Vol. XIV. NOVEMBER 6, 1934 No. 7

We Take a Bow!

On behalf of every member of the staff of the *Armour Tech News*, we wish to express our gratitude for the overwhelming popularity of our publication as evidenced by the attempts of admirers to walk off with anywhere from two to twenty copies apiece of each issue of the *News* during the past few weeks.

Much as we dislike to do so, circumstances force us to limit the distribution from the w. k. desk in the Main building hallway to a single copy per customer. However, to alleviate as much as possible any heart-aches caused by this arbitrary ruling, the managing board has agreed to mail an extra copy each week to each student for the negligible sum of one dollar per semester per copy per student. The circulation manager will be glad to discuss this proposition with anyone who finds that one copy is not sufficient to meet his particular needs.

Read the President's Report

On a subsequent page of this issue of the *News*, the first half of President Hotchkiss' report to the Board of Trustees for the period from January, 1933 to September, 1934 will be found. Although this report might appear at first glance to be a long, uninteresting, and involved one, it is very much otherwise. It is our firm conviction that every present student at Armour as a person vitally interested in the institution's welfare, present and future, should read the report conscientiously and critically. We feel that every Armour student should be given at least the opportunity to read what the status of his Alma Mater is and see what the future plans are for her advancement.

This report, in the form and content which the *News* is publishing, is taken from a pamphlet sent especially to the alumni of Armour; and with the exception of a special note to the alumni from the president, and a list of the newly appointed faculty committees for 1934-35, which list has already been published, as well as the members of the recently formed Council, the report is complete in every way.

Farewell

We simply can't pass up this time (and incidentally space) to shed a few verbal tears of farewell at the passing of a Century of Progress International Exposition of 1934, World's Fair and whatever else it has been called. Undoubtedly, everyone in the student body and faculty has had some contact with the Fair during the two summers it has been here. Some of us have been fortunate enough to work at the Exposition during its existence. It has been a great boon to us in several ways and we mourn its end.

The rest of us have been frequent visitors and wonderers at its all-around excellence.

We also hate to think of not being able to sightsee it again.

"The Slipstick"

Cleave to "The Slipstick"; let
the Slipstick fly where it may.

Some humor? ? ?

"Pappa, vat is science?"
"Oil! Stupid vot you is. Science is dose things vat says 'No Smoking'."

LOOKED ALIKE

Mother: "And did the monkey tip his hat when you gave him the penny, dear?"
Tommy: "Yes, mother."
Mother: "And then what'd he do with the penny?"
Tommy: "Gave it to his father who played the organ."

Expecting a Ripe Old Age

The professor of thermodynamics was lecturing. "I predict the end of the world in fifty million years."
"How many?" cried "Tony" Majercik with a frightened voice.
"Fifty million years."
"Oh," said "Tony" with a deep sigh of relief. "I thought you said fifteen million."

Poem With a Kick

On mules we find
Two legs behind,
And two we find before,
We look behind before we find
What the two behind before.

Dan: "Harry was quite angry when I bought this evening gown."
Ann: "Can you imagine getting angry over a little thing like that?"

On Another Campus

Janet: "Oh, Proffy, what do you think of me now that you've kissed me?"
Proffy: "You'll pass."

THE CANNY SCOT

The Scotchman couldn't find his ticket. On the conductor's second trip 'round it was still missing. "What's that in your mouth?" the conductor asked.
Sure enough there was the missing ticket. The conductor punched it and went his way.
"Aw, weel," said Sandy, when several of the passengers laughed, "I'm nae so absent-minded. It was a very auld ticket and I was just suckin' off the date."

1st Soph: "Well, I passed a Calc. quiz at last."
2nd Soph: "Honestly?"
1st Soph: "What difference does that make?"

In closing yours truly appreciates the contrihs of B. G., N. Disenhaus, and A. Majercik. Until next week.
R. H.

Railroad Engineer Addresses W.S.E.

Mr. Charles A. Morse, retired chief engineer of the Rock Island railroad, addressed the Armour chapter of W. S. E. last Friday. His speech was divided into his personal experiences and a review of qualities of a good engineer.

After his school days, which were spent at Maine, he became connected with the Burlington railroad as an engineer laying out new lines. This type of work was in great demand in the last years of the 19th century. He gave up this position for one netting a higher salary as an engineer on a Mexican railway.

Work Dangerous and Thrilling

This work was very hazardous for he was in close contact with hostile Indians. This did not bother him because his work was interesting enough to make him forget his hardships. He enjoyed his work so much that in the mornings he would have his instrument set up waiting for sufficient light to see his cross hairs to begin his survey, and then continue working until sunset when darkness made vision impossible. Although this type of ambition would discourage most men, his interest in his work made it a hobby for him.

Mail Order House Gives Scholarships

Montgomery Ward and Co. offer a unique opportunity for ambitious students to attain a college education. The plan consists of obtaining orders from friends and parents for which the student receives 15% of the order as credit toward his scholarship fund.

The student may enroll at any time and may select any school in any country. It also includes any necessary and reasonable expenses. When a student has obtained \$500 in orders, 15% of this amount, or \$75, is put into his scholarship fund. Each month thereafter 15% of the total sales credited to his name for the month is added to the fund. This plan may continue as long as the student wishes.

Further information may be obtained from the Dean's office, or from the College Scholarship Department of Montgomery Ward and Co., Chicago.

No detective work is needed in locating the dealer who sells what you want. Just look in the "Where to Buy It" section of your telephone book!

There, local dealers are listed beneath the trade marks of many advertised products—such as Philco, Greyhound Lines, Willard Batteries, Buick and Goodyear. Besides helping you find the brand you want, this service helps manufacturers check substitution, helps dealers increase sales.

"Where to Buy It" is just one of many services pioneered by Bell System men to increase the value of telephone service.

Why not say "Hello" to Mother and Dad tonight? Bargain rates on station to station calls after 8:30 P.M.

BELL TELEPHONE SYSTEM

Granger Rough Cut

"Why—I don't believe I
have used a pipe cleaner
in three or four weeks

Granger leaves no gum
in the bowl of my pipe
—or moisture in the stem.
It burns down to a clean
dry ash."

In the manufacture
of Granger Rough Cut Pipe
Tobacco the Wellman Process
is used.

The Wellman Process is different from any other process or method and we believe it gives more enjoyment to pipe smokers.

- ... it gives the tobacco an extra flavor and aroma
- ... it makes the tobacco act right in a pipe—burn slower and smoke cooler
- ... it makes the tobacco milder
- ... it leaves a clean dry ash—no soggy residue or heel in the pipe bowl

LIGGETT & MYERS TOBACCO CO.

the pipe tobacco that's MILD
the pipe tobacco that's COOL

—folks seem to like it
