

Other Campuses

Students at Purdue University now have a new course in x-ray technique. In addition to learning the physical motions necessary for the operation of x-ray equipment the students are taught the mathematics and physics necessary for a thorough understanding of the principles underlying x-ray photography.

As a result of work in the Textile department at Georgia Tech, a synthetic rayon has been made from Georgia pine wood pulp. This work may prove to be of great industrial importance.

In regard to class absences, the Daily Illini makes a play on an old adage and says, "Absence makes the marks grow rounder."

Of a total of 1,046 applicants for admission to the St. Louis university Medical school, only 148 were allowed to register.

A shipment of 2,000 paddles made of barrel staves was received recently by a fraternity at the University of Kansas.

A professor at Brown university photographs people who borrow money from him.

A professor at Manhattan is considerably perplexed over the fate of one Wallace Beery, who apparently registered in his class only to disappear completely.

The University of Catania, in Sicily, celebrated its 500th anniversary in November of this year. The U. S. was represented by several university officials.

A coed at the University of North Dakota has the distinction of being the first third-generation student at that school. Her grandfather was a member of the class of '89 and her mother was a member of the class of '08.

Joe Penner's duck, "Goo-Goo," is the new mascot of Duquesne university gridders, for his master was voted the squads favorite entertainer.

One hundred and fifty Loyola university students have appeared with the Chicago Civic Opera Company production this fall.

A professor of economics at Yale university made the following statement recently: "Many students are like coffee—98 per cent of the active ingredient has been removed from the bean."

From the Kentucky Kernel: I stole a kiss the other night, My conscience hurts, alack, I think that I'll go back tonight And put the blamed thing back.

Students at the University of Minnesota bartered fountain pens, clothing, jewelry, and other articles valued at a dollar each for admittance to the Engineer's dance held recently.

A professor of Political Science at the University of California is quoted as saying, "all men are created equal—but some of them get married."

Frankie Frisch, manager of the World's Champion St. Louis Cardinals, was a backfield star on the Fordham football team sixteen years ago.

At Illinois Wesleyan university a local barber gave free haircuts to every boy who played in the football games if their team won. If the team lost, only the men who scored in the game got them.

"Excessive week-ending" on the part of Colgate university to see movies in nearby towns and central New York, so irked officials of the institution that they set up a movie theater on the campus in Lawrence hall. The village theatre was closed in the summer.

Fraternity Notes

THETA XI

Since the beginning of the school year, the members of Alpha Gamma chapter have been busy habilitating and redecorating their new quarters at 3123 S. Michigan. With the able help of Professor Moreton, who has been appointed by the grand lodge as our new D. G. L., and some of the alumni, the actives have completed what they feel to be an excellent job of interior decorating and are now ready to step back into the picture around the institute.

Several of our interested alumni have been present at the meetings which have been held recently and are acting as an advisory committee for the chapter.

The first dance in the new house was held on February 7 as a celebration for the completion of the work on the rooms as well as the end of the semester. The dance was well attended by both actives and alumni, and Professor and Mrs. D. P. Moreton and Mr. and Mrs. O. J. Norris were in attendance as guests.

Officers for the semester who were elected a month ago are:

- Orin E. Norris President
- Lee C. Willis Treasurer
- Carlo M. Christiansen Secretary
- Curtis H. Parsons House Manager

PHI KAPPA SIGMA

The annual pledge dance was one of the best dances at the house since rushing. The decoration gave the unique effect of the ocean floor and a new orchestra furnished excellent incentive for dancing.

Probationary Week has finally come to an end, and although the boys are pretty well tired out they are happy.

Bro. Wallace, A. E. '35, has gone into a partnership and has a refreshment and soda shop, at Northwestern University, called "The Hut." Stop in and see Johnny.

BETA PSI

Last Saturday night the house enjoyed a radio dance, belated celebration of St. Valentine's Day. A number of the Alumni were present, and every one had a wonderful time.

This evening a meeting of all actives will be held. Everyone is expected to be present. Our Hell Week will in all probability start Feb. 23.

DELTA TAU DELTA

The dance held at the home last Friday night was a big success. There was a large crowd present, and everyone enjoyed dancing to the good orchestra.

A number of the members of the chapter attended the dedication of the Weiland Memorial Room at the Henrotin Hospital last Sunday. The Weiland Memorial Room was furnished by the Delta Tau Delta fraternity in honor of Dr. Weiland now deceased, who was a prominent Chicago physician and an active alumnus of the fraternity. Dr. Weiland attended the U. of Chicago and was a member of the Delta chapter there. The furnishings which make it one of the most

Guest Speaker Talks at A. I. Ch. E. Meeting

At their regular meeting last Friday morning in the Physics Lecture room, the American Institute of Chemical Engineers had as their guest speaker Mr. J. O. Clark, chief of the central section of the Food and Drug Administration. His subject was "Food Chemistry as Applied to the Food and Drug Act." The function of the Food and Drug administration, in the words of the speaker, is to regulate the business which supplies "everything human beings use as food and everything they use as medicine."

The scope of the subject of food chemistry includes the study of nutrition, the chemistry of growing plants and animals, and the manufacture of foodstuffs. Food chemistry requires much exact analytical work, and the laboratories of the Administration in the new post-office building on W. Van Buren street are considered the most modern and up-to-date in the entire country.

In spite of this modernity, Mr. Clark told of a painting hanging on his office wall which was executed by a worker on the C. W. A. It pictures a modern laboratory, and through this painting, it can be seen at what rate chemical laboratory equipment becomes obsolete. In the short time since it was completed, certain pieces have already outlived their usefulness.

After covering some of the legal sides of the picture, the speaker closed by inviting the members of the A. I. Ch. E. to visit the food and drug laboratories in the post office at some future date.

Arx News

For lessons in "How to Murder a Foreign Language in (take any number) Lessons" see that master dialectician, Senior Don Miguel Alvarez Manuel Haroldo SLAVITT. If you prefer a prescription for the cure of falling eye-lashes see Dr. SLAVITT. But if you are inclined to favor scholarly lectures about the fourth-dimension (Whatever that is:) see Prof. SLAVITT. Oh, yes, he also takes a crack at this architecture business we hear about, all of which make him a well-rounded something or other.

The new term has brought with it several additions to the department. The fresh were blessed with a couple of C. E.'s who now propose to augment their engineering knowledge with architecture. The juniors have two new men in their ranks, a Mr. COHEN, who hails from the U. of I., and a Mr. HRACHOVSKY, who is making his debut in American schools. Incidentally, S h o l t o SPEARS, would nominate the latter as about the most courteous man in the department, if one is to judge by the way he clicks his heels in true continental fashion when speaking or when spoken to. And just to prove that they always come back for more, Ed RUNGE, after about a year's absence, has decided to match his wits with the seniors; whereas Ray PETERSON, who has been teaching school since his graduation a few years back, is back in the harness, so to speak, to continue studying under Prof. KREHBIEL.

We'd gladly give two thumb-tacks (Boy, is that sarcasm!) to know who B. R. BUCHHAUSER remained down-town to meet the other P. M. We'd even raise the ante to discover why Dick LISCHER was dubbed "One-pinch" LISCHER. Could it have culminated from his recent fracas with "Killer" KICHAVEN, alias the "Battling Russian."

Messrs. BRUNETTI, GROSSMAN, SCHWAB and TAGUE have submitted water colors to the Art Institute for its International Water Color Competition. They will be on exhibit in the galleries of the Institute by the end of the month. We know these men will be on top with the best of them, but nevertheless, a little bit of good luck won't hurt. If you become intrigued with a certain sketch by Mel GROSSMAN which he has named, "Dumps" and to which he has affixed a value of twenty-five dollars, don't be surprised. Confidentially, Mel has promised said masterpiece to yours truly should it, by some quirk of nature, not be sold.

Mrs. GOODMAN claims that the noise she heard just outside of the office the other day reminded her of some of the wild animals she had seen and HEARD in a movie short the previous evening. Suppose we say her imagination was getting the best of her and let it go at that, so that our boys might at least get the benefit of the doubt.

EAGLE EYE.
