Published Weekly During the College Year

\$2.00 Per Year Single Copies, 10 Cents Each

MANAGING BOARD

Editor-in-chief.....Russell R. Johnson
Managing Editor.....Frank D. Cotterman
Sports Editor.....John O. Larson
Business Manager.....Cyril L. DuSelle
Faculty Advisor.....Walter Hendricks

EDITORIAL DEPARTMENT

News Editor.....R. S. Kercher
Make-up Editors.....J. J. Doudera, M. B. Stevens
Assignment Editors.....N. Gerber, F. L. Leason
Copy Editor.....G. A. Zwissler
Assistants.....V. J. Kropf, W. S. Hamlin, R. H. Knabe
Feature Editor.....J. Galandak
Assistants.....A. J. Rosen, J. K. Morrison
Proof Editor.....N. Balai
Cartoonist.....J. Kichaven
News Reporters.....S. L. Ender,
G. B. Eng, B. Gamson, O. Hampton, F. D. Hof-
fert, F. B. Harman, M. J. Hodes, J. Morozoff, L.
Parker, A. Schreiber, P. R. Schultz, J. Sheehan,
B. Sills, R. T. Smith, T. Speer, E. Wagner.
Sports Reporters.....M. Alexander,
G. H. Bergquist, J. M. Kubert, E. J. Pleva, R. Wor-
cester.

BUSINESS DEPARTMENT

Business Assistants.....M. S. Alexander,
N. Disenhaus, W. A. Hotzfeld, W. F. Lindeman,
E. J. Simek, R. W. Strauss, D. C. Timberlake.
Circulation Manager.....R. M. Lundberg
Circulation Assistants.....C. Forsberg,
E. C. Hoyer, W. F. Schreiber.

Vol. XV FEBRUARY 19, 1935 No. 1

Farewell

With this issue of the *Armour Tech News*, a new staff takes over the publication of the newspaper. The men who have directed its activities during the past year have no longer any direct connection with the job of getting it off the press, but in a sense their connection with the paper has not been broken, nor has that of the men who have gone before them. On the contrary, for the *News* today is what they made it, and every one of them has made his contribution.

Since its modest beginnings seven years ago, the *News* has steadily improved, and it has been the privilege of the new managing board to see it under the guidance of two groups whose contributions are among the greatest of all.

If the *News*, in the next year, improves as much as it has in the last, we will be able to retire conscious of having done a good job.

At any rate, we look forward to a pleasant year, for our staff of assistants is certainly one of the best. We are fully prepared to believe the statement of the retiring editor, made at the banquet, that when our year is up, we'll be sorry to leave.

Assembly

Perhaps the greatest of the features of a busy week for Armour will be the annual Washington's Birthday address next Thursday by Dr. Preston Bradley. Everyone who knows anything of Dr. Bradley, and in particular those who heard his address here three years ago, anticipates one of the most enjoyable meetings of the year.

We confidently expect that Armour will enjoy Dr. Bradley's talk, and will show him every courtesy in appreciation of his being present.

Finale!

Closing one of the most successful seasons they have had in many years, the Armour basketball team will play Indiana State Teachers on the home court next Friday. The game will start at 8 P. M., and the freshman-sophomore dance is scheduled to begin about an hour and a half later, so the team may hope to be cheered on to a victory by not only all of the Armour men, but their young lady friends as well.

Both the game and the dance promise very well for an evening's entertainment, and we trust that full advantage will be taken of both.

"The Slipstick"

Cleave to "The Slipstick"; let
the Slapstick fly where it may.

Well, well, here 'tis just 'nother semester.

HEARD IN S. S.,
"What would you suggest to help bring a return of prosperity?"
"The horse, sir, bring back the horse and the country will soon be stabilized."

"What's wrong, Henry?" asked his mother.
"My razor," boomed the voice from within the bathroom. "It doesn't cut at all."
"Don't be silly. Your beard can't be tougher than the linoleum!"

Two girl attendants at the cigar counter were discussing their last customer.
"Did that tall, handsome travelling man that you were talking to over there in the corner take a Times?"
"Naw, he didn't buy a Times but he took a lot of Liberties."

The rain it poured,
The sea it roared,
The sea was draped in black.
The old ship rolled,
She pitched and bowled
And lost her charted track.
"Oh dear, oh dear!
Sir, will it clear?"
Loud wailed a dame on deck.
As he heaved the lead
The skipper said:
"It always has, by heck."

A tombstone in an English village cemetery has the following epitaph:

"Here lies a miser who lived for himself,
And cared for nothing but gathering pelf,
Now, where he is or how he fares,
Nobody knows and nobody cares."

THEY SAY

THAT—It is dangerous to drive in a fog, especially if it is mental.
THAT—It would be better for the times, if some of the "Yes" men were bank cashiers.
THAT—A diplomat is a man who convinces his wife that a woman looks stout in a fur coat.
THAT—Golf is about the only thing that depreciates above par.
THAT—The pedestrian is the one who needs automobile insurance.
THAT—Love at first sight is possible, but it is always well to wipe off the spectacles and take a second look.
THAT—Screening a Motion Picture doesn't take the trash out.
THAT—Perfect poise is not looking self-conscious in a rumble seat.
THAT—Competition may be the life of trade, but it is the death of profit.
THAT—The man who tried his hand at something and failed might try his head for a change.
THAT—You can't keep a good golfer downtown.

SO THEY SAY!

A boy in college, being in need of negotiable funds, sent his father the following letter:
"Roses are red, violets are blue
Send me ten dollars, and I'll owe you."
In a few days he received the following reply:
"Roses are red, roses are pink
Enclosed find ten dollars, I don't think."

Stenographer: "Your little girl wants to kiss you over the telephone."
Busy Manager: "Take the message. I'll get it from you later."

Jimmy (smart boy): "Let's play Adam and Eve."
Johnny: "How do we do that?"
Jimmy: "You tempt me to eat your apple, and I do."

"College certainly has made my son over."
"I suppose you can hardly recognize him."
"No, he hardly recognizes me."

Student in E. E. 415: "Prof. Nash, I could work the problems for today."

Prof. Nash: "Yes, I know! You couldn't work them alone, so you grouped up and tried to work them. Then you went to a junior E. E. and he hadn't had the material, and a senior E. E. couldn't be expected to be able to work them."

A professor was delivering an address before a group of business men. At its conclusion a manufacturer joined issue with him.
"Science is of no benefit to me," he insisted.
"What is your business?"
"I manufacture suspenders."
"And where would your business be," the next question, "if the law of gravity was suspended?"

He lost the game;
No matter for that—
He kept his temper,
He swung his hat
And cheered the winners—
A better way,
Than to lose his temper
And win the day.

Library Collection Swelled by Gifts

Since September 1, 1934, the Armour Institute of Technology Library has received 162 books as gifts from faculty members, students, and friends. In expressing appreciation for these gifts, Miss Steele, the librarian, said, "Each year we are indebted to the members of the faculty who give us the publications of their professional societies."

Some of the books that were received from faculty members are: six titles in economics from Professor Dutton; "Anthony Adverse" by Hervey Allen from Dean Heald; several titles in the field of mathematics from Professor Krathwohl; "America's Tragedy" by J. T. Adams and "Forty-two Years in the White House" by I. H. Hoover from Professor Lockling. Volumes of publications from professional societies, many of them completing some incomplete service in the library collection, and miscellaneous volumes of fiction were donated by Professor Penn. Several volumes of periodicals also came from Professor Roesch. A student in the Evening session, Mr. Norman Sauter, donated several volumes of "Times" friends are numerous. The Gillette sent recently to the library by friends are numerous. The Gillette Publishing Company was the donor of 25 volumes in the civil engineering field, and Mrs. Joseph Trudelle furnished six titles in psychology, biology, and chemistry. Mr. John M. Humiston presented the library with miscellaneous periodicals, part of which were the early numbers of the American Telephone and Telegraph Company publications that were of great value in completing the library collection.

THE STEAM SHOVEL

For the past administration—including us—this is the swan song. And if in the past we've committed any offenses (unintentional)..... excuse it, please! About the identity of "us".....well, if you know the open secret, you just know it, that's all; and if you don't know it, you're sure enough not missing much! To those fellows—and ladies—who've been the fodder and dirt for our Steam Shovel we wish a lot of good luck; and to those fellows who've had the good luck to avoid our unsolicited publicity....we wish continued good luck....And now—take it away, pal!

This may be old news by now, but then maybe old news is like old cheese.... Well anyway, it seems that on a recent trip of the basketball team JULIAN (LOVE AND KISSES) O'LEVY of the Basketballists' fightin' Irish trio of O'BRIEN, O'LEVY, and O'CONNELL cemented himself solid with a certain farmers daughter by the name of MARGARET MURPHY—or someth'n. All of which proves that when two "weavers of the green" meet....well, nature takes its course!

And Al (Lugan) Lauchiskis demonstrated beyond a doubt that most of his 200 lbs. or so is composed of high quality sponge....when he soaked in five malteds, two banana splits, and a chocolate soda—all in the space of two hours!!

What's this we hear about RAILROAD BILL GRAY drawing pictures again?

To Hold Meeting of Chicago Physics Club

The fifth regular meeting of the Physics Club of Chicago will be held today at 7 P. M. in the Engineering auditorium, 205 West Wacker Drive. The club is composed of teachers or physics and men interested in the applications of Physics to modern industry.

The speaker of the evening will be Mr. Willis H. Carrier, chief engineer of the Carrier Engineering Corporation. Mr. Carrier was awarded the medal of the American Society of Mechanical Engineers in 1934 in recognition of his pioneer work in the field of Air Conditioning which will be the subject for his address.

Armour students who are interested in attending should see Professor Thompson. Only limited space is available and must be reserved in advance.

There will be lectures on Cosmic Rays, Physics, and Public Education at future meetings of the club.

CAMPUS ALBUM

THOMAS KOSKI, GRINNELL COLLEGE SENIOR, CAN CLIMB UP ONE SIDE AND DESCEND DOWN THE OTHER OF AN UNSUPPLIED 15 FOOT LADDER!

JOHN O. BRADSHAW HAS BEEN NAMED CADET COLONEL OF THE PURDUE UNIVERSITY ROTC. AND IS THUS ENTRUSTED WITH THE TASK OF HANDLING THE LARGEST COLLEGE ARTILLERY CORPS IN AMERICA. IT IS THE ONLY ONE COMPLETELY MOTORIZED.

nished six titles in psychology, biology, and chemistry. Mr. John M. Humiston presented the library with miscellaneous periodicals, part of which were the early numbers of the American Telephone and Telegraph Company publications that were of great value in completing the library collection.

Through the assistance of Professor Fischer, instructor in the French and German languages at Armour, the library has also secured two French and two German publications; namely, "Art-Industrie", "L'Art e Les Artistes", "Technik fur Alle", and "Wissen und Fortschritt". It is expected that the foreign language

students will find these magazines and the several books in these languages that are now available in the library, of especial value in training them, and in broadening their knowledge.

Last semester, a library copy of McAdam's "Heat Transmission" was lost by one of the junior or senior chemical students. Realizing the value of this book, the junior chemical students have subscribed ten cents each which sum will be supplemented with money from the treasury of the Junior Chemical Organization to allow the purchase of a new book. This book will then be donated to the library.

The Telephone "can take it!"

Your telephone must work 24 hours a day. It must be immune to icy blasts of the frozen north—dry burning heat of the desert—heavy, humid atmosphere of swamp lands.

And it is. For Western Electric—manufacturing unit of the Bell System—sees to it that telephones, switchboards and cable are prepared for life anywhere. Through long experience and rigorous testing, telephone engineers have learned how to make apparatus which is not adversely affected by the whims of climate.

Through pioneering and producing such improved apparatus, Western Electric contributes to the year 'round reliability of your Bell Telephone service.

BELL TELEPHONE SYSTEM
