

SIDELINES

By H. M. Ross

THE DREAD shadow of war still hovers menacingly over the world. While the Nile, one of mankind's oldest battlegrounds, has again become a center of world politics, all is quiet along the Rhine. Moreover, it is likely to remain quiet as long as Great Britain has not made up her mind to choose France or Germany as her ally to check the latest challenge to her world rule, Fascist Italy. In competition for British favor, Germany believes she holds trump cards inasmuch as all recent reports from London seem to indicate His Britannic Majesty's inclination toward her. France, though decidedly vexed with the British stand cannot afford to antagonize her, as, losing the British alliance, she would be left to stand alone. The fourth actor in this drama of war or peace, Italy, goes blithely on her way, indifferent to the demands of England, yet watchful of her every move.

IN THE MEANTIME England faces an internal crisis. Every mile of the Italian Army's advance toward Addis Ababa has brought her closer to an awkward and possibly dangerous turning point in her foreign policy. The government is appalled that Italy has virtually won her war before sanctions have had a decisive effect. It is a bitter pill and the problem of the moment is how the British government will swallow it. Prime Minister Stanley Baldwin and his Ministers know that if they allow Italy to dictate peace they will not only shake the authority of the League of Nations, but will also invite the wrath of the British public. But the government also knows that it cannot prevent Italy from dictating a conqueror's peace except by closing the Suez Canal and probably precipitating war. In the present anti-war mood of the British people such a solution is unthinkable, and it has been rejected outright by the cabinet. A retreat by Britain seems inevitable, yet there is no sign that the government knows how to accomplish it without a disastrous loss of prestige both at home and abroad.

IN ASSESSING THE French position one must not forget that there has been no public reaction against Italy in France, as there has been in Britain. The French have said that, as regrettable as it may be from the Ethiopian point of view, Italy is doing no more than France or Britain have frequently done in the past when they were amassing their colonial empires. Furthermore, the French argue, sanctions were one

(Continued on page 3)

Austin Student Wins Armour Scholarship

James D. Charlton, of Austin High School, has been named as the recipient of one of the ten Civic Assembly scholarships and will enter Armour next September. He graduated from high school last February, ranking twenty-third in scholarship in a class of 468, and also engaging in many extra-curricular activities. He was president of the Civic Industrial club, a member of the band, orchestra, Hi-Y, and the chemistry club, and played on the basketball team for two seasons. Norman Seip of Tilden was chosen alternate.

Other scholarships awarded were to University of Chicago, Northwestern, Y. M. C. A. College, and the American College of Physical Education in connection with the celebration of Youth Week. Gold achievement medals were awarded to representatives of the graduating classes of all Chicago public high schools on the basis of scholarship, character, leadership, and activities. From these were chosen the winners of the ten scholarships.

Musical Fraternity Pledges Seven Men

Seven students were pledged to Pi Nu Epsilon, honorary musical society, at a meeting held in the Salamander rooms on last Friday, April 24. The pledges, W. K. Emmerich, F. D. Hofert, E. C. Hoyer, R. P. Lischer, R. J. Magnuson, W. F. Schriber, and R. G. Stevens, are under the direction of pledge captain A. J. Strazz. They were examined at the Triangle house on the evening of April 16, and they are required to write a theme of 3000 words on a musical subject before they are initiated. The initiation will occur in about five weeks, but the pledges will be eligible for the interhonorary dance on May 1.

Alpha Chi Sigma Has Second Annual Party

Alpha Chi Sigma, professional chemical fraternity, held its second annual alumni smoker last Thursday evening at the Chicago Craftmen's Club, 2954 West Washington Boulevard. About thirty-five members attended, and judging by the jovial mood of the group, they had a very enjoyable evening. Cards and other games were a part of the program planned by the committee of L. W. Robbie, P. R. Schultz and H. J. Brannon who also took care of the refreshments for the party.

The game room recently acquired by the fraternity has made it possible to set up a ping-pong table, and a tournament started. The dark horse apparently cut to win is Bodnar, the soph class president.

An informal initiation for pledges is to be held tonight, and Thursday evening the formal initiation will be conducted with the aid of alumnus members and representatives from the Northwestern University Chapter of the fraternity. About ten men will be initiated.

MORETON STUDIES EASTERN SCHOOLS ON RECENT TOUR

Graduate Work Receives Close Attention

Professor D. P. Moreton returned last Thursday to Armour after a three week's tour of major engineering schools in the East, where he investigated policies of graduate study, research, personnel, placement of graduates, and evening school work. He visited nine schools and also studied the relationship between industrial firms and engineer schools.

Engineering on Upgrade

"On my trip through the East I was received with genuine hospitality and cooperation from Armour alumni, school officials, and business men," Professor Moreton said. "Everywhere the general condition of engineering work and business is definitely on the upgrade. I had the opportunity of conferring with many prominent educators and business men, and all were optimistic of the future in the engineering profession.

Use Basic Science Principles

"In many of the eastern schools, graduate work and research is being continually developed and extended. One of the outstanding items I noticed about graduate study is that more and more work is being done on basic science principles in the graduate schools with the scientific applications and advanced studies being left to industrial firms. A great deal of graduate work is being done in practical economics, thermodynamics, metallurgy, electronics, and the closer application of basic mathematical principles to engineering problems. All those I spoke to were impressed with the wonderful opportunity that Armour Institute has for graduate work and research in conjunction with the industrial companies in the Middle West."

Professor Moreton first visited Massachusetts Institute of Technology, and Harvard University at Boston. He then went through the Ma-

(Continued on page 3)

New Features in Next 'Cycle' Board

According to the editor, John B. Davis, the *Cycle* will be distributed during Junior Week. Honor *Cycle* will be awarded on Wednesday, May 13, and the general student body will receive their copies on Friday, May 15.

Several new features have been included in the forthcoming edition. President Hotchkiss has an article on "The Advancement of Armour," explaining the cooperative course and telling of the improvements and additions here, while Dean Heald has an article on "What the Future Holds for the Engineering Students".

Humor Section Included

The publication will be divided into four parts: the Senior section, Campus Activities section, College Life section, and the Group section. Each section will have a different border design, and the first half of the *Cycle* will have red borders, while the second half will have blue borders.

For the first time in five years there will be a humor section make-up. In the Campus Activities section, two full pages of action pictures are included. They are engraved from actual snapshots taken on the campus. There is an adequate explanation for each picture, and some are a real surprise.

Larger Number Ordered

925 copies of the 218 page publication have been ordered. This is the largest order in the history of the *Cycle*. This increase is due to the 76 cooperative students. There are enough copies ordered to provide for the demand of part time students and any one else desiring it.

National Lead Plant Visited by Chemicals

Last Wednesday afternoon the senior chemical class made an inspection trip to the National Lead Company, 936 West Eighteenth Street. This company produces white lead from lead furnished it by subsidiary companies. The white lead is, in turn, made into what is commonly known as "Dutch Boy" paint. The company also makes red lead, litharge, solder, babbitt, and allied lead products. Professor McCormack and Dr. Barr accompanied the group.

Next week the group will inspect the Sherwin-Williams Company, manufacturers of paints.

Herring to Speak at Next W.S.E. Meeting

At the W. S. E. meeting of May 1, Mr. H. C. Herring, Executive Director of the American Association of Municipal Engineers, will speak on "The Municipality and the Engineer." Mr. Leslie M. Johnson, Director of Public Works, city of Pittsburgh, presented a talk on "The Pittsburgh Flood," at the junior meeting of the W. S. E. last night. Mr. Johnson discussed measures under consideration for minimizing the bad effects of flood stages which may occur in the future. The recent flood exceeded three feet of the prediction made in 1911.

Five Men Pledged to Edfou, Scarab Temple

In an atmosphere decidedly Japanese, five men were pledged to Edfou, Armour's temple of Scarab fraternity, last Tuesday. Those pledged were M. J. Bejcek and W. D. Concolino, seniors, and F. E. Davidson and C. Saletta, juniors, and L. Skubic, a sophomore.

The ceremony was held in Fula's Japanese restaurant, after which a Sukiyaki dinner was served. Following this, Professor T. M. Hofmeister, a faculty member of Scarab, gave a talk on Japanese houses and culture.

Plans Now Complete for Honorary Dance

At the meeting of the interhonorary council held last Friday, plans were completed whereby members of Honor A, Sphinx, and Pi Nu Epsilon are eligible to attend the interhonorary dance. This annual affair will take place in the Venetian Room of the Southmoor Hotel at 6646 South Stony Island avenue, and will start at 9:30 p. m. next Friday night, May 1. After much consideration it was decided that the affair will be a table dance.

According to J. O. Larson, president of the council, about 90 couples are expected to attend. Dancing will be to the music of Ed Kraft's Melody Masters, an audition orchestra for the Columbia Broadcasting System. This orchestra has played for dances of the musical clubs, and has been well received.

Armour Is Host to S.P.E.E. Meet

With Armour acting as host, the annual meeting of the Illinois Indiana Section of the Society for Promotion of Engineering Education was held Saturday, April 18, at the Lawson Y.M.C.A. Professor J. B. Finnegan, president of the section, called the meeting to order.

The principal speakers at the meeting were Professor Hardy Cross of the University of Illinois, who talked on "The Importance of Teaching School"; Mr. Lawrence A. Downs, president of the Illinois Central System, spoke on "Engineering Education as a Preparation for Business Responsibilities"; and Dean Henry T. Heald of Armour, who discussed "Part Time Courses for the Graduate Engineer."

Group Meetings Held

Group conferences were held in the afternoon on various subjects. Professor J. S. Thompson presided as chairman of the physics group, Professor C. E. Paul as chairman of the mathematics group, and Professor W. Hendricks was in charge of the English group. Professor C. O. Harris, of the mechanics department, made arrangements for the meeting with the aid of a committee.

Spears Is Secretary

Towards the end of the meeting, the election of new officers took place. Professor R. P. Hoelscher, of the University of Illinois, was elected president, Professor Herbert S. Philbrick, of Northwestern University, vice president, and Professor Sholto M. Spears, of Armour, secretary.

It was also announced that the forty-fourth annual meeting of the National Society for Promotion of Engineering Education will be held June 23-24 at the University of Wisconsin.

Senior Dance Held at Knickerbocker

As the last class dance of their college career, the seniors held a supper dance last Friday night in the Grand Ballroom of the Knickerbocker Hotel. Dancing started shortly after nine o'clock and continued to the rhythm of Emil Flindt's orchestra playing before the supper, which was served at midnight, and afterwards until 3 a.m.

The Knickerbocker's grand ballroom contains a beautiful glass floor which is continuously played upon with colored lights. Emil Flindt, aside from drawing out his fiddle occasionally, brought with him his bag of tricks and novelties, and entertained with his "ten little bottles. . ."

All in all, the seniors felt that this, their last undergraduate dance achieved the acme of perfection that they had so long sought. As the seniors had previously announced, the dance was a strictly private affair being open to seniors only.

ARMOUR PLAYERS STAGE SHAKESPEAREAN COMEDY TOMORROW AT 10:30 A.M.

Condensed Version of 'Henry IV' Is First Play To Be Directed by W. B. Fulghum; S. M. Miner Plays Lead

JUDGES OF AMATEUR PLAYS TO BE PRESENT

All reporters are requested to attend a meeting of the News staff in the offices of the Armour Tech News, Tuesday, April 28, at 12:30.

Armour A.S.M.E. Acts as Conference Host

Armour's student branch of the American Society of Mechanical Engineers was host to the annual Student Conference at the Allerton hotel at the convention which lasted through Saturday, Sunday, Monday, and Tuesday of last week.

Official registration began on Monday at 8 a. m. and was in charge of Frank D. Cotterman and the student staff of the Armour branch. At 9:30 a. m. on Monday and 9 a. m. on Tuesday, the technical session convened. During this session papers were presented by representatives of seventeen mid-western colleges and universities. The prizes awarded were fifty dollars to D. D. Streid of the University of Illinois, who presented a paper on "Localized Stresses in Torsion," twenty-five dollars to R. L. Iglehart of Washington University, who presented a paper on "Study of Stress Concentration in Photo Elastic Materials," and ten dollars was awarded jointly to J. R. Marks of Rose Polytechnic, who presented a paper on "Design for Appearance—Redesigning the Commonplace," and to R. T. Saul of the University of Wisconsin, who presented a paper on "Centrifuge Developments for Biological Research."

At 7 o'clock on Monday evening, the midwest branches held a banquet in the Italian Room of the Allerton Hotel. Entertainment was provided the guests throughout the festivity. After the banquet souvenirs of various companies were distributed. A. M. Lane was chairman and toastmaster at the banquet.

W.P.A. Aids Armour in Landscaping Work

A program of improvement of the Armour campus and buildings has been undertaken by the Institute with the assistance of the W. P. A. The school grounds have already taken on a true campus appearance as a result of the clearing of vacant lots by the workers and the planting of trees and shrubbery furnished by Armour Institute.

In a few days students will be asked to confine their ball playing to the new field which has been cleared at the northeast corner of Thirty-Third and Dearborn streets, so that Ogden field can be re-seeded.

The policy of improving the general appearance of the buildings and grounds has met with universal commendation and is expected to be continued in the future.

Ten Men Are Pledged By Athletic Honorary

Eight students and two coaches were pledged to Honor A in the Eta Kappa Nu rooms last Friday morning. W. C. Kraft and B. Weissman were the coaches pledged, while the students were M. J. Bejcek, D. A. Delve, C. W. Dunbar, R. M. Faust, E. Kreml, W. P. O'Brien, I. Seidenberg, and E. F. Wagner.

The initiation will possibly be held at the awards assembly during Junior Week. A discussion of the type of jacket to be given seniors who receive athletic awards resulted in the selection of a suede and cloth reversible jacket.

Real Shakespearean comedy, with slight changes in dialogue, is the treat offered to the student body by the Armour Players, who will present *Falstaff* tomorrow at 10:30. Mr. Walter B. Fulghum, director of the Players, has taken the scenes and characters from Shakespeare's *Henry IV*, part I, preserving the original as far as possible. The cast finally selected is as follows:

Falstaff S. M. Miner
Prince Hal M. MacConnell
Poins G. E. Danforth
Bardolph R. Weissman
Gadshill H. M. Ross
Sheriff J. Mashman
Tavern Hostess P. W. Cump

Falstaff, the central character, is a typical tavern hanger-on of the Elizabethan period, combining a gross body with a boastful disposition and a sharp wit. His gluttony and self-praise often carry him into embarrassing situations, from which his devious methods of escape make him one of the comic figures of dramatic literature.

In Play Competition

The cast has been practicing three times a week until last week, and every night since then. It is attaining the smoothness of the Globe Players, whose style they employ. The newly-constructed tavern scenery should immediately put all attending in the right frame of mind for comedy. An added feature of the production is the fact that judges for the N.Y.A. play competition, in which the Armour Players are entered, will be present.

According to the players themselves, *Falstaff* is the best show which they have ever attempted. Tickets are selling at the low price of ten cents, the charge being made to cover the necessary expense of curtains, costumes, and scenery.

Emmerich Manages Stage

The work behind the scenes is being taken care of by the stage crew under the direction of W. K. Emmerich. J. M. Kubert manages the stage lighting, while E. C. Mitchell handles the properties, and A. N. Schriber directs the business end. B. H. Griesbach is the stage carpenter, and R. M. Lundberg is the prompter. A large part of the scenery was painted by R. P. Lischer.

Change Location for Junior Formal Dance

According to latest information, the all-important Junior Formal, climaxing Junior Week, will be held at the Elmhurst Country Club. Last week's *News* was not incorrect in stating that the Bal Tabarin at the Sherman House would be the site of the dance since an option had been taken on this location. Early rumors stated that this foremost event of the year was to be a summer formal; the affair, however, will be strictly formal. Emil Flindt's band, which is becoming increasingly popular with Armour students, will furnish the music for the formal occasion.

To insure select table locations, the social committee, headed by Oreste Tomei, has stated that all table reservations should be made by Wednesday, May 13. The committee has also said that instead of the usual flimsy paper favors, a more fashionable and durable program made of metal will be used.

The Elmhurst Country Club is located on Lake Street near Grand Avenue, on the outskirts of Elmhurst. Maps will be available to show the most convenient routes from any part of the city.

The Armour Players

Tomorrow that versatile organization, the Armour Players makes its debut under its new sponsor Mr. W. B. Fulghum. Since its reorganization six years ago, that group has developed, from a struggling body with make-shift illumination and shaky flats so old that they fell apart when touched, to its present status with its spot lights, scenery and actors which are a real credit to Armour Institute and her students. This, all under the guidance of Professor W. Hendricks who, because of more pressing affairs has relinquished his connection with the players.

During their period under Professor Hendricks who has been with them the full time, the players have presented a number of mentionable performances which have been received more or less indifferently by the students. The record of these need not be mentioned here; suffice it to say that the players at one time had the large curtain taken down and cleaned, and now they have purchased a new drop curtain. All equipment has been at the disposal of the student body. Under the new sponsor, they expect to continue to improve the quality of their productions and to add, little by little to their inventory. May the play tomorrow be the best yet and may the new director, Mr. Fulghum, be as proud of the organization as was Professor Hendricks.

On behalf of the students of Armour, the News wishes to express its deep sympathy with Raymond A. Peterson, whose father died on Tuesday, April 21.

STUDENT OPINION

Voice of a Glee Club Member
To the Editor:

To a mere member of the Glee Club of Armour, it would seem that the affairs of the Club should be administered by the members thereof or by the duly elected officers. Any interference from a source which is ignorant of the circumstances surrounding an action which had the approval of the organization, must naturally be resented. Whether this interference is due to a natural conservative element or to a selfish urge is open to question, but beside the point.

The fact remains that two progressive steps made by the Clubs in recent months have been blocked by the editorial staff of the News. First—the downtown Spring Concert, which was finally given after abandoned last year. Needless to say, the concert was an unqualified success. It gave prestige to the club, as well as providing the wherewithal to expand the activities of the clubs to neighboring cities.

There is no reason why the musical clubs could not be on a plane with those of larger schools and become more of a credit to this one. Such would be the effect of thus building a name.

The editorial in last week's News seemed decidedly ill-timed, if not superfluous. The objections raised were foreseen by the body concerned and cognizance was taken of these facts before approval was asked. If the club has raised no objections, why should anyone else? As for the school concert on the following Wednesday—the Sunday en-

agements of the clubs have not been hurt in the least by Saturday night dates.

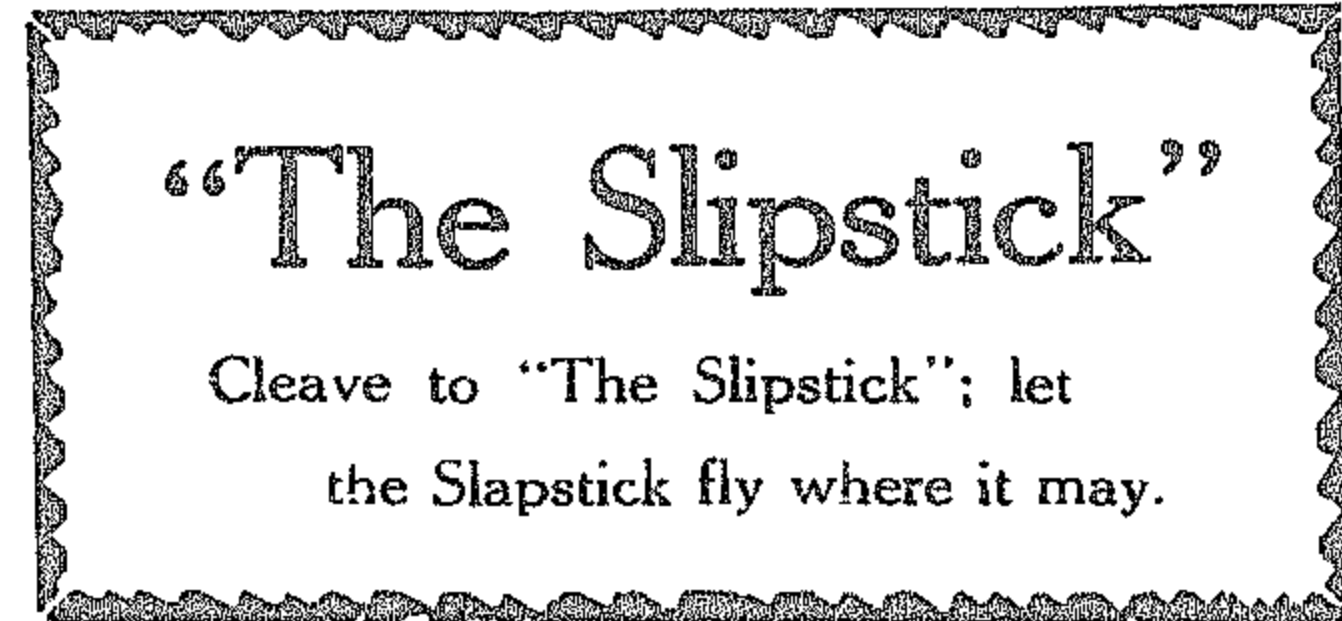

Instead of objections, why not cooperation from the News?
Charles W. Modersohn, '38.

To That Certain Editorial Writer
Dear Sir:

As a member of that "most prominent organization", the subject of one of your latest editorials, I wish to criticize your unwarranted attack on the "organization" and its officers. May I remind you, sir, that this "organization", the Glee Club, is as much a part of Armour as any other group on the campus. The members of the Glee Club are not from one class, not from one department, nor do they consider but one interest; the members of this Club represent all classes, all departments, and consequently could not show such utter disregard for the interests of their fellow classmates as you inferred in your editorial.

When the "out-of-town" concert was proposed to the Club, the members were given time to offer objections. None were offered! Then, and only then, the proposal was voted upon and passed. The Club had no desire to offend.

As you know, sir, the editorial has a great dignity, a great power which does much to influence the trend of common thought and opinion. One to whom this great dignity and power has been entrusted should be careful as to how he uses it. If one desires to be just, he must be certain that his criticism is, primarily, just.

"The Slipstick"

Cleave to "The Slipstick"; let
the Slapstick fly where it may.

"Who's that stranger, mother dear?
Look! he knows us—ain't he queer!"
"Hush, my own, don't talk so wild;
He's your brother, dearest child."
"He's my brother? Not at all!
Brother died away last fall."
"Brother didn't die, by heck!
Brother went to Armour Tech.
But they closed the school, so he
Has no place to go you see—
There is no place for him to roam
And so he had to come back home.
Kiss him; he won't bite you child;
All them Armour guys look wild."

Young Man: "Have you a book called 'Profits in Business?'"

Clerk: "Fiction counter on the other side, sir."

A bit of humor from the sheet of a lawyer's notebook:
Oct. 3—Advertisement for girl stenog.....\$ 0.75
Oct. 5—Violets for new stenog..... .65
Oct. 8—Week's salary for new stenog..... 15.00
Oct. 11—Roses for new stenog..... 3.00
Oct. 15—Week's salary for Miss 20.00
Oct. 15—Candy for wife over Sunday..... .75
Oct. 19—Lunch for Miss 10.60
Oct. 22—Lillian's salary 25.00
Oct. 25—Theatre and supper with Lillian..... 22.00
Oct. 26—Fur coat for wife 625.00
Oct. 27—Advertisement for male stenog..... .75

Dear Legras: We have received your jokes.
Most of them we have seen before; the others we have yet to see.

E. J. and ZAZU.

A young couple went to Buffalo on their honeymoon. To while away time, one evening while his wife was dressing for dinner her spouse picked up a copy of Snappy Stories.

Presently the bride tiptoed over to his chair and glanced over his shoulder. "Heavens!" she shouted, "I've married a book worm!"

E. J. (at the movies)—Can you see all right?
She—Yes.
E. J.—Is there a draught on you?
She—No.
E. J.—Is your seat comfortable?
She—Yes.
E. J.—Well, will you change seats with me please?

Deaf Mute (by sign language)—What did your wife say when you got home last night?
Second Mute (by ditto)—She couldn't say a word—I turned off the light.

Students come here every year,
Their object is a great career;
And when they finish, you will find
That they'll leave someone behind

and that's
ZAZU.

ARX NEWS

The Seniors have finally been straightened out and they are now doing the Ryerson prize competition. PFENDT and VIEHE-NAESS have been selected to represent the department in said competition. Good luck, boys. The Seniors were fortunate to have Mr. MARX, a residential architect, speak to them on remodeling in general.

Well, Bill CONCOLINO finally did it. Yes sir, he finished his summer problem . . . Lee Van SCOYOC came through with a First Mention on his arches, which was composed of details from buildings by Louis SULLIVAN . . . Juniors are now reading "Kindergarten Chats" by Sullivan in Ted HOFMEESTER'S culture class. It's great stuff . . . LISCHER and A. SCHREIBER again received a Mention Commended apiece on the recent modeling project, a "Radio" . . . In the Sophomore Freshman judgment, SCUBIC was awarded a First Mention for his fine set of drawings.

Seems that Hank LOHMILLER will just have to cut out blowing his whistle. The policemen on the drive cannot see the humor in the fact that Hank's whistle sounds just like theirs. Maybe there's too much competition.

Even Sholto SPEARS is against Hank, for when Hank brought the latest Spicy magazine Sholto took it away; he won't allow the boys to read such tripe.

TOM TAX.

Fraternity Notes

RHO DELTA RHO

As a result of the social committee's hard work arrangements for the combined active and alumni chapters' annual dinner dance have been practically completed. The date for the year's big affair has been definitely set for Saturday, May 23, and the Belden-Stratford has been chosen as the site. Options have been placed on orchestras, and before the week is out a decision will be made.

Under the direction of Brother Grombacher the baseball team expects to rapidly come up to the par set by the last year's champions. Our first practice game will be held tomorrow with Theta Xi.

Our congratulations go to Brother Freireich for being pledged Phi Lambda Upsilon.

THETA XI

We wish to congratulate Brother Krefit upon his recent pledging Phi Lambda Upsilon and Brother Chapin upon his pledging to Sphinx. Congratulations are also in order for Pledge Magnuson upon his recent initiation into Salamander.

Everyone is busy practicing for the Interfraternity Sing which is but a few weeks off. The baseball team has been selected and is now practicing for the tournament.

Our annual Founder's Day Banquet is to be held April 29 at the Bismarck Hotel. This is one of the big events of the social year and one which brings many of the alumni together with the active members. We were glad to have Brothers Grovian and Mulrooney pay us visits in the past week.

PHI PI PHI

Congratulations are in order for Brother Heike, who was recently initiated to Tau Beta Pi and pledged to Phi Lambda Upsilon.

The house is making preparations for Junior week activities. Practice for track, baseball, and tennis is now well under way, and preparations are also being made for the sing and the circus day skit.

Our new housekeeper, Mrs. Ostlund, is now well settled and is putting forth some marvelous meals. Our former cook, Mrs. Buss, recently returned to Germany, after serving us for fourteen years.

The Mothers' club held a meeting last Friday, a good attendance being reported.

TRIANGLE

Armour chapter of Triangle takes pleasure in announcing the pledging of

Nils K. Anderson, Ch.E. '38
Brother Kraft, formerly of this chapter and more lately of the University of Illinois, is now working in Chicago. He is living at the House.
Brother Hunt of our So. Dakota Mines Chapter, who has been living at the House for the past few weeks, has moved to the south side due to a change of positions.

Brothers Penn and Scott were our delegates to the Fraternity's Convention at Columbus, Ohio, last Thursday, Friday and Saturday. They left Chicago last Wednesday night and came back late Sunday night.

PHI KAPPA SIGMA

The house last Thursday was the scene of many happy reunions and friendships on the occasion of the Alumni Smoker. Stories of the good old days flew thick and fast as the evening waxed on.

The fellows played a practice game with the Pi Kappa Phi house last week which served to give both teams a good workout.

PI KAPPA PHI

In our first baseball practice game, which was held last Wednesday, we lost to Triangle by a narrow margin. We feel sure that the added practice that we have had by now will show a marked improvement in the team's playing.

The Mothers' Club card party, held at the chapter house last Saturday evening was a marked success. The attractive table prizes were a novel feature, and the refreshments were of the type only a mothers' club can serve.

DELTA TAU DELTA

Johnny Davis, Fred Engelthaler, Bill Laise, and Dick Street came through with a victory over Theta Xi in ping pong. These four men will represent us in the finals, and if they play as well then as they did last Thursday, the title will come to us.

Preparations are being made for our Circus Day stunt. A practice was held last Sunday and parts were assigned. This year the entire house will participate rather than just the freshmen as has been the case before. With more men from which to select material and with their valuable suggestions based on their experiences in the past year, the stunt promises to be very good.

Baseball is uppermost in our minds right now, and our team is ready for action. Practice games can be arranged through Fred Engelthaler, who is our team manager.

THE STEAM SHOVEL

It's a secret, or at least it was a secret until now, but it's a fact. Mel Schuman, that virile, manly, youth is knitting himself a sweater. And those brown gloves he's wearing, well those are probably to cover the scars on his hands.

Mr. Fulghum was very much surprised at the performance of his English 202 class on their last quiz. He didn't know at the time that the answers were chalked on the ceiling above him by some enterprising sophomore. He did think it strange, however, that for a great part of the time, most of the class were gazing upwards, as if in deep thought.

If you are too easily shocked, don't attend the Player's performance tomorrow morning. Some of that Shakespearean language is, well, pretty—well, you get the idea.

E. J. SIMEK asks us to make known the fact that he is not the E. J. who writes the Slipstick. It appears that his life has been threatened several times because of this mistaken identity.

We have found that the three young men purporting to be from Cornell U. who obtained dates from the hostess at the Allerton hotel, after the Monday evening session of the A. S. M. E. convention, were Armour men. In fact they were John Damiani, Paul Reh, and Otto Sauermaun. The girls took them around and showed them the city, while the "out-of-towners" stared in amazement.

Professor Moreton will be more careful in the future. While in New York, he was asked out of the studio where Major Bowes' Amateur Hour was being broadcast. "I guess I must have the wrong ticket," he explained to the guards, when caught sneaking in.

FRED LEASON and JOE KUBERT were in the cast of "Aida" last Thursday night. Of course, since it was their first appearance, they were not starred, but they received the generous sum of six bits apiece for their work. Now they are undecided as to whether to go to Hollywood, or to take up a radio career.

ONE-WORD DESCRIPTION OF PRINCE ALBERT: "COMFORTING"
The minute you light up P.A., you know you've met as cool and mellow and fragrant a tobacco as you'll ever want. No other tobacco is like it. Prince Albert charms away your cares—brightens the long hours of study. It is "crimp cut." That makes cooler smoking, keeps pipes sweeter. P.A. does not bite the tongue. It's a national favorite. Read our open invitation to all college men to try P.A. without risk.

SMOKE 20 PIPEFULS UNDER NO-RISK OFFER!
Smoke 20 fragrant pipefuls of Prince Albert. If you don't find it the mellowest, tastiest pipe tobacco you ever smoked, return the pocket tin with the rest of the tobacco in it to us at any time within a month from this date, and we will refund full purchase price, plus postage.

PRINCE ALBERT THE NATIONAL JOY SMOKE

Other Campuses

By F. I. Heidenreich and T. H. Watts

If college men would hold their girl friends, they should abide by the following rules, set by a professor in a northern university:

1. Leave off the cave-man tactics. Clark Gable may be able to get away with it, but everyone isn't a Clark Gable.
2. Don't try to be a Don Juan type.
3. Don't boast of your achievements.
4. Don't have the critical attitude. Remember that common faults are what make others human.

If by following this advice, you fail to have success just console yourself with the thought that she probably wasn't your type.

Students at William and Mary who have an 85 average may cut as many classes as they wish. Not a bad idea, eh?

When two alarm clocks could not awaken five Ohio statesmen, an engineering student came to their rescue. Now, the alarm goes off, the key goes 'round and 'round, winding up a string that turns on the room light and the radio, the latter previously set to a popular program.

We still have our doubts about this waking the "sleeping beauties."

A new group of courses in applied physics designed to meet a demand for scientists with special training for the application of physics in the solution of industrial problems has been formulated by Massachusetts Institute of Technology administrators.

A Long Beach Junior College co-ed while walking thoughtlessly behind the men's archery target was hit by an arrow. Afterwards she tried to convince her parents that she should quit school as there were Indians roaming at large on the wilds of the campus.

Because of the fear which the words "tea dance" invoked in masculine hearts last year, members of an underclass-women's honorary at the University of Washington have named their dance this year a "sports informal."

The Japanese proudly announce that they have a thousand men who are willing to drive torpedoes at the cost of their own lives. We have several million who are not only willing to, but do, drive autos.

To lighten the dead monotony of a weary day's plowing, a farmer can now switch on the dial of a new tractor radio, relax in an air cushioned seat, and listen to grand opera as he watches the furrows turn over. The University of Wisconsin is displaying these latest tractor models in its Agricultural Engineering building.

son laboratories at Yale University in New Haven, Connecticut and later visited numerous prominent Armour alumni in New York City. "All of the alumni I contacted were deeply interested in the school and were very enthusiastic about the new *Armour Engineer and Alumnus*," Professor Moreton said. While in New York he studied the policies of the Stevens Institute of Technology and the Brooklyn Polytechnic Institute, and after a short visit to Philadelphia he went to the General Electric plant at Schenectady where he investigated the cooperative electrical engineering course between the General Electric Corporation and M. I. T. The possibility of an electric engineering cooperative course at Armour is being given serious consideration.

At Pittsburgh, Professor Moreton conferred with officials at the Bureau of Mines and visited Carnegie Institute of Technology, the University of Pittsburgh, and the Research Foundation of Mellon Institute. In Cincinnati he attended the Convention of the American Alumni Council, an organization composed of officers of college alumni associations. Over 200 colleges and universities took part in the convention. He also visited the University of Cincinnati before returning to Armour.

Professor Moreton is preparing a complete report of his tour to be studied by Dr. Hotchkiss and the Board of Trustees. The trip was made to gather ideas and materials for an increased development program at Armour.

Frosh Study Groups Hold First Meetings

In order to help freshman gain efficiency in their work, four study groups have been organized. On Friday, April 17, the first meetings of the groups were held under the supervision of Mrs. Orcutta of the University of Chicago. Mrs. Orcutta, who is experienced in this type of work, is to take charge of all groups.

The students in the groups are chosen from all ranks of freshmen, based upon the intelligence tests, and are to meet every Friday. According to Dean Heald, these classes, if successful, will be continued next semester and will be extended to all freshmen.

Senior Mechanicals Conduct Boiler Tests

Working continuously for ninety-six hours, twenty senior mechanicals conducted a test of the boilers of the Blackstone Hotel power plant last week. The testing continued from Thursday noon to Monday noon, each man taking a shift of five hours.

Periodic readings taken by members of the group are to be plotted on a continuous graph, and the results and data are to be used as proof or disproof for the greater efficiency of coal as a fuel.

The Creear Clinch corporation, a Chicago company, sponsored the joint endeavor, the professors of the mechanical department having secured the cooperation of the senior students.

SIDELINES—

thing when it was believed they would stop Italy. But now that they have failed, the French theory is that there is no use in prolonging the existing sanctions because of the bad feelings they engender. Surely, over and above all, the French wish to keep Italy in the anti-German column.

WHILE TRYING to prevent further sanctions against Italy, the French have their eyes on the Rhineland and do not wish to risk affecting adversely the British promises to aid them against a possible attack by Germany. Paris, therefore, cannot afford to go too far in a position against London. On the other hand, the British promises to France involve British interests, and London cannot run the risk of pushing France and Italy together in an anti-British position. The situation is a very nice one. It would seem that Britain is in the most difficult position. She is not prepared to move in the direction of an understanding with Germany. She cannot afford to antagonize the French, and she is being defied by Italy.

IT IS TRUE enough that Great Britain could undoubtedly make a good bargain with Mussolini. But to make such a bargain would involve a tremendous retreat from the high moral position the British government has taken. So London faces no easy task. To let Mussolini have his way in Ethiopia signifies a severe dent in British prestige, a quality of great import in running the British Empire. To fall in with Mus-

'Engineer' Features Picture Supplement

A twelve page supplement of pictures of activities taking place at and about Armour Institute will be included in the next issue of the *Armour Engineer*. Laboratory and shop scenes of particular interest to alumni, faculty, and students are included. Members of Professor Hendrick's Advanced Writing class have submitted a great variety of articles.

P. W. Cump, J. D. Keane, J. D. Sheehan, and L. B. Parker spent one Saturday morning in cleaning up the *Engineer* rooms. They washed the ceiling in one room and half of the ceiling in another room.

Elect Lease Leader of Educational Group

Mr. L. J. Lease, industrial coordinator of the cooperative plan, was elected president of the Illinois Industrial Educational Association at the annual convention held April 17 and 18. Mr. Lease, previous to the election, occupied the position of secretary for three years.

The association is made up of vocational and industrial arts teachers, whose objective is the improvement of the personnel and teaching in their departments.

Mussolini's plans would involve a loss of prestige by the existing government which might bring severe reaction by the British public. Yes, Britain must act cautiously in taking her stand, for into the conference rooms of a Geneva, London, Paris, Berlin, and Rome seeps the insidious rumble of the drums of war.

Interfrat Softball To Begin this Week

The interfraternity soft ball tournament is due to start this week, and if the games run as per schedule the first round will be completed by Friday. As usual, the regular soft ball rules with fast pitching will prevail and the games will be played at Armour Square or the new fields on Dearborn avenue.

- Schedule (first round)**
 Tues., April 28—Pi Kappa Phi vs. Phi Pi Phi
 Wed., April 29—Theta Xi vs. Delta Tau Delta
 Thurs., April 30—Rho Delta Rho vs. Kappa Delta Epsilon
 Fri., May 1—Triangle vs. Phi Kappa Sigma

Tech Golfers Lose to N. U. at Kildeer

In their first golf match of the season Armour's club wielders received a setback when they were defeated by Northwestern at Kildeer, 21 to 0. Outstanding among the competitors was Jim Marek, a Northwestern sophomore, who turned in the sub-par score of 35.34.69. His round included five birdies and he finished up by sinking a 60-foot approach shot for a birdie three on the 18th.

—for Digestion's sake—smoke Camels

MENTAL STRAIN induces nervous tension—slows down the digestive functions. Smoking Camels increases digestive activity—gives you a "lift." Smoke Camels for digestion's sake. Camels set you right!

Camel's aid to digestion confirmed by Science

Many phases of modern life—the hurry, worry, and mental effort—tend to slow down the flow of the digestive fluids. Smoking Camels helps release you from this strain on digestion. Renews and increases the natural and necessary flow of the digestive fluids.

Enjoy Camels steadily! They encourage that delightful sense of comfort and

well-being that good digestion brings in its wake. Smoke Camels with meals, after, as often as you like—for the pleasure of their matchless flavor...for digestion's sake...for their cheery "lift." Camels set you right! You can smoke as many as you please. Camels never get on your nerves or tire your taste. Turn to Camel's costlier tobaccos today.

Dining de Luxe at Pierre's, New York

What will you have? It's pleasant to imagine. Perhaps *Borsch Polonaise* to start. Then *Supreme of Halibut à la Russe*, Braised Lettuce, and String Beans *au Gratin*. Then...a Camel...a crisp salad...a Camel again...and an ice with *demi-tasse* and...Camels! Camels are part of the art of dining today. They stimulate digestion—add to the sense of well-being every one should have after dining. M. Bonaudi (above), the banquet manager of Pierre's, who handles many of New York's smart "deb" parties and other exclusive society functions, says: "Camels are by far the most popular cigarette here."

METHOD USED. Credit for paving the way for the discovery that Camels promote digestion goes to Pavlov, the great physiologist. Recent investigation confirms Camel's beneficial effect.

WHIRLED THROUGH SPACE upside down. Attractive Vera Kimiris, featured artiste in the New York hit, "Jumbo," says: "Thanks to Camel's aid to digestion, I can always be sure of enjoying my food."

COSTLIER TOBACCOES!

Camels are made from finer, MORE EXPENSIVE TOBACCOES—Turkish and Domestic—than any other popular brand.

SECOND WEEK OF SOFTBALL GAMES NOW COMPLETED

Two Teams Eliminated From Tournament in Past Week

NINE GAMES RUN OFF

The third week of the interclass baseball tournament shows promise of better games to come. This week saw the first two eliminations of the tournament and soon only the best teams will be left to fight for the title.

Jr. F.P.E. (10)—Sr. F.P.E. (6)
Among the outstanding contenders for the title are the slugging junior five protects. Their victory this week was over the senior F.P.E.'s. The juniors took an early lead by scoring two runs in the first inning. They held this lead throughout the nine innings by scoring an additional eight runs out of fifteen hits.

Jr. Ch. E. (8)—Jr. M. E. (5)
This week's "game of the week" was played by the junior mechanicals and junior chemicals. The chemicals took advantage of a two run lead in the first two innings but when the mechanicals drove two runs across the plate Wiegman came to the rescue by driving one over Harrold's head for a homer and chased two runners across the plate. A long hit by Dreis drove another run across the plate to take a lead of 5 to 4 in the seventh. The mechanicals asked for another two innings but were still unable to take the game. The schmiers drove in three more runs to end the game with a score of 8 to 5.

Sr. E.E. (16)—Soph C.E. (2)
The second team to drop out of the tournament was the sophomore civils who gave up the ghost when the senior electricals defeated them 16-2 last Friday. Though there existed a tie of 1-1 at the end of the first inning the score became lopsided when the seniors gathered in four runs in the fourth, five runs in the fifth, and others along the way.

Soph M.E. Beat Frosh D
Friday afternoon the sophomore mechanicals picked up another win for themselves by defeating the frosh "D" team in one of the hardest fought games so far. Few errors were made and the playing was greatly improved since each team had learned to work together. High spots in the game were Ralph Faust's homer and a freak four base hit on errors.

Soph E.E. (11)—Soph Ch. E. (10)
In a loosely played game last Wednesday the sophomore electricals beat out the sophomore chemicals in extra innings by an 11-10 score. Due to frequent errors and heavy slugging, each team had men on base in every inning and consequently the leading score see-sawed back and forth between teams. With a 9-9 tie in the eighth both teams put a run across.

Frosh A (12)—Jr. E.E. (5)
The first team to be eliminated was the junior electricals who were defeated 12-5, against the frosh "A" team. Good pitching on the part of the freshmen made the electricals hit up in the air to the waiting fielders. The runs were scored on some weak in-fielding, and the frosh, who were ahead all the way, beat the juniors out of the race easily with their 12 runs against the other's five.

Junior C.E. (19) — Soph C.E. (3)
After playing a tight game for three innings the sophomore civils cracked, and their opponents, the junior civils, piled up their total of nineteen runs by virtue of hits and sophomore errors. In the third the sophs threatened, but with the bases loaded Machulis looked at the third strike to end the inning.

Senior C. E. (21)—Freshman B (4)
With runs in almost every inning the senior civils overwhelmed the frosh B team by making a total of twenty-one runs. The seniors went to work early in the game, and by batting around in the second and third innings, brought eighteen runs across the plate. To compare with this, the frosh made three of their runs in the first, but remained scoreless during the rest of the game with the exception of one in the fourth.

Armour Loses in First Home Game

Northwestern's Wildcats vanquished Armour's ball team for the second time last Tuesday afternoon by a score of 9-1. Wagner scored the lone run for Armour off of Logullo's hit in the first inning. Northwestern opened the game with a walk to first and a two bagger, driving Merrill in for the first run.

Tech Opens Nicely
Armour opened up well in her first inning with a walk by Wagner and a bunt by Dunne that placed runners on second and third. Seidenberg was closely out at first on a short grounder. Adamec walked to load the bags and Logullo hit to drive Wagner in and Kruse hit a short ball forcing Dunne out at home.

Northwestern fell in the second inning one-two-three. Russek managed to get on for Armour but was caught stealing third. Prehler struck out, Wagner got on with a fielder's choice, and Dunne hit the ball to force Wagner at second for the third out. Northwestern scored three runs in the third inning by socking two balls over the fence for a triple and single, and hitting another man to second. Two more were scored in the fourth, making the score 6-1.

Logullo batted one over the fence for a single in Armour's sixth and reached third later but was tagged

Swanson Is Star As Tennis Team Loses

The tennis squad received its second setback when it was defeated by Indiana State Teachers College 6 to 1. Swanson, the only Techawk to win his match, turned in a good performance with a 6-2, 6-2. In the doubles match between Swanson and Quandee, of Armour, and Burg and Sturgeon, of Indiana, the former put up a good scrap, losing their first set 3-6, but running up the last one to 8 all before being defeated. Natinchek, far from his usual form, also received a setback, 6-8, 4-6, while the remaining sets were taken with relative ease by the Teachers.

out on the way home. Merrill took the only homer of the day in the eighth, driving in Kimball and making the final run of the game. Chown had made thrid on error and stole home with Kimball's hit. Kruse pitched eight innings for Armour, Delve relieving him in the ninth.

Box Score

| Northwestern (9) | | | | Armour (1) | | | |

Racketeers Lose in Season's First

Last Wednesday saw the tennis team travel to Naperville to lose to North Central, six matches to one. George Quandee, playing as number five man, beat Ekstrom of the home school 6-2, 6-3, to give Armour its only match.

The effect on Armour's playing of the sudden change from the fast, hardwood floor of the Armoury to the slower outside clay courts became apparent early in the afternoon. Capt. Arnold, playing as number one man, couldn't get started and bowed to McCollum, 6-1, 6-0. Then Natinchek lost the best match of the day to Groom. After losing the first set 6-2, Natinchek took the second 6-3 and carried the third and last set to 8 all. Then Groom stiffened and took the set 10-8 and the match 6-2, 3-6, 10-8.

Cardinals Take the Rest

Except for Quandee's match, little more happened to warm the hearts of Armour sport fans. Boehme of Armour bowed to Woodward 6-3, 6-1, and Herz lost to Wright 6-0, 6-2. Both doubles matches had a similar outcome for the Techawks. Natinchek and Herz lost to Woodward and McCollum 6-1, 6-1, as did Arnold and Boehme to Wright and Groom, 6-1, 6-4.

Red Demons Ride Rough-Shod Over Tech, 20-11, in Ninth Inning Splurge

In a long drawn out three and one-half hour scoring contest last Friday afternoon, Armour lost its first league game to North Central 20 to 11. Up until the ninth inning it was anybody's game and the Techawks had high hopes of turning in the first win of the season behind the fine pitching of Kruse who had been holding the visitors at bay since relieving Delve in the sixth. Dunne also helped to bring up the hopes with his total of four hits responsible for five of Armour's eleven runs. The ninth might be called unlucky but it was worse than that. Kruse, who had hurt his pitching hand while batting in the eighth, was unable to start the ninth and Delve had to be recalled. Then the fireworks started and before the spree subsided the whole North Central team had crossed the plate and as far as Armour was concerned the game was over.

Visitors Take Early Lead

In the first few innings the visitors went into an early lead, scoring two in the first on a single and a homer by Heilman, and two more in the second from two hits and an error. Armour gathered in its one run when Adamec scored on Dunne's single. The Techawks picked up three more runs in the fourth when Adamec and

Kruse each poled the ball over the right field fence, followed by clean singles by Dunne and Wagner to tie up the score. It was short lived, however, since North Central came back in the next inning with six from five hits and an error. In the second half of the fifth Armour added three more to their score, and the four more they scored in the following two innings put them into an 11 to 10 lead. The eighth saw North Central tie up the score and the fateful ninth saw them clinch up the game, bringing the score up to its final standing 20 to 11.

Box Score

| Armour (11) | | | | North Central (20) | | | |

the SANTA MARIA Columbus' Flag Ship

the ship that brought Columbus to America ...and tobacco to the world

History tells us that when Christopher Columbus' sailors took tobacco back home with them everybody hailed it as one of the first new pleasures in years.

Today tobacco gives more pleasure to more people than ever before.

Many different claims are made for tobacco, but most everybody agrees on this . . .

Smoking is a pleasure and the cigarette is the mildest and purest form in which that pleasure can be enjoyed.

..and now throughout the world smokers are saying They Satisfy
