

**SIDELINES**  
By Albert M. Lane  
LOCAL POLITICS have taken on the aspect of a jig-saw puzzle. There are a few pieces to be put together, but the only key to the proper correlation of the component parts seems, at the writing, to be pure speculation.

It is generally conceded that there are two factions of Democrats dominating, between them, all of the major political offices in both the city and the county. Persistent rumors indicate a lack of harmony between the two factions, and there have occurred a series of incidents that tend greatly to strengthen belief in the supposition that an open break is impending.

THE REPORTED \$380,000 shortage in the accounts of the leader of the minority faction does not appear to greatly distress that individual. Perhaps it would not be a serious error to assume that he may be able to account for the missing amount by producing party notes—pledges to repay borrowed campaign funds.

ONE OF the most fruitful sources of political income has been for years the protection fees paid to the political syndicate by "bookies" and other gamblers. Since the appointment of Captain Gilbert to the directorate of the police department, the gamblers have operated only by "cheating"; and that income has not been available to the politicians.

### Picnic Held by A.I.E.E. at the Indiana Dunes

With its successful season rapidly drawing to a close, the Armour branch of the American Institute of Electrical Engineers held a picnic in the Indiana Dunes last Thursday. Treasure hunting, wheelbarrel and horse-back racing, baseball playing, and prize awarding were the highlights of the occasion.

### Graduating Class Numbers 140 Men

Armour's graduating class of '35, will be addressed on Commencement day by Dr. D. S. Kimball, Dean of Engineering at Cornell University. The Commencement exercises will be held on June 13 at 4 p. m. in the Goodman Theatre.

To Give 23 Advanced Degrees  
The graduating class numbers 140 men. Of these, 29, who should receive the Bachelor of Science degree, will be M. E.'s, 28 E. E.'s, 18 C. E.'s, 27 Ch. E.'s, 16 F. P. E.'s, and 22 Arx's.

Baccalaureate June 9  
The Baccalaureate Services will be held on Sunday, June 9, at 10:15 a. m. in the Orchestra Hall. The Rev. Frederick F. Shannon D. D., who delivered the sermon at last year's services, will do so this year also.

The Baccalaureate Sermon is open to the public, no tickets being needed for admission.

### Honor Cycles Will Be Awarded at Banquet

Alumni, seniors, faculty members, and trustees of Armour Institute will stage their annual spring rally at the Medinah Athletic Club on Tuesday, June 4, at 6:30 p. m.

The 100 members of the Glee Club and Orchestra will fittingly close a successful season by presenting a concert composed of college songs and other numbers. Members of the championship relay team will also be present.

Both President Hotchkiss and Mr. Cunningham, chairman of the board of trustees, will give short talks concerning the new Armour Institute. Distribution of the Armour Cycles is to start June 4 at the Alumni banquet, when honor editions of the annual will be presented to the ten outstanding graduating seniors.

### Fraternities to Have New Rules in Rushing

Proposed changes of the interfraternity rushing rules were submitted at the interfraternity council meeting which was held last Thursday, May 23, at the Sigma Alpha Mu house.

Another plan voted on at the meeting was the presentation of an award each semester to the fraternity having the highest scholarship average. Tuesday morning, May 28, was set as the deadline for the first round of the interfraternity tennis and golf matches; and Friday, May 30, was set as the deadline for the second round.

### HOLD ELECTION OF A. T. A. OFFICERS THIS WEDNESDAY

Election To Be Held In Lobby of Main Building

#### FILL THREE POSITIONS

The Armour Tech Athletic Association will hold an election of officers tomorrow from 9 o'clock to 2 o'clock in the lobby of the main building. Voting is open to all students of Armour, athletes and non-athletes.

First vice-president: Joseph Bar-tusek, Eugene Heike, and Francis Popper.

Second vice-president: Claire Dun-bar, William O'Brien, and Edward Wagner.

Secretary: Eugene Kremel, Paul Martin, and Robert Merz.

#### Committee Selects Candidates

The candidates for election were nominated by a committee consisting of John Ahern, chairman, Harry Dollemaier, Ralph McDonald, Al Lauchiskis, Paul Martin, and Charles Johnson. Toward the end of the spring semester the nominating committee chooses three men, who are not necessarily athletes, for office.

At the time of the election a sophomore is elected to the office of first vice-president. After serving in that capacity, he automatically becomes president in his senior year. Next year the A. T. A. president will be Donald J. Neal.

#### Second Vice-President a Freshman

The second vice-president is elected from the freshman class. This office, however, does not carry on, the tenure being one year. The secretary, who is elected from the ranks of the sophomores, has a one-year term.

The men elected to office automatically become members of the Board of Athletic Control, having as permanent members Professors Hunt-ly and Schommer, Dean Heald, G. S. Allison, and W. C. Krafft. The board makes up a yearly budget for extra curricular activities, and appropriates money for all athletic teams.

Since the policies of the board affect the extra curricular activities of the student body so greatly, and the management of the student activity fee lies in their hands, a wise and discreet selection of officers should be made.

### F.P.E.S. to Hold Last Meeting This Friday

The Fire Protection Engineering Society will conclude its season with a meeting next Friday at 10:30, in which officers for next year are to be elected, and reports of this year's activities will be read.

Officers for the past year were: E. N. Searl, president; W. A. Trudell, vice-president; O. P. Freilinger, secretary; and J. K. Morrison, treasurer.

### Officers Are Elected to Head Pi Tau Sigma

Officers to lead Pi Tau Sigma, honorary mechanical engineering fraternity, during the coming semester were elected at the last meeting. The men elected were: H. S. Nachman, president; A. M. Lane, vice-president; D. E. Howell, recording secretary; F. D. Cotterman, corresponding secretary; A. H. Rice, treasurer; and E. P. Auler, catalogueur.

A farewell banquet to the graduating seniors, similar to those held in past years, is contemplated for the end of the semester.

### PRESIDENT'S NEW REPORT TELLS OF RECENT PROGRESS

In a report, supplementary to the president's report published last fall, Dr. W. E. Hotchkiss, president of Armour Institute, reviews the activities of the various faculty committees and relations of the Institute.

Through use of certain trust funds and special contributions the deficit has been reduced to \$50,000. "The administration is convinced that we cannot afford longer to make our attack upon this limited front. Further study of the question of a new site indicates that the time for action has arrived." Plans and problems to be met are mentioned elsewhere in this issue.

#### Faculty Council Active

Members of the council and its committees have been active this last semester in several different lines. Through recommendation of the special committee on shops, under the chairmanship of Professor Finnegan, in their report, submitted recently, shop courses will be in the curricula next term.

#### Increased Publicity Obtained

Publicity through an alumni and faculty speakers' bureau is making excellent progress under Professor Paul's direction. About 200 students were interviewed by members of the scholarship committee in preparation for the exams held last Saturday.

Forms have been developed and complete records are kept of all transactions of the student loan committee. Professor Freud has taken steps to insure a thorough business-like procedure in granting loans and making collections.

A thorough study of the placement field, and a development of records and personal data of all graduates is going on under the direction of the chairman, Professor Peebles, W. N. Setterberg, placement officer, and the faculty committee on placement.

Enrollment has averaged only 5.5 percent decrease this year over last year in the day school, in spite of an increase in tuition. Evening class enrollment has increased 43 percent.

### Alpha Chi Sigma Has Election of Officers

At a business meeting held last Monday the members of Alpha Chi chapter of Alpha Chi Sigma, professional chemical fraternity, elected the following officers for next year: L. Robbie, master alchemist; J. A. Haase, vice-master alchemist; J. H. Johnson, recorder; W. F. Schreiber, treasurer; R. M. Paulson, master of ceremonies; and H. P. Milleville, reporter.

The chapter's magazine, *Alpha Sights*, is being planned for greater distribution next year, under the editorship of H. P. Milleville. The other business taken up at the meeting was the completion of an alumni register to reach all graduates in the Chicago region.

### Mr. G. Bursach Will Be Married on Saturday

Mr. George Bursach, secretary in the office of the registrar, is to be married this Saturday, June 1, to Miss Diana Korach. The wedding, which will take place at 12:00 noon in the Serbian Eastern Orthodox church, will be followed in the evening by a reception and supper at the Serbian Church Hall.

### AWAIT DECISION OF BOARD OF TRUSTEES ON PROPOSED NEW NORTH SIDE LOCATION

Executive Committee of Board Approves Booklet Prepared by Dr. Hotchkiss Discussing Lake Shore Drive Site

#### POSSIBLE FINANCING PLAN IS DISCUSSED

The physics laboratory will be closed for the semester after Monday, June 3, 1935. Reports must be in not later than 1 p. m., Wednesday, June 5.

### Frosh-Soph Dance Plans Completed

The Freshman and Sophomore classes, which have already offered Armour an innovation in class dances in their table dance last February, are again presenting something different. This time, the affair will be a dance held on the night of June 12, following the final examinations.

Roy Lind and his ten piece band, popular in college circles, will provide music for the Spring Informal, being held in the Crystal Ballroom of the Edgewater Beach hotel. Ample space for dancing is assured, as the ballroom is capable of accommodating 300 couples.

Bids, which are being sold by members of the social committee for \$1.59, will be exchanged at the entrance for attractive, suede covered programs.

Stanley Healy, freshman social chairman, and Oreste Tomei, sophomore chairman, with their committees, have been instrumental in arranging the affair.

The members of the freshman committee are W. Chelgren, H. Downing, M. Hodes, F. Roder, and G. Stober. The sophomore committee consists of R. Bacci, F. Davidson, D. Forberg, G. Starmann, and I. Thuder. Bids may be obtained from any of these ten men.

### W.S.E. to Elect Officers Today

An election of officers and a discussion of plans for the Spring Smoker will be the main topic at the meeting of the Armour branch of the W. S. E. today at 11:30 a. m. in the lecture room off the assembly hall in the Mission.

The following officers are to be elected: President, vice-president, secretary, assistant secretary, treasurer, and member of the board of managers. Only those who are members in good standing can be eligible for office. In addition the nominees for the offices of president and secretary shall be active members of the Armour W. S. E. branch and shall be a member or a prospective member of the Western Society of Engineers.

### Journalists Initiated Into Sphinx Honorary

In recognition of the interest which they have shown publications, seven juniors were initiated last Tuesday night into Sphinx, honor literary society. They are N. Balai, C. L. DuSell, G. Freund, R. H. Knabe, J. O. Larson, R. O. Patterson, and G. A. Zwissler.

Following the initiation G. A. Zwissler and F. D. Cotterman were elected to fill the offices of president and secretary-treasurer respectively, succeeding H. J. Zibble and L. J. Beckman of the senior class.

A booklet entitled "A New Home for Chicago's Center of Education in Engineering and Architecture," containing a complete discussion of the project for a north side campus, was approved by the Executive Committee of the Board of Trustees at a meeting in the Union League Club last Thursday and was presented to the Board of Trustees last night at the Chicago Club.

Options have already been secured on the city block between Erie and Ontario Streets fronting Lake Shore Drive. The total cost of the land, which Armour proposes to acquire, including an eleven story building and two one-story buildings on the site, plus the cost of remodeling and moving, will be about \$2,000,000.

Provided funds are raised to take up the options before they expire, operations in the new home can begin at the beginning of the coming school year.

#### May Move Next Year

On the proposed site are three buildings which may be used after remodeling. One is an excellent eleven-story building hitherto known as the Furniture Exhibition Building, 100 by 110 feet, which was built only eight years ago.

Architects attending classes at the Art Institute and students studying Fire Protection at the Underwriter's Laboratories will be accommodated by the proximity of the Lake Shore site. Transportation of practically every form is within walking distance of the proposed campus.

#### Location Is Ideal

The accessibility of the loop and the favorable neighborhood should increase the evening class enrollment. Another item in the Armour program is the Summer School running from Commencement to the end of

To assist in the development of plans for moving the Institute to the north side, Mr. Wallace M. Flower has been made a member of the Institute staff.

### New Staff Member to Assist Hotchkiss

Working with the president, he will be engaged on the business details of the project.

Vol. XV. May 28, 1935 No. 14

## A.T.A.A. Elections

The most important election of the year at Armour will be held tomorrow when the students choose the officers of the Armour Tech Athletic Association. Yet not only has no notice of the election been issued before today, but it is doubtful if very many of us could state off-hand where the candidates came from, now that we know who they are. Moreover, although we are probably dimly aware that they have something to do with the administration of the student activity fee and the presentation of athletic awards, we haven't a very good idea of just what the duties and powers of the A.T.A.A. officers are. In short, the student body is woefully in ignorance about the functionings of the A.T.A.A.

Secure behind the requirement that every student become a member of the association, the Athletic Board of Control has perhaps been a little careless in neglecting to take the student body in on what's going on. True enough, they were anxious that this issue of the *News* make the details of the election quite clear; they are not, of course, trying to hide anything. But after all, the dues were paid last February. Why wait until the day before elections to start explaining to an admittedly ignorant student body that the first vice-president now being elected will automatically become president in a year?

Of course, all the information regarding the A.T.A.A. has always been available to any one who wants it. There is a constitution which, among other things, specifies the method of selecting candidates for office in the association, and it may be examined by any student, provided he can find some one who has a copy of it. On this ground, we might even be criticized for our failure to find out for ourselves whatever we need to know about an organization so important to us all. But all the blame cannot be thus affixed.

Entering Armour, every freshman is officially told that there is a student activity fee of nineteen dollars a year which every one must pay. Unless he purposely tries to find out more about the matter, which, in his naturally innocent state is unlikely, he will not learn until nearly a year later, on the eve of the A.T.A.A. elections, that he has any voice in the matter of the student activity fee. For that much money, he has a right to expect a little more.

It must be emphasized that the athletic board is aware of this situation, and, apparently, takes the same view as the *News*, that it ought not to be. What they have neglected is to do something about it. The remedy is, of course, perfectly simple. Let the A.T.A.A. provide every member with a copy of its constitution and by-laws, and, perhaps, with a simplified explanation of its methods of procedure. If, then, no one ever reads the things, at least no one will have any kick coming.

## "The Slipstick"

Cleave to "The Slipstick": let the Slapstick fly where it may.

### SAPPIEST EVENT OF THE WORLD

The health enthusiast who wrote an article on fresh milk and an editor condensed it.

Francois.

*Old Gentleman (bewildered at an elaborate wedding):*  
*Are you the bridegroom?*

*Young Man: No sir, I was eliminated in the semi-finals.*

They had been sitting in the swing in the moonlight alone. No word broke the stillness for half an hour until—

"Suppose you had money," she said, "what would you do?"

He threw out his chest in all the glory of young manhood, "I'd travel!"

He felt her warm, young hand slide into his. When he looked up she had gone. In his hand was a nickel.

Suitor: I wish I could take you in my arms and squeeze you until you'd gasp for breath!

Girl: So do I, you weakling!

I can always tell a married man from one who isn't so. My method is infallible and this is how I know.

There may be other ways of telling but I think this is the best. A bachelor never, never lacks a button on his vest.

### Thanks to Science (?)

*I can't see why,*  
*After wishing the semester was over*  
*At the beginning,*  
*With all the work to do*  
*And final exams coming,*  
*I wish it it was longer.*

The modern gold digger is a genius indeed; her forefathers mined for it with pick and shovel, while she merely strokes a bald head.

Conscience is the little thing that tells you that someone else is sure to find out.

A little weak looking man (about the size of Nick Virgilio) had applied to the foreman of a stevedore gang for a job. He was insistent so the foreman put him to work loading 300-pound anvils in the hold of the ship.

All went well for a while, but suddenly a splash was heard and somebody cried for help. Running to the gangplank the foreman looked over the side and saw the little man he had hired bobbing up and down in the water.

"What's the matter, Shorty, can't you swim?" called the foreman.

"Sure," came the reply, "I can swim all right, but if you don't throw me a rope, I'll have to drop this anvil."

An engineer has to be a contortionist to get by these days. First he has to keep his back to the wall and his ear to the ground. Then he must put his shoulder to the wheel and his nose to the grindstone, keep a level head and have both feet on the ground.

*If the plural of mouse*  
*Is mice,*  
*Then certainly*  
*The plural of spouse*  
*Is spice.*

You're wrong! It's bigamy! —Ohio State Lantern.

A certain prominent collegian wandered into a tennis tournament the other day and sat down on the bench.

"Whose game?" he asked.

A shy young thing sitting next to him looked up hopefully.

"I am," she replied.

### When an Engineer Proposes

My darling Inertia, you are my big moment. My heart whirls in eccentric orbits, and when I think of you my brain spins as though it had lost its radius of gyration. Though you are far away, I steel love you. Each time I leave you, I hurry back saying to myself, "I cantilever alone." When I beam on you, the stress in my heart strings approaches the elastic limit. As two bars are firmly riveted together, so let us be forever united by the bonds of matrimony. —Minn. Tech.-Log.

"Do you like beer in a mug, girlie?"

"That all depends on how he acts when he's got it in him."

From which it follows that:

The capacity of the beer barrel is fixed but the capacity of the beer drinker is something he has to find out for himself.

Some punk poetry (found in the gudder):

*Pity the calf*  
*That lost its mudder—*  
*It's all alone,*  
*There is no udder.*

## Fraternity Notes

### PHI PI PHI

Gamma chapter of Phi Pi Phi takes great pleasure in announcing the pledging of Thomas Onions '37. Congratulations to Brother Savidis on his appointment as track manager for next year. May he have the success that has attended Brother Grakavac, retiring manager.

Good-luck, also to Brother Sram-ek on his election as co-captain of the boxing team.

At their meeting at the house last week, the Mother's club formulated plans for the coming year.

With finals only two weeks away, the brothers are looking forward to our annual farewell party to be held in honor of the graduating members.

### PHI KAPPA SIGMA

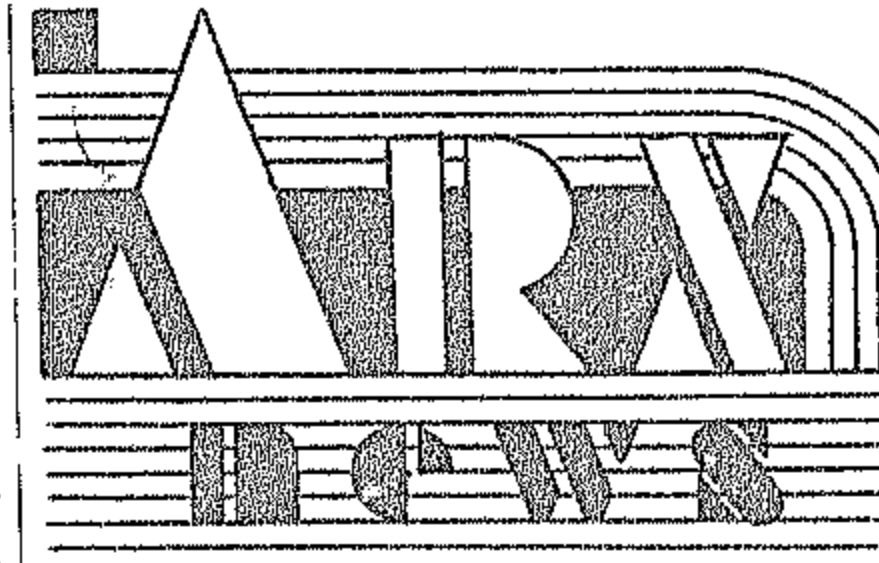

The annual Senior Farewell party was held at the Empire Room of the Palmer House last Friday night. The couples spent a very enjoyable evening dancing to the smooth rhythm of Freddie Martin's band.

Congratulations are in order for our tennis team who won the first match with Triangle last Thursday by the score of 2-1. We are now looking forward to the first match of interfraternity golf which will be played in the near future with the Deltas.

### DELTA TAU DELTA

Plans are in progress for a house dance to be given a day or two following finals. It will be held at the Architects Club and a large number of both actives and alumni are expected to come. Brother Frost, an alumnus from University of Illinois and at present occupying a position in Chicago, has moved in to our new shelter with us. The new quarters have met with a favorable impression on him and he thinks that the possibilities in decorating will prove beneficial in every way.

H. J. Prebensen was recently presented with the jeweled, alumni, service badge of Delta Tau Delta by our chapter in appreciation for the distinguished services he has given us under the roll of chapter advisor. Mr. Prebensen has been both active in

Having made no less than fifty-three studies of plan on the Ryerson Prize Competition, Mel GROSSMAN finally came back to his second or third idea. Likewise, Stew GRANGER has been tossing himself around from pillar to post, and deriding his "nigger", Hal SLAVITT, jestingly of course, for loafing on the job. (Let's not mention Mel's "nigger.") Friday is the day these immense projects are to be turned in, and one can never tell, until the inevitable voice of Joe Wagner calls for them, just what the final will be like.

A few of the seniors seemed to take matters into their own hands when they put "Blue Boy" URBAIN in the well-known sink. Another of the "dunking" candidates was Joe KICHAVEN, who was also sunk by the seniors. KICHAVEN'S free bath was a result of his untimely remarks to the general populace when the seniors were trying to im-

our chapter and affairs of the Western division of Delta Tau Delta. At present he is busily engaged in formulating another Chicago alumni chapter.

Our golf team has high possibilities this year with the Davidson brothers forming a nucleus around which the team will be built. Our first match will be played with Pi Kappa Phi.

### PI KAPPA PHI

Congratulations are in order for Brother DuSelle, who was initiated into Sphinx, honorary literary society last week.

Sunday evening a get together smoker was held for the Beta Psi alumni of the Chicago area. Plans for initiation of Beta Psi alumni into Pi Kappa Phi were made for the near future.

Plans are rapidly nearing completion for the senior farewell dance, to be held Saturday evening, June

press the freshmen with some good fatherly advice. The interesting part about this whole sinking business is the comparative reactions of the "sinkee." URBAIN was meek as a lamb and probably would have sat in the sink himself if he were told to do so. However, the other victim was as wild as they make them and squirmed and wiggled like a stuck pig. (Pardon the simile).....

"Kid" SALETTA pulled a funny one (we think) the other evening when he said, "If a man calls up, tell him if the phone is working." There's no sense to that, but that's just what we like about it. To hear him say it is half the show.

"One-Pinch" LISCHER again came through. This time he was THE junior to rate on the last class B Esquisse - Esquisse, "An Antique Shop".

The results of the judgment in New York of the last junior project, "A Park Bridge" were rather favorable. W. Senn WEITING, whose beautifully rendered project must have floored them at the E. A. I. D., came through with a first mention. His classmate, Ivar VIEHE-NAESS, got off with a mention, whereas halves were given to Bill CONCOLINO, Ed OLSON, and Joe PFENDT.

Let us close with a welcome to the freshmen who last Friday were both formally and informally initiated to A. A. S.; and who were shown that evening at the annual banquet, the splendor in which the upper-classmen dine (once a year).

EAGLE EYE.

1. A large group of alumni are expected to be present.

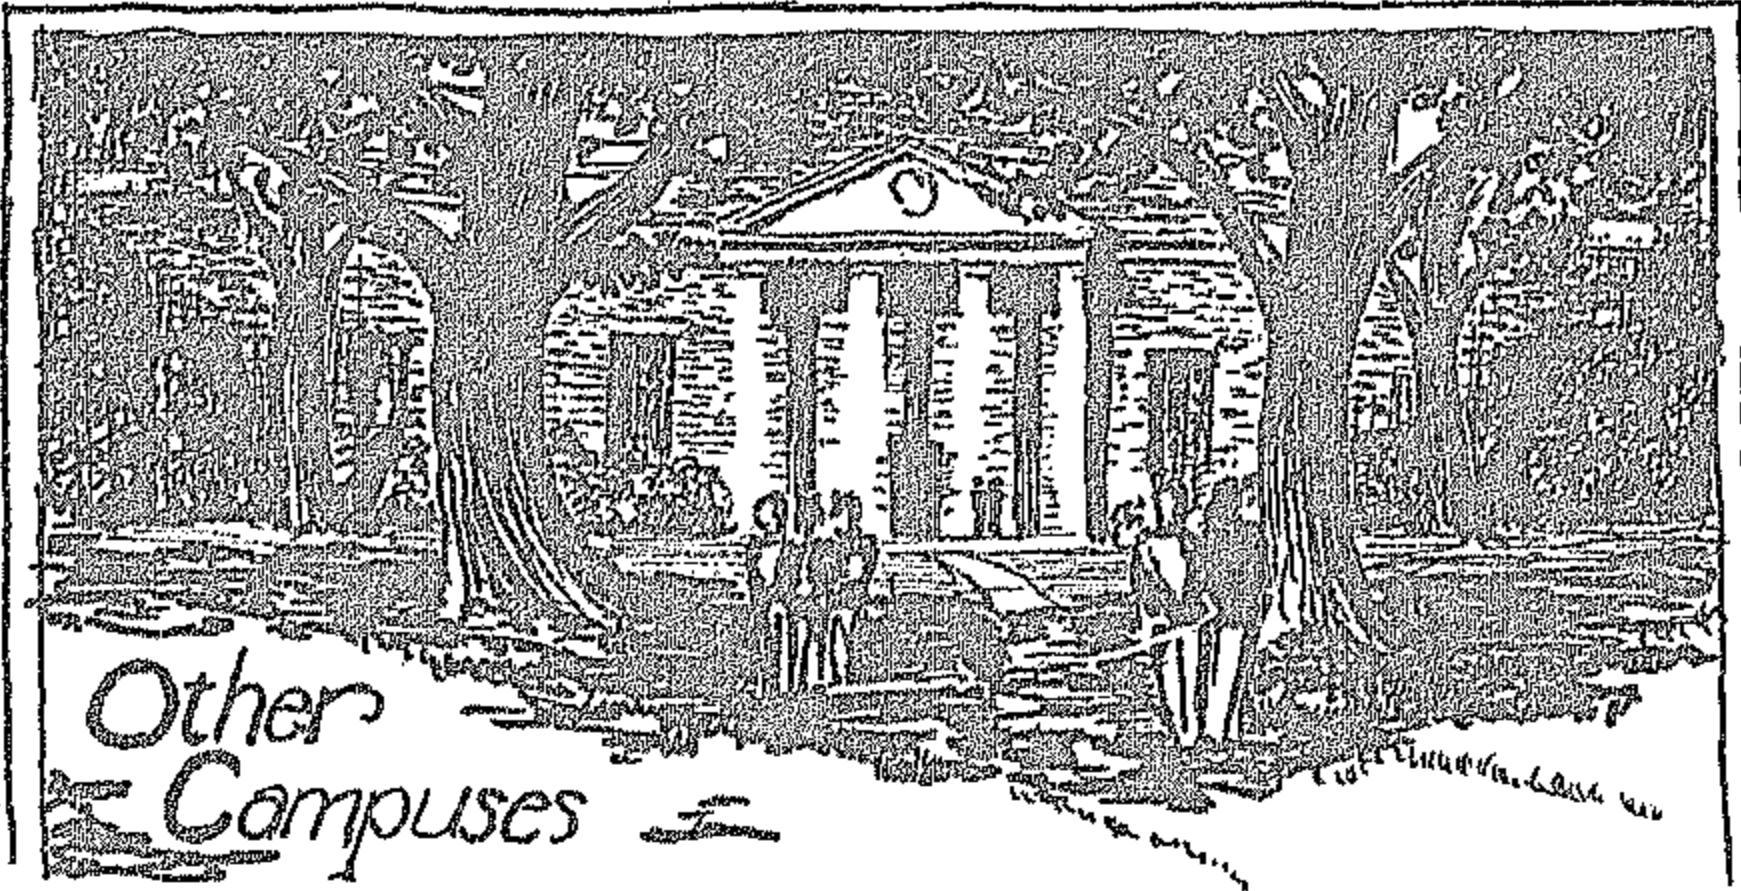

### RHO DELTA RHO

The annual Rho Delta Rho dinner dance was held last Saturday, May 25. Amid the beautiful surroundings of the Electrical Club in the Civic Opera Building, and to the tune of Dave Cunningham and his Towne Club Orchestra, the Rho Deltas and their girl friends enjoyed themselves to their heart's content. Dinner was served at 8:30 p. m., after which many unusual novelty numbers were presented by the orchestra.

IT'S NO SECRET  
I'm your best friend  
I am your Lucky Strike

Copyright 1935, The American Tobacco Company

IT'S THE TOBACCO THAT COUNTS. And there are no finer tobaccos than those used in Lucky Strike.

By Orville H. Hampton

West Virginia University recently conducted a poll to determine the size of the diplomas to be given next June.

(After all, though, it isn't the size, but the number that counts.)

A new chain letter has been started at the University of California. Instead of "Send-a-dime" it is "Send-a-dame."

Naturally as soon as the letter got in circulation mathematicians set to work; and they figured that if each of the 10,000 males at the university co-operated there would be approximately 156,250,000 "dates" that would result from one letter.

COLLEGE PIE

A freshman is like a pie before baking. A sophomore is like a pie that is half-baked. A junior is like a pie that has too much crust. A senior is like a pie that has soaked too long. —Collegian.

All the freshmen at the University of Maryland are required to work on the student paper one day a week.

A new advance in intellectual pursuits has been made at the University of California, by the way. The coeds have organized a Women's Auxiliary to the football team.

The Concordia College student band will make a summer tour to Norway in 1935, under the auspices of the Normandsforbundet, an international league of Norsemen.

A professor who goes to a class five minutes early is very rare—in fact, he's in a class by himself!—Nebraska Awgivan.

X-CELLENT!

X is the Roman notation for ten. X is the mark of illiterate men. X is a ruler removed from his throne. X is a quantity wholly unknown. X may mean xenon, a furious gas. X is a ray of similar class. X-mas is Christmas, a season of bliss. X in a letter is good for a kiss. X is for Xerxes, the monarch renowned. X marks the spot where the body was found!

—Green Gander.

(Ed. note: We can't understand why they didn't mention that "X" are what the hens lay.)

NEW SITE—

(Continued from page 1)

August. Coolness of the summer climate, general desirability of the neighborhood, an unobstructed view of the lake, cleanliness, and attractiveness of all surroundings make the proposed location ideal.

Old Site Inefficient

Armour has found that the present plant dating from the Columbian Exposition is glaringly inadequate and that the deterioration of the surrounding area is unsuitable for an institution of higher learning.

In searching for a new site, the administration set three requirements: (1) For the Students: The site must be accessible to the undergraduate and provide for him a stimulating environment favorable to sound physical, technical, cultural, and moral development.

(2) For Service: The Institute must be easily accessible to the whole Chicago area. This is necessary in order that, through research and other activities, it can most effectively serve the industries of Chicago and have a part in their development.

(3) For Its Civic Contribution and Prestige: The site should be one in which the city may take justifiable pride. Its setting and architecture should reflect the function and idea which Armour Institute has maintained in the past and will continue to maintain.

Oldenburger Gives Talk on Relativity

Dr. Rufus Oldenburger closed the Mathematics Club's successful first year with an interesting talk last Friday on "A Simple Exposition of the Theory of Relativity."

Interferometer Explained

An explanation of the Michelson-Morley interferometer experiment and the method by which it was used to measure the suspected "ether drift" was followed by the explanation that Einstein's theory is based on the assumption that the velocity of light is constant.

Recent work by Dr. F. Pease, an Armour graduate, who is now carrying on the work of the late Professor A. Michelson in measuring the velocity of light in a vacuum, seems to indicate, however, that this assumption may be false, indications being that there is some periodic variation in the velocity of light.

Simplified Theory Developed

A simple theory of relativity was shown as it could be developed in a one-dimensional universe. While the only motion in this universe would be backwards and forwards, geometrical construction using a "world curve" was shown to be necessary to give the relation of events in time.

Theory is Confirmed

One of the successful applications of the theory of relativity was shown to be the bending of a beam of light in passing a large mass. Tested during an eclipse, soon after the issuance of the relativity theory, the shift in the field of stars gave a striking confirmation of Einstein's theory.

SIDELINES—

(Continued from page 1)

around the corner. Still, the books, for the most part, have been closed.

JUST HOW are these events interrelated? If the small fry had control of the distribution of the income from gambling and if, being in immediate need of "make-up" money, they should expect to apply the income to their needs, how could they meet the payment with the income not coming in?

be found through a prize competition.

Extensive Search for Site Made

Search for a suitable site within a radius of a mile or two of the loop began more than two years ago. Students and members of the faculty in structural engineering and architecture made surveys of the present property to find the space that would be required. In two cases actual floor plans were drawn as a basis of possible interior remodeling.

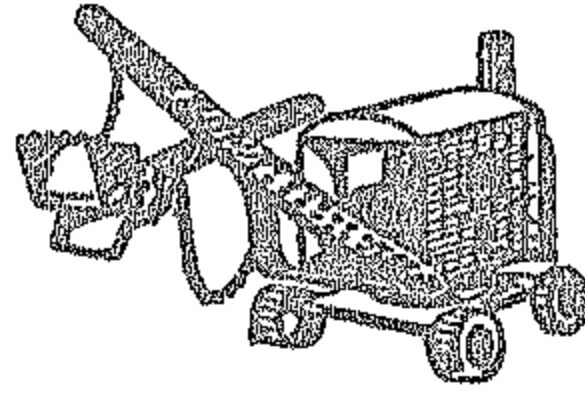

In searching for a new site, the administration set three requirements:

(1) For the Students: The site must be accessible to the undergraduate and provide for him a stimulating environment favorable to sound physical, technical, cultural, and moral development.

(2) For Service: The Institute must be easily accessible to the whole Chicago area. This is necessary in order that, through research and other activities, it can most effectively serve the industries of Chicago and have a part in their development.

(3) For Its Civic Contribution and Prestige: The site should be one in which the city may take justifiable pride. Its setting and architecture should reflect the function and idea which Armour Institute has maintained in the past and will continue to maintain.

THE STEAM SHOVEL

Edward F. Hickey has no fears of lens problems. He answers "Just use LENZ'S LAW."

A news item that was lost and printed here:

H. S. NACHMAN and W. J. GARTZ were formally initiated into the O. T. W. C. some time last week at a certain hour. HARRY showed his approval by gently patting "SCRATCH" SKACH on the head with a T-square.

BILL GRAF was caught with his shoes off in Rwy. & Hwy. Loc. In an interview, he revealed, "I take them off at home and anywhere else if possible. I seem to sleep better."

"Head Hunter" Sprague would be better off if he became chair hunter. Or maybe he ought to strap the chair to himself.

M'REECE (the same one) returned to his habitat last Friday. He sort of ruined the consistency in the bald head row, but give him time, give him time. (He also didn't pay.)

Sez H. P. DUTTON, noted social scientist during a sale discussion: "In most cases housewives are lonely and glad to receive a salesman to talk to." (???) We wonder if he talks as a man of experience.

In order to improve his appearance for the benefit of Open House visitors, R. H. Bothwell had his hair curled. He was uncertain at first but after a few minutes of physical argument, he was induced to sit still.

Another lost news article, but this belongs on the sport page: BILL FLEIG and some dame wrestled to a draw in the Armour gym on Open House night. Bill used his favorite hold, much to the enjoyment of a full house.

Party Climaxes Year For Armour Players

Last Friday night the Armour Players held a private party in the Faculty Grill as a conclusion to the past year's work. Thirty people were present, including all but two of the women players of the latest production, "The Red Robe."

The evening consisted of a radio dance, entertainment and refreshments, featuring a chocolate covered cake with the name Armour Players written in icing across the top.

Golfers Get Four Wins In One Week

Record To Date—Six Victories and Four Losses

The Armour golf team defeated South Side Jr. for the second time by an 11 1/2 to 6 1/2 score in an 18-hole match played at Evergreen last Friday. Larry Davidson turned in the day's low score with a 78, while "Three Cushion" Shanahan did some fancy shooting all over the course to net a nice 88.

Davidson and Ahern Break Par

On the whole, Coach Bibb's boys have been rather successful in their last seven matches, as they garnered four wins, one tie and two defeats. Tech beat St. Viator twice, first 15 1/2-2 1/2, and then 15-3. South Side and Wright were also trounced, the former as all-ready mentioned and the latter 12 1/2-5 1/2.

Techawks Beaten by Loyola

Of the two defeats received by the Techman neither can be considered a dishonor, as they certainly were administered by some pretty good players, the Loyola team and the Armour Alumni.

Loyola dropped them 11 to 7 in a 36-hole match played at Southmoor on May 18. Armour lost the doubles in the morning, 3 1/2-2 1/2, and the afternoon's singles, 7 1/2-4 1/2. Grunt of Loyola had the day's honors with a 77, Larry Davidson and Frank Davidson following with 79's.

At time of writing the results of the Wright game on Saturday were not known, but a victory is practically assured. If so, the season will

The golf team has won six, lost four, and tied one to date. Larry Davidson and Bill Ahern have been leading the pill pushers in their successful campaign.

The tennis team, at plus six, minus two, is really going great guns. Bob Esbensen has won all ten matches he has played, and teamed with Lowell Lammers, he has helped account for six successive wins in the doubles. Of course, six and two aren't ten—the other two are practice matches with Chicago, which have been split.

Incidentally, that Chicago B team was undefeated, and were promised tennis charms by Coach Stagg if they stayed so. But we did it—nasty, but such is life!

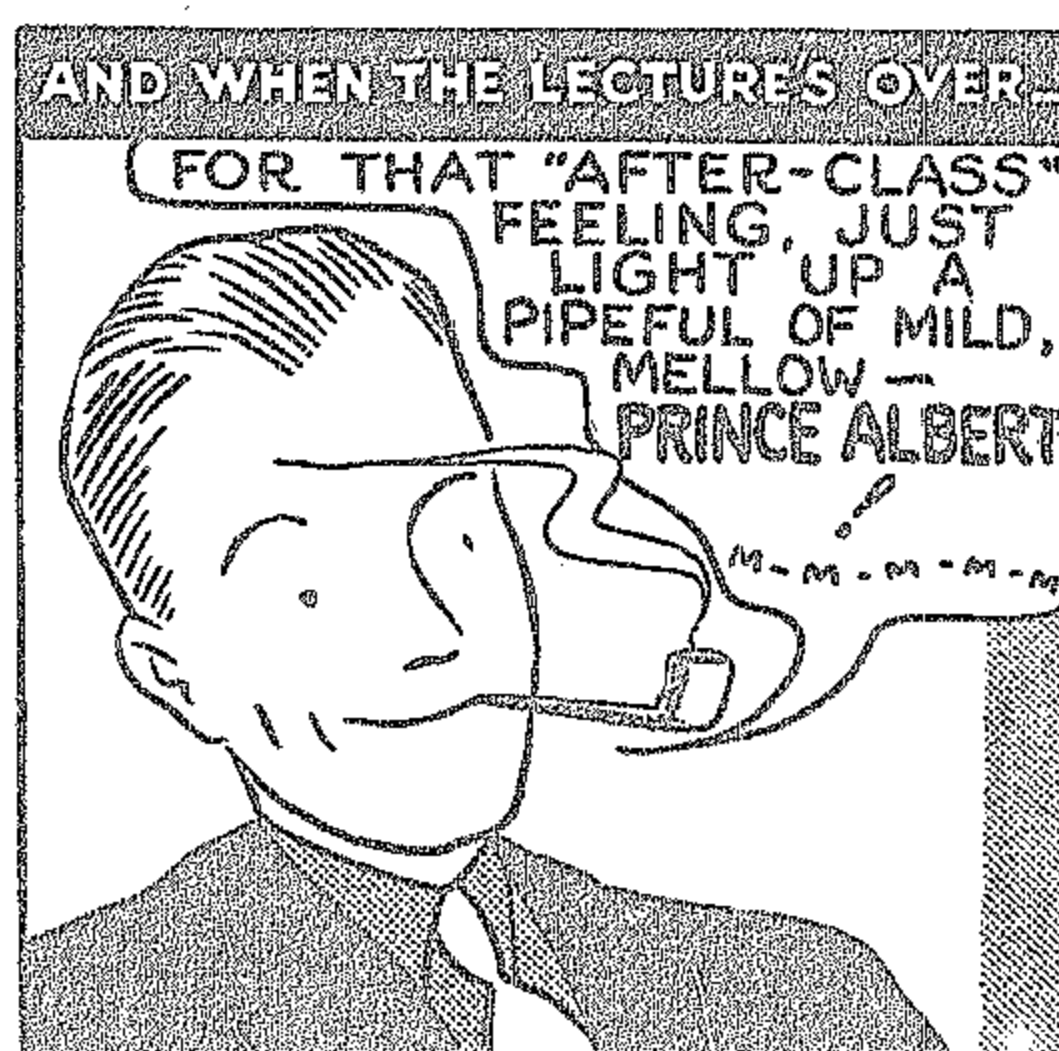

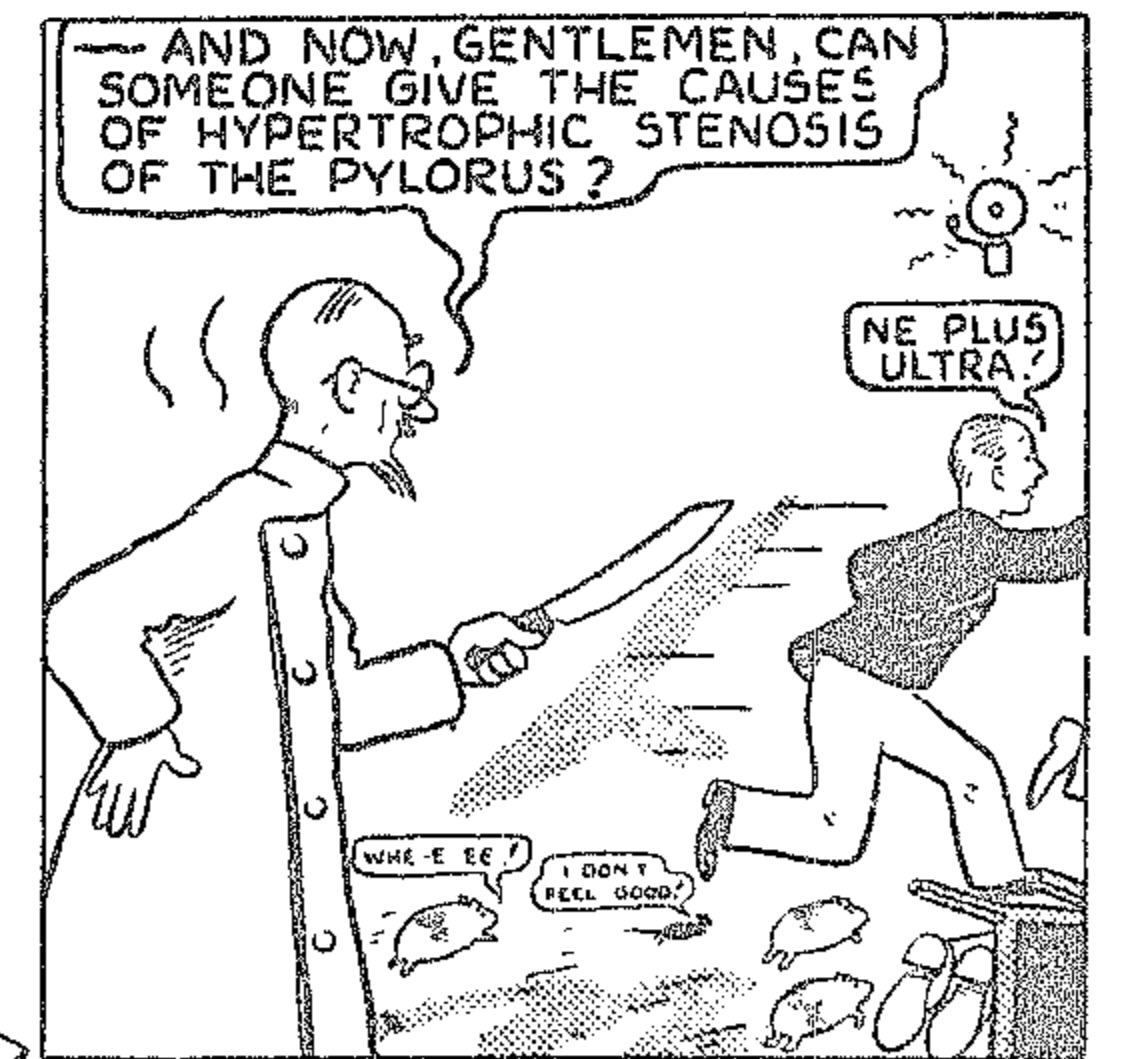

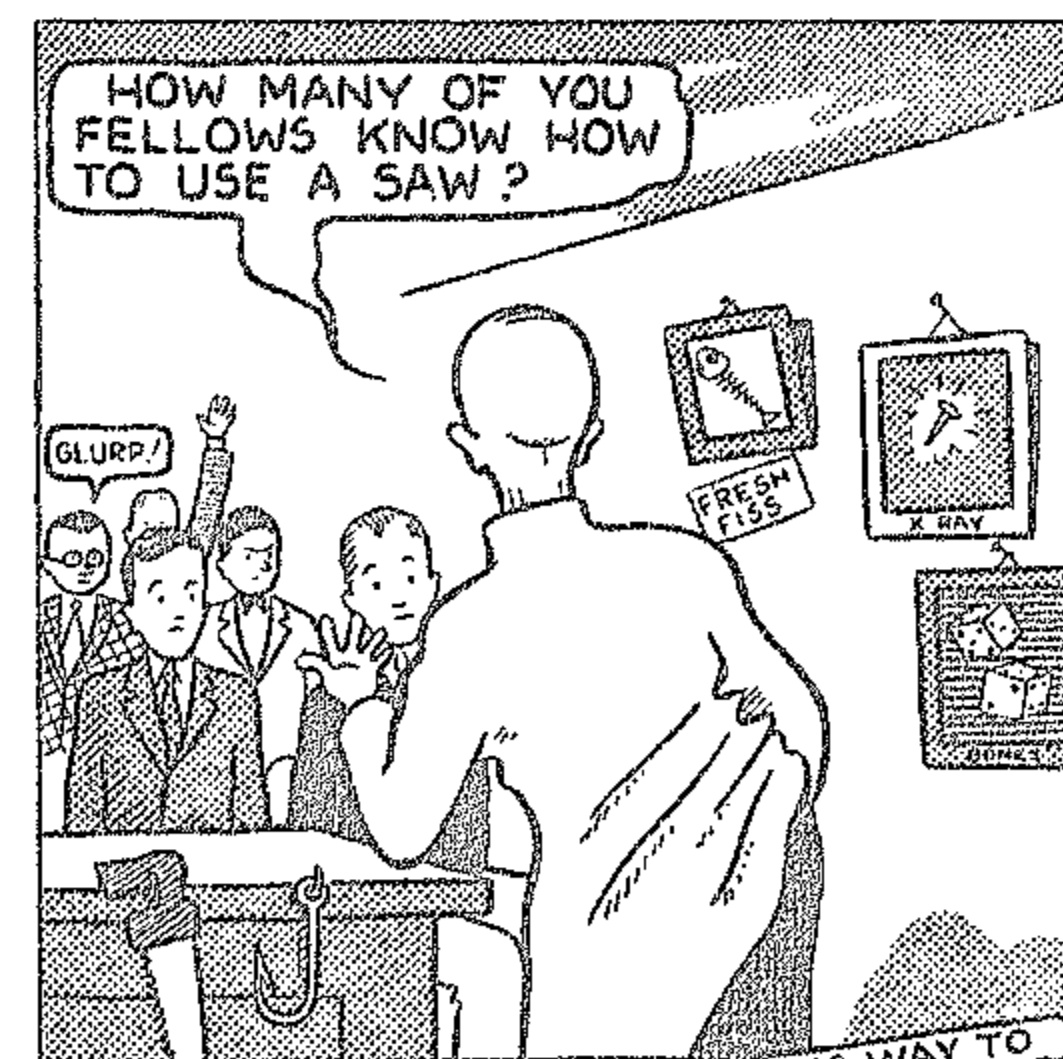

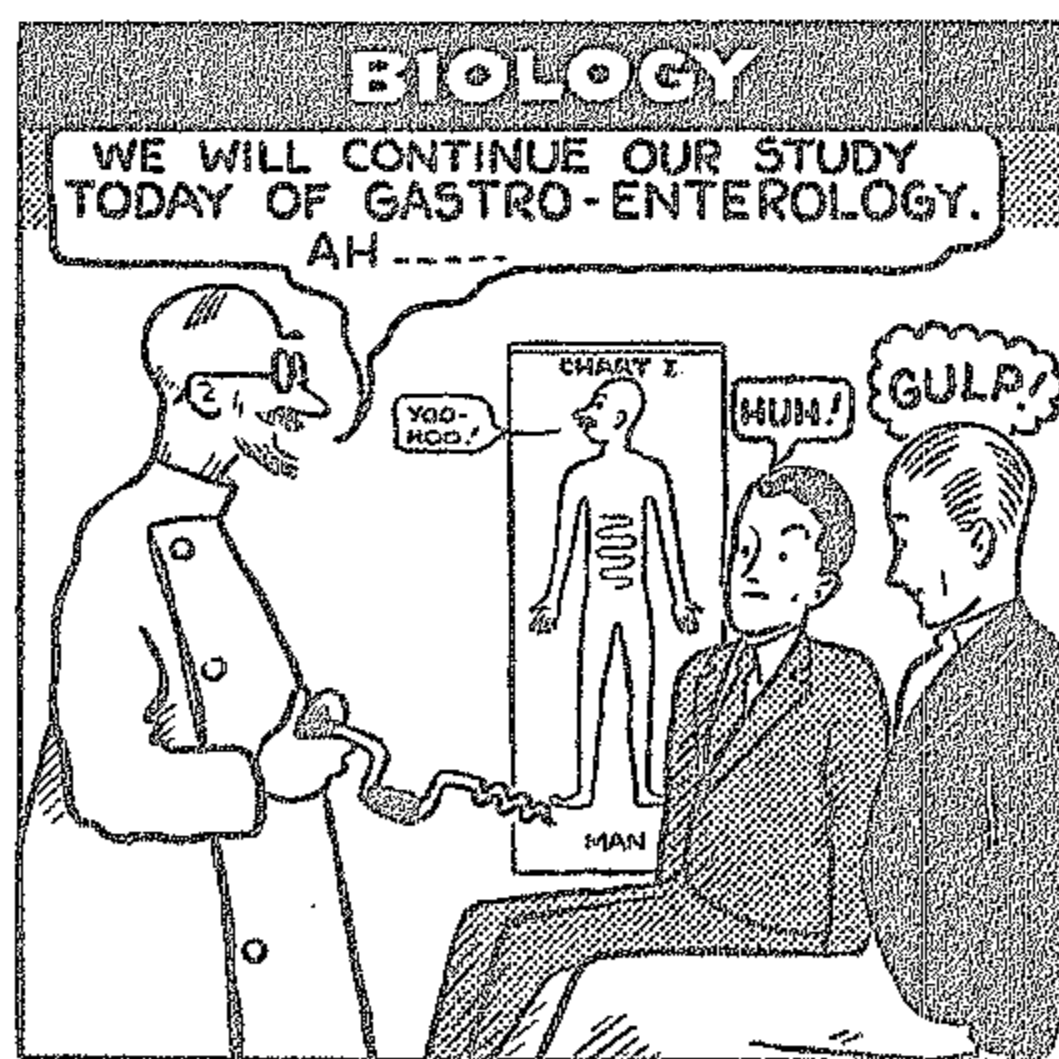

Hanging on to tennis, according to Manager Ed Searl, Armour beat De Pauw, who beat Indiana, who beat Purdue. This seems to rank the netmen as big ten calibre. And they beat the U. of C. B team!

Dan Delve's one-hit game last Friday would have been no hits, no runs, had not Johnny Roberts' brother (or is it cousin) pushed a double out, fair by only one foot. Better get the rest of the Roberts clan at Armour, Dan.

The indoor tournament is winding up with the winningest teams bracketed. The Ch. E. 3 team put the Ch. E. 4 bunch out, 21-9, so the F. P. E. 4, E. E. 4, and the M. E. 4 remain with them at present. Bet it's the Schmiers! '36 again, y'know.

end with seven wins, four losses, and one tie. The defeats were suffered at the hands of Chicago, Northwestern, Loyola, and the Alumni, the superior competition lessening the disgrace of defeat.

IN EVERY TIN', 'SPECIAL PROCESS REMOVES ALL "BITE"', 'MILDER-COOLER', 'TOP-QUALITY TOBACCOS', 'CRIMP CUT', 'AMERICA'S FAVORITE PIPE TOBACCO', 'PRINCE ALBERT THE NATIONAL JOY SMOKE!', and '2 OZ. (1/2 TUB)'. Includes an illustration of a Prince Albert cigarette pack.

# DELVE'S ONE HIT GAME SHUTS OUT LAKE FOREST, 6-0

## Rally In Fifth With Two Out To Cinch the Victory

### ONE FLUKE DOUBLE!

The Armour ball team has finally supported Dan Delve, although he didn't need much, and they really rang the bell in defeating Lake Forest by a score of 6-0. Delve's stellar pitching was the outstanding performance of the day. He went the entire game, allowing but one hit, and keeping the north siders from the scoring column. This was his first win, although he deserves first mention for his hurling in the North Central game, when his efforts held Naperville to a 5-3 score, and also for holding Michigan State Normal to a 2-2 tie in eight innings. He lost, unfortunately, when Ypsilanti staged a ninth-inning scoring spurt.

#### Bartusek Knocks Homer

Both teams remained scoreless till the fifth, when Joe Bartusek led with a homer. Biegler struck out, and Delve popped up to first base. Then, with two outs called, Wagner singled and stole second. Seidenberg also hit a single, advancing Wagner to third, and then stole second. Captain Omiecinski followed suit by knocking out a single to score Wagner and Seidenberg. At this point Rouse, pitching for Lake Forest, was replaced by Larson after allowing four hits. Adamec walked, and Lauchiskis fled out to center for three outs. Roberts of Lake Forest made the sole hit for the suburbanites, a fluke double down the third base line.

Baumel singled to lead the sixth inning. Bartusek popped up and Biegler walked. Delve singled, advancing Baumel to second base. Wagner walked, filling the bases. After Seidenberg popped to the pitcher, Biegler was put out at home trying to score. With Tad Omiecinski at bat, Delve was put out in an attempt to score on a wild pitch.

#### Wagner Scores Double

The last inning saw Wagner on second base after his second hit, a double. Shewchuck walked, and Omiecinski was safe on an error. Adamec walked to first, forcing Wagner home. Shewchuck scored when Lauchiskis fled out, and then Baumel and Bartusek ended the inning.

This victory brings the tally to six wins and seven losses, a good deal better than was expected at the season's beginning, and the impending game with Northwestern today is hoped to better the average by one.

## Techawks Beat Lake Forest in First Game

Led by the stellar fourth pitcher of "Dolly" Dollemaier, the Techawk ball team last Tuesday opened the week's proceedings with Lake Forest by eking out a 7-6 victory. "Dolly", who crossed the plate in the seventh inning to score what turned out to be the winning tally, kept the Foresters from scoring an earned run, fanned ten men, and kept the four Lake Forest hits well scattered.

#### Shause Knocked Out in Fourth

The Lake Forest hurling divided between Shause, who started, and Larson who relieved him in Armour's big fourth inning rally, was better than the outcome indicates. Shause, in four and one-third innings, al-

lowed five hits and fanned three while walking three and hitting one Techawk, Phillips. Larson in three and two-thirds innings gave up three hits while fanning four and issuing an equal number of free passes.

Loveton, leading off for Lake Forest in the first, made second when Seidenberg dropped his Texas League pop-up, and went to third on Rouse's sacrifice bunt. He scored when Phillips dropped Dollemaier's throw-in on Bade's infield top.

The next tally came in the second when "Babe" Adamec drove one out of the park in straight center to tie up the score.

#### Lake Forest Rallies

Both teams were held scoreless in the third, and in the fourth came Lake Forest's big inning. Two walks combined with one hit, a sacrifice, an error, and a dropped third strike, were used to an advantage to push four men across the plate.

In the fifth, which was the bad inning for Lake Forest pitching, Armour used one hit aided by five walks and an error to again tie up the score. The Techawks went into the lead in the sixth when Seidenberg, who was safe when Eiserman bobbled his grounder, stole second and scored on Delve's single to right.

What proved to be the margin of victory was scored in the seventh when Dollemaier was safe on Eiserman's error and scored on the last of Wagner's three hits, a double off the right field fence.

Lake Forest threatened in the ninth when Loveton scored on Bade's single. Wagner's throw, however, caught Rouse at the plate and Grundel popped to Omiecinski to end the game.

## Tennis Team Beats DeKalb, 6-1 for Sixth Win in Eight Matches

The Tech tennis squad boosted its season total to six wins, two losses last Friday when they trounced De Kalb, 6-1. Though the matches were all hard fought and some of the men were extended to three sets for a change, the match anticipated as the season's test became Armour's most decisive victory. De Kalb has twice defeated North Central, who possesses a 4-3 win as one of the two Tech losses.

Lammers opened with a win over Ohlhaber. The first set was just an exchange of service victories until Lowell broke the De Kalb service. The second set was then bagged. Bob Esbensen had to work to take his season's tenth victory in as many matches. Between the courts and a high net Bob had some trouble, but he can't be stopped now.

Dick Armsbury, shaking off his season's jinx, used the first set to break in a new racquet and then took the last two sets to win. Herb Arnold took the fourth match, but Ed Schmidt dropped his to give De Kalb consolation.

Both doubles team copped, Lammers and Esbensen making it six straight for the season.

**SUMMARIES**  
**ARMOUR (6), DE KALB (1)**  
**Singles:**  
 Lammers (A)—Ohlhaber (D): (9-7) (6-3).  
 Esbensen (A)—Gould (D): (6-3) (7-9) (8-6).  
 Armsbury (A)—Peterson (D): (2-6) (6-4) (6-4).  
 Topp (D)—Schmidt (A): (6-3) (6-1).  
 Arnold (A)—Wymer (D): (6-1) (6-0).  
**Doubles:**  
 Lammers, Esbensen (A)—Ohlhaber, Gould (D): (6-1) (8-6).  
 Armsbury, Arnold (A)—Peterson, Topp (D): (6-1) (4-6) (6-3).

Also featured in the successful campaigning are a 5-1 victory over Wheaton Thursday and a 5-2 win from George Williams the previous Monday. The Wheaton match would have been a clean sweep had not Capt. Armsbury dropped two prolonged sets (7-5, 7-5) to Coleman of Wheaton after leading in each set. Dick has been well off his game lately and has yielded his standing to Bob Esbensen after losing a challenge match for rank in straight sets.

#### Tech Doubles Win

None of the Wheaton players went to three sets. Esbensen used his wicked forehand to start the afternoon off right for Armour and to annex his ninth win this season. At the same time Ed Schmidt extended through a love set, but had to extend himself to pick up the next set and match (6-4). Lammers, Armour's number one man, made it 3-1 when he put Cedarholm away in short order. Needing one of the doubles matches to win, both doubles teams came through to cinch the meet.

#### Lammers Wins Again

George Williams went down for the second time this season when they lost a week ago Monday (5-2). Lammers set the pace properly when he took Eiswald in straight sets. The racketeer from Williams has taken three victories in as many matches with teams from Armour previously.

Esbensen, Schmidt and Arnold followed the lead and took more straight set matches, but the doubles were split when Herb Arnold and Ed Schmidt lost a tough one to the Eiswald gent teamed with Hansis.

## Michigan Normal Is Victorious Over Tech

The Michigan Normal Hurons, who defeated the Techawks, and Dan Delve, 6-2, with a ninth inning four-run splurge in a home game, took the Tech nine, 7-2, in a return game at Ypsilanti, May 18.

Lefty Delve, who has been turning in some mighty fine games as the schedule rounds out, held the Hurons to seven hits. He yielded in the eighth to Dollemaier when an error, a walk, and a homer by Moroz pushed in the last home tally.

Meanwhile, Coggins held Armour to six scattered hits, two of which Jimmy Dunne pushed by the infield.

Michigan Normal (7)	Armour (2)	ab	r	h

#### Final Match Today

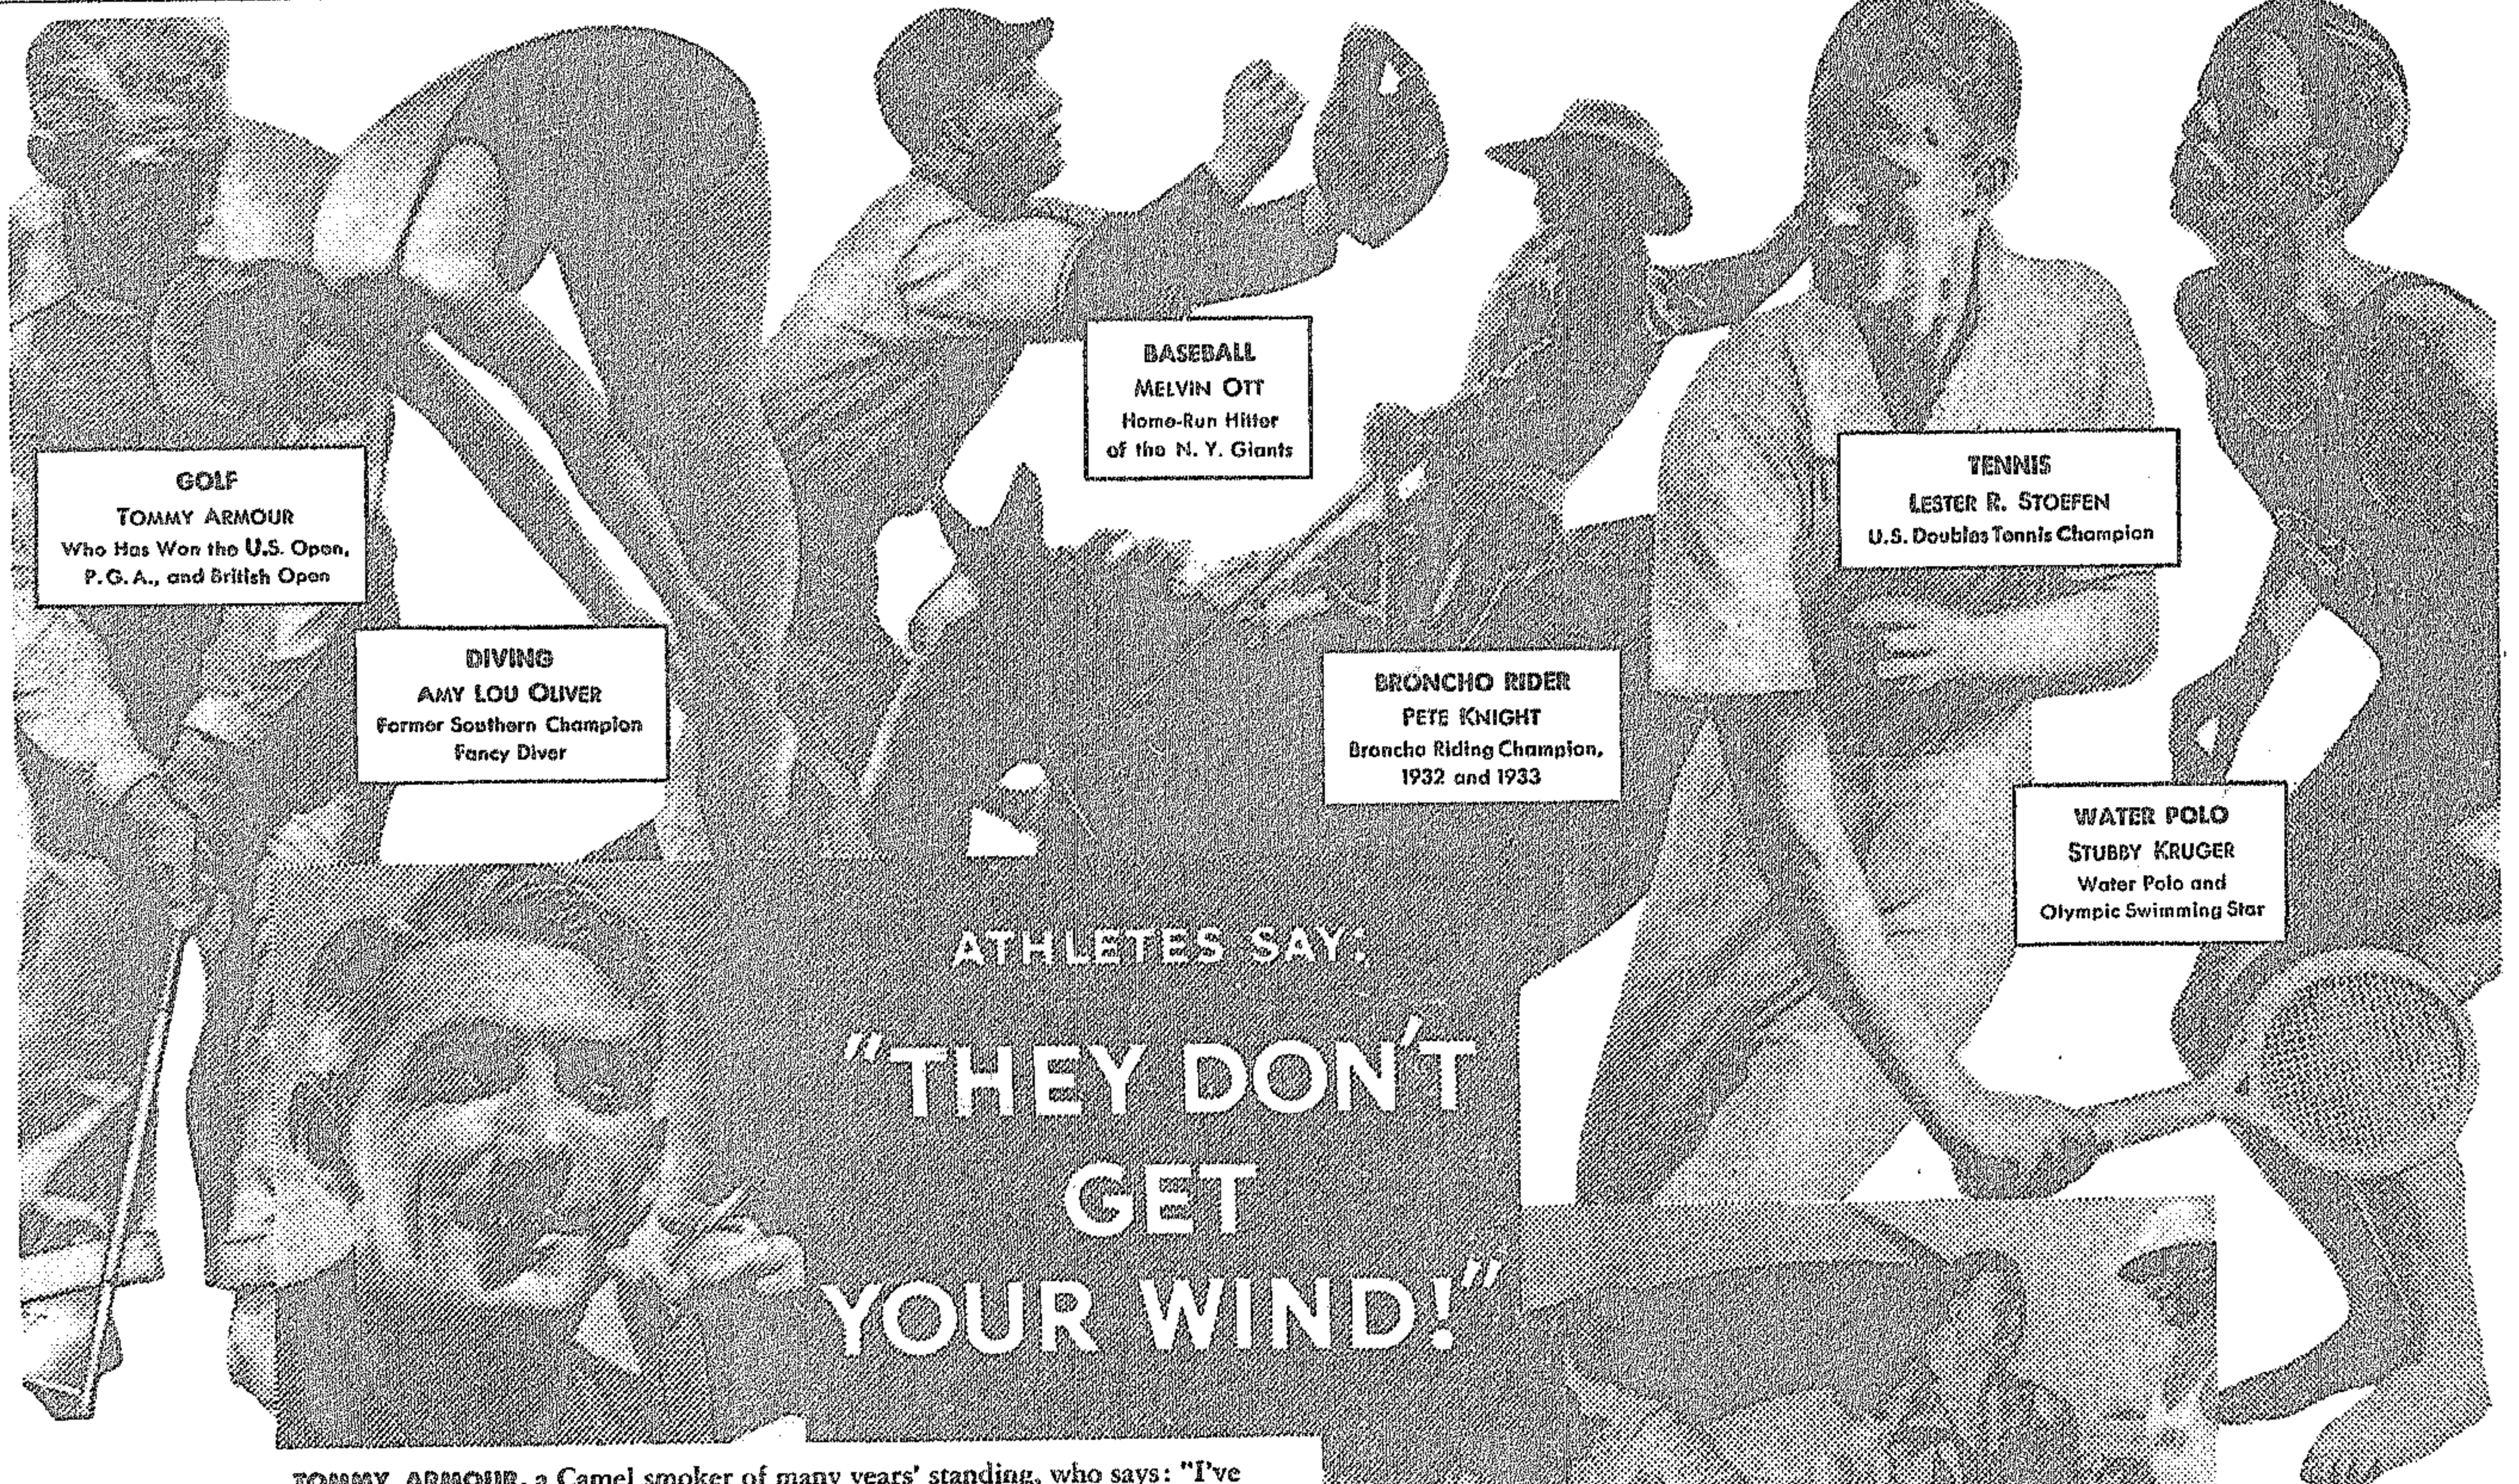

The team finishes their schedule this week. Loyola will be met today on the Tech courts. They have been beaten, 4-3, and are due for a more impressive trimming. The Wheaton game, called off during Junior Week, will be played in the morning of Memorial Day, Thursday. This is a home game, as is the finale with De Pauw Saturday. Be sure to see at least one of these games, especially the holiday match.

## TECH GOLFERS ARE BEATEN BY ALUMNI IN ANNUAL MATCH

The Armour Alumni team showed that it still had plenty of the old Armour fight spirit when it beat the Techmen, 13-5, in a 36-hole match played at Southmoor on May 14. The weather was rotten, with the golf course practically flooded, there being two lakes about 15 acres large. The seventeenth hole, which is usually a straight affair, was converted into a dog leg. Although the team was defeated, it certainly could not be ashamed of its performance, as it was up against such competition as the club champion, Wes Miller, and the runner-up, Zingheim, and also the club president, Chick Frary. The Alumni led, Wes Miller copping the day's low of 83. The Tech doubles lineup consisted of L. Davidson and Bill Ahern; Bob Richards and Jack Shanahan, the latter two being matched against Zingheim alone. In the singles Frank Davidson played instead of Bob Richards and shot a 90.

The team did not mind losing to such an aggregation, as they certainly appreciated the attitude taken by these former Armour men, and the fine spirit with which they have donated the use of their golf course.

ATHLETES SAY:  
**"THEY DON'T GET YOUR WIND!"**

Read below what these famous athletes say about their experiences in smoking Camels

A suggestion: Follow the athletes in your search for cigarette mildness. They can't trifle with healthy nerves—their "condition"—their wind. The cigarette they smoke *must* be mild.

Tommy Armour, the golf champion, says: "Camels never bother my nerves or shorten my wind—convincing evidence that Camels are mild."

Mel Ott, heavy-hitting outfielder of the New York Giants, reports: "My experience is that Camels are so mild they never get my wind."

And Stubby Kruger,

water polo and swimming star; Amy Lou Oliver, diver; and Lester Stoeffen, tennis star, agree with Pete Knight, the rodeo champion, who says: "Camels—there's a smoke so mild it never cuts down your wind, never gets you out of condition."

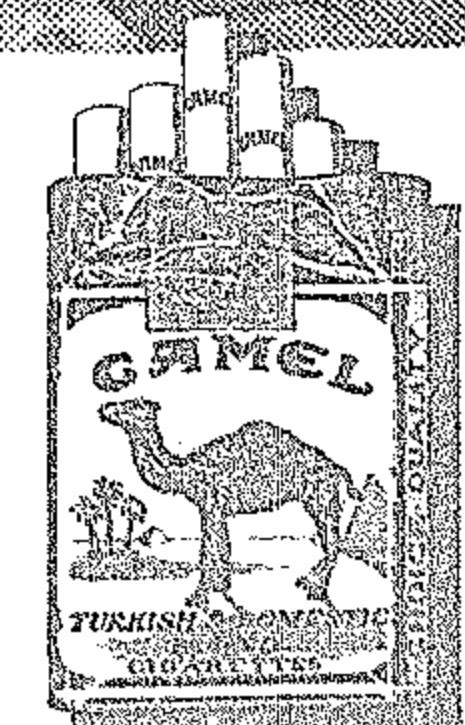

A mildness that will please you too! Camels are made from costlier tobaccos. They are mild, cool, gentle on the throat. Smoke them all you wish. Camels don't upset your nerves... or tire your taste. And athletes find that Camels do not get their wind.

YOU'LL LIKE THEIR MILDNESS TOO!

CONSIDER THAT LIFE IS MORE WORTH WHILE when you feel good—physically fit, "in condition." Turn to Camels. Athletes say, "They don't get your wind."

**SO MILD YOU CAN SMOKE ALL YOU WANT!**

**Camels**

**COSTLIER TOBACCOS!**

Camels are made from finer, MORE EXPENSIVE TOBACCOS—Turkish and Domestic—than any other popular brand.

(Signed) R. J. REYNOLDS TOBACCO CO. Winston-Salem, N. C.
