Vol. XVI. No. 11.

Armour Institute of Technology, Chicago, Illinois

Tuesday, December 10, 1935

By Albert M. Lane

THE EBB AND flow of human entity is strange in its conformity to pattern. The age through which we are passing bears a marked resemblance to a great transition period existent some one hundred and sixty years ago. The drops wear a different coat of paint, and the footlights shine more brightly. But behind them both man toils relentlessly, as in bygone ages, with the eternal struggle toward social equilibrium.

fort was bent toward loading the | been small amounts to balance high scale pan, that from the world | the A. T. A. A. budget in years might be wrought a supply of its | when the income was too small to fruits sufficient to meet the demands | cover all necessary disbursements. of the rapidly propagating human race. Progress was meager until the weight of the dawning "Machine Next Play Will Be Age" slowly tilted the balance. Then man staggered back from his place as prop to watch the new order gain in momentum. Enthusiasm grew apace. Each generation bred its quota of engineers and scientists destined to add larger, more effective contributions to the equilibrium ing so full of tingling thrill as is the account of their accomplishmentsthe record of the freedom of mankind from drudgery.

GLORIOUS IS THE story in the telling, but sad in its realization. Somewhere, somehow, the decimal point must have slipped, for the balance failed of being struck. The balance load has gone on past dead center and its speed remains undo, the engineer and the scientist | hard to complete preparations. have well accomplished. Lured on by the glamour of each success, they have far outstripped the world's fondest illusions in their provision Gordon Erickson said that the stage for supplying life's demand. Perhaps they should have stopped short of their present advances, for the the advances might have lent an eye | drama. to the approach of the disaster that to do.

IT MATTERS NOT who should have done what. Whatever could have prevented the present situation was not done, so we have to cope with the problem rather than lament its existence. It is not enough to merely recognize the fact that it is a thing to be done. There is a greater charge. The problem is ours; and we, the engineering students of today, are going to have to solve it. The responsibility of effecting a bal ance between demand and ability to supply has been thrust upon us. Look at the generation before you if you will. All that you will see is the torch being flung back to you.

(To be continued next week)

#### Salamander Initiates Two Men at Banquet

Marshall T. Horn, a senior, and Donald N. Brissman, a junior, were initiated into Salamander, honorary Fire Protection Engineering Fraternity, last Tuesday evening at a banquet in the Swedish Club of Chicago at 1258 N. LaSalle St.

the founders, and other alumni.

#### A.T.A.A. SURPLUS

Although an official announcement could not be obtained last week, it was reliably reported that the amount of the surplus of the T. A. A. is approximately \$9000. This was the status of the fund when the resolution permitting advances to the student loan fund was adopted on October 10, 1933. At that time the money was invested in securities paying a low rate of interest.

Since the student loan resolution was adopted, a portion, probably not more than one-third, of the surplus has been reinvested in student loans. Repayment of this amount was guaranteed by the Institute at the time the resolution was adopted.

As far as could be learned last week, the only actual expen-FOR UNTOLD centuries all ef- | ditures from the surplus have

Properties and costumes That would not be the human thing will be handled by J. Kubert and W. Emmerich is to take charge of lighting effects, which will be particularly important in this play.

Rehearsal Period is Short

"Dust of the Road" will be the first producion to be given by the players with so short a time for rehearsal. The players having only a short time ago, finished "House of Juke," are already deep in rehearsal for the next play.

A welcome visitor at rehearsal last Friday was Michael Pantone, who was stage manager last year, but who was unable to return this year. Mike says that he will return next year, and his return will be appreciated by the players.

## Major G. F. Lee to Speak Friday

Major George F. Lee, veteran army officer, will present an interesting and informal talk on his experiences. in the United States army, through the courtesy of the Western Society of Engineers on Friday, December 13, 1935, at a general assembly in the Mission at 10:30 a.m.

Major Lee's connection with the army began when enlisted as a private many years ago. His service has carried him through many campaigns including encounters with Indians in the West and finally through the World War. He will present the human side of army life, including its humor, its sorrow, and its romance.

Mr. J. F. Peterson, chief engineer of the Chicago Tunnel Company, spoke at the last meeting of the W.S.E. He explained the operation of the vast network of underground tunnels beneath the downtown streets, ber 18. There will be a slight modhow coal is hauled in, ashes carried out, merchandise transferred, and the history of its construction.

position of associate editor of the publication during the past year, and was also in charge of the college section. Professor Hendricks is the faculty editor in charge.

The last issue of the Engineer under the editorship of Nachman will be ready for distribution on Decemification in the color of the cover, and there will also be a few minor changes in the magazine itself to meet some of the objections which

## Spirited Student Opinion Greets Discussion of A. T.A.A. Constitution

of the senior class, the three or four hundred Armour students who turned out for the general assembly last The cast, which is now complete, Thursday voted almost unanimously to withhold the vote on the proposed Considering the time that the play- gan taking steps to prepare still andiscussion at the meeting.

Constitutional Committee Appointed A committee composed of those who took part in the discussion met on Thursday evening and succeeded in preparing a set of revisions designed to insure dissemination of information about the A.T.A.A. among the students which met with the approval of all those present except Peterson. Peterson objected to the inclusion of lic as soon as it has been approved by the Board.

Interviewed last Friday by the News, Peterson stated that he has no it stands, and he felt that publication of the A.T.A.A. budget would merely cause unnecessary dissension Twelve Are Initiated among the student body. He gave as his reason for wanting a delay in the vote the charge that the students didn't know what the A.T.A.A. was all about and more time ought to be allowed them to discuss the A.T.A.A. in class meetings.

To Meet Again Tomorrow Another meeting of the group which was appointed last week, together with the members of the

Board of Athletic Control, is scheduled for tomorrow at 2 p. m. Present indications are that before another assembly is called to consider the constitution, there will be a great deal of further discussion about the A.T.A.A., possibly in meetings of the

Passage of the constitution, gen-(Continued on page 3)

four classes.

be devoted to an inspection of the junior and senior chemical engineering laboratories in which all equipment will be in operation to display the type of work included in the courses at Armour Institute.

# to Electrical Honorary

Twelve pledges became members of Eta Kappa Nu, honorary electrical fraternity, at the initiation and banquet held Tuesday evening, December 3 at the Union Station. The initiation ceremonies were held in the Conference Room, and the banquet followed in the Cactus Room of the Fred Harvey restaurant. The A.S.M.E. Votes for evening was topped off by a real entertainment program put on by five of the actives and the twelve initiates. This meeting was held in conjunction with the Chicago Alumni chapter. Thirty graduates were present from the various Eta Kappa Nu chapters.

The men initiated were C. P. Boberg, R. H. Bothwell, W. A. Chapin, J. A. Ganzar, W. Gruca, A. J Haeger, E. J. Kirsch, R. Knaus, F M. Martin, G. R. Rothschild, R. E Ruppert, and P. L. Slugg.

#### M. E. Honorary Elects Five to Membership

Professor S. E. Winston and four students were initiated two weeks ago into Pi Tau Sigma, honorary mechanjuniors.

# Lockport Field Trip

Lively discussions on proposed field trips and W. Gruca's paper, "D. C. Transmission" occupied the limelight in the A. I. E. E. meeting last Friday. Despite the sparse attendance, trips to Lockport and to the North Shore Electric shops were discussed with great vigor. President Kirsch read an invitation from the W. S. E. to attend their meeting next Friday to hear Major Lee discuss his military experiences. The remainder of the hour was occupied by Gruca's theme concerning methods and advantages of direct current transmission.

## Smoker This Friday

In answer to the questionnaire recently circulated among members of the student branch of the American Society of Mechanical Engineers, the smoker committee announces a smoker next Friday night, December 13. All seniors, juniors, and sophomores in the mechanical engineering department are invited, the charge to students being twenty-five cents. Members of the faculty are also welcome after their evening classes.

Entertainment will be varied and plentiful during the evening, and refreshments will be sandwiches and coffee with perhaps cider for the tion. He piled up a total of 17 points

coffeetotalers. The questionnaire revealed some lected by a large majority.

# ARKANSAS ST. (19). Merz, c .... 2 1 0 W. Davis, c ... 8 1 0 Warner, g ... 2 1 0 Langley, g .... 1 6 3 Dollenm'er, g ... 3 1 2 Rorex, g .... 0 0 0 O'Connell, g ... 2 0 0 Shannon, f .... 1 0 1

Repeating last years' flying start, the Armour cagers trampled Arkansas State underfoot last week by a score of 44 to 19. The opposition was not all that was expected but perhaps it was Armour's advantage of height that made the score so one sided.

An unusually large crowd turned out to witness the game and to cheer under the able leadership of Jimmy Dunne and John Ratto. It is quite evident that the Armour spirit has reached a new high. Even a few of taken an interest in sports and turned out to cheer the team to vic-

Action Begins

Determined to show the crowd a little action, captain Dollenmaier opened the game by taking Merz' tip basket. After a bit of see-saw play, a jump was called at the free throw line under Arkansas' basket . Heike a beautiful hook shot. Not to be outdone, the rest of the team laid down a barrage of shots which netted three more baskets in quick succession. The game then became an exhibition of expert ball handling and

It was quite evident during this exhibition, that the Arkansas players were failing to follow up their shots. The Armour men always took. the ball off the backboard while the visitors were left flat footed.

Arkansas Calls Time Twice

Warner finally got loose and dribbled through the whole opposing team for a nice step in. By this time the southerners were disorganized and had to call a time out. Soon after play was resumed, a rejuvenated visiting team started their attack. For the first time they followed up their shots and Baldwin scored for State. Encouraged by this score, the team continued to drive for the basket. Their offensive was disrupted, however, when Merz blocked a shot, grabbed the ball, and raced all the way down the floor but missed the set up. Arkansas, thoroughly disorganized, took time out again. Soon after play was resumed. Baldwin again rushed in under a shot, took the rebound, and netted another score.

A nice hook shot by the Arkansas center served to quiet the crowd a bit but soon afterwards Heike grabbed a blocked shot and passed to Merz, who was open under his own basket, a quick set up netted another score. The exertion must have been too much for Merz, for he came out of the game soon afterwards, pretty well tired out.

New Men Get Chance

The home team managed to keep the play in the visitors' territory for the rest of the half, but was unable to score again. The half ended with the score, Armour 21, Arkansas 9. At the opening of the second half the crowd was treated to some fast play. Finally Heike, at his position as pivot man, managed to twist around his guard and angle in & shot. The remainder of Armour's scoring was dominated by Heike, who was fed well at the pivot posiby the end of the game.

With six or seven minutes of play interesting facts about the require- left, Coach Kraft began substituting
