

Armour Institute of Technology, Chicago, Illinois Vol. VI. No. 9.

Tuesday, April 16, 1935

By Paul Schultz

IN THE LAST FEW DAYS, the newspapers have had that sort of a sensational spree which only occurs every so often. The common subjects of Hitlerism and gangland news were forced to take back seats before the overwhelming torrent of subject matter which the editors of the daily papers call "real news." The bills under consideration in the Illinois legislature, especially the one concerning the increase in sales tax and the one which brings under that levy private and municipal utilities furnishing gas, water, electricity, telephone and telegraph service, Soph baseball game, a pentathlon. are ones which should be of interest to everyone within the state. The 2 per cent sales tax which was levied last year, and which has proven to be a major source of revenue for the state, according to our officials is no longer sufficient and the tax must be increased in order to meet the 36 millions demanded by the federal relief bureaucracy as Illinois' share of relief expenditures.

liancy of the legislation going on, came the recent scandal at the Uni- | circus program. versity of Iowa. This exposure was have been expelled from schools for Class rush. similar offenses, but never before has a school meted out such quick and decisive punishment to a group. The punishment at first glance appears to be extremely harsh but when given careful consideration the penalty seems no more than just. Granted that some of the men were not guilty, all of the members must have been aware of what was going on and for these members to permit the continuing of the offence makes them guilty on an equally serious charge. The responsibilities vested in a fraternity are such that the members must absolutely abolish acts such as this one or else that fraternity cannot or will not be allowed to survive.

TRULY, this has been a wonderful week for news and headlines, but the effect behind the story is certainly of more importance.

WHAT EFFECT will these subterfugee of the news reporters have upon the life of the country and what will be the final result?

#### Spring Concert Site To Be Assembly Hall

As in other years, the annual Spring Concert of the Armour Tech Musical Clubs will be held at Armour, in the assembly hall. The date has been tentatively set for Wednesday, May 15. Before that time, the clubs will have completed a full schedule of concerts away from home, but they hope to give the best one in their career for the Junior Week affair.

A poll conducted by the Armour Tech News last week indicated that Selecting J. Healy to act as tem- the decision of the Musical Clubs to

#### A.S.W.E. President to Give Talk Here

Stress Importance of Engineer

Dr. Ralph E. Flanders, president of the American Society of Mechanical Engineers, will address the student versity, president of the S. P. E. E., body at a general assembly tomorrow at 10:30, conducted under the auspices of the A.S.M.E. He will speak on the subject, "The Engineer and our Social Well-Being," and will discuss the importance of the engineer in our present social structure.

> "Dr. Flanders is an expert on basic industrial and economical problems," said J. M. De Boo, president of the 27. Armour branch of the A. S. M. E., "and is widely known as an engineer and economist." He has served on Avenue. At the present time the orthe Industrial Advisory Board of the chestra which will play at the dance N. R. A., and also as a member of has not been selected. the Bureau Advisory and Planning Council. At the present time he is | Math Meeting Talk president of the Jones and Lamson Machine Company and the Bryant Chucking Grinder Company. On April 17 he will speak at an evening meeting of the Chicago Section of the A.S.M.E. at the Hamilton Club.

Mr. Ray Colin has donated envelopes and letterheads for the club's use and has also designed posters which are to be hung in the lobby, in the book-store, and in the electrical laboratory. Professor Moreton has given various electrical meters to the club and heartily welcomes any new members. Application blanks may be obtained from him at the Electrical Engineering

#### Committee to Revise Rushing Rules

A number of important decisions were made at the Wednesday meeting; of the Inter-fraternity Council. At that time a committee consisting of R. Lyford of Triangle, S. Bernstein of Sigma Alpha Mu, and F. Gallagher of Delta Tau Delta was appointed for the purpose of revising the rules for fraternity "rushing."

Also, during the course of the meeting, schedules were drawn up for inter-fraternity baseball, tennis, and golf. In addition, a plan of procedure was formulated for the next fraternity sing, and it was decided that the fraternity stunts would be held before the freshman-sophomore rush during the next Junior Week.

#### Hansen to Lecture Before Senior Class

"The Engineer in Economic Investigation" is the topic of a talk to be given before the Senior class in Public Policy Tuesday, April 16.

Mr. Arthur S. Hansen, an Armour graduate, a consultant in economics and actuarial investigations and now an instructor in the social science department at the institute, will be the speaker.

There will be a meeting for the editorial and business staffs of the Armour Engineer on Tuesday, April 23, at 12:30, in the News office. It is necessary that all members of the staff be present.

Because of the Easter holidays, there will be no issue of the Armour Tech News next Tuesday.

#### Inter-Flonorary Dance Will Be Held April 27

A special effort is being made this year to have as many alumni members of the honorary fraternities as possible attend the inter-honorary dance on Saturday evening, April

The dance will be held at the Allerton Hotel, 700 North Michigan

# to Be on Statistics

Professor Davis will give a talk on the subject, "Mathematics of Statistics" at the next meeting of the Math Club, Friday, April 26 at 10:30, in Science Hall.

The subject of statistics is an important one in business and engineering work, and is rapidly coming to the fore in both fields. #### Fencers Choose New Pilots for Next Year

Last Friday, the officers of the Fencing Club and team were elected for the following year. K. Trzyna, G. Quandee, J. Beatty, and J. Damiani were elevated to the positions of president, secretary, and treasurer, respectively. E. J. Krok, ex-president, will be the only man lost from the ranks by graduation. K. Trzyna and G. Quandee, high point men, will function as co-captains, while W. K. Emmerich remains as manager.

The meet with Wright Junior College, which was scheduled for Friday, was postponed until Wednesday, April 17. The match will be held at the Wright gym at 3:30.

### ARX DANCE TO BE HELD APRIL 23 IN CONGRESS HOTEL

#### Committee Cuts Price of Artistic Bids to Minimum

#### TABLES AVAILABLE

Because of the success of their Bal Autome, the Armour Architectural Society is holding an informal supper dance for all students at the Congress Hotel on Friday, April 26. The place selected is the famous Joseph Urban room, while the music is to be supplied by George Devron and his broadcasting orchestra.

Six or Eight Parties at Each Table The committee of R. G. Edmunds, massier, C. H. Schreiber, sou-massier aided by M. J. Bejeck, R. P. Lischer, and A. H. Schreiber have settled upon a simple and artistic bid since the price is being set at a minimum for the unusual setting of the dance. The bids at \$2.50 may be had of any one on the committee, or at any junior architect.

Parties of six or eight at one table may be arranged with the dance committee. All arrangements and tickets must be procured by Thursday, April 25, in order that reservations may be secured.

The attendance of 350 people at the autumn dance given by the architects makes them feel sure that they can provide a similar group for the usual and distinctive ballroom in the Plans for the remainder of the city. Everyone who visited the Cenof the last masterpieces of this artist of design and unusual color effects. The room bearing his name in the Congress Hotel is widely known for the subdued and constantly changing lights which form the decorative design of the walls. An automatic device using glow tubes provides this color organ ef-

Joseph Urban Influential Designer Upon the recent death of Joseph Urban, one of the architectural journals devoted an entire number to his work and showed that the last few years have definitely placed this artist as one of the foremost designers. Before his work at the Chicago Fair, he executed many stage settings for the Ziegfeld Follies, although this did not deter him from also working with the Metropolitan Opera Company of New York, and the Boston Opera Company.

Some of the prize-winning works of this artist include the New School for Social Research, projects for the Soviet Palace International Competition, the Metropolitan Opera House and its decorations, and many fashionable interiors for restaurants, shops and apartments.

It was the reputation of Joseph. Urban as a designer that led to the selection of this room as the scene of this, the most ambitious project of the architects, and they feel sure that the opinion of the engineers will bear them out in the value of this unusual dance being given at cost.

#### Prof. Krathwohl to Talk on Lens Design

On Thursday, April 18, at 6:15 p. m., Professor W. C. Krathwohl will present a talk before the members of the Men's Mathematics Club on the subject: "Mathematics Used in the Designing of Lenses in Optical Systems." Two of the topics to be discussed are "The Three Commandments," which every lens computer obeys, and formulas which any high school student of trigonometry can use in tracing the path traversed by a ray of light through a lens.

Armour students are invited to come to both the meeting and the dinner which precedes it. The latter costs one dollar, and reservations should be made with Professor Bibb on or before Wednesday morning. April 17. The meeting will be held at the Central Y. M. C. A. auditorium, 19 S. LaSalle Street.
