Our Platform

In this our last editorial for the *Armour Tech News*, for a new staff will be running the paper in its next issue, the first one of next semester, we wish to outline a platform or program for the betterment of *Armour* to which we feel every student and interested person should pledge himself.

This platform contains items which apparently fall into two classes. They are: items concerning which the individual student can do very little except to talk about them, and items about which the individual *Armour* student can do everything.

In the first class we place the following:

- 1. An entire new plant for Armour Institute of Technology with more than ample laboratory and lecture room facilities of the most improved kind.
- 2. A new and suitable location for the "new" Armour Institute.
- 3. A large endowment fund to make *Armour* self-perpetuating.

These three items obviously make up quite a comprehensive general plan about which *Armour* students have dreamed in the past and are still dreaming. Although there seems to be nothing that the *Armour* students individually or collectively can do about the three points just mentioned, we feel that it certainly does no harm to talk and think about them.

In the second class or student reform group, we list the following:

- 1. The development of courteous conduct in student assemblies.
- 2. Take the politics out of class elections by cutting down the number of free bids to class dances or any other way that would get the same result.
- 3. Put the selection of the staffs on the various *Armour* publications on a sound and just basis.
- 4. Keep the prices of bids to class dances as low as possible. Make it possible for more to enjoy this class function by making the price lower.
- 5. An increase in student participation in extra-curricular activities. More students should be involved in such activities than there are at the present moment.

The last points named are certainly self-explaining, and, if we have not been misinformed steps have already been taken in some instances. However, there is still plenty to be done on all points. Therefore, let us all concentrate on these points and build these improvements into our Alma Mater, making a truly new and greater *Armour Institute of Technology*.

"The Slipstick"

Cleave to "The Slipstick"; let
the Slapstick fly where it may.

The lack of days of folly
Makes us all so melancholy
With exams within a week
No wonder we are very meek.

Professors should please take note
And try not to play us for the goat
For we may have a trick up our sleeve
To pass them all with a mighty heave.

Cheer up fellows, and smile again
Because soon we'll be in our domain
When we return to our social activities
And forget to fill in our cranium cavities.
A. M.

The Junior Mech's work in "Strength" only because they are always under stress.

JAPANESE RULES FOR AUTOISTS

- 1. At the rise of the hand of the policeman, stop rapidly. Do not pass him or otherwise disrespect him.
- 2. When passenger of the foot hove in sight, tootle the horn trumpet to him melodiously at first. If he still obstacles your passage tootle with vigor and express by word of mouth the warning, "Hi! Hi!"
- 3. Beware of the wandering horse that he shall not take fright as you pass him. Do not explosion the exhaust pipe on him. Go soothingly by or stop by the roadside till he pass away.
- 4. Give big space to the festive dog that make sport in the road way. Avoid entanglement of dog with your wheel spokes.
- 5. Go soothingly on the grease-mud, as there lurk the skid-demon.
- 6. Press the brake of the foot as you roll around the corners to save the collapse and tie-up.

Sing you a song in the garden of life,
If only you gather a thistle;
Sing you a song
As you travel along,
An 'if you can't sing—why, just whistle!
F. L. S.

Porter: "Miss, your train is—" **Precise Passenger:** "My man, why do you say 'your train' when you know it belongs to the railway company?"
Porter: "Dunno, Miss. Why do you say 'my man' when you know I never had anything to do with you?"

Bob: "What's a tailspin?"
Bert: "It's the last word in aviation."

Sonny: "Say Mother, Papa wouldn't murder anybody, would he?"
Mommer: "Why, certainly not, child. What makes you think that?"
Sonny: "Well, I just heard him down in the cellar saying, 'Let's kill the other two, George.'"

Laugh a little now and then
It brightens life a lot;
You can see the brighter side
Just as well as not.

Don't go mournfully around,
Gloomy and forlorn;
Try to make your fellowmen
Glad that you were born.
R. H.

Fraternity Notes

BETA PSI

Our ping-pong team nosed out the Triangles in a practice match by a score of 3-1, singles; 1-1, doubles. Lyford appeared to be the most talented player, but our 4 man team was a close second.

Flash! Smiling Rahn and Delang still hold a lead over our battlers, Schnackel and Wittekindt. The score is now 10-6 in that 25 game pinochle battle.

Friday, Feb. 8, a number of the fellows are planning to have a mid-semester party at the Aragon. The idea certainly stands approved, and we hope that everyone who goes has a good time.

PHI KAPPA SIGMA

The bridge party, at the house, sponsored by the Mother's Club, was well attended. In fact, seventy-five couples enjoyed a pleasant evening of bridge, with refreshments being served later. Everyone is looking forward with great interest to the annual Pledge dance. The date set for this affair is February 9, the Saturday night before probationary week. No other social events, with the exception of the bridge party, have been planned in the last few weeks due to finals.

TRIANGLE

Brother Spencer of the class of '30 has been in town visiting the boys. Brother Kraft of Cincinnati is also here.

Brother Penn, '08 of the University of Illinois, was at the house last Tuesday night. He gave a short talk after dinner which was enjoyed very much by all of us.

DELTA TAU DELTA

The house dance last Saturday was well attended and everyone had a good time as usual.

The ping pong tournament has now reached the semi-finals. Davidson, Davis, Laise, and Engelthaler have proved their agility with the paddle. The finals will be played off this week.

Plans for the next Mother's Club meeting are well under way under the able direction of R. R. Bacci.

The house is now settling down to the stiff grind in preparation for the coming finals.

Tech News Staff to Hold Banquet Feb. 13

Plans have been completed for a banquet to be given for the staff of the *Armour Tech News* Wednesday evening, February 13, in the Student Union. At this time announcement will be made of the selections for staff positions for the new term. An outside speaker may possibly be secured for the occasion. The present membership of the *Armour Tech News* staff is invited. The committee on arrangements consists of R. D. Armsbury, chairman, C. L. DuSell, F. L. Leason, J. Sheehan, E. Wagner, and G. A. Zwissler.

Other Campuses

By John K. Morrison

The favorite bit of reminiscence on a Minnesota professor concerned his early days, when he once ended a lecture by asking for questions from the students. There was no response, so he waited, growing more and more nervous. Finally he offered a cigarette to the first one asking an intelligent question. Another long silence. Finally a boy's hand went up: "What kind of a cigarette?" he asked.

According to a six-year study about to be released by the Carnegie Foundation, American colleges and universities are failures as educational institutes.

A coed of Cornell university outplayed the men polo players and has received a regular place on the team.

Upperclasswomen of the University of Arizona, finding competition with the freshman coeds, a bit tough, recently passed a rule, through the medium of the Panhellenic council, to the effect that the freshman coeds were to have only one night date a week, as "girls just entering college are not sufficiently mature to go places at night with men."

Students never walk on an inland in the Memorial Union building lobby at Purdue university out of respect for Purdue men who died in the World War.

Then there was a freshman who suggested in a physics exam that steel wool is the fleece from a hydraulic ram.

Three hundred and fifty couples attended a Hobo dance at Purdue university recently. Prizes were awarded to the man possessing the finest beaver, to the toughest looking couple, to the roughest man, and to the toughest damsel. Many present were caused no small amount of consternation and discomfiture when they read the "Purdue Exposer," a scandal sheet which was distributed to those present.

THE STEAM SHOVEL

The Junior Civils are agitating for an "inspection trip" of Chinatown. Well, it's O. K. with us... though we'd like to caution the boys not to get too noseey....

And Professor Scar's nose gave a noble account of itself when, with the otherwise reputable senior electricals, LOU MECKLENBERG and AL AUGER, smelling their "Kaywoodies," he identified the odor of soft coal burning.

Among the little known facts about prominent students at Armour is the following:

Our well known friend, BILL AHERN, has lost during the last three and one-half years at Armour no less than four girl friends by the matrimonial route. We wonder if any deductions could be drawn from such facts?

NELLE could also earn the undying gratitude of the GLEE CLUB if she'd get a copy of the year book of the NATIONAL COLLEGE OF EDUCATION... We understand that their year book contains not pictures and names, but also telephone numbers!

The Junior Chemical "Engineers" have been given a new problem.... the designing of a new style ear muff so that Al (Stiff) Rulis can go skating in comfort!!!!

BILL GRAY hereby warns the person who knows more about Bill, than he, himself, that he will challenge that person to a duel—poppuns or water pistols at ten paces.

Freshmen Appoint Own Cheer-Leader

In spite of wise cracks, cat calls and general display of extemporaneous mental pyrotechnics, the freshman class meeting, held last Thursday in the assembly hall, accomplished several worthy ends. The class of '38, hoping to set a precedent, decided on having a class cheer-leader, and a class yell. After a bit of discussion, James Dunne was appointed cheer leader.

Following this, the subject of rewards for athletic merit was brought up.

Chess Team Wins; Club Is Growing

Armour's chess club added another victim to its list when on Friday, January 11, they defeated the Faragut chess club 4 1/2 to 2 1/2. The victory added an incentive to schedule more matches. These will be played off sometime after the semester examination have been completed.

There are at present twenty members in the club with students steadily applying for membership. The tournament which is being held amongst the members, is now rapidly approaching its end. The members who are entered, are urged to complete their scheduled games as soon as possible in order that adequate preparations can be made for future engagements.

Arx News

Some of you engineers might be cringed to learn that "Light travels in straight lines and will not go around corners." This was one of the General Hints with regard to lighting that appeared in the new Class A program issued by the Illuminating Engineering Society. The more serious part of the program calls for "A Bank for Savings"; and if you want to get really mercenary about it, we might add that the society is offering five hundred genuine AMERICAN dollars for the first prize, inflation or no inflation. So if you see one of our beloved class-mates sporting a new spring outfit about March 21, give him the benefit of the doubt, and imagine that he cashed in on this or one of the other ten prizes.

This column has mentioned before what a swell fellow "Red" MAY-FIELD is, and that still goes. Consequently, we are really sorry that he is going to leave ARMOUR in February; but nevertheless when he leaves he will take with him the best wishes for luck and success from this columnist as well as everyone in the department.

This column thus far has been passing out prizes by the thousands of dollars, good luck, congratulations, bon cheerios, etc. So while we're still in the thing, we must express our desire that Irv ADDIS has better luck in his future ice skating ventures. Well, at least his alibi for that beautiful SHINER is that he acquired it ACCIDENTALLY while ice skating. (At least it's

a good substitute for that "bumping into the bed-post" gag.)

It must have worked a terrific hardship on Bernie NOBLER. And by IT we mean he actually came to school with a shirt, tie, and hat, and minus those "seven-league boots". Nope, there were no females connected with this, but he was all prettied up for his picture for the CY-CLE.

Some playful architect "planted" a bottle of ketchup in Mr. Kichaven's brief case the other evening while the boys were DINING at their favorite supper CLUB. As DRACANSTEIN was making his exit, the manager was tipped off to search the case, which of course revealed the condemning evidence. This is a very amusing pastime, and is otherwise known as "Idiot's Delight."

EAGLE EYE.

There's Money In Your Attic! And In Your Basement, Too

Dear Student:
You wouldn't use your attic as a bank, would you? Then why store your textbooks there?

Your textbooks are worth money even after you are through with them. Make every book pay extra dividends by trading it now for real money or other books you need.

With the rapid change of World Events, the rapid advance of Science, the new spirit in Literature, and new methods in teaching, textbooks go quickly out of date; and Publishers print New Editions & Later Texts to replace those you have.

SO Just As Soon As You Finish Your Exams, load up your car, or tuck your books under your arm and bring them to Wilcox & Follett Co. We will pay you cash or give you credit on next Semester's books.

TECH WRESTLERS BEATEN BY NORTH CENTRAL MATMEN

Exhibition Bouts are Won by the Tech Grapplers

FINAL SCORE 21-13

Vainly attempting to defeat Armour's arch rival of all sports, North Central college, the Armour matmen nevertheless came close enough to keep the 200 North Central and 3 Armour rooters on edge throughout the meet which ended in a 21-13 victory for North Central.

Bob Hella, in the first match, met a fast, clever opponent in Hummel at 113 pounds. After being tired by a series of cross-bodies, Hella was pinned in 4:56 by a body press. The second match between Marslek of Armour and Berdman of North Central at 125 pounds, likewise resulted in 5 points going to North Central, Marslek being pinned by a half-nelson and wrist lock in 9:16.

Dunne and Schmidt Win
Dunne of Armour, a potential champion at 135 pounds, was matched against Strubler of North Central and made short work of the match, pinning Strubler in 2:49 with a half-nelson and crotch hold. Not to be outdone by Dunne, Bob Schmidt, captain of the Armour grapplers, brought the fans to the realization that it was not going to be easy sledding for North Central by pinning Kaney in the short time of 43 seconds with a half-nelson and wrist lock. The score was tied 10-10.

At 155 pounds, Kreml of Armour was the aggressor in his match with Albrick, almost pinning him in the first 4 minutes. Both tired rapidly and Kreml had to be content by winning the match with a time advantage of 2:14. In the next match, Sumner of Armour met North Central's ace, Adler, at 165 pounds. Sumner forced Adler to exert himself to the utmost, but Adler won with a time advantage of 3:6, again tying the score 13-13.

Last Match Deciding One
Gus Bergquist met some stiff competition in Rickenbacher at 175 pounds, looking small compared to the tall Cardinal matman. After being thrown through the ropes, Gus still maintained the aggressive, although he lost the bout on a time advantage of 3:17.

The heavyweight bout climaxed the evening, since Armour could win the meet by a fall in this event, or tie by a time advantage. Ray Peterson, meeting Miller of North Central, twice had Miller nearly pinned in the first minute of the bout, but Miller rallied and won by a fall in 2:14, ending the meet with a score of 21-13 in North Central's favor.

Armour Wins Exhibition Bouts
Preceding the meet, four exhibition bouts were staged, all of which were won by Armour. Popper won from Hanson at 160 pounds with a time advantage of 4:38. Patterson, meeting a fast, slippery grappler in Wagner at 145 pounds, won by a time advantage of 3:11 in an entertaining bout. Meyer, newcomer to the mat fold at Armour, pinned Olson at 167 pounds in 3:55. Larson beat Schuman, both men being from Armour, in a true exhibition bout with a time advantage of 3:20.

Tank Men to Meet Wright Jr. College

The Tech swimming team's second meet of the season, against the Wright Junior College, will be held on Wednesday, February 6, at 7:30 p. m.

The meet will be held at Bartlett pool at the University of Chicago, the Armour home tank. After winning their first meet against the South Side Junior College, the team is in good shape to gain another victory, although very little is known about the new opponents.

Since the following Thursday and Friday are holidays, Coach McGillivray has ordered that all swimmers report at 2:30 each day for practice. In addition he has asked that all new men wishing to try out for a berth on the team report for tryouts at the same time. All candidates, including the regulars, must participate in these time trials.

Baseball practice is scheduled to start soon and already there are ten assured bookings with several tentative ones in the offing. A complete schedule is to be printed in a forthcoming issue of the News.

Delving back into history, we wish to say that the Phi Kaps won the interfraternity swim with a good lead over their closest opponent. This was the first meet of its kind and from enthusiasm shown it will not be the last.

The Tech track team opens the indoor schedule Feb. 9 at the U. of C. fieldhouse with the annual Chicago duel. The boys will really have to work if they are to be in condition after the exam grinds.

The interclass relays disclosed real frosh talent—something last year's event failed to do. Especially Englishall, Dunbar, Newert, and Widell, the fast stepping relay team; Faust and Lindeman, milers; and Thornton, in field events.

MICHIGAN GAMES—

(Continued from page 1)
baskets. The lead shifted in the last half till in the last few minutes Armour led 38-30. Armour's poor control, and a spirited home rally netted 6 points for Normal but the gun found Armour the winner of the home and home series with the Hurons; having set them down 33-25 on the Tech court. The Wayne five will have the opportunity to be double victims when they play here on Feb. 12.

DePauw Here Feb. 8
With this success, Corch Kraft will point the team for the DePauw game, Feb. 8, at the Tech home court. DePauw has been followed closely in their games and these indicate that another game of the North Central calibre is due Tech rooters.

ARMOUR MATMEN DEFEAT DE KALB BY SCORE OF 26-10

Armour's wrestling team won their second consecutive meet a week ago Monday by defeating DeKalb teacher's college 26-10. Practically all of the bouts were easy wins because of the proficiency the men are acquiring.

Hella and Dunne, in the light-weights, both won on decisions, while McDaniel lost his bout in a quick fall after losing his advantage.

Schmid, the captain, extended his string of victories by pinning his opponent in a little over a minute on a body stretch, one of the most painful holds allowed. Sumner of Armour and Schiedecker of DeKalb put on the fastest bout of the evening. Wrestling in the 165 pound division, they twisted and wiggled continually except for the two times when Sumner pinned his man; this was the only bout in the meet in which the feat was accomplished. Another fast bout was the one in which Kreml beat Rickard by a fall in the short time of two and three-quarters minutes.

Armour split the heavy matches with the visitors. Meyer lost to Sohne who gained a fall in 2:50; and Ray Peterson bumped his opponent around in an exciting finale to win in 6:30.

Red Demons Beat Armour Quintet

Another tradition continued unbroken when North Central again defeated the Armour basketball men by the close score of 23-22 last Tuesday on the home floor.

The Armour five, leading at the close of the half, 11-8, suddenly found themselves falling victims to that unshakable jinx that has so persistently dogged them in their tilts with North Central, and which has flouted the Techawks with consecutive losses since 1929.

Armour Leads at Half
In the early moments of the game, the evenly matched teams displayed a careful wariness that seemed to bode no good for the spectators. Lauchiskis finally opened hostilities by cashing in on a gratis heave, and a minute later, missed trying to duplicate the order. Merz slammed it in for the first field goal and the Red Demons promptly retaliated by scuttling one and another by a volleyball "push-in." A similar push-in, a

free throw and a snappy hook-shot by Heike saw Armour leading at the quarter, 8-4.

Turnly opened fire in the second half with a short sizzler, and was quickly followed by Young with a push-in and a free-throw. North Central's defense was superb. Time and time again "Pop" Warner and "Dolly" would attempt to get in within striking distance but to no avail. Finally "Pop" broke through and sank a beauty. Lauchiskis followed suit with an over-arm marker, and then sank two free throws. Spiegler gave North Central an 18-17 lead by following up a field goal with a gratis check. From then on there was no holding the Red Demons. Shooting from all over the court, they soon made it 24-18. Heike, taking several desperately long shots, cashed in on two.

The Techmen fought a North Central stall in the last few minutes but their efforts only added to their total of "personals." Armour was unable to threaten and the gun sealed the 28-22 score.

*—so far as we know tobacco was
first used about 400 years ago*

—throughout the years what one thing has given so much pleasure...so much satisfaction

Early Colonial planters shipped hundreds of pounds of tobacco to England in return for goods and supplies.

*They came looking for gold
... but they found tobacco*

...and tobacco has been like gold ever since!
The tobacco raised in Virginia and exchanged for goods helped the struggling colonists to get a foothold when they came to America.

Later on, it was tobacco that helped to clothe and feed Washington's brave army at Valley Forge.

Today it is tobacco that helps—more than any other commodity raised in this country—to pay the expense of running our Government.

In the fiscal year 1933-34 the Federal Government collected \$425,000,000 from the tax on tobacco. Most of this came from cigarettes — six cents tax on every package of twenty.

Yes, the cigarette helps a lot—and it certainly gives men and women a lot of pleasure.

Smokers have several reasons for liking Chesterfields. For one thing, Chesterfields are milder. For another thing, they taste better. They Satisfy.
