

By E. R. Johnson and T. H. Watts

Columbia university has a regular "wakerupper." For a consideration paid in advance, he makes the rounds, shaking out sleepers in time for class. Height of the university's social season is also the peak time for his income.

Maine's "cocktail college" was closed because pupils were too enthusiastic about sampling their own concoctions. This sounds rather harsh on the stewdents. Now they can again sing "Fill the Stein."

Sophomores at Haverford take a comprehensive examination containing 2725 questions. It requires 12 hours to complete the test. (And here we take sophomore physics and spend 12 hours on one of those "—!!\$; problems twice a week.)

According to an announcement from the University of Illinois, plant molecules have been brought within man's microscopic vision. Which is our idea of making a mountain out of a molecular—or should we say molehill.

"Nobody loves a fat man," says the old adage. Now Professor Walter B. Pillsbury, head of the University of Michigan psychology department, finds that fat students are less brilliant than slim ones.

Students at Columbia reversed the tables and gave the faculty an

intelligence test. The tests, conducted by the Spectator, campus newspaper, indicated an average mental age of 20.

Men who wear suits at the University of South Carolina are labeled capitalists. Wonder how an economics prof would rate a nudist?

Gatekeepers at Ohio have a novel way of deciding whether or not you're sober enough to enter the football stadium. If you can wiggle your thumbs in unison you are o. k. Otherwise you watch the game from a telephone pole.

Fraternity Notes

Mothers' Clubs Meet
Three of the fraternities held "Mothers Club" teas last week. The mothers and members of Delta Tau Delta, Phi Pi Phi, and Pi Kappa Phi spent the afternoon playing bridge, discussing future plans, and in general having a good time. Phi Kappa Sigma's club plans to have a bridge party next Saturday evening at 8:30. The plans being made provide for a large attendance.

Many Hold Dances

Other social events of the past week included the annual Rho Delta Rho pledge dance last Saturday which was well attended by alumni, actives, and pledges. Professor and Mrs. H. L. Nachman and Mr. and Mrs. Jack Landis were present. The latter is president of the alumni chapter.

Triangle is planning to hold a dance jointly with the Northwestern chapter in the near future.

Delta Tau Delta men made merry last Friday evening at their house dance.

The future holds promise of more fun making at the Phi Pi Phi and Pi Kappa Phi houses. The Pi Kapps definitely plan to have a dance on November 23—courtesy of the pledges, and the Phi Pi's anticipating a radio dance also in the very near future.

Rushing Goes On

Rushing is still going on in the fraternities, Sigma Alpha Mu having pledged David Rodkin, M. E., '38. The members of Theta Xi intend to become active on this phase of fraternity life simultaneous with

their moving into new quarters just above the Social Science department sometime next week.

Theta Xi is offering congratulations to brother Peter Slugg on his being pledged to Eta Kappa Nu.

Athletics in Limelight

With the crisp fall air in their nostrils, everyone is feeling athletic. All of the basketball and touch-football teams are practicing. Some preliminary games have even been scheduled.

Delta Tau Delta is all pepped up for its first practice basketball game with Triangle, which is also all pepped up. A touch football game is scheduled between the Deltas and the Pi Kapps.

All of the Phi Pi's are "het up" over the pool and ping pong tournaments going on at their house. Odds are being quoted by Handicapper PHALEN.

Groups Visit Illinois

The Phi Pi's had additional excitement Thursday when Mr. McNulty, president of the Marblehead Lime Company, was a luncheon guest.

Fred Jost, say the Pi Kapps, seems to have an extra sweet tooth. In cooking pork chops the other day he used powdered sugar instead of flour.

Lots of social visits are in order. Pilgrimages were made on a large scale to Illinois for the home coming game last Saturday. Five Phi Kaps went as well as many men from the other houses. The Phi Kaps are also eagerly looking forward to the Thanksgiving dance to be given by the Northwestern chapter.

A Monte Carlo smoker for its alumni kept Triangle up late last Friday evening.

THE STEAM SHOVEL

Bob Paulsen's advice to the profs has the unanimous backing of the rest of us when he sez: Either give homework and let students sleep in class, or don't give homework and let students sleep at home.

In case Herbie Enaz doesn't know it, that lock on his office door, which he persists in locking and unlocking, is OUT OF ORDER.

Henceforth "NINE TEN" LEVON will be more careful about when to yell "Here!" in his sleep.

J. R. Bunce has a good time telling jokes to the freshmen during class. Anyway there's one guy who enjoys them.

APOSTLE STEVENS, ST. MAACK, DISCIPLE GRAY, REVEREND BALAI and FATHER GILKISON, joint sponsors of the NEW Legion of Decency, have distinguished themselves and therefore will be represented in the hall of fay-fairies.

HAL HEIDMAN went to Galesburg one Saturday and contracted a cold. Our guess is that either she was an icicle or that he slept with his mouth open.

And we hear that Louie Zwissler caused SHOLTO M. SPEARS to lose

Studebaker Plant Is Inspected by A.S.M.E.

Seventy-nine members of the Armour student branch of the American Society of Mechanical Engineers inspected the Studebaker plant at South Bend last Wednesday. The students met at the proving grounds in the morning where Mr. de Blumenthal showed them the work of the experimental laboratory on acceleration and velocity factors, center of gravity, and inertia.

From the proving ground, the group drove to the main plant where they went through the main experimental laboratories. Engine tests were being run and tests of electrical apparatus, speedometers, horns, and other equipment were being made.

At noon the group had lunch at the Administration building. In the afternoon a tour of the foundry, machine shops, body shops, and assembly lines was made under the direction of Mr. G. Wolf.

his equilibrium completely last week, merely by pulling a punk pun.

And now dear gentle readers (the soft soap is necessary), if you by any chance find yourself exposed to some free publicity, don't load your shotgun or draw your grade book, for, after all, it is possible for these bits to be written from contributions.

Students Learn Slide Rule Tricks

That the Armour students are keenly interested in the use of their very much used instrument, the slide rule, was shown by the large number of students who attended the meeting of the Math Club last Friday morning, to hear Mr. William W. Gorsline speak on "How to Manipulate a Slide Rule." Mr. Gorsline is professor of Mathematics at Wright Junior College, and has taught courses in the use of the slide rule at that school.

Mr. Gorsline included in his talk a brief history of the development of the slide rule, a well presented theory on the location of the decimal point, based on logarithms. He showed the use of the C I scale in facilitating slide rule use. Several examples were given in demonstration of the theory.

SIDELINES—

(Continued from page 1)

BEFORE STABILIZATION can be accomplished, in addition to provisions for final settlement of the war debt problems and for national budget balancing, there must be established a reasonable freedom in international trade. Until such time as the present era of governmental experimentation has run its course, there can be little possibility of obtaining the needed freedom. It is fundamental that a new order of government, to maintain its popularity, must secure for its people advantages not previously available. The impossibility of rectifying a bankruptcy from within makes it mandatory for reorganization governments to strive for superlatively favorable trade balances. It compels them to maintain import restrictions while yet contriving to force foreign market advantages for their export commodities.

THE BANKING and business interests will promote propaganda in support of their contention that to await these adjustments would but postpone stabilization indefinitely. They will propose and support the theory that stabilization itself will accelerate and bring about the necessary changes. If the public can but realize that the record of the past is the precursor of the future, a tragedy will be averted. Should it fail, however, to have drawn from the post-war lesson an understanding of the collapse that must accompany stabilization without removal of the causes of its failure, it shall soon encounter new and more serious currency disorders.

"Camels don't get your Wind"

FAMOUS GOLFERS SAY

CRAIG WOOD (right)—Tommy Armour—Helen Hicks—Gene Sarazen—Bill Mehlhorn—Denny Shute—Willie Macfarlane!

Their names sound a roll call of tense moments that have made golfing history, when prime "condition" and healthy nerves were at a premium. All are outspoken in their preference for Camels.

"Camels are so smooth and mild they never affect my wind," says Craig Wood, pictured at the right as he paused to smoke a Camel. Willie Macfarlane adds: "Camels are mild. They don't get my wind." Miss Helen Hicks brings up the feminine viewpoint. "There's a delicacy of flavor in Camels that appeals to women. Camels never interfere with one's wind." And Denny Shute says: "I switched to Camels years ago. I smoke them constantly, without upsetting my nerves or disturbing my wind."

You'll Like Their Mildness Too!

Such experiences with Camels can be matched right among your own friends. You'll like Camels too. Camels are made from costlier tobaccos. They never tire your taste.

COSTLIER TOBACCOS!

Camels are made from finer, MORE EXPENSIVE TOBACCOS... Turkish and Domestic... than any other popular brand.

TUNE IN! CAMEL CARAVAN with WALTER O'KEEFE DEANE JANIS • TED HUSING • GLEN GRAY AND THE CASA LOMA ORCHESTRA • Tuesday and Thursday—9 p.m. E.S.T., 8 p.m. C.S.T., 9:30 p.m. M.S.T., 8:30 p.m. P.S.T.—over WABC-Columbia Network.

So Mild! YOU CAN SMOKE ALL YOU WANT

In every-day life, physical fitness plays a big part too. Life's more fun when you feel good. So mark what champions and star athletes say: Camels don't get their wind and don't ruffle their nerves. That's real mildness. Try Camels yourself, and share in the enjoyment of Camel's mellow flavor that means so much to others.
