

## KRUSE LEADS TECH IN SHUT-OUT OVER WHEATON NINE, 9-0

**Timely Hitting, Good  
Pitching, Bring  
Victory**

### WAGNER GETS THREE

Behind Kruse's stellar pitching, the Tech ball team shut out Wheaton by a score of 9-0 in last Friday's ball game, the second league contest of the season.

Both pitchers gave a good account of themselves as far as strikeouts were concerned. Kruse showed nine men the last strike, while Johnson of Wheaton turned back six of his opponents by the third strike route. In the hitting department, Wagner, Adamec, Dunne, and Russek provided the punch for the Techawks. Wagner hammered out three safeties, to lead in hits, while Adamec contributed two belts over the center fielder's head and out through the fence for triples. Dunne and Russek also contributed two hits apiece.

Wheaton led off in the first inning with two hits, but some fast work on the part of the fielders nullified both of them, and no runs scored. Again in the second the visitors threatened, but with two men on base and no outs, Kruse tightened up, caught one man off base, and put the other two out of the way by strikeouts. Nothing happened in the third bracket, but in the fourth the Techawks settled down to business. Logullo got to first on an error, stole second and then brought the first run in on Dunne's single. A few minutes later on, a double by Russek and singles by Bartusek and Wagner brought three more runs home.

In the fifth, Armour added two more runs; this time on a walk to Logullo and a long triple by Adamec, bringing the score to 6 to 0 in their favor. Things were quiet again in

(Continued on page four)

## June 2 Set as Date for Alumni Banquet

"Bomb Explosions" will be the subject of a talk by Mr. Clarence Muehlberger, of the coroner's office, which together with an after dinner talk by James Weber Linn, the University of Chicago's famous after dinner speaker, will be featured entertainment at the annual Alumni Banquet to be held Tuesday, June 2 at the Medinah Athletic Club, starting at 6:30.

Armour seniors will be heartily invited to meet with many members of the alumni, the faculty, and the board of trustees on this occasion. Besides the above events, the program, arranged by Prof. J. J. Schommer and D. P. Moreton, includes music by the musical clubs, a short talk by Mr. James Cunningham, chairman of the Board of Trustees, and a question period during which Dr. Willard E. Hotchkiss will attempt to answer questions concerning the school.

## Scholarships Awarded To Armour Students

Three Armour students, John F. Kahles, Peter Morrison, and George Thodos, were recently awarded scholarships.

Kahles, a senior chemical, has received appointment to a graduate assistantship at the University of Cincinnati. He will spend twelve hours a week as assistant in the general chemical laboratory and the remainder of the time studying for his master's degree.

Morrison, a junior electrical, has been awarded one of the Tribune scholarships to children of employees. The scholarship has a value of \$500.

Thodos, a sophomore chemical, has received a half year scholarship to Armour. The scholarship was awarded by the Order of Ahepa. Thodos made application for the scholarship about a year and a half ago.

## Feature Pictures In New 'Engineer'

Friday, May 15, is the date set by the editor, Professor Walter Hendricks, for the distribution of the *Armour Engineer and Alumni*. The most important feature of the magazine will be a twelve-page supplement, of which twelve thousand copies will be printed, besides the six thousand copies of the magazine. The additional copies of the supplement will be used to present the educational facilities of Armour to prospective students.

Other features of the *Engineer* include articles on patent contracts, by A. Hoffgren; air conditioning, by H. J. Presbensen; building activities, by W. H. Newman; rare mathematics books, by Prof. W. C. Krathwohl; and new shop courses, by Prof. W. A. Pearl. Mr. Hoffgren is a Chicago patent attorney and his article reveals some interesting facts about patents. Mr. Presbensen's article is entitled, "How Do You Like the Weather?" and Mr. Newman's, "Fluctuations in Building Activities."

The regular features of the *Engineer* include fraternity notes, campus news, and the articles on trustees. Because it will be distributed during Junior Week, the issue is known as a souvenir number.

## Board of Trustees Has Spring Meeting

The development of projects leading to closer contact with business concerns, authorization of degrees for the class of 1936, and the election of Mr. C. S. Davis to the board occupied the time of the members of the Board of Trustees at their annual spring meeting held today at the Union League Club.

Mr. Charles S. Davis, President of the Borg-Warner Corporation, was invited to join the Board at a special meeting held April 3, 1936. He accepted the invitation and his official election was to take place at the meeting today.

Other business involved discussion and reports concerning financial and educational activities of the college year. These included the inauguration of the cooperative course and the setting up of the Research Foundation.

## Initiate Six Civils In Honorary Fraternity

At the initiation held last Friday night in the Chi Epsilon rooms, two seniors and four juniors were formally initiated to the active chapter of Chi Epsilon, honorary civil engineering fraternity. The men formally initiated were: R. B. Richards and N. Virgilio, seniors; and P. L. G. Moore, S. Rabinowitz, H. M. Ross, and J. C. Stern, juniors.

Present at the initiation ceremonies were Dean H. T. Heald and Prof. J. C. Penn. After the initiation the group departed to the faculty grill where a banquet was held. Present at the banquet were two alumni members of Chi Epsilon, C. Gabriel and A. Beemsterboer, both of the class of '33.

After the banquet and the enjoyable after dinner speeches, active new initiates, and the alumni visited the Palace theater.

## WELCOME, OPEN HOUSE VISITORS

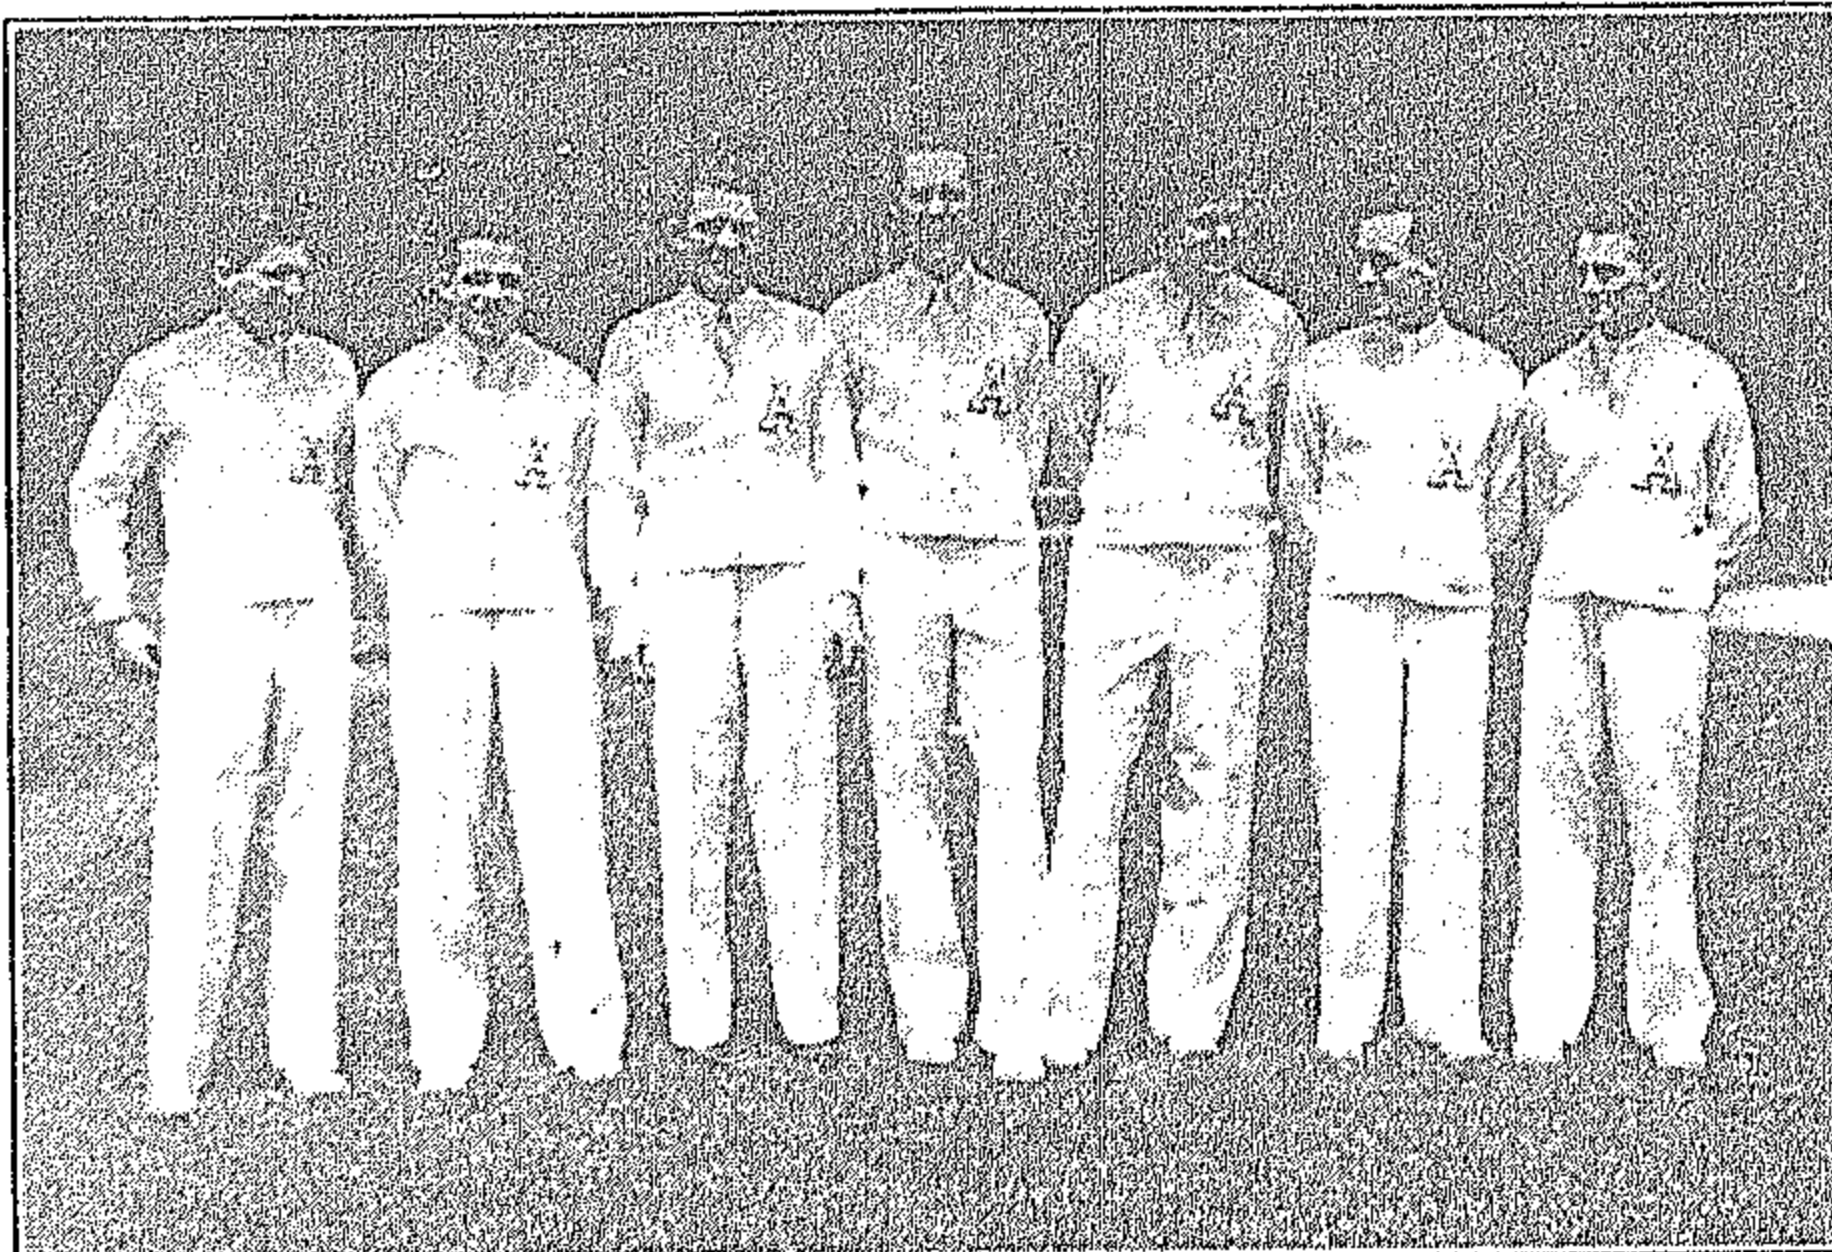

Open House night is an Armour tradition of which we are proud. On that night, we try to give our guests as broad a concept, as limits of time and space permit, of what it means to study at Armour. We hope that they may see not only what the courses and activities mean for the students, but what it means for education and for industrial and civic advance to have this opportunity here in our midst.

It is a happy privilege to welcome the families, teachers, and friends of our students, to welcome those who may become students, and to welcome back students of other days.

May Open House night in 1936 be a pleasant and profitable occasion, from which all who participate may take away inspiration and happy memories.

Willard E. Hotchkiss, President.

## JUNIOR MARSHALS

Selected by their class to manage Junior Week, these marshals are, left to right: P. R. Schultz, Jr., R. E. Winkler, P. L. G. Moore, L. Holmes, P. M. Martin, head marshal, E. A. Droege, and H. P. Lohmiller.

## Students Forsake Homework and Quizzes for Junior Week Events

### Push Ball, Egg Throw Contests New

Throwing away their books and forgetting study, homework, and quizzes, Armour students have entered the thirty-first annual Junior Week with vim and vigor.

At 11:30 this morning the first awakening of the spirit of bygone Junior Weeks was caused by the Parade of Hobos in which the general student body took part.

That much "looked-forward-to" game between the faculty and seniors in which the young and old pros test their athletic ability against that of their students will be a high-light of Tuesday's affairs. The game will be played at 10 o'clock.

### New Junior-Senior Events

Two new events have been planned for the junior - senior contest on Thursday. One is a push ball contest, the other an egg throw contest.

A push ball about eight feet in diameter will be moved back and forth by the upper classmen until the ball rests securely in one or the other's goal.

In the egg throwing contest juniors and seniors will pair off with their respective classmates. Retreating from each other, they throw eggs between them. When they have separated a fixed distance and the eggs are still in their original form, a point will be scored for their side.

### To Have Bonfire Thursday

A bonfire which will be started about 7:30 on the campus will liven the Thursday night activities. Firelight singing will probably be followed by street parades and other activities.

(Continued on page three)

## Eta Kappa Nu Elects W. Chapin President

At last Thursday's meeting of Eta Kappa Nu, honorary electrical fraternity, William A. Chapin was elected president for the coming year. The other officers are R. G. Liebmann, vice president; E. H. Brink, recording secretary; P. M. Martin, corresponding secretary; W. B. Graupner, treasurer; and A. Goldsmith, publicity correspondent.

### Fraternities Engage In First Open House

Michigan Avenue will echo to the sound of a parade of gay couples as they travel from house to house when the Interfraternity Open House swings into action Tuesday night. The houses along fraternity row will be aglow with light, and music from radios will pour from the windows to lure the wayfarers in.

The entire student body is invited to the affair—their only ticket of admission being a date. Furthermore, in order to spur the dancers to greater efforts, buffet refreshments will be served at most of the houses.

Those houses which will participate in Fraternity Open House are Delta Tau Delta, 3423 S. Michigan Avenue, Phi Kappa Sigma, 3236 S. Michigan Avenue, Pi Kappa Phi, 3337 S. Michigan Avenue, Rho Delta Rho, 3254 S. Michigan Avenue, Theta Xi, 43 W. 33rd Street, and Triangles, 3222 S. Michigan Avenue.

## SPRING CONCERT TO GIVE ARTISTIC TOUCH TO WEEK

Wednesday evening at 7:30 p. m. Armour Tech's Glee Club and Orchestra, under the direction of O. Gordon Erickson, will present their thirty-first annual Spring concert in the auditorium of Armour Mission. The concert program will be divided into two parts, and the Interfraternity Sing will take place between them. Those who did not attend the mid-winter concert given by the Musical Clubs and sponsored by the Women's Faculty Club at the Goodman Theater last February will have the opportunity of hearing the numbers rendered there in addition to all the new pieces that will be sung and played tomorrow night.

Armour students are urged to bring their friends and relatives. Admission is, of course, free to all.

As in past performances of the Musical Clubs, R. M. Paulsen and J. Johnson will be the instrumental soloists. Three Glee Club members will sing a trio in the selection, "Land Sighting." They are Don Harris, Fred Smith, and Tom Yeakle.

The Interfraternity Sing Program will be held during the intermission of the Spring Concert. Those fraternities participating are: Phi Kappa Sigma, Delta Tau Delta, Theta Xi, Phi Pi Phi, Sigma Alpha Mu, and Pi Kappa Phi. Each fraternity will present two numbers.

Judges of the Sing will be Mr. William E. Kelly, Dr. Rufus Oldenburger, and emeritus Professor C. W. Leigh. Dean Heald will then present the circulating loving-cup to the winning fraternity. Professor Leigh was the one who organized the musical clubs at Armour thirty-one years ago.

## ARMOUR GREETES GUESTS IN OPEN HOUSE DISPLAY; NEW DEVICES EXPLAINED

**Lie Detector, Fever Machine, Puppet Show,  
Scientific Laboratories, Make Visit  
Unusual and Interesting**

### VARIETY MARKS 1936 DEMONSTRATIONS

## Junior Formal To Close Festivities

Climaxing the activities of Junior Week, the class of '37 will present the Junior Prom, the foremost social event of the year. This strictly formal affair will be held at ten o'clock at the Elmhurst Country Club, located on Lake St. near Grand Ave. about eighteen miles from the loop. The club will be reserved exclusively for the Prom, which is the first ever held by Armour Juniors at a country club. Emil Flindt's famous orchestra will supply the music. According to social chairman O. A. Tomei, this will undoubtedly be the best and most successful Prom that Armour has ever had.

Dr. and Mrs. W. E. Hotchkiss, Dean and Mrs. H. T. Heald, and Mr. and Mrs. G. S. Allison will be the sponsors. Bids at four dollars each will be sold each noon and until five Wednesday in the lobby, after which no more reservations will be made. Maps and general directions will be given away with bids, and can be obtained from L. Zwissler. Unique metal programs will be used instead of the usual favors. Tuxedo arrangements must be made with J. Stern by Tuesday.

## Players Win First In College Division

Armour's dramatic group competed last night at the International Amphitheatre in the state amateur finals, presenting "Falstaff," the play with which they won in the semi-finals and finals of the college division of the Drama Festival. This play is under the direction of Mr. W. B. Fulghum, English instructor at Armour. The players won in the finals of the college division last Wednesday at the Amphitheatre.

The finals last night were held in competition with the winners in the other amateur groups, among which are the Hull House Players and groups from Chicago high schools.

A silver loving cup donated by Thomas Wood was awarded to the winner. In addition the winner will be given the opportunity for a radio broadcast. Three outstanding performers will be awarded scholarships which cover full tuition for a semester's study in the drama departments of DePaul University, Y. M. C. A. College, or Mundelein College.

Besides Armour's presentation of "Falstaff" in the finals of the college division, St. Xavier's College presented "Midsummer Night's Dream" and Chicago Normal College presented "The Turtle Dove." All three plays were well-received by the audience. Chicago Normal College won recognition for the best make-up.

## R. Starmann Chosen Rifle Club President

With the conclusion of a very successful season, the Rifle Club held its annual election. Those who gained office were: R. Starmann, president; F. Neubauer, treasurer; R. Miller, range officer; and W. Labes, manager. H. McDaniel was re-elected captain of the team.

The medals won by the Rifle Club in the University of Chicago Invitational Rifle meet have arrived and are on display in the student supply store. The team took second place and each man is to receive an award. The medals will probably be presented at the athletic award assembly.

By Richard F. Beardsley  
Open House presents Armour Tech in full operation, with interesting features in every exhibit. The description which follows covers only a part of the activities going on this evening, and is meant to serve as a guide to the location of each department and the type of work done there. Students making demonstrations are prepared to answer questions, and will undoubtedly be kept busy by interested observers.

On the first floor of the main building is the library, containing a large part of the recorded scientific knowledge of the world. Several rare mathematics books are on display, together with some other works of historical interest. The photographic exhibit should be attractive to visitors seeking relaxation. At the south end of the first floor is the dynamo lab, where several dynamos are generating the current to operate the other electrical apparatus in the building.

In the electrical lab at the south end of the second floor are many applications of the theories of electricity. An automatic telephone and a photo-electric counter are in operation here, and short-wave currents having medical application in the production of artificial fever are being produced. Another interesting electrical application being shown is a lie-detecting instrument.

Moving along to the fire protection exhibit in the physics lecture room at the north end of the second floor, a variety of fire extinguishing and protective devices are found. There is an Aero alarm system operating by the expansion of air in a copper tube, and a Garrison alarm system employing a fusible alloy.

In the physical chemistry lab on the third floor are being performed experiments typical of those actually done during the school year.

Before continuing to the fourth floor chemistry exhibits, the visitor should view the puppet show being presented by the Armour Players in Science Hall, at the north end of the third floor. Directly above Science Hall is the organic chemistry lab, where many typical experiments

(Continued on page three)

## Scholarship Exam To Be Given on May 23

To date, a total of 102 applications for the freshman scholarship examinations on Saturday, May 23, have been received, according to Professor C. A. Tibbais, chairman of the scholarship committee.

Offering a full year's tuition, 300 dollars, the examinations are open to all high school graduates of February or June of this year. The examination consists of an interview with the dean, H. T. Heald, and a formal examination in mathematics, physics and chemistry, and English.

There is still time for interested men to make application. On Open House Night the Scholarship Committee will be in the office of the Chemical Engineering Department on the 4th floor to discuss the examinations with any one desiring more explicit information. They are especially anxious to talk to high school graduates of the current year.

Of the applications received 91 come from the Chicago area and 11 from other states. Eighty men have been in for their interviews and are qualified to take the exams.

The examination is given in the gymnasium from 9 o'clock till noon after which the custom is to entertain all the applicants at lunch.

### After You've Seen Everything

Well, how did you like the show? Spectacular, astounding? That was scarcely the purpose of Open House Night; to present a picture of what Armour does—the fundamentals of science turned to the accomplishments of engineering—these are what the exhibits have tried to present. Research, the tool of science, shows its results in every department by applying these fundamentals to the solution of our modern problems. Short wave communication, safeguarding public water surplus, diesel engines, the latest fire protection devices are the results of engineering as

it uses the basic principles of science.

So do the courses of Armour offer a broad foundation to the man who wants to enter the field of engineering. Starting with the tools of the profession, mathematics, physics, and chemistry—as well as drawing and English, the foundation is laid for future specialization in any department. Advanced courses then lead directly to the most recent work in particular engineering fields. The fact that engineers are coming now and more to step into important business posts is also recognized by training in the operation and control of business enterprises.

Probably of importance comparable to the departmental work presented tonight is another phase of the development of the all-around engineer. Rounding out the programs followed by the student is the extra-curricular part of college life. Athletics, fraternities and engineering societies, newspaper and magazine writing present opportunities leading to rewards beyond those of the classroom. Meeting practicing engineers, competing with other schools in sports, presenting a speech or an article for publication, these are what the student engineer does in the activities which are preparing him for the work he will do after graduation.

So that is what Armour Tech is. We've shown you a large part of it, and to one and all, it's been a pleasure to have met you.

### A.T.S.A. Election

Next week, the first election of officers of the revised student governing body will take place. The new slate consists of the best men of the school instead of only athletes as was done because of a misunderstanding under the old name. To be sure, there are several athletes on the slate, but they are there because they are real leaders. This is not meant to be derogatory in any way to the former officers; in fact a majority of the leaders at Armour have been athletes.

Students must recognize this when they see the ballot next week and try to select men they trust, men who will work hard for the student body and Armour Institute. In the hands of the new A.T.S.A. officers will rest the decisive power of the most important body at school. Let's elect the best men to hold these offices.

### The Slipstick

Cleave to the slipstick; let the slapstick fly where it may.

You have all been justly warned and have done nothing about it. Zazu will once more come into your midst. Suffer, suffer—(Heh, Heh, Heh—)

Twinkle, twinkle, little star,  
How I wonder where you are;  
High above I see you shine,  
But, according to Einstein,  
You are not where you pretend,  
You are just around the bend;  
And your sweet seductive ray  
Has been leading men astray  
All these years—O little star,  
Don't you know how bad you are?

Two Irishmen laid a wreath of flowers on a comrade's grave. Across the cemetery was a Jap laying some rice on the grave of his friend.

Asked an Irishman, "When do you expect your friend to come and eat the rice?"

"When your friend comes to smell the flowers," was the reply.

How was I to know you didn't love me

When you told me such convincing lies?

How was I to know that you were lying,

And didn't mean the promise in your eyes?

How was I to know that when you kissed me

You would laugh because you thought me true;

But what you didn't know when you were laughing,

Is the biggest joke of all—I lied too.

B. A. Fox.

Poetry makes one think of birds, so turning to section "B" and looking under "bird gags" we find: Birds of one feather usually catch colds.

### AMONG US GIRLS

Gracious, it's been five years since I've seen you. You look lots older, too.

"Really, my dear? I doubt if I would have recognized you, but for your coat."

We have all taken quizzes before, but how few of us know what the word "quiz" really means. Here's how Webster's New International Dictionary defines the word: We quote "Quiz — 1. To ridicule; to banter; to chaff or mock with pretended seriousness of discourse." Look it up if you don't believe us.

### Fraternity Notes

#### PI KAPPA PHI

At a meeting held last Wednesday, the recently elected officers were installed. They are as follows:

Archon ..... Idris Thomas  
Treasurer ..... Robert A. Winblad  
Secretary ..... John F. Sturgeon  
Historian ..... Roy A. Burman  
Chaplain ..... Frederick H. Jost  
Warden ..... James C. Hodel

Preparations have been made so that we may accommodate a sizable gathering at our chapter house during the Fraternity Open House on the evening of Tuesday, May 12.

Under the direction of Brother Engelschall, the track team has been taking shape. With the additional practice all members will have before the Interfraternity Meet, they should offer stiff competition to all other teams.

The explanation of the musical chords originating in our house is the new harmony, to our songs, which have been written by Brother Doudera. Concentrated practice has been carried on in the desire of retaining the cup won by our chapter last year.

#### DELTA TAU DELTA

Our Alumni Celebration last Friday, in honor of Founders' Day, was a huge success. Many of the Alumni of our chapter dropped in and quite a few from other chapters paid a visit.

The Delta Prom last Saturday night found most of us in white coats for our highlight of social events. The effects of Friday night's party didn't appear and every one had a good time.

Sunday, the Mothers' Club musical was a real enjoyment to all of us. Our Mothers certainly know how to entertain.

The baseball team entered the semi-finals without further mishap by defeating TX 5 to 2. Dick Street is recovering from the effects of our previous game and will be O. K. very soon.

"Let's kiss and make up,"  
Said she in a huff.  
"I'll kiss you," said he,  
"But you're made up enough."

E. J.—Make your peace, Zazu, I'm about to shoot you.

Zazu—How come?

E. J.—I always said I'd shoot anyone who looked like me.

Zazu—Do I look like you?

E. J.—Yes.

Zazu—Go ahead and shoot.

ZAZU

### RHO DELTA RHO

Rho Delta Rho takes this opportunity in extending an invitation to men of Armour and their friends to visit our house tomorrow night, for the first Interfraternity Open House Night. The house is located on the north-west corner of 33rd and Michigan, and will be open at 8:00 o'clock.

The baseball team has been triumphant in its first effort over the K. D. E's, and hopes to continue onward in the championship march. Along with the ambitious ball players, the track men have been practicing for the fraternity track meet.

### PHI KAPPA SIGMA

Alpha Epsilon chapter of the Phi Kappa Sigma Fraternity wishes to extend a most cordial invitation to the men of Armour and their dates to visit the house in their rounds tomorrow evening. The occasion is the first Open House of the fraternities of Armour Tech.

The date for the Senior Farewell Party has been set for June 9. The formal festivities will take place in the Empire Room of the Palmer House.

The Annual Picnic is to be held at Trout Lake, Elgin, on May 24. Canoeing will be the main occupation and sport of the day, as the park is located on the Fox River.

Which brings to mind the fact that the house's track team is organized and is getting in condition for the meet during Junior Week. Here's luck, fellows!

### TRIANGLE

Armour Chapter of Triangle extends its greetings to the visitors at Open House.

The boys at the house are working quite hard in preparing for the various interfraternity activities held this week. Track, tennis, and golf now occupy the limelight, and we are hoping for the best.

### PHI PI PHI

With the final preparations for Junior Week going on, there is more activity than ever at the house. Interfraternity baseball is now in the final brackets of the tournament. We are happy to say that we won our first game, that with Pi Kappa Phi, by a score of four to nothing. The track and golf teams have also been picked. The Phi Pi tracksters will try hard to keep the cups they won last year in the relays and track events. After weeks of practice we feel that we are finally ready for the sing and circus day skit. So long now—we'll see you at interfraternity open house — get a date and come down, dancing from nine 'til twelve.

### KALEIDOSCOPE

"Sublime Tobacco."—Lord Byron.

FROM THE DAYS OF RALEIGH to the present time, literature abounds in allusions to tobacco. The Elizabethan writers constantly refer to it, often in praise though sometimes in condemnation. The incoming of the "Indian weed" created a great furor, and scarcely any other of the New World discoveries was talked about so much. Ben Jonson, Marlowe, Fletcher, Spenser, Dekker, and many other of the poets and dramatists of the time make frequent reference to it and no doubt at the Mermaid tavern pipes and tobacco found a place beside the sack and ale. Poets and philosophers drew solace and inspiration from the pipe. Milton, Addison, Fielding, Hobbes, and Newton were all smokers. It is said Newton was smoking under a tree in his garden when the historic apple fell. There are those who object to the use of tobacco because of its reputed ill effects on the human system, but—

"Killed him?" No doubt! it's apt to kill

In fifty years' incessant using—  
Some twenty pipes a day. And still,  
On that ripe, well-filled, lifetime  
musing.

I envy oft so bright a part,—  
To live as long as life's a treasure;  
To die of—not an aching heart,  
But—half a century of pleasure!

J. K.

### ON A BROKEN PIPE

Neglected now it lies, a cold clay form,  
So late with living aspirations warm;  
Type of all other creatures formed of clay—  
What more than it for epitaph have they?

SIR WALTER RALEIGH! name of worth,  
How sweet for thee to know  
King James, who never smoked on earth,  
Is smoking down below.

### Student Opinion

#### Infant Officials

Dear Editor:

I am not chronic—this is my first crack at the "Voice of the Peepul"—but perhaps someone could help clear up a situation that has bothered me for four years.

Why has habit decreed the business manager of the *Cycle* be a junior?

In that most of the staff positions of our periodicals are held by seniors, this appears as an eccentricity. Why shouldn't the business manager of the *Cycle* be subjected to the training and selection that all of the other staff men on our periodicals must face?

Knowing that very few men begin real work on the periodicals in their freshman year, the incumbent manager must select his successor from an unqualified group—not as concerns interest and ability—but experience. And the new man really has fun; full responsibility the first time he faces the job in its fullness. He might have been faculty *Cycle* salesman, etc., but he never was assistant manager!

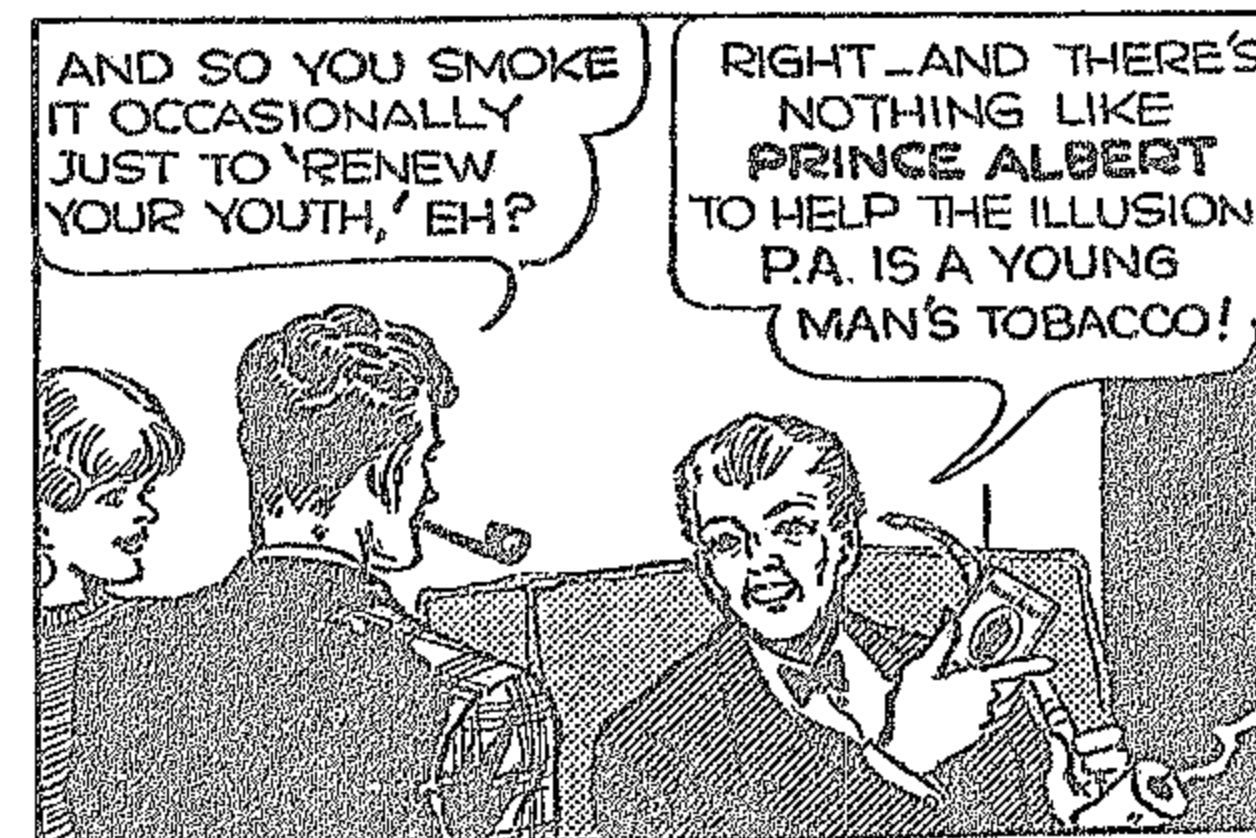

Why not abort this practice now? The present manager could be reappointed as a senior manager, while those sophomores qualified for advancement could be named assistants. This procedure is common to all editorships and certainly the intelligent one. It would be very fine to select the *Cycle* editor-in-chief from the sophomore class!

John O. Larson, C. E. '36

WE HAVE SEVERAL excellent and unusual verses on the "pernicious weed" which limited space compelled us to omit. If you have enjoyed these verses, drop a note in the *News* box in the Main Building lobby, and we will be pleased to print the others.

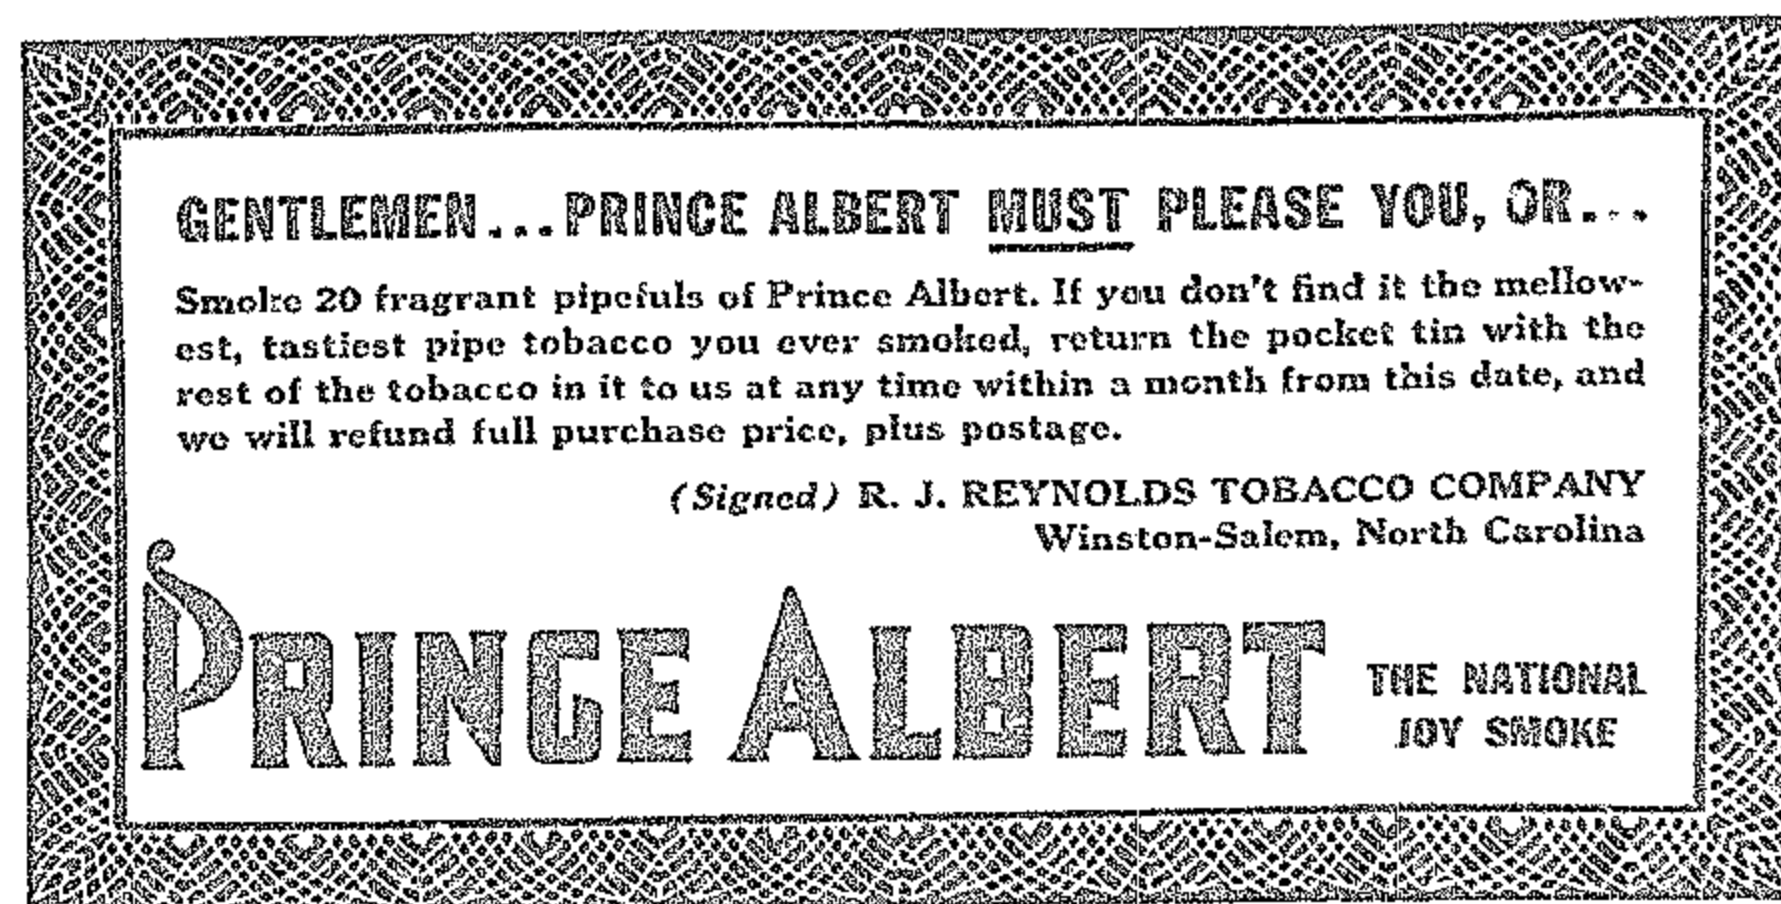

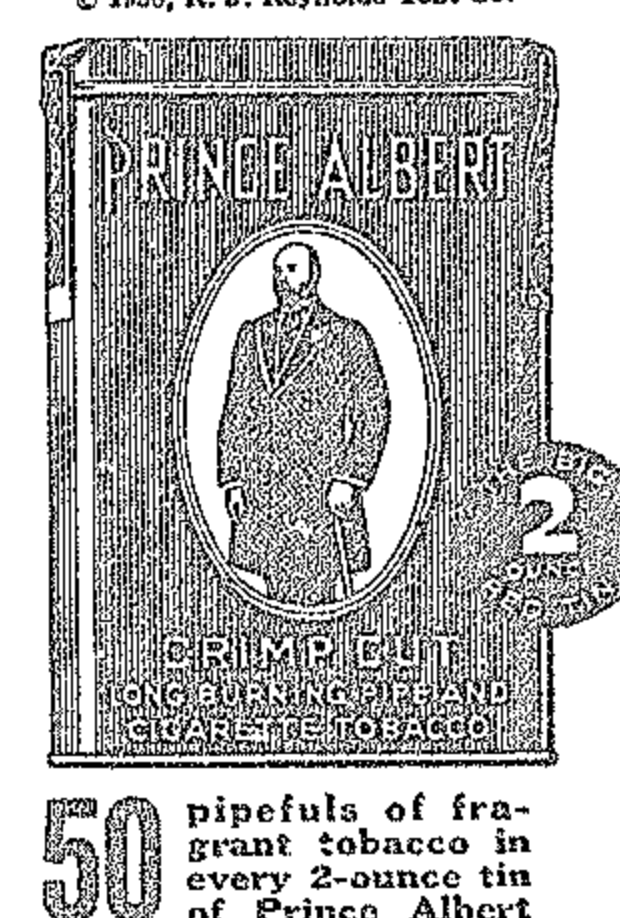

R. W.

"Where," asked the women orator, "would men be today if it were not for women?" Silence. "I repeat, where would man be today?" "He'd be in the Garden of Eden eating strawberries," answered a voice from the gallery.

### SHORT CUT TO REAL PIPE CONTENTMENT

A man can spend years finding the tobacco that hits the spot—or he can try Prince Albert now. We'll back this princely smoking tobacco against the field for choice quality—for mellow flavor—for mildness. Being "crimp cut," Prince Albert is a revelation in coolness. And the "bite" is removed by a special process. Accept the invitation below to try P.A. at our risk.

GENTLEMEN... PRINCE ALBERT MUST PLEASE YOU, OR...

Smoke 20 fragrant pipefuls of Prince Albert. If you don't find it the mellowest, tastiest pipe tobacco you ever smoked, return the packet tin with the rest of the tobacco in it to us at any time within a month from this date, and we will refund full purchase price, plus postage.

(Signed) R. J. REYNOLDS TOBACCO COMPANY  
Winston-Salem, North Carolina

PRINCE ALBERT THE NATIONAL JOY SMOKE

50 pipefuls of fragrant tobacco in every 2-ounce tin of Prince Albert

## SIDELINES

By H. M. Ross

THE ITALIAN ARMY has at last entered Addis Ababa. From a military viewpoint the occupation of the Ethiopian capital is more of symbolic than of material importance. From a political viewpoint, however, the entry of Italian troops into Addis Ababa is an event of great significance. Its European repercussion may be far reaching and full of dangerous possibilities. It cannot be doubted that the Italian government's intention is to proclaim, as soon as possible, the annexation of Ethiopia to Italy, in the name of King Victor Emmanuel. This, according to the Italian way of thinking, will officially mark the end of the African campaign as such and will reduce whatever fighting which may occur later to the status of suppression of brigandage. It will at the same time present to the world at large, to the League of Nations, and particularly to Great Britain, an accomplished fact of such dimensions as will be impossible for European diplomats to ignore.

WHEN THE LEAGUE of Nations met today at Geneva it faced the necessity of making a supreme decision. Three courses are open to it. It may decide to recognize an accomplished fact and recognizing the failure of its attempt to coerce Italy, lift its sanctions. It may decide to keep its sanctions in force until Italy bows to its authority and agrees to negotiate a settlement of the East Africa problem, or, finally, it may approve drastic measures such as closing the Suez Canal to bring Italy to terms. Most persons in Italy think the League will come to the conclusion that there is nothing further to be done to save Ethiopia, and will, by abolishing sanctions, tacitly admit that coercive measures have failed.

SEVERAL FACTORS contribute to this conviction. In the first place, Emperor Haile Selassie's flight indicates he realizes the game is up. Moreover, if the Italian newspapers may be believed, sentiment against sanctions is growing very powerful among the conservative majority in the British House of Commons. France, in addition, fearful for her position in Europe and wishing to keep Italy definitely pro-French, is more determined than ever to oppose any stiffening of sanctions.

THE ONLY BLOW to Italian complacency is the attitude of the British government and particularly of Anthony Eden, its Foreign Secretary. It is evident that if Premier Benito Mussolini is allowed to get away with Ethiopia, British prestige will have suffered a severe blow. The Italians think it is too much to expect that Britain will swallow such a bitter pill as the annexation of Ethiopia by Italy, thus emphasizing the success with which Mussolini has twisted the British lion's tail. On the other hand it seems there is nothing Britain will be able to do about it unless she is willing to face the risk of a European war, which at present she does not seem prepared to do.

IN LONDON, the situation is complicated further by the appearance of undoubted cleavages within the ranks of the League of Nations Union itself. The truth is that public opinion has begun to resent the persistent attempt of this powerful association to impose its viewpoint upon the government and the nation. Influential men, high in the councils of the union, now hesitate to continue a policy that could end in the destruction of the League of Nations. This means that the British government no longer will be able to base its policies clearly on the expressed will of a major part of the nation to see justice done within the framework of the League covenant. Mr. Baldwin and his colleagues may well gaze despondently at the present state of Europe and ask themselves how far the policy of collective security, pursued since last September, has been effective in maintaining international peace.

## OPEN HOUSE—

(Continued from page one)

of the sophomore chemistry course are carried out. In a cosmetics exhibit, cold cream, shaving cream, and vanishing cream are made.

In the chemical engineering labs on the fourth floor and annex are shown horizontal condenser tubes, evaporators, vacuum-leaf filters, and experiments on pyrometry and sanitation of water. Lake water is distilled for free and albuminoid ammonia, and delicate determinations show the amount of organic material present in water.

### Freshmen Show Drawings

The drawing work of the freshmen and the architectural students is displayed in the freshman drafting room on the fifth floor. The works exhibited cover a wide range, from the simplest mechanical drawings to complete working drawings. Some of the freshmen are demonstrating drafting methods acquired during their course.

The basement of the main building contains the laboratories of the mechanical engineering department, with the power lab at the south end and the experimental engineering lab at the north end. In the power lab are several direct-current generators and an air-compressor. In the experimental lab is an interesting air conditioning unit. Torsion and tension tests of iron bars and tests of the heat conductivity of building materials are made. The refrigeration plant at 33rd and Dearborn is operating, but no tests are to be made. In Machinery Hall, the shops are running as in ordinary class work.

The automotive lab north of Ma-

chinery Hall is showing a 125 H. P. Hercules diesel engine, a 60 H. P. McCormick-Deering tractor-type diesel, and a 10 H. P. Fairbanks-Morse diesel.

### Movies in B Mission

On the third floor of the Mission building is the civil engineering exhibit. Drawings by the students, bridge models, and sketches on soil mechanics are also on display.

Of historical interest are antique surveying instruments, original maps dating back to 1600, and replicas of maps dating to 1443, part of the collection of Prof. John C. Penn. A motion picture showing the erection of the Empire State Building will also be shown in room B Mission.

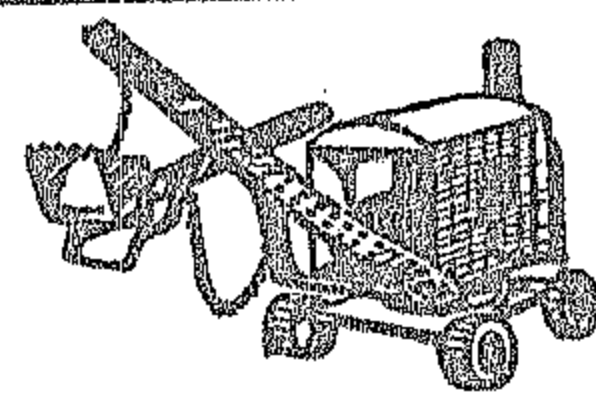

At the north end of Chapin Hall, on the first floor, is the physics lab, where many devices illustrating the properties of matter are operated. The radio club, third entrance Chapin Hall, offers a free service of sending messages to any part of the United States.

### Filtration Plant Open

Armour's remodeled filtration plant is at the far south entrance of Chapin hall. Special exhibits on water purification are present through the courtesy of the City Water Department. Provision for better vision of the filtered water has been provided for this year's Open House.

As the final attraction of the evening, an informal dance is to be held in the gymnasium on the fifth floor of the main building, starting at 9:45 p. m. Ed Kraft and the Melody Masters are to furnish the music, and everyone is promised an enjoyable time.

## THE STEAM SHOVEL

In spite of the fact that there will be many visitors who will read this paper, and we ought not to make a bad impression, the Steam Shovel believes that it is its bounden duty to report faithfully the failings, foibles, and frailties of the Armour student, so brace yourselves, here it comes—

\* \* \*

We learn that the freshmen in Billy Goetz's 1:00 o'clock class told him that it was not customary to have classes in the afternoon during Junior Week. Professor Goetz, however, examined the files, and proved that it WAS customary, and the frosh, in spite of their attempts to kid the public, will have a 1:00 o'clock. Score 1 for Billy Goetz and his statistics.

\* \* \*

William H. Fogle, senior C. E., is known as "snuffy." His first experience with revenooers occurred the night of the last Senior Dance. He has learned what a one-way street is, at the cost of \$2.00.

\* \* \*

Professional jealousy prevents Brother Winston from appreciating John Slowiak's interpretation of Edie Cantor.

## JUNIOR WEEK—

(Continued from page one)

Friday, Circus Day, will bring the week's activities to a peak. The Athletic awards assembly at 10:30 will open the day. It is to be followed by the interfraternity pageant in which Phi Kappa Sigma, Delta Tau Delta, Theta Xi, Phi Pi Phi, Sigma Alpha Mu, and Pi Kappa Phi, fraternities will take part.

Then will come the clash of the factions—the freshman-sophomore class rush. Dust will fly for ten minutes and the end will reveal the winner of another Armour rush.

### Select Judges for Events

Mr. G. S. Allison and Professors W. B. Fulghum, P. C. Hundly, C. E. Paul, J. J. Schommer, and S. M. Spears will judge the interfraternity pageant. Mr. W. N. Setterberg will have charge of the interclass and interfraternity relays. The judges of the interfraternity sing will be Miss Nell Steele, Professor Emeritus C. W. Leigh, and Dr. Rufus Oldenburger. Dean Heald will be the starter and Mr. N. R. Root will judge the pentathlon and interfraternity relays.

### Herman (Mighty Tender) Bauermeister

was in the E. E. lab last Friday, giving the new Lie Detector a trial. What we'd like to know is how they ever got it to working again after H. O. B. got through.

\* \* \*

After studying the chapter on nomenclature, for Prof. Perry's Steam Power class, Bert Heine wanted to know what part of an engine the nomenclature is.

## TECH IN SEASON'S FIRST WIN OVER ELMHURST, 11-3

Finally coming to life, the Tech ball team beat Elmhurst last Tuesday to the tune of an 11-3 tally to chalk up the season's first win. The game was featured by the Techawks' timely hitting and Dollenmaier's steady pitching.

After a lone run in the first, four hits, an error and a passed ball accounted for five runs in the fifth. Three hits and a stolen base garnered two more in the seventh, and in the ninth three hits, including Adamec's homer, were coupled with a walk and a stolen base to bring in the last three. "Dolly's" twirling limited the home team to seven scattered hits. Nine Elmhurst men were retired via the strike-out route while only one was hit and one man reached first on a base on balls.

After Wagner fanned to open the first inning, Seidenberg walked. Logullo's hit sent him to third and he scored when Adamec topped one into the infield and was safe on a fielder's choice.

Dollenmaier was practically untouchable the first three innings, fanning five men. In the fourth, Stroebel opened up with a triple, but it looked as though good fielding would hold him on third. Dunne

# For Digestion's Sake... SMOKE CAMELS

Smoking Camels stimulates the natural flow of digestive fluids . . . increases alkalinity

**PROMS AND EXAMS.** Constant rushing about and mental strain put you on your mettle. Camels set you right with their aid to digestion—their cheering "lift"—their costlier tobaccos.

**THE BROWN DERBY.** The chef is putting the final touches to a Lobster Thermidor, while within the restaurant the stars of Hollywood gather to dine...and to enjoy Camels. In the glamorous life of Hollywood, Camels play a major rôle. As Mr. Robert H. Cobb, the man behind The Brown Derby's success, remarks: "Camels are the choice of the majority of our patrons."

**CROWDED MINUTES** as the reporter works to beat the deadline. "It's a life of hurry, hurry, hurry," says Peter Dahlen, newspaper man, "and a life of irregular hours and meals. It's swell the way Camels make food taste better and set better."

**UNDER THE BIG TOP.** Watching Miss Dorothy Herbert of Ringling Bros.-Barnum & Bailey, you marvel at her poise. She says: "I smoke all I want—eat anything I care for. Camels make food taste better and digest easier."

**TUNE IN! CAMEL CARAVAN**  
WITH WALTER O'KEEFE,

## COSTLIER TOBACCOES!

Camels are made from finer, MORE EXPENSIVE TOBACCOES—Turkish and Domestic—than any other popular brand.

## TECH TAKES ONE IN DOUBLE HEADER WITH LAKE FOREST

**Dollenmaier Hurls  
Three Hit  
Win**

**6-2 WIN, 6-0 LOSS**

After playing well behind Dollenmaier's three hit pitching to take the first game, 6 to 2, the Techawks relapsed behind Delve and dropped the second game of the double-header with Lake Forest, 6 to 0.

In Lake Forest's first inning, Eiserman walked, following Rouse's infield out, and went to third when Adamec bobbled Petersen's grounder, Petersen making second. Boyle topped into the infield and made second while Eiserman was trapped between third and home, Petersen taking third. Perry singled, scoring both runners, and then ended the inning trying to steal second.

In the next inning Russek drove one to deep center for a home run. Seidenberg then walked and scored the tying run on Bartusek's double. Armour went into the lead in the third when Logullo tripped and scored on Dunne's fielder's choice.

The sixth inning three-run rally started when Adamec walked and took second on Russek's sacrifice. Seidenberg singled, scoring "Check," but after stealing second and reaching third on a passed ball, he was caught at the plate as Shewchuk made first on a grounder. Bartusek scored Shewchuk with his triple and crossed the plate himself on a passed ball.

### Second Game

In the second game Turowski limited the Techawks to five scattered hits. Delve, pitching for Armour, looked good while striking out thirteen men, most of them in the pinches. However, his good work was nullified by six errors, two walks, a wild pitch, and four men hit with pitched balls.

Lake Forest's first two runs were scored in the first inning when two infield errors and a walk were followed by Boyle's timely single. Three hits and wild playing accounted for four more runs in the last inning.

### First Game

Armour (6)	Lake Forest (2)

### ELMHURST GAME—

(Continued from page three)

threw out Robbins and Stoeck was out stealing second. However, Russek let a pitch go through and the runner scored.

The fifth inning rally started with Dollenmaier's triple. He scored when Robbins on third muffed Wagner's infield grounder. After Seidenberg singled, Logullo fanned, but Adamec came through with a triple to score two. Dunne's double sent him home and Dunne himself scored from third on a long fly, after reaching that station on a passed ball. Further scoring was limited to one by Elmhurst in the fifth and one in the eighth, while Armour scored the above mentioned runs in the seventh and ninth.

Armour (11)	Elmhurst (3)
AB R H	AB R H

## Armour Golfers Are Defeated by Loyola

The Armour golfers suffered a 16 to 2 defeat at the hands of Loyola last week at the North Shore Country Club. Unfortunately only three men were able to attend and this of course seriously handicapped the team and was partially the reason for such a lopsided score. The lone two points were netted by Davidson when he defeated Lynch 2-1 in the singles.

During the first part of Junior Week, the team will take a trip, playing Wabash College Monday and Eastern State Teachers College on Tuesday. Last Saturday the varsity played the Alumni at Southmoor, but the results were not available at press time. At the end of Junior Week, St. Viator will be played at Southmoor.

### WHEATON GAME—

the sixth, and also in the first half of the seventh, but the second half saw Adamec smash out his second triple; he scored a few minutes later when Dunne sent a long fly to center. The Tech squad concluded the scoring with two more runs by virtue of a scratch hit, three successive walks from Johnson, and a long fly by Janas, the last run being scored after the catch.

Armour (9)	Wheaton (6)
AB R H	AB R H
Wagner	4 0 3 2 Cuswell
Seidenberg	4 0 0 1 Merritt
Logullo	4 2 0 1 ETT's

## FORMER CHAMPS AGAIN IN FINALS OF SOFT BALL TOURNAY

With four eliminations last week, the soft ball tournament swings into the final round. Play off games between the school's best will be for first place among Junior Week activities. The senior chemicals, last year's champs, are the favorites, but there are still several unbeaten teams in the race.

The sophomores opened last week's round with a rousing game between the mechanicals and the fire protectors. In the first inning the F. P. E.'s tried to put the game on ice by sending nine men across the plate to the mechanical's four. In spite of poor fielding by both teams during the next three innings, no runs were scored. In the fifth, however, the mechanicals took advantage of Dunbar's butterfingers and drove in four runs to bring the score to 8-9. Two more runs in the seventh won the game for the mechs, 10 to 9.

The biggest surprise of the semifinals was the overwhelming defeat of the freshmen by the senior chemicals. Both teams had a record of no losses and a close contest was expected. The seniors took control in the first inning and continued to place their hits out of reach of the bewildered freshmen until they had succeeded in piling up a score of 12 to 0 by the end of the game.

Another elimination in this week's round was accounted for when the senior electricals, serious contenders for the title, out played the senior mechanicals. The game was

## Tennis Team Earns Victory and a Draw

In the two tennis meets played last week the Armour squad turned a victory and a tie. The former was a 4 to 3 win over the Loyola team last Tuesday, and the latter a 3 to 3 tie Friday afternoon with Wheaton.

The Loyola meet saw Armour gain a 3 to 2 advantage in the doubles matches, and then split the singles. Swanson led off with one of the hardest games played this year. After losing the first set 3-6, he came back in the second to win 6-2, and in third he nosed out his opponent 6-4. Both of the doubles matches proved to be hard fought affairs, the first being won by Armour 6-4, 6-4, and the other going to Loyola 2-6, 6-3, 6-4.

In the Wheaton contest, the Techawks came from behind, after losing three of the singles matches, to take both doubles, tying the meet up at 3 all. Natinchek, playing Fischer of Wheaton, lost one of the toughest games of the day, going down in the first set 8 to 10, and losing the second, 4 to 6. Again, both doubles matches brought out a display of good tennis, Swanson and Quandee of Armour defeating Fischer and Dobbins of Wheaton in three sets, 3-6, 6-2, 6-4. Natinchek and Boehme won over the two Moffet brothers from Wheaton, 6-2, 3-6, 6-4.

closely contested all the way through due to the perfect functioning of the electrical's infield and the spectacular one-handed catches of Harry Tachman in the mech's outfield.

The seventh inning found the score tie at 3-3, but in the following two innings the electricals out-scored the mechanicals to finish the game with a one run lead.

## Trackmen Defeat South Side, 69-62

Turning in their third successive victory over the South Side team this season, the Armour Tech track squad came through in typical style to beat their opponents, 69 to 62, last Wednesday at Ogden Park. Besides being the third meeting of these two teams this year, it was also the third time that the Techawks came through in the final event, the relay, to nose out their rivals.

### Lead See-Saws

The meet as a whole was a see-saw affair in which neither team was able to get any foothold. It opened with a South Side win in the mile run, Dominique easily outdistancing the field, followed by a clean sweep of the 100 yard dash by Armour. Through the next three events the Techawks stepped into a seven point lead, but this was short-lived since Kune and Stedman came through with a first and second for the Southerners, putting the score once more on an even basis at 27 apiece. Next, South Side took its turn in the lead when Zoyner came through in the low hurdles, and brought the score to 48-42 in their favor.

### Tech Takes Last Event

In the remaining events the Armour squad slowly whittled down their disadvantage, and with the exception of the discus, had little trouble taking all the firsts. In the latter event Goes, of Armour, experienced quite a good deal of trouble staying in the ring. After a fluke toss and two fouls he was eliminated from the finals. However, it was

finally decided that since it was not a standard ring, the contestants should be given an additional toss. In his final throw, Goes managed to stay within bounds, and turned in his winning heave of 102 ft. 3 in. The Techawks took a lead of 64 to 62 with the last event to be run off. This event, the half mile relay, proved easy for the Armourites, and after McDonald took an early lead, it was maintained to the finish for an easy victory by twenty yards.

### Summaries

**1 Mile Run**—Won by Dominique (S). Finnegan (A) second, Deuter (A) third. Time—4:48.5.  
**100 Yard Dash**—Won by Dunbar (A). Neal (A) second, Neuert (A) third. Time—10.4.  
**100 Yard High Hurdles**—Won by Zayner (S). Fleig (A) second, Clark (S) third. Time—16.8.  
**440 Yard Run**—Won by Neal (A). Mason (S) second, Benz (A) third. Time—52.9.  
**Two Mile Run**—Won by Kune (S). Stedman (S) second, Faust (A) third. Time—19:16.0.  
**220 Yard Run**—Won by Dunbar (A). McDonald (A) second, Swgart (S) third. Time—23.4.  
**Half Mile Run**—Won by Dominique (S). Mason (S) second, Finnegan (A) third. Time—2:4.0.  
**220 Yd Low Hurdles**—Won by Zayner (S). Anderson (S) second, Fleig (A) third. Time—28.2.  
**Javelin Throw**—Won by Kane (S). Stedman (A) second, Meyer (A) third. Distance—133 ft. 5 in.  
**High Jump**—Won by Simcox (A) and Chapman (S). Bejeek (A) third. Height—5 ft. 9 in.  
**Discus Throw**—Won by Goes (A). Kane (S) second, Bastion (S) third. Distance—102 ft. 3 in.  
**Pole Vault**—Won by Concolino (A). Dixon (A) and Kane (S) tied for second. Height 10 ft. 6 in.  
**Shot Put**—Won by Goes (A). Anderson (S) second, Bastion (S) third. Distance—33 ft. 11 in.  
**Broad Jump**—Won by Neal (A). Swgart (S) second, Zayner (S) third. Distance—20 ft. 11 in.  
**Half Mile Relay**—Won by Armour (McDonald, Neuert, Dunbar, Neal). Time—1:35.3.
