The demands on Germany were so heavy that she was forced to suspend payment of her debts. Great Britain | better. was next affected, and, her position being precarious, she was forced to abandon the gold standard. Throughout the year the situation became more critical, an ever increasing number of nations being forced to devaluate their currencies and abandon gold payments. Each devaluation led to a trade advantage over those nations still clinging to the gold standard, the only marked exceptions being France and Germany, who enjoyed underrating. The ensuing dumping of goods in those countries not yet affected forced them to adopt successively tariff restrictions, quotas, and, finally, policies of gold payment suspension. The United States withstood the attack in the face of increasing unemployment and Corporation at South Bend, Insuch unprecedented events as Japanese steel underselling the domestic ing regularly conducted through this product until 1933, when the present

## Architects Will Hold Ball on December 6

One of the highlights of Armour's social season, the annual Arx Ball, has been set for the evening of December 6. As before, there will be a poster contest with a free bid to the winner and half a bid to console the runner-up.

The price of the bids, orchestra, location of the dance, and information concerning the poster contest will be announced later. These particulars will be handled by a committee composed of R. W. Becker, M. Beckman, B. Nobler, A. H. Ramp, and E. F. Schmaltz.

## Junior Commissioners Choose Midland Hotel

At the junior commissioners meeting last Friday, a report was presented by the social chairman regarding the location for the junior dance. After a brief discussion, it was decided that the dance be held at the Midland Club. The dance is to be held on Saturday, December 21, 1935. The price of bids was not definitely decided upon, but they probably will be \$1.50. The social committee does not plan to have a table dance on this occasion.

The committee investigated various sites for the dance, among them the Drake, LaSalle, and Sherman Hotels.

# Plan Engineer Issue Early In Next Week

According to latest information, the first issue of the newly revised Armour Engineer, technical organ published quarterly by the students, is expected to be ready for distribution by Monday, November 11.

The issue was scheduled last week to go to press today; the contract has been let to Printing Products Corporation.

This first issue will include a large number of illustrations and several full page ads. The advertising department has been particularly successful during the past week mainly through the efforts of Professor D. P. Moreton.

# Handbook Ready to Be Published

Full information about all school activities will be included in the student directory to be published by the Institute, Dean Heald announced last week. Articles covering all clubs, societies, and fraternities have been delivered to the Dean by the members of Sphinx, honor literary fraternity, at whose instigation it was decided to include the information.

The handbook will include brief, concise articles on all the extra-curricular activities. There will be articles which give the names of all the honorary fraternities and the requirements for consideration as a member. Also, there will be articles on the social fraternities, the athletic teams, the clubs, and the manner in which the student activity fee is divided. One of the articles will of the Armour Tech Athletic Association, which has been passed and approved by the board of directors, by the student body.

ices of the handbook will be the introduction of the new students of is in existence in which they are engineering. very much interested, and a small concise handbook will answer all the questions a visitor can ask about Four Semiors Flomored the extracurricular activities at Armour.

# W.S.E. and A.S.M.E. Hold Joint Meeting

Friday morning an announcement was made of a joint meeting, sponsored by A. S. M. E., to be held here November 15. The speaker will be Mr. R. S. Archer, president of the consulting engineer for the Republic Steel Co. He is also co-author with Zay Jeffries of The Science of Metals.

At the last meeting of the W. S. E., Mr. Magnus Gunderson presented an unusual talk on construction problems. Mr. Gunderson is chief structural engineer for Graham, Anderson, Probst, and White, architects. Difficulties encountered in the erection of the new Chicago Post Office constituted the major subject of the J. Schommer Speaks talk. Railroad tracks running on the ground presented quite a problem due to the fact that the column footings had to be located in such a way that they could withstand the tremendous load of the super-structure. Silicon steel previously used for smaller girders helped solve the problems encountered in the construc-

### Honor A Proposes to Standardize Letters

Standardization of the design of major letters for Armour athletes may soon be achieved if Honor A, the lettermen's honor society, succeeds in the project on which it is now engaged. Different types of major letters that have been awarded in the last few years by the athletic board are now under consideration by its members. The society as a whole feels that a single standard major athletic award should

# by Pledging to Sphinx

Four men were pledged to Sphinx, honorary literary society, last Tuesday. They are G. H. Bergquist, C. E., '36; J. J. Doudera, C. E., '36; J. Galandak, C. E., '36; and M. B. At the meeting of the W. S. E. last | Stevens, F. P. E., '36. G. H. Bergquist has worked on the staff of the Armour Engineer for the last two years and is now circulation | cio. manager. J. J. Doudera, J. Galandak, and M. B. Stevens joined the Tech American Society for Metals and a News staff three years ago. Doudera and Stevens are now make-up editors while Galandak is the feature editor.

All four men have been very active in extra-curricular activities and have worked hard on the publications, which is one of the bases for their choice as pledges. Only staff members of the student publications are eligible for membership.

# Over Radio Stations

During the past few weeks Professor John Schommer has been actively engaged in fulfilling speaking engagements in addition to officiating each Saturday in leading football encounters of the middle west.

On Friday evening, October 25, he spoke for fifteen minutes over radio station WJJD on the subject "Duties of Officials." Later, the same evening, he spoke for half an hour over WMAQ, contrasting football of former days with football today. In the latter talk, he mentioned the use of strategy in games, and also mentioned many incidents of football of former days: the play was rougher, injuries were more serious, and substitutions were few-

Last week on different occasions, Professor Schommer addressed the Cornell Club, the Kiwanis, and the Bar Association. His topics at all three functions were based on athletics.

## Thirty Men Attend Rifle Club Meeting

for the first meeting this semester of | teaching employed in the study of the Armour Rifle Club.

The only motion passed at the meeting was one empowering J. O. Larson, president of the Interhonorary Council, to appoint a committee of three to investigate the situation and recommend a course of action. Larson has appointed A. M. Lane, representing the engineering societies, L. Robbie for the professional fraternities, and O. Zmeskal for the honoraries, to act on the committee, of which he will be a member ex offi-

> Rate Increased Last Year Fraternities and engineering societies must now pay a fee of \$20 for a double page in the Cycle, or \$35 for four pages. Previous to last year, the cost was considerably less. It was pointed out that the actual cost to the Cycle of the double page is approximately \$30. However, it was also pointed out that the limited budgets of the engineering societies make the \$20 payment nearly impossible, while its effect on the honoraries is a large increase in the initiation fee.

The allotment of the 1936 Cycle from the student activity fee is \$2.75 per subscriber. This, however, is not the total amount which each student will pay for his Cycle, since each class is assessed \$75 for its section, and all organizations which are able to collect dues from their members are also assessed. The social fraternities pay the same rates as do the honoraries and the engineering societies.

J. B. Davis, editor-in-chief of the Cycle of 1936, present at the meeting as the representative of Salamander, honorary fire protection engineering fraternity, pointed out that the assessments on the societies amount to about 10 per cent of the Cycle budget, and indicated that were this source of revenue to be cut off and no other provided in its place, the quality of the book would be seriously impaired.

Among the courses of action being (Continued on page 3)

### J. S. Thompson Heads Physics Association

Professor J. S. Thompson was elected president of the Chicago Section of the American Association of Physics Teachers, last spring at Lake Forest College. The purpose of the Thirty men turned out last week society is to improve the methods of physics in college.

The Chicago section is composed
