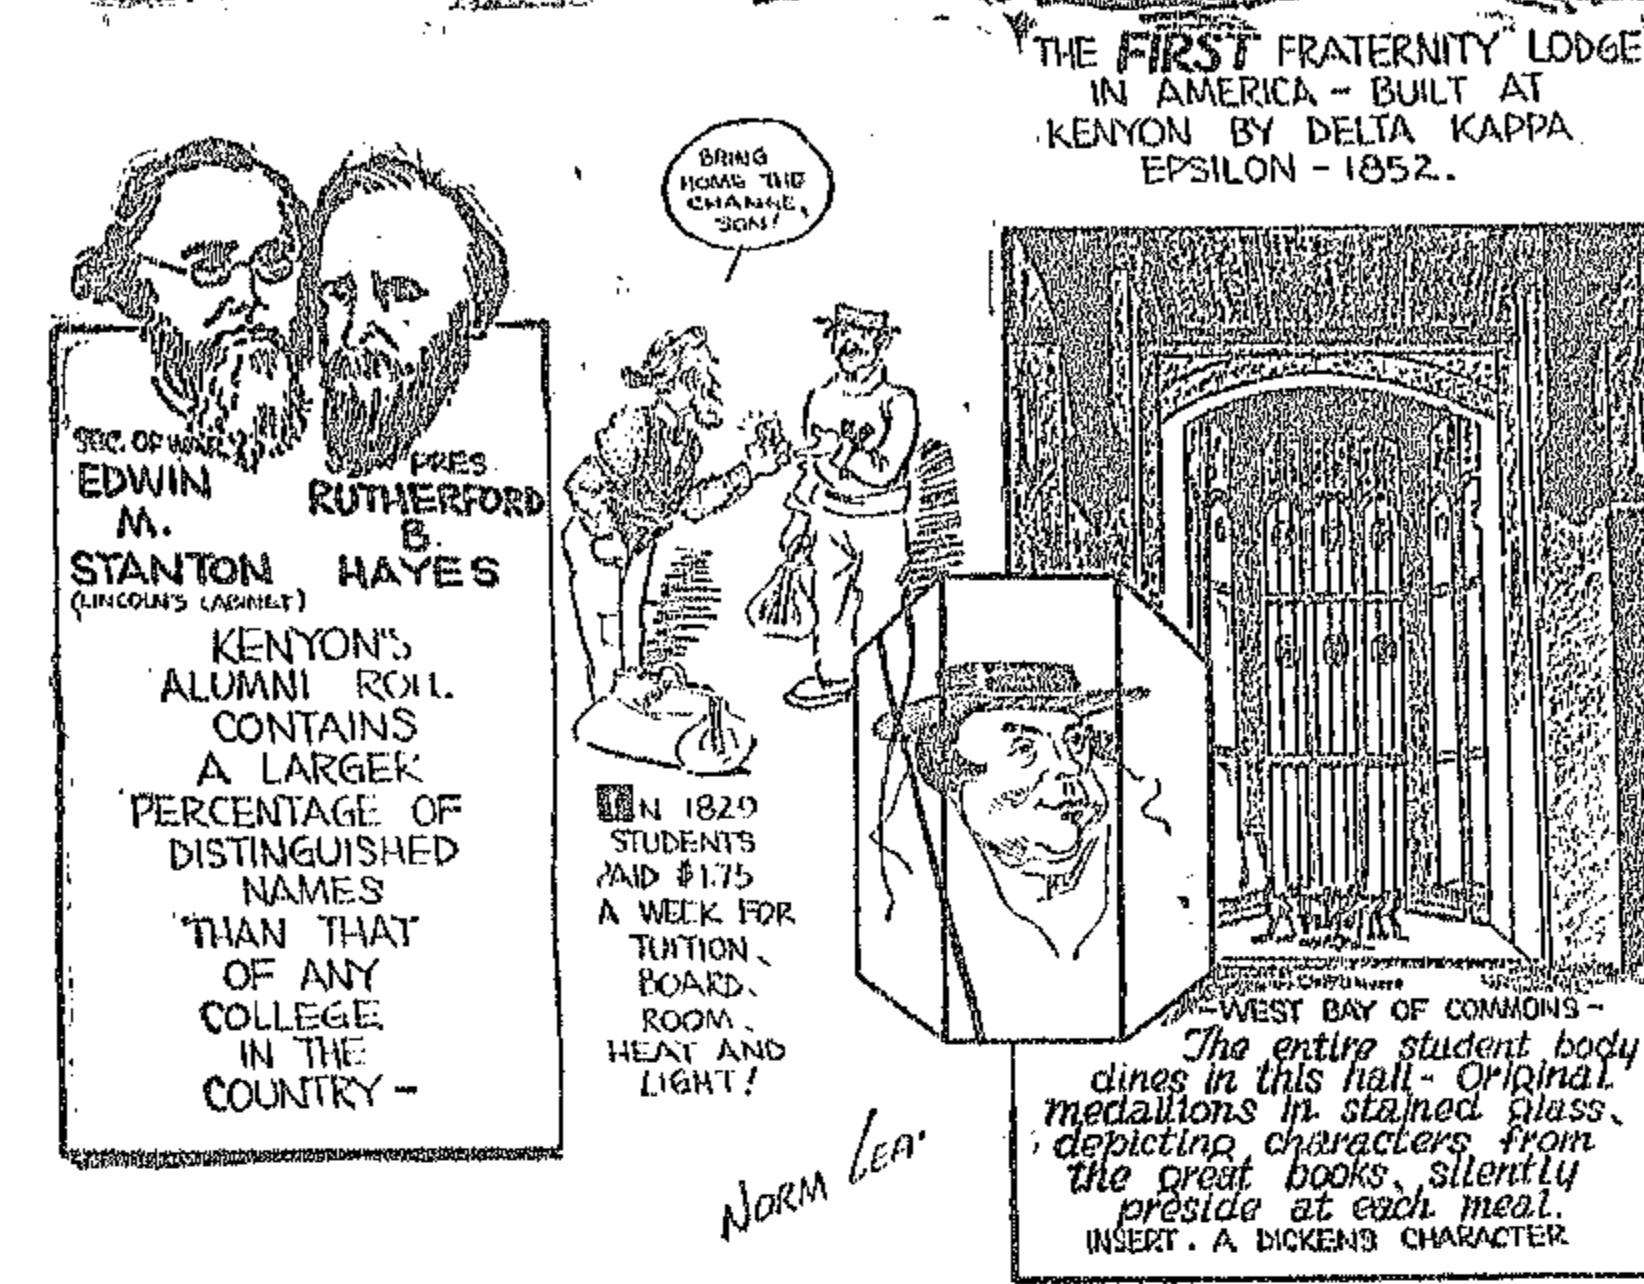

W.S.E. Given Talk on "Chicago Plan"

At the W. S. E. meeting held last Friday morning Mr. E. H. Taylor, Manager of the Chicago Plan Commission, gave an interesting lecture on the progress and influence of the commission in making the city a better place to live in.

The commission began as an outgrowth of the Columbian Exposition in 1893. A movement was originated by the commercial club to maintain the order, beauty, and efficiency of arrangement of conditions which were so prominent in the Exposition. It was, therefore, decided that this commission would present appropriate public improvements to the city council as suggestions.

The first plan that was suggested by the commission related to the control of traffic and street improvements. Although the automobile was in its infancy, the foresight of the commission caused it to plan to widen streets and relieve heavy traffic conditions by having main thoroughfares running outside the loop district. Since the loop was not very accessible, because of the river on the north and west and the large railroad yards on the south, elevated roads were deemed necessary to enter the city. The commission also presented various plans to control the place and number of railway terminals in the loop.

Since the commission was only for the benefit of the public, it had a humanitarian aspect. It is through their efforts that Cook County has about 32,000 acres of forest preserve and almost all of the land of the lake front has been reclaimed. This development provides the people of the city of Chicago and its suburbs with greatly varied types of recreational facilities.

Scholarship Exam To Be Held Jan. 12

Several hundred high school students from the Chicago area will gather at Armour on Saturday, January 12, to compete in examinations for freshman scholarships.

These scholarships are open to graduates of February, 1935, from accredited high schools. They provide tuition for two semesters, beginning with the second semester of the school year, 1934-35.

Awards are to be granted to five

students and will be based not only on the competitive examinations, but also on the candidate's high school record, and his extra curricular activities. A personal interview will also be required of the candidates.

The examinations will cover mathematics, physics, and chemistry. Certain questions in the examinations will be graded according to rules of good English.

Courses are arranged so that the entering student can enter the sophomore year at the beginning of the academic year, 1935-36, by attending the summer session immediately following his first semester.

Math Club Will Hold First Meeting Today

Mathematicians attention! Inasmuch as there are many students at Armour who are mathematically inclined, a mathematics club has been formed for the purpose of formal discussion and informal argument. The first official meeting will be held today in Science Hall at 12:20, and will be open to all who are interested. Officers will be chosen by competitive examination, a novel but effective method. Professor Bibb is to be the probable sponsor.

the Wellman Process
does this — ..it leaves a clean dry ash—no soggy residue or heel in the pipe bowl

GRANGER ROUGH CUT PIPE TOBACCO

... in a common-sense package—10c

In the manufacture of Granger Rough Cut Pipe Tobacco the Wellman Process is used.

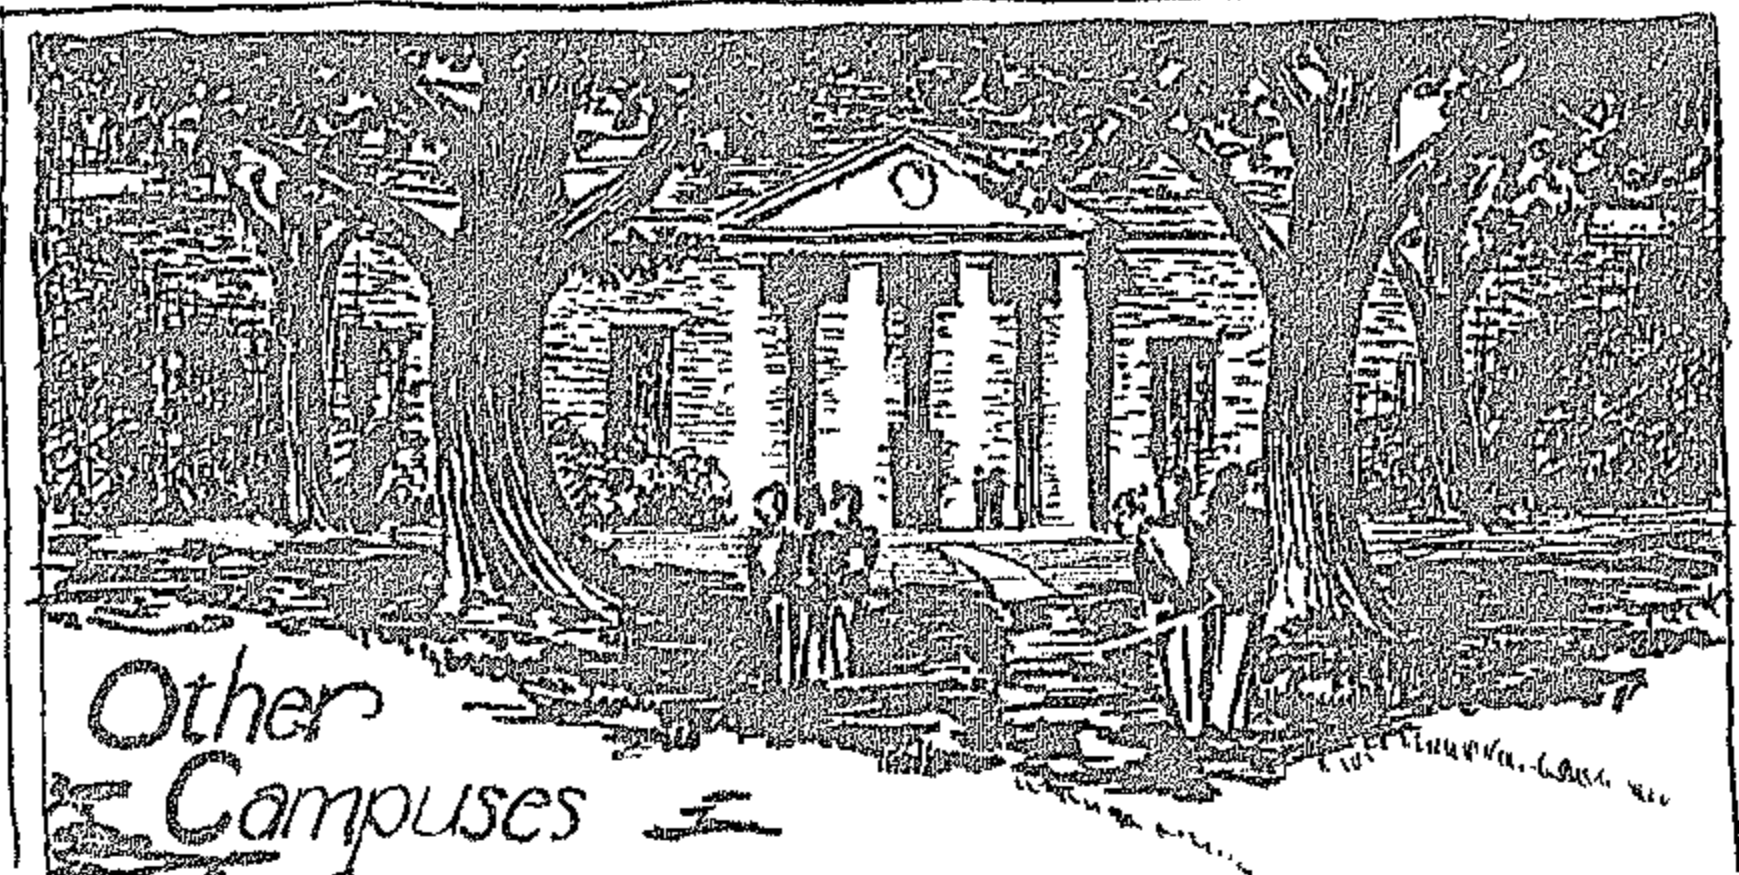

The Wellman Process is different from any other process or method and we believe it gives more enjoyment to pipe smokers.

- ... it gives the tobacco an extra flavor and aroma
- ... it makes the tobacco act right in a pipe—burn slower and smoke cooler
- ... it makes the tobacco milder
- ... it leaves a clean dry ash—no soggy residue or heel in the pipe bowl

LIGGETT & MYERS TOBACCO CO.

We wish in some way we could get every man who smokes a pipe to just try Granger

By John K. Morrison

Here's a story coming from the Ohio State campus: An English professor at that institution called a trembling frosh up to his desk, after the class had been dismissed, and asked him in a harsh voice whether he knew the essay he handed was one of Emerson's. The boy turned white and said in a bitter voice: "I got it from one of my fraternity brothers, but I never thought he could be such a low down cheat!"

In 1916, Minnesota's football team defeated opponents by scores of 47 to 7, 81 to 0, 67 to 0, 54 to 0, and 49 to 0. The victims were North Dakota, South Dakota, Iowa, Wisconsin, and Chicago. Minnesota lost to Illinois 14 to 9 in one of the biggest upsets in sport history.

Carl M. Dozer, a junior at the Carnegie Institute of Technology, is a well known announcer of the Blue network of the National Broadcasting Company and is affiliated with station WCAE of Pittsburgh.

The Florida Times mentions the possibility of the nation feeling a bit more optimistic if the girls would get their fingernails out of the red.

It is the custom of the freshman class at Massachusetts Institute of Technology to give the president of the sophomore class an informal ducking in the nearby Lake Massachusetts.

From the Daily Illini: Brutus: How many herrings did you eat for lunch, Julius? Caesar: Et tu, Brutus.

\$1,786,000 was spent last year by Iowa State undergraduates. 2,245 men spent only \$144,000 on clothes while co-eds numbering 880 squandered \$111,000 on fine feathers. Tobacco companies collected \$20,000 while only \$5,000 were spent for sewing materials, which just goes to show. (NSFA).

To Sherman Minton, '15, goes the distinction of being the first Indiana university graduate ever to gain a seat in the United States Senate from the state of Indiana. He is the second Indiana graduate ever to take a seat in the Senate.

A young married couple is studying biscuit making and law at the University of Washington.

Students of Clarkson and Normal colleges are preparing for an ice carnival to be held in Potsdam, N. Y., in February. A King and Queen of the carnival will be selected. Negotiations have been made with several of the finest skating organizations of the U. S. and Canada to have some of their members participate.

At the University of Southern California when a man catches another man cheating he begins stomping his feet. The whole class begins stomping until the cheater stops his foul tactics.

It is said that this was the origin of the new dance step, the Cheater's Stomp.

From the Detroit Technician: If exercise will eliminate fat, how in the world does a woman get a double chin?

The bewildered frosh of Detroit Institute are complaining. They say the profs. can't make up their minds. One day they say 2 and 3 are 5, and the next day they say 4 and 1 are 5.

One of the most courageous, yet traditionally foolish, frosh of Georgia Tech exercised a little not too good judgment when he decided that he was too good to wear a freshman cap. The sophomores saw

their chance and operated on the dome of the unprotected freshman producing a true masterpiece of art in the form of a major "T", using a pair of barber's shears and a pair of clippers.

The following "terribles" are taken from the Daily Northwestern: Octoroon - A cocoanut cookie which is awful good with ginger ale.

Astronomy - This is the study of mules and their habits.

Physiology - It teaches a fellow how to mix drinks.

Macadam - A French lady.

Exits - The center of the globe. "The world is spinning on its exits."

The minimum cost of attendance at the Massachusetts Institute of Technology at Cambridge is \$1,080 a year.

The origin of the word "jazz", which had heretofore been somewhat of an unknown quantity, has been traced to the slaves of the west coast of Africa by Professor Harold F. Bender, head of the department of Oriental languages at Princeton.

Some very interesting statistical information relating to the educational rank of states is given in the Techno, published by the Kansas State Teacher's college. According to these statistics, Illinois and New Jersey were tied for first place with regard to the number of school days per year with 188.4. The investment in school property per pupil enrolled for Illinois was \$316. New York stood first in the investment column with a value of \$407.

Pug Lund, great Minnesota half-back, will end his football career this year with a missing finger on one hand, a broken thumb on the other, a hip badly battered, a lacerated knee, and with five of his upper front teeth missing. He surely can take it!

"Anthony Adverse", international best seller, was written by Hervey Allen. Sigma Chi, Pittsburgh 1915.

Illinois Normal college has not defeated Illinois Wesleyan in the last 26 years.

Here's a story coming from the University of Oklahoma. The president of the Chi Psi house sent a pledge upstairs to break up a poker game. Two hours later he came down again. When asked why it took him so long he doubtfully replied, "I had only two bits to start with."

Glenn Cunningham, famed University of Kansas miler, entered the University of California this year, where he is assisting Brutus Hamilton, California coach. He is serving without pay, however, in order to preserve his amateur standing.

A 125-piece band and a 182-foot swimming pool, said to be the longest in the world, are Senator Huey P. Long's gifts this year to Louisiana State university, his hobby outside the realm of politics.

F. P. E. S. To Hear Mr. Quackenboss

Mr. Quackenboss, assistant chief engineer of the Western Factory Insurance Association, has been secured as speaker for the next meeting of the Fire Protection Engineering society which is to be held on December 21, a week from next Friday.

Because of his contact with the Western Factory Insurance Association which specializes in high grade sprinklered buildings, Mr. Quackenboss is very well informed on the hazards of special classes of risks.

Fraternity Notes

TRIANGLE

Preparations are being made for our Christmas Dance. Brother Freeman is arranging the event.

We are looking forward with interest to the Interfraternity swimming meet to be held next Tuesday. Brother Schmidt and his team have been practicing rigorously.

Plans are being made to have a joint meeting of the alumni and actives. No date has been set at present.

BETA PSI

We wish to congratulate Brothers Curtis Bristol and Howard Zibble, who were recently initiated into Salamander, honorary fire protection engineering fraternity. Congratulations are also in order for Roy Wittekindt and Howard Zibble, who were pledged to Pi Nu Epsilon, honorary musical fraternity.

Since winter is here to stay, ping-pong and billiard fans are polishing up on their game in anticipation of the coming house championship matches. "4-point" Wittekindt still looks good, but he is going to get some stiff competition from the pledges. Orville Hampton looks good when it comes to batting the little white pill around, so we're warning Bristol in advance.

The Christmas Dance will be held at the house Dec. 22, and will in all probability be an orchestra dance.

The Beta Psi Mother's Club met at the house last Tuesday, and enjoyed a lovely afternoon of games and gossip, as well as helping to see that the house was spick and span.

PHI PI PHI

The annual Thanksgiving Dance held at the house Saturday, Dec. 1, was a gala affair. The members and their guests had a very enjoyable evening, the music being furnished by Bob Kraus and his orchestra and the entertainment by some newly-discovered local talent.

Final preparations are being made for the Father and Son's Smoker to be held at the house Friday evening, Dec. 14.

The Phi Pi's showed their intentions of winning their 17th consecutive championship in interfraternity Basketball by defeating the Phi Kap's 19-11, in its first game of the season.

The second game proved to be a thriller and it had us yelling ourselves hoarse. The Phi Pi's came from behind to nose out the Kappa Deltas 25-23, to enter the finals.

The results of the final game, played with the winner of the Theta Xi-Delta game, were not known as this went to press.

DELTA TAU DELTA

The pledge dance was a great success. The committee under the leadership of N. J. McGuone did splendid work in decorating the house and in securing a good orchestra. A num-

Publicity Group to Circulate Poster

In accordance with their plan to advertise Armour, the publicity committee, headed by Professor C. E. Paul, has prepared posters which are to be sent to Chicago high schools. These posters, which are framed, are two and a half by three feet in size. They contain general information concerning the school, such as the courses offered, requirements for admission, degrees conferred, expenses, scholarship finances, extra curricular activities, and placement opportunities. There are also pictures of the buildings, athletic teams, and some laboratories. They are taken from the Cycle.

One of these posters has already been sent to the new Lane Technical High School, and the committee is expecting to have the others out by the end of this year.

"Emerson Prize" projects and sailed through with a half mention each. In the local judgment these architects rated mentions with the exception of Charlie Siegal, whose recognition was a second medal.

Here's something to really toot about. For the first time, within our memory at least, every project sent to New York rated. The credit for this is due the juniors for their efforts in designing "Duplex" houses. Their credit may be further extended to the amount of forty-seven dollars and some cents—the profit these same juniors accumulated at the ARX DANCE. But something that Ralph EDMUNDS will have to explain more explicitly is how he can account for a total attendance of exactly 377.36 persons!

This week's BEERSMAN BOOP: "Smooth as fuzz on a peach."

Harry BENTLEY is inclined to give very difficult assignments for History sketches. In fact, one proved so baffling to a group of seniors that they actually took a trip to the City Hall to get a glimpse of a living, breathing groined stone vault. Of course, it turned out to be a simple problem in descriptive geometry; but then what do seniors know about "descrip"?

There is in the offing a marvelous opportunity for BLACKMAIL, because of a fellow who carelessly leaves his LOVE notes lying around. One of these came into our possession and it would make excellent reading matter. If the shoe fits, take it off; because if you think you're the man in question, you're a conceited optimist.

If ever you have nothing on your mind, try counting steps from the foot of Adams and Michigan to the senior ARX room. We hate to admit it but yours truly was in that state of mind not so long ago and counted 107. Try it some time; that is, having nothing on your mind. You'll probably enjoy it, because it comes natural. Eagle Eye.

Seniors Rated on Personal Qualities

(Continued from first page)
commend suitable men for any available opening. The Placement Committee will try to meet this need and to this end the cooperation of faculty and students is very earnestly solicited.

Employers Seek Data

"The office of the Registrar has ample data in regard to the scholastic standing of every student, but prospective employers ask many questions for which such records furnish no answer. Questions relating to character, personality, temperament, health, physique, etc. are asked by practically all employers, and we should be in a position to answer them as intelligently as possible.

"Some of the characteristics mentioned above are perhaps a bit intangible and difficult to evaluate. Certainly most of them cannot be graded as if they were examination papers in mathematics. But the thoughtful, well-considered opinion of a number of men who know the new graduate intimately must certainly be better than the unaided judgment of the Placement Officer. It is exactly those opinions, expressed as concisely as possible, that the Placement Committee wishes to secure.

Faculty to Assist

"The committee will soon send a letter to all members of the faculty who have senior classes, asking for

Fencers to Stage Exhibition Shortly

Officers of the Fencing Club for the coming year were chosen recently. The positions of president, manager, and secretary are filled by E. J. Krok, W. K. Emmerich, and P. A. Reh, respectively. The club is officially recognized and pictures of it will appear in the Cycle. Professor H. Fischer is coach and adviser of the organization. Membership fees are not charged, and all interested in the sport are welcome to come to the practice sessions.

Trials are now being held to establish a fencing team. To date, two of four men on the team have been selected; they are E. J. Krok, captain; and G. A. Quandt, assistant captain. W. K. Emmerich has been appointed manager and will arrange a schedule of bouts with other schools, the first of which will be held sometime after the Christmas holidays.

their cooperation in this work. With the letter will go a rating card, listing probably not more than ten personal characteristics, and the professor will be asked to grade each senior in his classes with respect to each item listed. A grade of A, B, or C, or an approximate equivalent, will be asked on each item. For the present such a rating card will be called for only once each year, probably about May 1. If the plan works successfully it may be extended later to include all students and, it is hoped, may become an important part of a well-integrated personnel service.

"When the rating cards are re-

TECHAWKS STAGE WATER CARNIVAL FOR FIRST TIME

The first annual Water Carnival and Interfraternity Swimming Meet will be held Tuesday, December 18, at the convenient hour of 7:45 p. m. Bartlett Pool, the U. of C. home of Tech tank activities, is the place.

The fraternities will compete in seven events: the 40 and 100 yard free style, 40 yard backstroke, 40 yard breast stroke, 160 yard sprint relay, and the 160 yard medley. Also there will be a fancy diving event with the following dives to be executed—plain front, plain back, front jack, back jack, and two optional dives.

The rules set forth by Joe "Bucky" O'Connor, interfraternity manager, state that a limit of two men from each house be entered in the individual events. This is done so that the confusion resulting from a fraternity entering a number of men will

be eliminated. The qualifying heats will be run against time. This will narrow the field down to four qualifiers for the finals.

Entries will be taken until 2:00 p. m. December 17, and must be given to Joe O'Connor. There will be no changes or substitutions permitted after the entry has been accepted.

The interclass events include two relays, a 160-yard sprint relay and a 160-yard medley. The medley is to be contested by two free stylers, one backstroker, and one breaststroke swimmer, each swimming 40 yards. In the sprint event four swimmers will equally share the 160-yard jaunt.

The qualifications necessary for entry are that all men must be members of the class they represent, and that they are not entered twice in the same relay.

Since there is no rule to ban the lettermen from competition a fair idea can be had as to the chances of the upper class teams, that have lettermen as their mainstays.

The seniors have John Ahern, Stan Bernstein and Dinny Moore, bolstered by several promising swimmers such as Bob Lyford and Charley Goldberg.

Juniors Have Capable Men

The juniors will provide plenty of competition with such men as Knaus and Tallafuss, award men on the team, ably supported by several promising candidates for the tank team this year. Knaus has been elected to lead the hopefuls of '36.

The sophs and frosh are more or less dark horses in this meet so that there can not be any predictions as to the merits of their squads. The sophomores are planning to have time trials next Friday.

Armour Wrestlers and Boxers Stage Interclass Tournaments

Wrestling, although a minor sport, has commanded the best response of any of the individual tournaments held thus far. With the varsity schedule opening next week some really fine new and necessary talent has been uncovered for the team and the finals today should include wrestling bouts,—not mere tangles as has often been the case. The boxing tournament first round was also completed last Wednesday and its finals will be held this week also.

In the 135 pound division Braun defeated Freilinger with a time advantage of 4:32. Dunne defeated Wolniak with a fall in 3:15. Dunne, a freshman, displayed plenty of wrestling knowledge, riding his opponent with a figure four which he slipped on and controlled nicely. He used a crotch and chancery in gaining the fall.

Roy Kercher in the 147 pound class earned a 4:03 time advantage from Machulis in their five minute go. Kercher, from last year's squad, had little trouble controlling his man. Weiss and Hughes in the same weight fought for 3 minutes and 15 seconds till Weiss applied a crotch and half-nelson to pin Hughes and gain the right to the finals.

160 pound class saw three snappy

bouts, the first ending with Fleig the Popper rode See to gain a 4:32 time advantage and the decision. Jean Krenl pinned Putignano in 2:30 in nice form. Krenl, Popper, and Fleig have all had some wrestling experience at Armour.

One bout in the heavy class saw Chelgren pin Rest in 2 minutes flat.

Boxing Tourney Results
147 pound class—P. Moore beat Chapin. J. Lindahl beat Rosenthal.

160 pound class—Mahnke beat Anderson.

175 pound class—Olson beat Reuchberg. Stober beat Simeon.

Heavyweight — Fredrickson beat Hook.

DECEMBER

December is a pleasant, steam-heated month whose principal missions are to wind up the calendar and the bank surplus. It is a more agreeable month than November, because we expect the weather to be bad, it is sometimes fine, whereas in November we still hope for pleasant weather and what we get instead cannot be effectively commented upon in polite society.

In December man retires indoors and only uses the outside air when passing through it from one set of radiators to another. The icicle and snowball crops ripen and when a man stands on a street corner waiting for the dim future in the shape of a street car, he looks like an engine with a leaky steam pipe. December is one of the few months in which the human breath is visible and it is worthy of note that the breath is always pure white, (no matter how it tastes to the producer.) Dark brown and sulphur blue exhausts are only figments of literature.

In December, also, the sidewalks begin to become pugnacious. Nothing is more quiet than a sidewalk in July or more unreliable and blood-thirsty than a sidewalk in December after an ice storm. It is a common thing for a December sidewalk to approach a victim stealthily from behind and to leap upon his neck and shoulders with the ferocity of a young tiger. Thousands of people have suffered severe injury by being attacked by hostile sidewalks and porch steps in December. This country is now tolerably free from wolves and Indians, but until the man-eating sidewalk has been subdued, life will still continue to be sadly uncertain.

The most prominent feature of December is Christmas which finally comes to a head on the 25th of the month. This festival has made December one of our most prominent and successful months. The younger half of the world spends the first half of December counting the days until Christmas, and the older portion spends the last half of the month counting its money with a slightly dejected air.

In December the days keep getting shorter, along with the people, until the 21st when winter is formally opened and the sun goes to bed before the banks close. The 21st is the shortest day of the year astronomically, but the 26th is shorter financially by a strong majority.

In December, the owner of the automobile wraps it up in goose grease and moth balls and packs it away until spring. This has made December a delightful month in many respects, and has increased greatly the esteem in which it is held by pedestrians.

P. S.

FEELING "BLUE"? GET A LIFT WITH A CAMEL!

LEAF TOBACCO EXPERTS AGREE.

"Camels are made from finer, more expensive tobaccos—Turkish and Domestic—than any other popular brand."

MANNING SMITH, '35—Student of Journalism. Newspaper work calls for the active type of person with plenty of natural, vibrant energy, as Manning Smith, journalism student, well knows. He says: "You've got to be a hustler in the newspaper game! There's lots of 'leg work' and head work, too—and both use up plenty of energy. When I'm feeling kind of 'low' generally, I smoke a Camel, and the right words come to me more easily, I can think faster. When I smoke steadily during long sessions at my typewriter, Camels never jangle my nerves."

BUSINESS GIRL. Eve Miller, New York department-store executive, says: "I smoke Camels because I appreciate mildness and delicacy of flavor. And Camels give me a 'lift' when my energy is low—and never upset my nerves."

CAMEL'S COSTLIER TOBACCOS NEVER GET ON YOUR NERVES!

FRATERNITY CAGERS FACE ELIMINATION IN FINAL ROUNDS

Schedule's Completion
Accompanied by
Upsets

FINAL GAME ON DEC. 10

The interfraternity basketball tournament, which has for years been a headliner in the home athletic schedule, was started on Tuesday, November 27th.

The opening game saw Phi Pi Phi, present champs, take the Phi Kappa Sigma quintet. The Phi Pi's, to whom winning the tournament has been a matter of form, led at the half by a score of 12 to 11. In the second half, however, they held the Phi Kaps scoreless and won with a final score of 19 to 11.

Triangle Dropped in First Game

The second game, played on the same night, was between Triangle and Kappa Delta Epsilon. Triangle, known for success in the inter frat track meet, was unable to stop its opponents and lost by a score of 29 to 13, in a game approximating a track meet.

On Monday, December 3, the next bracket of games was played and Sigma Alpha Mu met Theta Xi in game number one of the evening. Led by Roberts, who himself scored 27 points, Theta Xi emerged winner by the one-sided score of 43 to 7.

Beta Psi Shows Class

Game number two of the same evening was between Rho Delta Rho and Beta Psi. This game was also one-sided, with one man counting for 10 points for the winning team. At the half the score was 7 to 5 auguring a tight game, but in the last half Beta Psi got busy and scored 24 more points to their opponents' 8, making the final score 31-13. Doudera of Beta Psi scored 10 points while Rabinowitz dropped in 8 points for the Rho Deltas.

Phi Pi Phi, Almost!

The next day, Tuesday, December 4, saw the frats again ready for action, and Phi Pi Phi almost lost their pants to Kappa Delta Epsilon. With both teams easy victors in their first games a real contest was in the offing. Everybody was out to smear the "champs" and here was a chance. The half found the K.D.E. bunch leading 10-7! A new champion in the making, but not quite. Habenstreit and O'Brien, the startling frosh, led Phi Pi to a slender margin of victory counting ten and eleven points respectively.

Baker, with ten points, led the challengers in their attack but a basket in the last few seconds meant victory. Once again Phi Pi to the finals!

Deltas on to Finals

The next game saw Delta Tau Delta pitted against Beta Psi. The Deltas early showed their basket ability and were in front with a score of 11 to 5 at the half. The second half was about even as far as points scored is concerned, giving the Deltas the victory with a 23 to 15 score. Doudera was high point man again for Beta Psi with 5 points to his credit. He was outpointed in this game, however, by Laise of Delta Tau Delta who scored 8 points.

Deltas Swamp T.X., 36-9

The game on Friday, December 7 was between Delta Tau Delta and Theta Xi, to decide the second finalist.

Engelthaler started the scoring for the Deltas by dropping one in after the first tip-off. The Deltas did the ball handling for the first half and scored 19 points against the 2 points for Theta Xi, which were scored by Roberts on two gratis tosses.

Doane started the second half with a shot from under the basket. Two more baskets made the score 25 to 2 in favor of the Deltas. Roberts, getting desperate, sank a beauty from the center side lines. He tried another and took it from the backboard to make a total of 6 points for Theta Xi. The Deltas maintained unquestioned superiority but Norris scored a basket and a free throw for Theta Xi ere the game ended. A total upset; with Delta Tau Delta winning by a score of 36-9.

The championship game on Monday, Delta Tau Delta vs. Phi Pi Phi,

may mean that the cup changes hands. The Delt combination is composed of capable men that show a smooth team organization. Of course, the champs still show life!

The fraternity matches were not indicative of real ability, but were, on the contrary, indicative of luck and of a more sufficient supply of men. Houses which swamped one team were themselves swamped by others. The condition that exists is due to the larger number of men in one house, and also the uneven distribution of athletes.

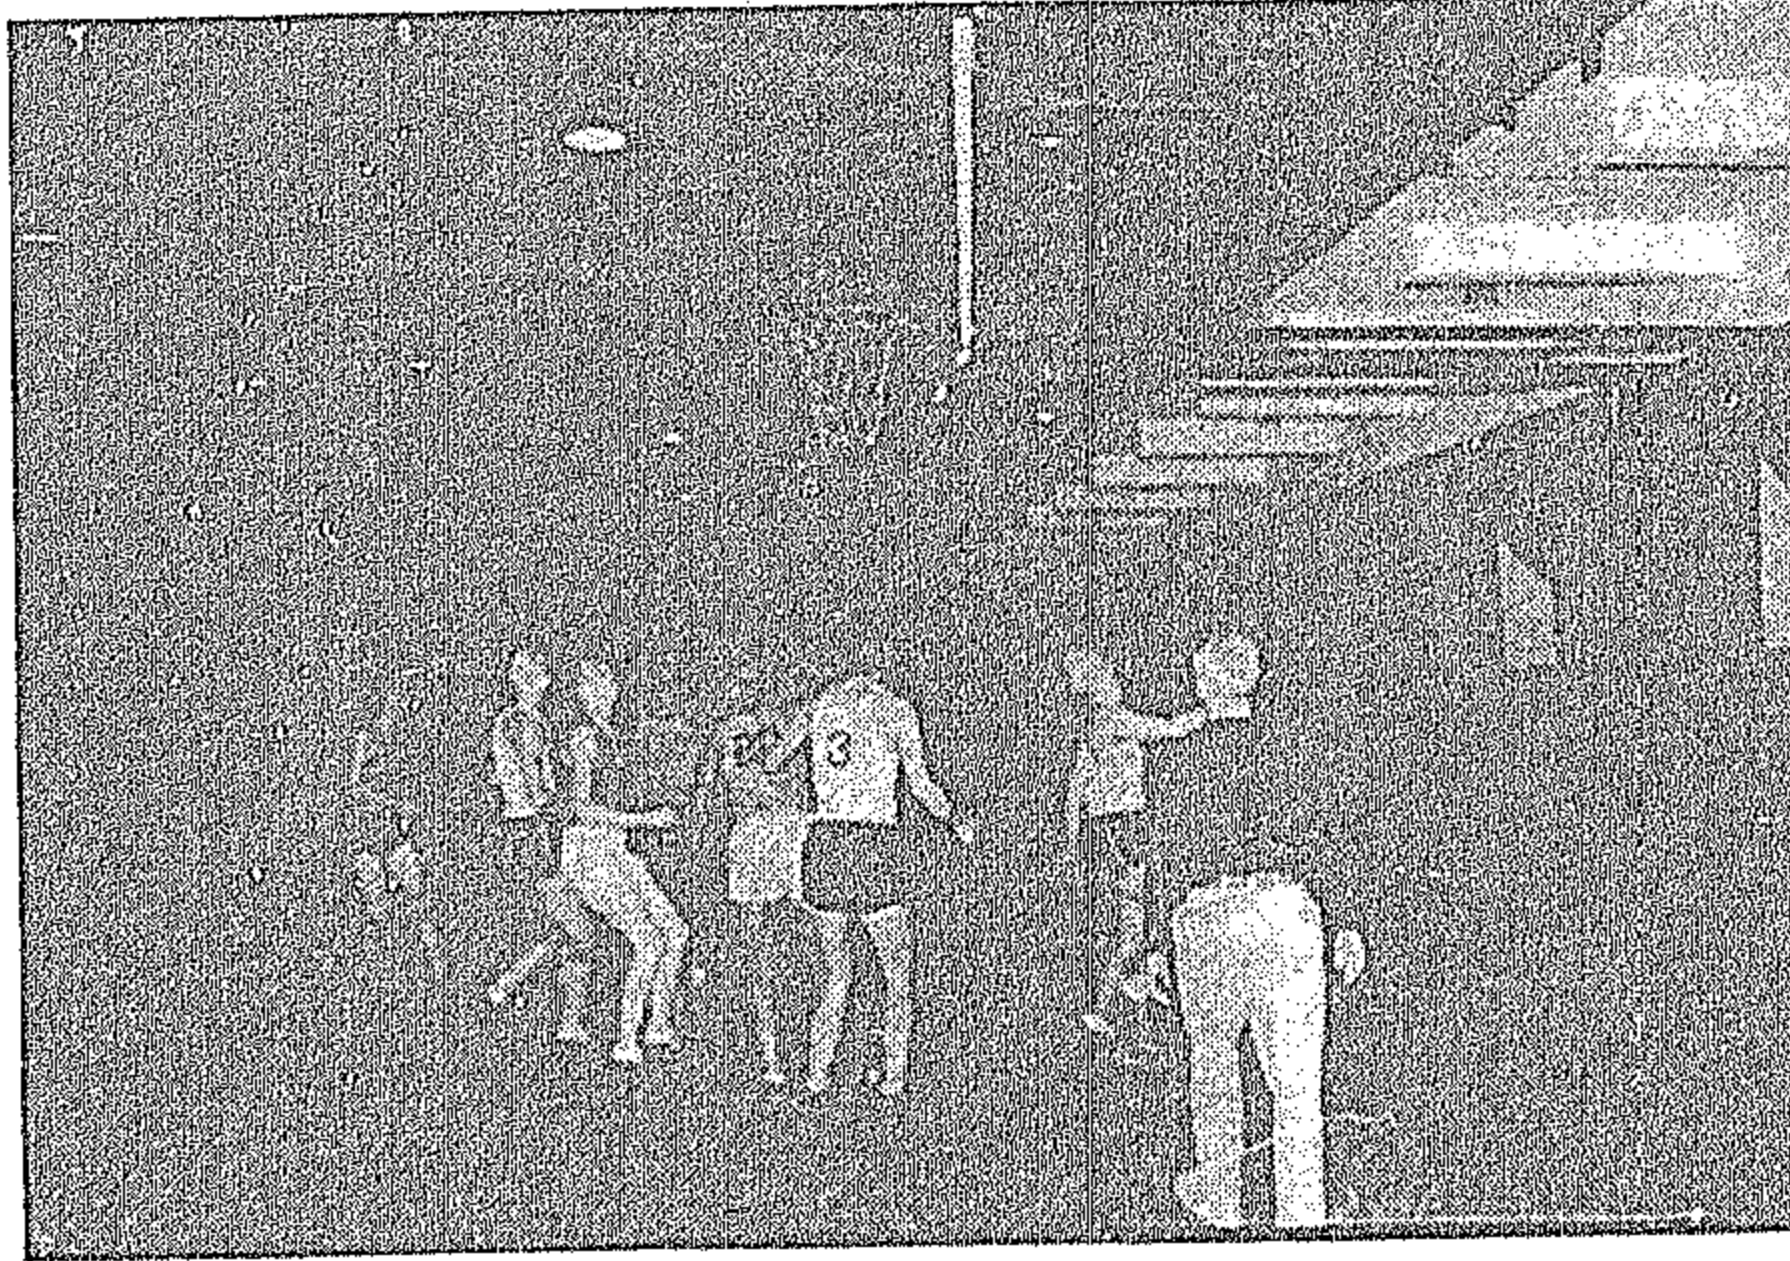

The box scores of the semi-final games follow:

Pi Phi Pi (25)	B	F	P
Habenstreit	5	0	0
Malinowski	1	0	0
O'Brien	4	3	1
Dunbar	1	0	0
Sramek	0	0	3
Total	11	3	4

Kappa Delta Epsilon (23)	B	F	P
Holland	1	1	3
Ender	3	0	0
Baker	5	0	4
Freedman	0	0	0
Riman	0	0	2
Ikenn	2	0	0
Total	11	1	9

Delta Tau Delta (36)	B	F	P
Engelthaler, f	4	0	1
Laise, f	3	0	1
Gallagher, c	3	0	0
Doane, g	6	1	0
Bacci, g	1	1	2
Total	17	2	4

Theta Xi (9)	B	F	P
Kercher, f	0	0	0
Roberts, f	2	2	1
Anderson, c	0	0	0
Norris, g	1	1	1
Stevens, g	0	0	2
Total	3	3	4

A tense moment as "Pop" Warner scores a ringer in the Armour-South Side Junior College tilt.

(Continued from page 1)
came out on the floor and gave the crowd a look at their beautiful new red sweat suits with yellow lines here and there.

Stage Comeback
Evidently Coach Kraft spoke at or to the boys during the half for they came back to literally wipe up the floors with the opposition. Merz again took the honors by making two beautiful baskets. Then Heike scored two after Warner had broken up a would-be basket-play by South Side. Again Merz sunk one, then O'Brien, star freshman player, put one in followed by Heike dropping one in over his shoulder. All this revived the crowd, the players, and the coach, and correspondingly plunged the opposition into the dumps out of which they never rose for the rest of the game. Now the plays were all by Armour men who kept the ball consistently under and around their basket free to shoot or stall. Time after time the team would take the ball away from the Junior College men and put it into their own basket. The succession of

fast plays and dazzling shots dumfounded the other team and the game ended with Armour way ahead to the tune of 38-26.

College basketball has opened its season with a lot of action, with each team attempting to pile up as many victories as possible before the Christmas vacations. Wheaton has started off with a bang by defeating Milton by a score of 28 to 15. This game is an indication of what the Tech-hawks may expect when they encounter the Wheatoners on December 18, at the Wentworth Armory.

One of the biggest upsets of the season occurred when DePauw, of Greencastle, Indiana, dropped their opening game to Evansville college by a score of 20 to 12. Last year De Pauw had one of the strongest fives in Indiana, and their early defeat has caused a great deal of comment. From the looks of things, Armour has the edge on De Pauw, and it is more than probable that the Techawks will be the victors in their two games with them.

On Friday, December 7, DePauw partially succeeded in retrieving its reputation of last year when it defeated Anderson by the smashing one-sided score of 49 to 19. This last minute result tends to tone down the confidence of the Armour men but we still believe that the odds are in the Techawk's favor.

North Central College opened its season last Saturday with a game with George Williams on the Naperville floor. The Cardinal squad was the advance favorite, but the score failed to reach us by press time.

The North Central-Armour game at Armour on January 22 is going to be the closest game of the season. The Armour boys have three strikes called, and will have to improve a lot if they expect to beat the strong North Central squad.

Armour's old opponents, Indiana State Teachers College and Lake Forest, are due to open their schedules Saturday, the former with Illinois Teachers, at Charleston, and the latter with its alumni. There are two games scheduled with Indiana State, the first on February 19, at Terre Haute, and the second on February 22, at Armour. Armour has two games with Lake Forest, the opener on December 20, at Lake Forest, and the final on January 9 at Armour. It is difficult to predict what these teams might or might not do to Armour when they haven't hit competition yet. Possibly, with a perfect record (after one game), the timorous predictions become the duty of our opponents!

Wrestling and boxing occupy the old Tech gym these days. The tournaments, being conducted by managers Biegler and Wheaton, are expected to uncover a good bit of worth while talent.

In the basketball game between Theta Xi and Sigma Alpha Mu, J. Lew Roberts scored 27 points, and obtained bids for a basketball career. Due to the fact that Stan Bernstein didn't play with the Deltas, Roberts was held down to 6 points in the next interfrat game.
