

By T. H. Watts and F. J. Heidenreich

The ideal University of Utah man wears striped clothes and loud socks, coeds voted. Then, like lightning out of a clear sky, they picked a conservative dresser as "most popular man."

"I will positively refuse to allow necking in my classes this year," announced Prof. William F. Byron of Northwestern's sociology department, "until I come to the subject of sex in my lectures." "And even then," he added, "only hand-holding will be permitted."

Dr. C. P. Boner, Physics professor at the University of Texas, gives a party along with final examinations. Midway through their three-hour tests, students take time out for coffee and doughnuts—all on Dr. Boner. It is rumored that an adaptation—serving black coffee before lectures—will soon be adopted here at Armour.

Depression years are productive ones for student music composers, George McKay, associate professor of music at the University of Washington, believes.

With their minds off the hunt for dollars, they turn to creativeness in the form of music, McKay points out.

"In my class in elementary harmony," he said, "I get all sorts of reflections—everything from classical to sorority house music, depending on whether or not the mind is relaxed."

Stanford University psychologists say you can teach an old dog new tricks.

For age has little to do with learning, and one can learn almost as easily as 50 as at 20.

"Yes, I believe that cheating is very prevalent at Miami, but I think that women do most of it," a Miami university (Oxford, O.) student tells an inquiring reporter. — We'll lay you 10 to 1 that that particular student has himself cheated many times.

Fifteen Chinese students buried themselves in the snow a couple of months ago because they couldn't get any cooperation from the faculty—an unusual way to get even with your professor; we'd just use a sub-machine gun.

According to alumni office records, 750 Duke University Alumni married as a result of campus romances.

Amherst students once packed a town meeting and voted the erection of a new city hall, to be one foot wide, 100 feet long, and made of glass.—Yes, they were seniors looking for a job.

Antiquated "hand-box" gymnasiums are to blame for the mediocre brand of basketball played in New England, says Al McCoy, coach of Northeastern University, Boston.—Mr. McCoy, needless to say, has never seen Armour's gym.

So he wouldn't have to listen to "Sweet Adeline" at 3 A. M., President Frederick Arnold Middlebush of the University of Missouri built a weekend cabin 100 miles from the campus.

Senior students of Essex, England, are supplied with free bicycles if they live far from school.—Why, of course, the freshmen walk!

The three most wonderful words in the world, as described by an Iowa State columnist, are no longer the old standby, "I love you," but "enclosed find check."

Yale, Princeton, Harvard, Dartmouth, McGill, Toronto, Queen's University, and the University of Montreal have formed an international hockey ring.

Indiana University will probably be the first to have its student body fingerprinted and registered by the government officials. The fingerprints will not be placed in the criminal files but in the non-criminal files, although Dean Edmondson suggested that the University require fingerprints for identification purposes.

The Veterans of Future Wars are gaining strength rapidly, and the National Council at Princeton is adding new posts by the dozen. Some of the chapters are going to demand medals by the carloads, bonuses and pensions by the billions, an immediate

THE STEAM SHOVEL

Poor Bill Schlax, he's so healthy! If he could only get the measles or something, so he could go to the St. Mary hospital, where a certain blonde nurse is on duty.

Bill O'Brien is now making eyes at a South Side redhead. Tsk, tsk, Bill, what would Gladys say if she knew?

One way to find out who your true friends are, is to try to sell raffle tickets. Ask Chris Coullias; he's been trying to sell them.

BOB YOUNG, wag that he is, put a tiny brassiere on the female figure that ornaments his radiator cap. Heck, Bob, if she's not bashful, why should you be?

Connoisseur Sodaro says, quote: "I don't like blondes; they get dirty too quick!"

OUR PUNNING PHYSICIST, PROF. SPRAGUE, KNOWS HOW TO REMEMBER THE A N O D E FROM THE CATHODE. "IT'S SIMPLE," HE SAYS, "THE CURRENT ANTERS HERE".

Willy Johnson talked to a strange girl on the phone for fifteen minutes, throwing the old bull for all he was

Urge Tau Beta Pi To Contact Local Alumni

Organization of an active alumni group of Tau Beta Pi in the Chicago area was urged by Mr. C. H. Spencer, council-elect of the national organization and alumni representative, who addressed the Armour Chapter in the Tau Beta Pi rooms last Friday morning.

He said that the Chicago area, with over one thousand Tau Beta Pi alumni, could form an active group. In his home city, Washington D. C., an alumni group of over four hundred members has been quite active.

Mr. Spencer, accompanied by Mr. J. R. Thompson, is touring the country visiting the chapters and urging organization of active alumni chapters.

worth, in the belief that he was talking to his girl friend. Was his physiognomy purple?

The boys in Dutton's Social Science 401 passed the hat around for him when he found his pockets empty on the verge of his famous phoney mazuma stunt. When they saw how much they had collected, however, they kept the money for their own purposes.

Be at the 31st street "L" station at 5:00 p. m. any Thursday, if you

"Exact Determinations" Is D. B. Keyes' Topic

Prof. D. B. Keyes will lecture on "The Value to the Industries of the Exact Determination of Chemical and Physical Properties" at the next meeting of the American Society for Testing Materials. The meeting is to be held tomorrow evening at the Chicago Engineers Club, 314 Federal Street, 4th floor, at 7:30, and Armour men are cordially invited.

Progress in industrial development necessitates the acquisition of accurate data. Dr. Keyes will present the results of recent work at the University of Illinois and discuss specific examples of several industrial processes, and the type and extent of data necessary for their development and control. He will bring out the difference between the data of random experimentation and of planned studies designed to appraise the commercial practicability of industrial processes. The factors involved are equally applicable to investigations of the properties of materials and their standardization.

want to see who Fred Andrews' light o' love is. Her name is Marion Edwards and we hear that she's worth waiting for.

If you want some real hot dope, get hold of Velvel's diary. We hear tell he carries it with him.

SIDELINES—

(Continued from page one) would have to cover definite military obligations. Nothing less than this would impress Hitler that his promises were being taken seriously or give France and the central European countries a sense of security. Yet this way, though less immediately dangerous than the first or less insecure than the second has its share of danger and risk. Military pacts are notoriously weak. Such a treaty built on the ruins of another, which the participants could not keep alive, will leave Europe in a state of feverish unrest. The British will ask themselves, "Can we trust the French, seeing they had hesitated in the Italo-Ethiopian affair?" The French, in turn, will ask themselves, "Can we trust the British when their Locarno signature was proved of no value?" The Nazis might regard this alliance as a cause for a new adventure just as they used the Franco-Russian treaty as a reason for occupation of the Rhineland.

ONE CANNOT suggest how this momentous question should be answered, nor can we judge those who have the responsibility of making this momentous decision. We can but hope that they are equipped with the humanness, the wisdom, and the courage to make that decision which is likely to mark a turning point in the history of modern civilization.

—for Digestion's sake... smoke Camels

Smoking Camels a Pleasant Way to Promote Digestion

The nervousness induced by our modern life often affects digestion. The mental effort—the physical rush—the worry and tension—all slow down the flow of the digestive fluids. Smoking Camels acts to restore and increase the natural and necessary flow of the digestive fluids.

Modern scientific research, based on Pavlov's great work on digestion, defi-

nately confirms the fact that Camels encourage good digestion in this pleasant way. As you enjoy Camel's superb mildness—a mildness that is never flat or tiresome—you feel cheered and comforted. And experience a delightful "lift." Camels set you right! Enjoy them as much as you like. Camels do not tire your taste or frazzle your nerves.

Copyright, 1936, R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

BARONIAL DINING at the famous Winter Place Tavern in Boston. Theodore Roosevelt, Enrico Caruso, Henry Cabot Lodge—all knew and praised its famous fare. Here Camels reign

supreme. Nick Stuhl, *maitre d'hôtel* for over 41 years, says: "Camels have the gift of making food more enjoyable. Camels are the most popular cigarette at the Winter Place Tavern."

READY TO "BAIL OUT." Miss Uva Kimmey, daring parachute jumper, welcomes Camel's aid to digestion. "I smoke Camels for digestion's sake," says Miss Kimmey. "They encourage digestion in a pleasant way."
