

## Juniors Meet, Argue, and Adjourn; Correspondents Present Viewpoints

### Election Committee Is Chosen

Marked by a stormy and somewhat vitriolic session, the junior class met for the first time last Friday morning to discuss the form of class government. After a great deal of heated discussion a decision was finally made to continue the class officer type of government now in force.

#### For Commission Government

The students most energetically advocating a commission type of government were members of the civil engineering department. Contrary to popular opinion, they were firm in their belief that departmental politics and prejudices were fast becoming more noticeable and injurious. They were also positive that business could be transacted more efficiently if the power of ruling was put in the hands of a few.

#### Abolish Petitions

The class also decided that an election committee should be chosen by the retiring president, H. J. Bodnar, at his discretion. The petition system will not be used. Instead, any junior desirous of running for an office will formally file in writing an application of his intention to do so with any member of the election committee. If too many applications are received for any one office, the committee will select the most capable men, whose names will be put on the ballot. They will arrange the ballot sheet, arrange for the time and place of voting, and will officially count all votes. The members of the committee are: C. Basile, C. W. Dunbar, W. R. Marshall, G. Palka, and I. Seidenberg. Applications will be acted by the committee from Tuesday morning until Friday, October 30, at 5:00 p.m. Election will probably be held a week from tomorrow. Statuettes were granted to the junior baseball team, interclass champions. As a reward for his victory in the spring tennis tournament, Joseph Kubik will also receive a statuette.

### Smoker to be Given by Alpha Chi Sigma

A smoker will be given by Alpha Psi chapter of Alpha Chi Sigma, national professional chemical fraternity, at 7:30 o'clock on Thursday evening, October 29, at the Triangle fraternity house, 3222 South Michigan Avenue. Nineteen students enrolled in chemical engineering have been invited to attend. The present membership now totals fifteen. Alpha Chi Sigma has its own rooms in the Armour flats, but at present they are being rebuilt and completely redecorated.

Alpha Psi chapter has been rapidly rising to a position of national fame during the past two years. Honorable mention was awarded to the Armour chapter in the last national rating. Its scholastic average ranked among the highest in all chapters. Leading Alpha Chi Sigma this year are: J. A. Haase, master alchemist; L. Kacel, vice-master alchemist; W. R. Marshall, secretary; F. D. Hofert, treasurer; P. R. Schultz, reporter; and W. F. Schreiber, master of ceremonies.

### Eight Are Pledged to Mechanical Honorary

At the meeting of Pi Tau Sigma, honorary mechanical fraternity, held last Wednesday night at the Delta Tau Delta house, the Armour chapter pledged four seniors and three juniors. The senior pledges are W. E. Carlson, R. C. Immekus, A. Mandelowitz, and W. C. Nearing. The junior pledges are C. K. Nauman, H. B. Nicholas, and I. Thomas. Professor Charles R. Swineford was also pledged.

Professors Nachman, Huntly, Winston, and Anderson of the mechanical engineering department were also present and assisted in the ceremony. After the pledge examination and ceremony, refreshments were served.

### Agree on One Point: Adjournment

(Special Press Release)  
by Zazu

At a meeting of the junior class held last Friday, dastardly inter-departmental plans were disclosed to the horriification of the unsuspecting members. Such terms as, "The class is getting 'screwed,'" "No gyys," "The civils are sewer rats," "The seniors are 'poop-outs,'" and other enlightening statements were issued to poison the minds of the assembled scholars.

#### Don't Want Poop-Outs

The "blow-off" came when one of the more popular members of the anti-commission group steadfastly and unflinchingly stated, "We don't want to be 'poop-outs' like the seniors. If we do we don't have to go very far." An objection raised by one of the members, C. B., one of the civils, aroused the ire of Pres. H. B. to the extent of having his department called "sewer rats."

#### Discover an Arch

After a series of motions and seconds from the floor, it was discovered that there was an arch in the house. A motion was carried that he speak but, as he was asleep, the meeting went on. At this point the choice of graduation rings was discussed. After another series of arguments in which one of the electricals shocked the meeting by shouting forth that the class was getting "roped," it was discovered that the class was not graduating for another two years, so the discussion was dropped. Then came more motions, seconds, and objections. At this point one of the members (Zazu) went so far as to suggest a class dictator.

#### Agree on Adjournment

Again the popular anti-commission member arose, "I don't give a damn..." at this point he was interrupted by a series of seconds from the floor. This brought about a miniature revolution. A motion was made to quit the meeting, so it adjourned. This was unanimous. At the next meeting all weapons will be deposited at the door.

It may seem that this story does not tell of anything accomplished at the meeting... It tells everything!!

### Dr. Poulter To Talk at A. S. M. E. Meeting

Dr. Thomas C. Poulter, second in command and senior scientist of the Second Byrd Antarctic Expedition, will be the speaker at the A. S. M. E. meeting, Friday, October 30. This meeting will be held at the usual hour, 10:30 A. M., in Science Hall. Speaking on "High Pressure," Dr. Poulter will talk before a gathering of Armour students for the first time.

Last Friday, the A. S. M. E. took action with an inspection through the Chicago and North Western Railway repair shops. This trip was unique in that it featured an advance preview of the sights and processes to be seen. This preview was given by Mr. L. P. Michael of the railroad.

About eighty-five students took the trip through the shops Friday afternoon. Starting off with a trip in the main roundhouse, several types of locomotives were seen including the famous "400" and a giant class H engine, the largest of the line, developing four thousand horsepower. Then in succession the machine shop, power plant, forge, foundry, electrical shops, wheel shop, and erecting shop were visited.

The machine shop featured lathes and milling machines for remodeling old wheel parts. One wheel lathe was eighty years old.

The six huge boilers in the power plant consume four fifty-ton cars of coal per day during the winter time. The forge shop features the shaping of a huge bar of white hot metal by a large steam hammer. The foundry featured the efficient method of

(Continued on page four)

### Diana's Spirit to Pervade Arx Hop

Diana, nymph of the woods of ancient Italy who hid the Greek god Virbius within her grove at Aricia, will supply the inspiration for the dance which the architects are holding Friday, November 13, at Diana Court in the Michigan Square building. The inspiration she will supply, however, will not be in person (unfortunately), but certainly her spirit will abound the unique ballroom, especially during the wee hours of morning.

This Arx dance, first of Armour's 1936-37 social season, has been named, "Diana's Bacchanale." Up until last Friday night, the News staff had only a hazy idea as to what the architects were driving at when they had named their dance thus. Webster's "unabridged" helped them out considerably. (For lack of space in this column, we refer you to the Steam Shovel, where you will find a first class—and authentic (Continued on page four)

### Elect Paul Martin Senior President

#### Has Majority in Both Ballots

Paul Martin was elected president of the senior class in the final ballot last Friday, defeating his opponent, Donald Brissman, by a margin of 74 votes to 43. A preliminary election had been held on the preceding Wednesday, in which the results were: Martin, 74; Brissman, 38; and P.L.G. Moore, 30. Considerable discussion was aroused among the seniors concerning the necessity of holding another election, since Martin evidently received a majority of the total votes cast in the first ballot.

#### Martin Heads Many Activities

Martin's activities and good judgment have made him one of the most popular men at Armour. He was head marshal for the Junior Week activities last spring, successfully arranging and promoting interclass baseball, the junior-senior rush, the freshman-sophomore rush, the interfraternity circus, and the Junior Formal. His scholastic achievements are shown by the fact that he was one of the student honor marshals at the graduation exercises last June, is a member of Eta Kappa Nu, honorary electrical fraternity, and is a member of Tau Beta Pi, national honorary engineering fraternity. At present he is president of the musical clubs and is editor-in-chief of the 1936 Cycle.

#### Commissioner Elected

E. F. Schmaltz, an architect, was elected to the senior commission last week, making that body complete. The other members of the committee are: O. A. Tomei and J. F. Bartusek, M. E.; J. F. McCaulay, F.P.E.; A. Goldsmith and A. A. Sobolik, E.E.; L. E. Zwissler and J. C. Stern, C.E.; A. Dreis and J. A. Haase, Ch.E.

### J. B. Finnegan Speaks At Railway Meeting

"Fire Protection Education" was the subject upon which Professor J. B. Finnegan spoke at the twenty-third annual meeting of the Railway Fire Protection association, held last Tuesday and Wednesday in the Congress Hotel.

In addition to the regular informal addresses by men well known in the field of fire prevention and protection, an address of welcome by the Honorable Edward J. Kelly, mayor of Chicago, was included in the busy two day program.

Professor Finnegan, speaking at the Tuesday session, used as a basis for his address the work of Armour's fire protection engineering department since its establishment in 1908. He explained the operation of this department, the curriculum followed by the students, and he stressed the importance of training in such a basic broad course in engineering.

### Second Tryouts for One-Act Play Today

Tryouts for forthcoming production of the Armour Players were held last Thursday and were attended by a group of twenty students, who were mostly freshmen and sophomores. Mr. Fulghum conducted the tryouts and several parts were tentatively cast.

The play, "Waiting for Lefty," by Clifford Odet, was read at the meeting and was met with enthusiasm by the Players. There will be eighteen male parts and two female parts. Tonight a second tryout will be held in the Mission at 4:45 p.m., and the final cast will be decided upon. All students are welcome to attend and try for a part. Rehearsals will be held two or three times a week, and the play will be presented in the latter part of November.

### Students' Directory To Be Out This Week

The second edition of the annual publication, the Student Directory, will be out this week. This fact and the fact that its price will be ten cents, a reduction from last year's price of twenty cents, was disclosed by the Dean's office last Friday.

#### Thousand Copies

This edition of one thousand copies, differs from last year's in that the entire section on general information about Armour has been removed. The contents will include a list of the faculty, students, officers of administration, and other officers and employees, together with their addresses and phone numbers.

The general consensus of opinion among the student body was that last year's price of twenty cents was exorbitant, and as a result very few copies were sold. Thus several hundred of the 1935-36 Student Directory were wasted. It was for this reason that the price was reduced.

#### To Prevent Waste

According to Dean Heald, the student directories would be distributed free to the student body but for the fact that when such a procedure is followed, a great wastage always occurs. The present issue of one thousand copies was prepared to be sure to have enough on hand for those who wish them; and whether all are sold or not, the number which will be published each year will probably remain at one thousand.

### Mitchell to Lead Sophomore Class

Four votes were the determining factors in the election of the sophomore class president Friday, when E. D. Mitchell, vice-president of last year, won over Ralph Dixon by 63 to 59 votes, Ralph Tullgren defeating Fred Neubauer for vice-president also by a slim margin of 64 to 58 votes. The 122 voters of the 175 in the class gave Harold Anthon a victory over Irving Footlik, 72 to 50 for the office of treasurer. For secretary, Robert Jaffee received 57 votes, Sam Spencer, 24, and A. M. Zarem, 24. Bolton Anderson was re-elected social chairman with 65 votes, H. C. Anderson getting 34 and Robert Winblad 18. Willard Kruse, whose name was the only one on the ballot for A. T. S. A. representative, received 104 votes.

Twenty-eight votes were cast for candidates whose names did not appear on the ballot. Of these, William Horton received 20 for A. T. S. A. representative, and Stephen Finnegan four votes for social chairman. John Barale, after receiving more than 30 names on a petition which almost placed him on the ballot as the choice for class "dictator," received a "come down" when he received only three votes on the final ballot.

The newly elected class officers will be formally installed at the next sophomore assembly, and a list of their names will be delivered to the registrar. B. F. Oswald, Jr., E. C. Mitchell, J. Barale, R. A. Winblad, B. G. Anderson, and W. E. Kruse are the retiring officers.

### A. I. Ch. E. Will Debate on Engineer's Union

Student debates before the meetings of a professional society have been decidedly infrequent at Armour, but this Friday's meeting of the A. I. Ch. E. will prove an exception when the question, "Resolved that chemical engineers should unionize," will be debated by Frank Hackman and Paul Schultz on the affirmative side and Herman Bauermeister and Robert Clark on the negative side.

#### Question Not New

According to J. A. Haase, president of A. I. Ch. E., this question of the unionization of engineers has been receiving the serious thought of practicing engineers, both chemical and others, for some time; and the arguments of both of these teams should prove to be interesting and stimulating to the thoughts of those who will be present. The program committee, in anticipation of a large audience, plans to conduct the meeting in Science Hall.

#### Plans Proceed on Joint Meeting

However, the important item in the minds of the officers and members of the A. I. Ch. E. is the joint meeting with the senior branch to be held at Armour on December 16. Extensive plans are being made for this night, which promises to be the most important event of the year's program of the A. I. Ch. E. All of the chemical laboratories will be in full operation with practically all of the junior and senior chemicals in attendance. Haase said, "The chemicals are planning to make this joint meeting at least the equal of last year's highly successful 'get together' of senior and student members of A. I. Ch. E."

### Math Club Plans to Hold Meetings Soon

Student mathematicians of Armour will meet on the first available Friday in November. According to Mark Dammis, many interesting discussions have been planned for the Math Club meetings.

The topic of the first gathering will probably be a survey of matrices and will be delivered by one of the faculty. For one of the other meetings in the near future a discussion of the mechanics of calculus has been planned. The purpose of the latter will be to aid not only students of calculus, but also those who have not as yet studied this subject.

All students who have a particular interest in any phase of mathematics are requested to join the club. Its main purpose is to present a different view of mathematics, other than that presented in the class rooms.

### Senor Perez Speaks On Spanish Rebellion

"Spain's rebellion is not a war between communism and fascism as the newspapers would have it. It is a war between democracy and monarchy, the former fighting for better living conditions and the latter for their privileges they so much enjoyed prior to the upheaval." These were the words of Luis Perez, consul-general in Chicago, at the junior W.S.E. meeting last Thursday.

Senor Perez said that the non-interference pact signed by the surrounding countries is just a temporary quell, and that they have a high interest in the present situation. The consul-general explained the complications involved and what they mean to world peace at this time. On the whole, Senor Perez presented a very intimate picture of the underlying difficulties.

Talking motion pictures titled "Automobile Ignition Systems," "Manufacture of Spark Plugs," and "Automobile Racing," will be presented Thursday at the junior meeting of the W.S.E. by W. E. Fitzsimons, sales engineer for the Champion Spark Plug Company. The films will consist of animated motion pictures of the ignition systems, the story of the manufacture of spark plugs.

## 'NEW DEAL' WINS OVER 'OLD GUARD' IN ARMOUR POLL

### Definite Political Trend Is Shown By Ballot

#### ROOSEVELT BY 3-2

Deadline counting of the political ballots and tabulating of the results last Friday night revealed Roosevelt "New Deal" supporters as having a definite stronghold at Armour. Roosevelt garnered 109 votes to Landon's 69. Norman Thomas, Socialist candidate, and Earl Browder, Communist, each drew seven ballots in their favor. William Lemke, Union candidate, was given two votes. Three ballots were cast with no preference for a presidential candidate.

#### Twenty-Five Per Cent Vote

The results represent a cross section of the twenty-five per cent of the student body who were interested enough in the national political situation to fill out their political ballots. Fifty-three or 48.6 per cent, of Roosevelt's supporters were eligible to vote, while of Landon's followers thirty-two or 46.3 per cent, could vote in the November election. In the ballot on page four is tabulated the complete results of the inquiry.

#### Favor 'New Deal'

From the results of the combined vote on the issues, a majority agree: that the present administration has taken undue control over business, that a government should not have a strict control over business, that the constitution should be liberally interpreted, and that Congress should not have the power to repass an act declared unconstitutional by the Supreme Court. They also agree that the government should own and promote public utilities such as the T.V.A., that a president should not be given extensive powers, that a pub-

(Continued on page three)

## Night Enrollment Reaches New High

A new record has been set this year by Armour Tech's evening school division. According to Mr. W. E. Kelly, registrar, there is a total enrollment of 1380 individual students.

This is an increase of more than 10% over the registration of 1929 (largest night school enrollment until this year), which totaled 1248.

Because of an extra large enrollment in many of the classes, they have been closed to further registration. Waiting lists have been started in these cases. The class with highest membership this year is machine and mechanical drawing; they have a record enrollment of 200 students. Next comes machine tool work with 124 members in the class. Third is the course in fundamentals of electrical engineering, which boasts an enrollment of 76; general chemistry

(Continued on page six)

## Chess Club Starting New Type Tournament

Although the Armour Tech Chess Club has experienced a slight delay in securing a match with another school, the club tournament has been progressing quite rapidly. A new type tournament has been inaugurated in the club this year. At the beginning of the semester, each member was assigned a rating on the basis of 1000 points, the rating being based on the member's work in previous tournaments, or on the opinion of the officers in the case of new men.

Each game played is a match game, played touch-move, the winner receiving ten per cent of the loser's points, the loser, naturally, losing ten per cent of his own score. This means that a perpetual tournament is always in progress.

## The So-Called 'Bull Session'

Luncheon discussion circles more commonly referred to as "bull sessions" although tabooed by a great number of the administration officers, have quite a beneficial effect on those students who participate in them. To many of the participants it has brought considerable enlightenment. Educational theories and facts bounce off his cranium like a rubber ball off concrete and formulæ for him are some of the most difficult things to remember. However, some of the viewpoint discussions which arise in these so-called "sessions" and in the clarifying of many a hazy idea and often bring new ideas of the student to voice.

As long as the youth thinks he is being dosed with learning, he absorbs the required material and nothing more. When, however, he becomes interested in a subject for its own sake, education becomes an intriguing game where the student is the seeker, with increased knowledge and wisdom as his goal.

These discussions increase a will to learn and this will motivates his spirit and the college, instead of being a place where education is systematically injected, becomes a singular opportunity for self-development of character and mind.

## More Support Needed

Perhaps it was because the political poll blanketed all other news appearing in the *Armour Tech News* last week, but the fact remains that very little response came to our plea for written acknowledgment of student support for a "Father and Sons" night at Armour. However what response did appear was spontaneous and very favorable.

We sincerely hope that Armour students are not assuming the attitude prevalent among most people—that "let the other fellow do it" attitude. If you fell in to that class last week take five or ten minutes off your lunch hour and write a note approving or disapproving of the proposed event. Place it in the news box or give it to one of the members of the staff. This event must not be allowed to fail for lack of student support.

## PAUSE AND REFLECT

The seniors nonchalantly pass from class to class as they have been doing for three years, apparently unaware that as the year progresses

their undergraduate life is nearing an end. Yet within himself every man in the class notes with mingled feelings the passing of those things which make college life a well balanced whole. Perhaps he dares to pause and ask of himself "Have I made a success of my college career?"

The four years spent in college should be regarded as a job. Employers everywhere regard a man's record as an indication of just how well he has conducted himself on the job. Yet many students do not get this viewpoint until as seniors or graduates it is presented rather abruptly by the personnel department of some company.

As an underclassman you have a task before you, namely: to get as much out of college as you possibly can, and it is never too late to start doing just that thing—a good scholarship record should be the primary aim of every student, which, combined with sufficient extra-curricular activity, produces a well rounded whole. The exact balance between the two is an individual matter, but as a student you should never lose sight of the fact that this is your first big job. Will you succeed, or will you fail?

Cornell Engineer.

## STUDENT OPINION

### "Dad's Night" Booster

Though it is still quite warm, may I take this opportunity to give the "snowball" a push, and furthermore many other students deem it necessary to add their push to the "snowball". Perhaps by referring to the promised "Dad's Night" affair as a "snowball," my attitude towards it would seem to be chilly, the opposite is true.

Think of it! An opportunity to introduce our dads to Armour's activities; a chance to have dad sit around the banquet table with the "rest of the boys"; and to show him the importance of the extra-curricular side of school life.

That this affair could be nothing but "bang up", I have no doubt. A banquet topped by a basketball game would, to me, be the best way to show our dads the school life at Armour.

Furthermore when we consider that an affair of this type is conducted at most Big Ten schools and has definitely proved successful, I can see no reason why student leaders at Armour need hesitate.

Arrange the affair and start selling the tickets, and I feel that the Teckhawk will back the function.

Let's get behind this splendid idea, Teckhawks, and make this December affair the first in a long string of outstanding annual "Dad's Night" affairs.

### Another Dad's Night Booster

"Dad's Night" seems to be an ideal plan for acquainting our dad's with extra-curricular activities at Armour. As was well put in last week's paper "Open House" night gives only the view of the everyday school work.

Dad is always interested in sports especially if his son takes part in them. Let's treat our dads. After all "It's papa who pays."

An Interested Junior.

### Aero Club

I believe Mr. J. J. Healy has been sadly misinformed or else is sadly uninformed with regard to the attitude of the Armour Student Branch of the A. S. M. E. towards the formation of what he calls an "Aero Club."

Because of the fact that I was one of a committee who were actively engaged during the latter part of last year in the formulating of the present constitution and by-laws of the A. S. M. E., I believe that I am qualified to reply to Mr. Healy's letter.

First of all let me state that there is not "registered on the books" of the A. S. M. E. an aeronautical branch, nor has there ever been such a registration.

From the very first, the A. S. M. E. has made clear its stand with regard to the "Aero Club." The A. S. M. E. had no desire at that time and still does not itself intend to organize and promote any such activity. Rather, it has amended its constitution and by-laws in such a manner as to allow any such organization, as Mr. Healy states did exist, to become affiliated with the A. S. M. E. as a professional division. By becoming affiliated with the A. S. M. E. as a professional division, the "Aero Club" could and still can enjoy to the full the wealth of privileges and benefits which have accrued to the A. S. M. E. because of its enviable reputation among student professional groups.

Furthermore, one of the principal reasons for the institution of the new associate membership grade, with its correspondingly drastic membership rate reduction, was to aid enterprising students as much as possible not only in the organization of an aeronautical division, but also other professional divisions as well, by making it possible for these groups to entice their prospective members from all departments with a low membership fee. Students of other departments, and perhaps even of the mechanical department, would feel reluctant to join the professional division should they be required to apply for regular membership in the A.S.M.E. with its accompanying fee of \$3.00, while the associate membership fee would appear very reasonable in the light of the many privileges and advantages which would accrue to the prospective members of the professional group because of their affiliation with the A.S.M.E.

If Mr. Healy is still as sincere in his desire to establish an "Aero Club" as he seemed to be, I would suggest that he get in touch with any of the officers of the A. S. M. E. and discuss this matter with them, and obtain from them for his perusal, a copy of the constitution and by-laws of the A. S. M. E. I am sure that Mr. Healy will find the administration of the A. S. M. E. only too pleased to render him every possible assistance in the establishment of this aeronautical professional division.

PAUL A. REH,  
Chairman, Inspection Trip Committee.

## The Slipstick

Cleave to the slipstick; let the slapstick fly where it may.

Gentlemen, we are happy. We are happy to the point of going nuts. We have received a contrib. A real, genuine contrib written in blue ink and on a perfectly good sheet of paper folded eight ways. We proudly present for your approval:

*I think that I shall never see,  
A hazar drougher than a tree;  
A tree o'er which my ball must fly  
If on the green it is to lie;  
A tree which stands that green to guard,*

*And makes the shot extremely hard  
A tree whose leafy arms extend  
To kill the mashie shot I send;  
A tree that stands in silence there  
While angry golfers rave and swear.  
Niblicks were made for fools like me  
Who cannot ever miss a tree.*

"Chouch."

"My kid brother ate some chicken yesterday and he's not feeling very well."

"Croquette?"  
"No, but he's sicker 'n hell."

*Zazu is so jealous of his girl Nostalgia that he makes her drink black coffee in the evening so she can't meet the man of her dreams.*

Three decidedly illuminated Brit- ishers were travelling to London by train. As the train pulled to a stop at a station, one of the lit trio asked of his wall-eyed companion, "Is this Wembly?" The second souse shook his head somberly, "No, it's Thursday." The third soak perked up considerably. "I'm Thursday, too. Let's have a drink."

A woman is like a can of paint— she has to be stirred up before she's any good and she's hard to get off your hands.

### DID YOU KNOW

0. That Santa Claus is the only man who ever pays any attention to silk stockings when there's nothing in them?

1/2. That there isn't any Santa Claus?

1. That the seashore is always built very near the ocean?

2. That oysters have practically no singing voice at all?

3. That ninety per cent of the water that goes over Niagara Falls never comes back?

4. That you needn't have rheumatism to get stiff in every joint?

5. That water is a liquid that

## Fraternity Notes

### RHO DELTA RHO

Rho Delta Rho is pleased to announce the pledging of

Jack Cohen, '40

To Brother Abe Mandelowitz, goes our heartiest congratulations for his recent pledging to Pi Tau Sigma, honorary mechanical engineering fraternity.

The first of this year's social affair, the pledge dance will be held next Saturday night at the fraternity house. Extensive arrangements have been made for the dance which will be quite novel as it is the first of Rho Delta's pledge dances to be held on Halloween night. In keeping with the night, a decorative scheme has been arranged under the direction of Brother Krieman. As a further surprise to the pledges, actives and alumni who will attend, will be the attractive souvenir bids designed especially for the occasion.

turns black when you put your hands in it?

5.234. That I'm getting just as sick of this as you are?

### Chronic Alcoholism

Oh, once there was a senior who was feeling rather gay, And he started out to make the rounds of Chicago's great White Way.

He stopped at many a honky-tonk and many a bar that night, And when to home he staggered he was very, very tight.

We know that it is possible to communicate with the dead because we can hear Zazu very distinctly.

"Is Kegglyon so very good as an after-dinner speaker?"

"Is he! I thought the guests would die of convulsions when he spoke from under the table."

"Have you any experience in trick photography?"

Velvel: "Have I? Say, I've photographed one cute little trick after another."

"Hey, where you going so riled up? What scratched your face?"

"I'm looking for that guy that said silence gives consent."

*Zazu claims that he never lets his girl have her way but we know that she writes her diary a week ahead of time.*

E.E.J.A.Y.

## PI KAPPA PHI

It is our pleasure to announce at this time the pledging of the following men:

Ralph Schmal, Co-Op. '41.  
Edward Schmidt, Co-Op. '41.

The pledges are carrying forward their plans for the Halloween Party with great enthusiasm.

Our Mothers' Club recently donated some towels and bedding.

Many improvements are still being made around the house, since our house cleaning did not stop with the end of Rush Week, but is still being continued to put the house in excellent shape for the winter social season. Plans are now being formulated for the purchase of new furnishings.

## SIGMA ALPHA MU

We take the pleasure of announcing the pledging of

Bob Abrahamson, '40

Our pledge party and dance has been planned, and many novel ideas will make the affair an outstanding event. It will take place on Saturday, November 7.

## PHI PI PHI

The pledges, now that they are getting settled after Rush Week, are busy planning for their pledge dance, which is to be held this Saturday evening at the Chapter House. Decorations will be in the true Halloween manner and a ten-piece orchestra will furnish the music.

Plans are also under way for a Mothers' Club tea, and a Fathers' and Sons' smoker.

The pool and ping pong tournaments have begun and may the best man win. From the practice games, the pledges are given a little chance to come through near the top.

Last week a number of the fellows went to the opera. Just ask them how they liked it, especially Abbott.

## PHI KAPPA SIGMA

The pledge class is organizing a touch football squad to play the actives. This squad will also look for competition at school.

The house is planning a Halloween dance, and arrangements for a splash party will be started before long.

A number of actives attended the Founders' Day banquet at the Northwestern Chapter last Wednesday night.

Brother James O. McKinsey, Alpha Pi '16, was the main speaker. Brother McKinsey at present is an executive of Marshall Field & Company.

HERE'S WHY THERE'S NO OTHER TOBACCO LIKE PRINCE ALBERT: P.A. IS CHOICE MELLOW TOBACCO - "CRIMP CUT" FOR COOLNESS— WITH THE "BITE" REMOVED BY SPECIAL PROCESS. IT'S THE LARGEST-SELLING TOBACCO IN THE WORLD. AND SWELL FOR "MAKINS" CIGARETTES.

### SMOKE 20 PIPEFULS OF P.A. AT OUR RISK

Smoke 20 fragrant pipefuls of Prince Albert. If you don't find it the mellowest, tastiest pipe tobacco you ever smoked, return the pocket tin with the rest of the tobacco in it to us at any time within a month from this date, and we will refund full purchase price, plus postage.

# SIDELINES

By S. M. Miner

(The following is a continuation of the subject discussed in SIDELINES of last week. The remaining two social policies are considered: enforced competition and government ownership.)

WHERE REGULATION as a means of industrial control meets its difficulty, the enforced competition method demures. Since regulation cannot be attained because of the extensive diversification of industrial endeavor, enforced competition offers a solution which tends to allow the small business man to remain free, to set his own prices on the basis of competition. From there it goes on to attempt control of the large, giant, monopolistic types of business organization; not control of the regulatory type, however, but definite rules of procedure and conduct, requirements and standards, thereby setting the limits within or under which big business may operate.

WITH THIS accomplished it is assumed that industry will control itself on a price-adjusting basis, thus the title of enforced competition, "maintained freedom"; as one economist has drawn the analogy, "ban the Mack truck from the highways and the baby Austin can roll on unhampered and unafraid."

DEFINITE policies along the line of enforced competition are carried by such regulations as the Sherman Anti-Trust Act, and the Clayton Act, and have been forwarded by such actions as Theodore Roosevelt's "Trust-busting" campaign, La Follette's (the elder) attempt to break up all big business, and Wilson's "new-freedom." Its culmination, to date, was reached when both major political parties declared strongly against monopoly.

HOWEVER, EVEN enforced competition does not answer the problem. It too has its difficulties and shortcomings. It has been said that "A good corporation lawyer could take a law designed to be a wall and make it into a triumphal arch". This figure of speech brings out the fundamental difficulty with enforced competition. No one can be so naive as to believe that prices in the steel industry have been set by free competition. And again, everyone realizes that there are many large companies in the industrial world, whose policies are law and to defy those is certain death.

THE CAUSE OF this difficulty lies in the inability to obtain efficient, honest and intelligent policing. This inability can be traced to three origins. First, legislation has been slow and difficult to obtain. Second, the problem facing the policing official soon tears down any strength of endeavor which he might have had. And third, court decisions have tied the hands of the authorities to a very great extent.

THE FINAL POLICY is one which receives much discussion from liberal theorists and from radical fanatics, but for the common people is still too much of an experiment to be worried about; it is government ownership. In one respect, it has an advantage over enforced competition and regulation in that it allows for one man (a government executive) to do the work formerly handled by two (a business executive and a government official to watch him.) Furthermore, from the view point of society as a whole, there is an advantage in the elimination of the profit motive.

HOWEVER, AS A possibility on an appreciable scale within the next few years, the governmental ownership policy may be ruled out. It goes too much "against the grain" of the American people. It involves too much of a change in our manner of by the rank and file of the people.

AS PROFESSOR TAUSSIG has said in describing the antipathy of the American people toward government control, "... it is an inheritance from the older political philosophy of *Laissez-Faire* and non-interference. In part, it is due to sad experience of misgovernment in this country.

## CAMPUS CAMERA

AFTER STUDYING TOGETHER FOR SIX YEARS MR. & MRS. HAROLD CARLSON GRADUATED AT THE HEAD OF THEIR CLASS OF 140 FROM THE MECHANICAL ENGINEERING COURSE AT NEW YORK U. HIS AVERAGE WAS 95, HER'S 94.8!

But to no small degree it arises from a lurking fear of dispossession. Public management is 'socialistic'; it is feared as the entering edge to complete expropriation."

OF COURSE THIS division into

four main divisions is only superficial. Government is, has been, and will be a combination of features from all four. It is only a question of the ratios in which the constituents are present in the mixture.

## BALLOT—

(Continued from page one)

lic works program is preferable to cash relief, that an amendment making state minimum wage laws constitutional is desirable, that the government should aid the American farmers by protective tariffs and the regulation of prices, and that relief should be administered by the local government in preference to the national government.

Opinion was divided on the effect of a new administration on the business conditions of the country. From the vote, thought is divided on the handicapping of business by a large unbalanced national government budget.

### The Relief Question

The *Why?* question on the advisability of having a public works program or cash relief drew some interesting answers.

Generally the ideas in favor of a public works program were: "Prevents a dole," "Less graft—but no boondoggling and waste," "Have something to show for the money," "No work, no eat," "Aids basic industries," "Idleness induces crime," "Work promotes self-reliance" and "There's individual cheating with cash relief."

In favor of the cash relief were written: "Public work interferes with normal development," "Too much administration cost," "Cheaper form of relief—makes relief less attractive," and "Private industry could do the work much cheaper."

The opinions on the relative values

of the administration of relief by the national and local governments are in most cases contradictions. Many of the same advantages are claimed for both methods of administration.

### Thought Trends

Consensus of thought of those favoring local relief administration is that the local government knows the needy individuals, has a clearer understanding of the problems, and could operate more efficiently and at a lower cost.

Claimants for national relief say there is less chance for petty graft, local problems are least understood by local agents, some local governments are not wealthy enough to finance relief, and that it centralizes control.

Separate tabulations were made on the way in which the followers of each candidate answered the questions in the ballot.

Followers of the "Old Guard" standard believe a new administration would have a marked beneficial effect on business conditions. In contrast, the Roosevelt followers give a vehement No!

### Business Handicap

Is business seriously handicapped by a large unbalanced budget? The Republicans say yes with 55 votes against 63 negative votes of the Democrats.

According to 79 votes by followers of the "Donkey" party, the T.V.A. and other public utilities would be properly owned by the government. Seven Thomas' followers and six Browder advocates agree with them, while 51 of the 59 Landon men voting and the two Lemke

followers are opposed to the idea. Has the present administration taken undue control over business? Fifty-three Landonites think so while 78 Democrats disagree with them.

As to the question on the present relief policy forming a permanent dole supported class, 57 Republicans and 17 Democrats believe it will. A weaker group of 49 Roosevelt men think otherwise.

A higher percentage of both factions believe that the government should not have a strict control over business and an approximately equal number from each faction want the *Laissez Faire* (let alone) policy. The followers of Browder and Thomas voted against both strict control and let alone policies.

### Split on Court Power

On the liberal interpretations of the constitution, Landon followers split on the issue, 28 for and 28 against with 11 doubtful. Seventy-six strong Roosevelt advocates and five of the Socialists favored it. Strangely enough, two of the Browder followers were for liberal interpretation and three against it. Lemke's two followers also split on the issue.

The Republicans definitely voted to oppose the enabling of Congress to re-pass an act over a Supreme Court decision while the Democrats were evenly divided on the question.

# For Digestion's Sake... Smoke Camels

Smoking Camels with meals and after helps bring a delightful sense of well-being

**MENTAL EFFORT TOO**—especially long hours of study—builds up tension and puts an extra strain on digestion. When you're tired, get an invigorating "lift" with a Camel. And at mealtimes and after, "for digestion's sake... smoke Camels." Camels set you right!

**EATING** is one of life's real pleasures. And Camels make it even more enjoyable! Thanks to Camels, food tastes better and digestion goes along more smoothly. For it is a scientifically established fact that smoking Camels at mealtimes and after speeds up the flow of digestive fluids... alkaline digestive fluids, which good di-

gestion and proper nutrition require. Mild, rich-tasting Camels are a refreshing stand-by the whole day through. They give you a cheery "lift" when you need it most. Camels set you right! They never get on your nerves... tire your taste... or irritate your throat. So, make Camel your cigarette!

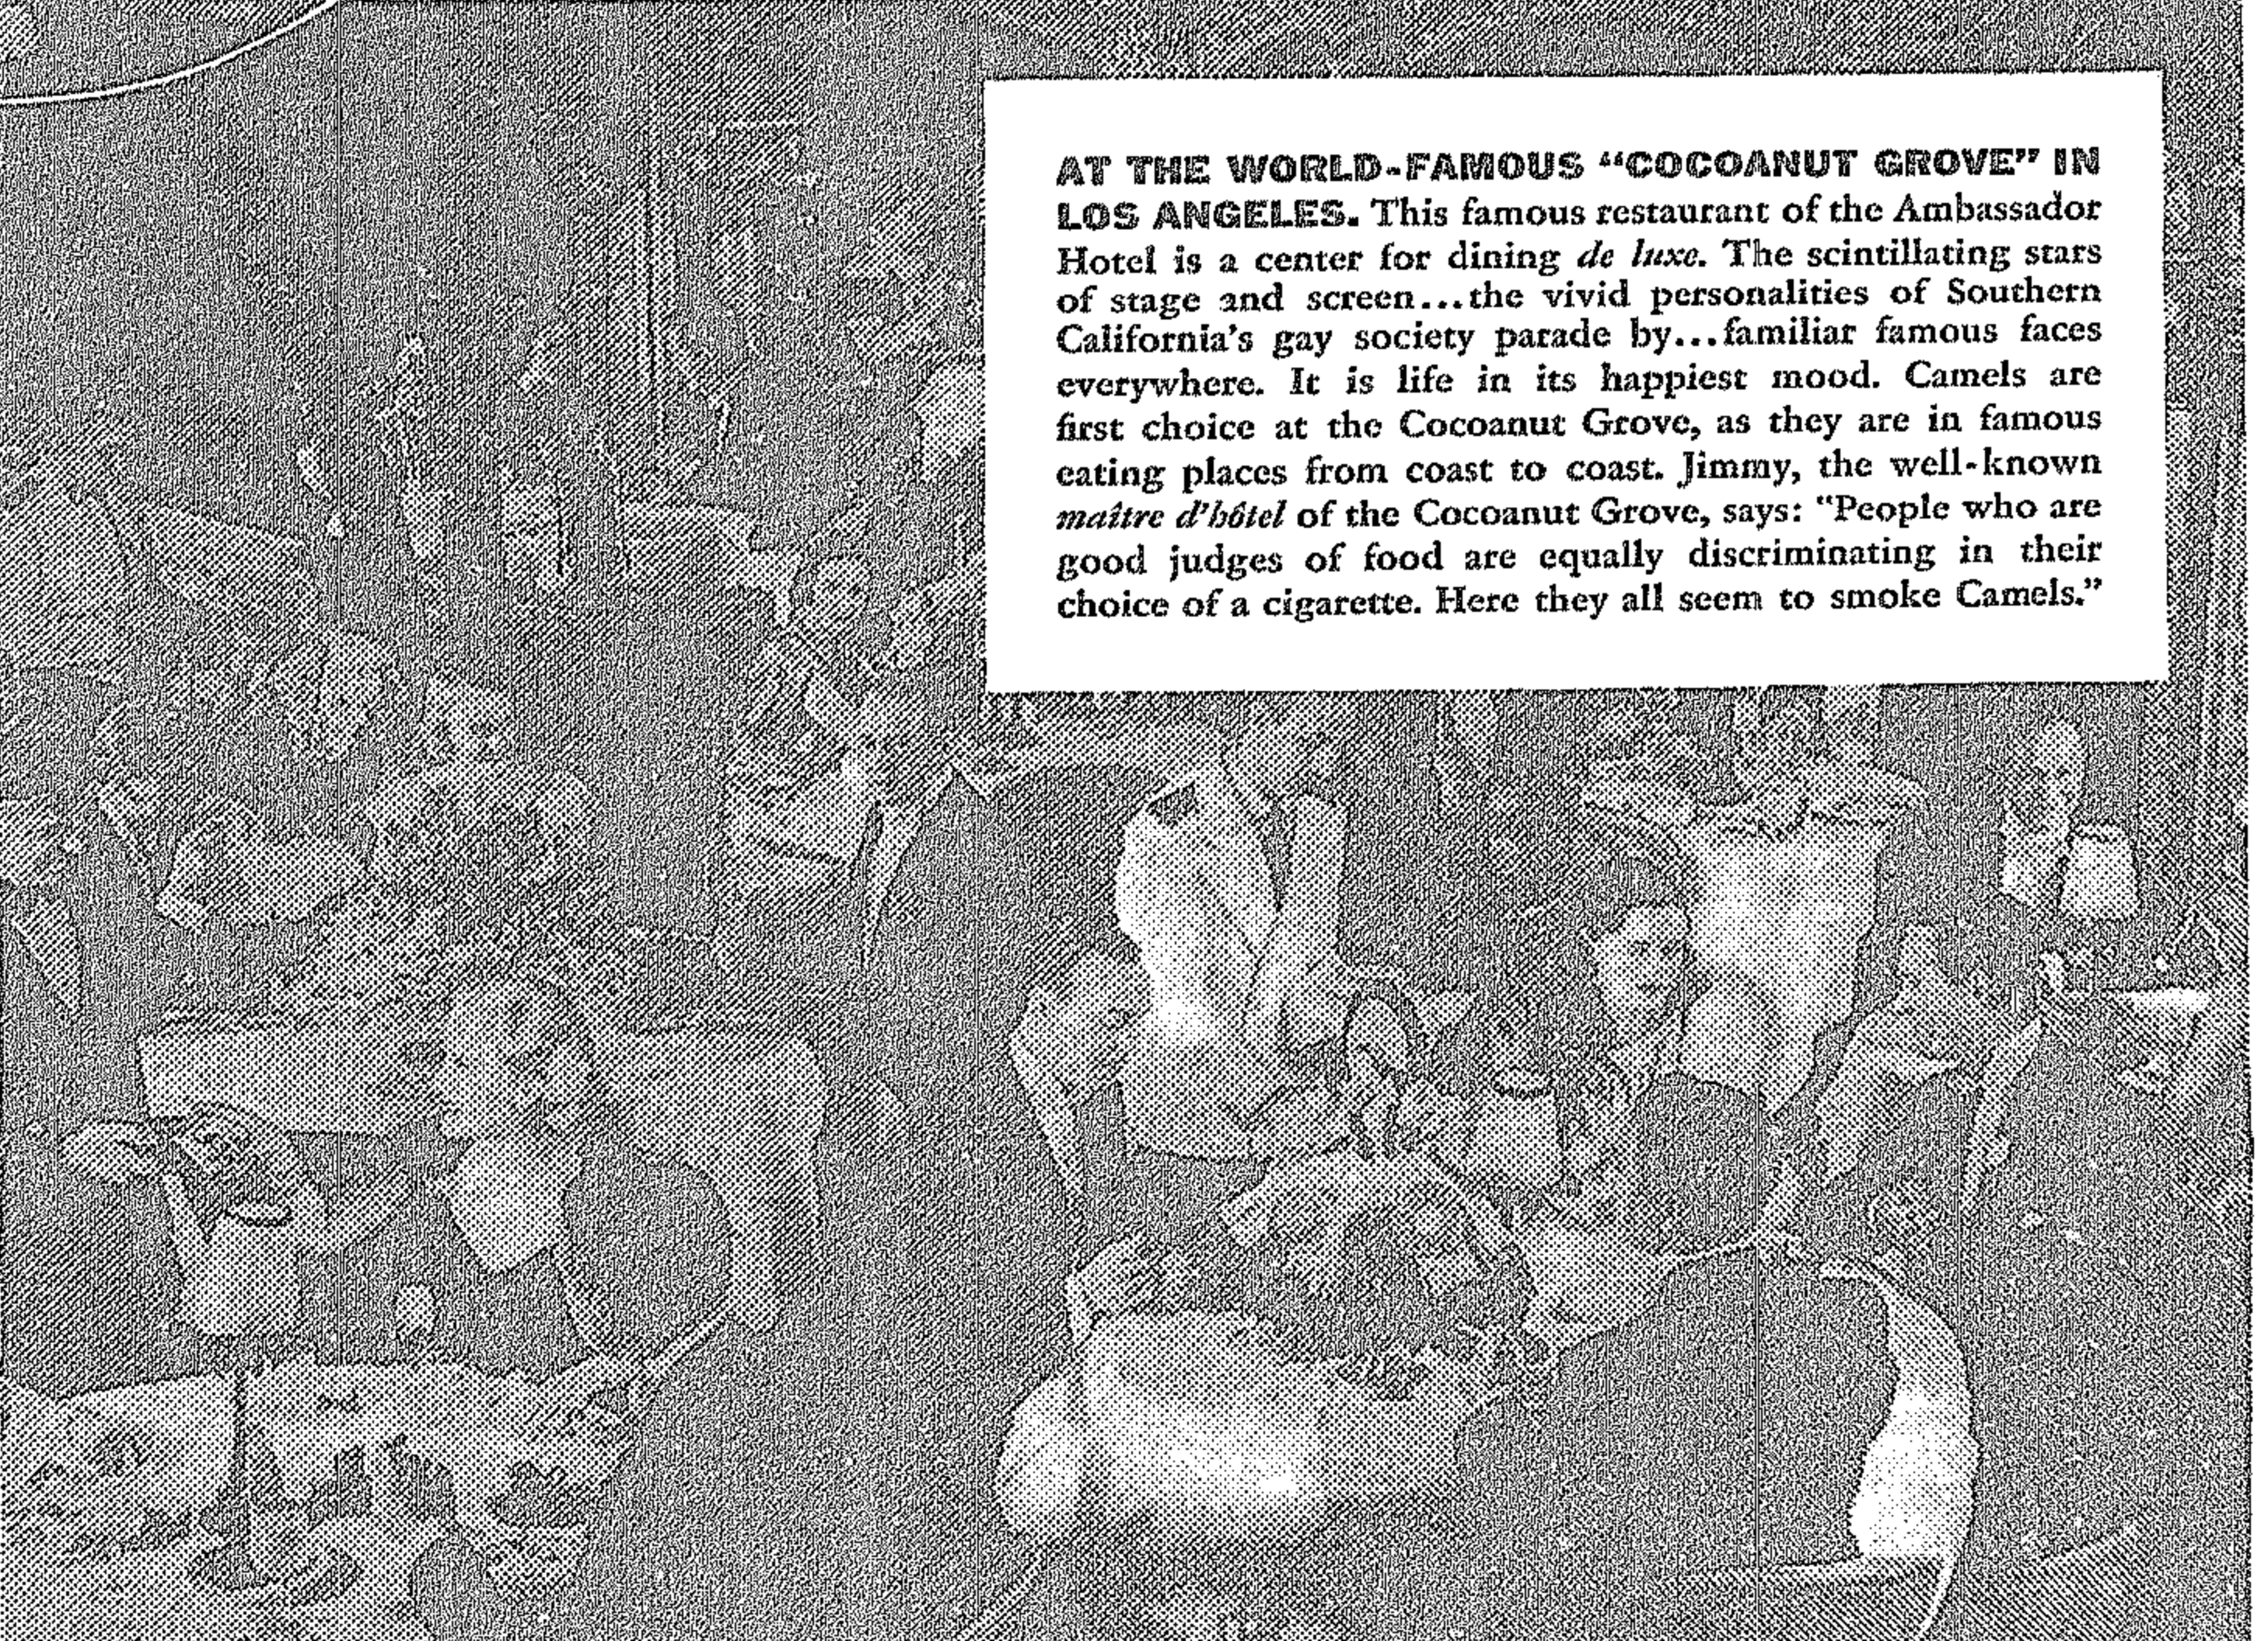

Copyright, 1936, R. J. Reynolds Tobacco Company, Winston-Salem, North Carolina

**LESTER STOEFFEN**, tennis champion whose smashing service goes at the amazing speed of 131 miles an hour. He prefers Camels. "An athlete has to have good digestion," says Lester. "I smoke a lot during meals and after. Camels make food taste better and digest easier."

"TALK ABOUT A GRAND FEELING," reports Sydney Jones, expert electrician. "The best part of my meals is when I loll back and have another Camel. Camels always set me right... calm me down... make my food taste better and help my digestion. Camels never jangle my nerves."

AT THE WORLD-FAMOUS "COCOANUT GROVE" IN LOS ANGELES. This famous restaurant of the Ambassador Hotel is a center for dining *de luxe*. The scintillating stars of stage and screen... the vivid personalities of Southern California's gay society parade by... familiar famous faces everywhere. It is life in its happiest mood. Camels are first choice at the Cocoanut Grove, as they are in famous eating places from coast to coast. Jimmy, the well-known *maitre d'hotel* of the Cocoanut Grove, says: "People who are good judges of food are equally discriminating in their choice of a cigarette. Here they all seem to smoke Camels."

### HOLLYWOOD RADIO TREAT!

Camel Cigarettes bring you a FULL HOUR'S ENTERTAINMENT! Benny Goodman's "Swing" Band... Geo. Sells' Concert Orchestra... Hollywood Guest Stars... and Rupert Hughes presides! Tuesday—9:30 p. m. E. S. T., 8:30 p. m. C. S. T., 7:30 p. m. M. S. T., 6:30 p. m. P. S. T., over WABC-Columbia Network.

## COSTLIER TOBACCOES!

Camels are made from finer, MORE EXPENSIVE TOBACCOES—Turkish and Domestic—than any other popular brand.

By William Graf

The trying times of the depression, to a certain extent, are probably responsible for the change of attitude of today's college youth. Formerly these young people displayed a carefree and pleasure-seeking attitude; today he has become serious-minded, mature, and seeks more for knowledge. It is manifestly true that college students everywhere are more concerned with obtaining the knowledge and skill needed for security in the future than they are about the good times of the present. The college youth now seeks to grasp something that is more substantial—something that will not wear off even though a depression strikes it—an education.

A freshman at the University of California this week signed up for 34 different courses with many conflicts. When informed that he could not be in six classes at once he replied: "But I really didn't intend to go to all of them."

To somebody's classification of college as a machine, the Dean of the College of Liberal Arts at Northwestern replies that college is a sieve, rather than a machine, through which the strong and able student is separated from those who simply go to college because they are sent.

An Oregon State psychology professor submits a rather new method of classifying students and their grades. He says that the A students are usually meek and submissive and

can be molded to suit the professor's will, the C students are the independent and defiant type, while those averaging B are a happy medium between the two and the most successful.

The N. Y. A. officials at the U. of Oklahoma have run into the question of just why whiskers do not grow as well in dry weather as in wet weather. According to the Oklahoma Daily a coed got an N. Y. A. job due to her complaint that the drought had hurt her dad's barbering trade.

### NOVEMBER 3? A POLITICAL INQUIRY

This political inquiry appeared in the October 20 issue of the *News*. Approximately twenty-five per cent of the student body took part in the poll. The results as tabulated follow:

John W. Aiken (Socialist-Labor)	0		
Earl Browder (Communist)	7		
D. Leigh Colvin (Prohibitionist)	0		
Alfred M. Landon (Republican)	69		
William Lemke (Union)	2		
Franklin D. Roosevelt (Democratic)	109		
Norman Thomas (Socialist)	7		
No declaration	3		
Do you think a new administration will have a marked beneficial effect upon the business conditions of the country?	76	88	24
Is business seriously handicapped by a large unbalanced governmental budget?	73	72	30
Do you approve of government construction, ownership, and operation of public utilities such as the T.V.A.?	105	62	13
Has the present administration taken undue control over business?	25	91	20
Will the present relief policy tend to form a permanent dole supported class?	80	55	41
Do you approve of a government's			
(a) Strict control of business	41	95	22
(b) Laissez Faire policy	53	54	33
Do you believe in liberal interpretation of the constitution?	101	37	16
Congress has the power to override the veto of the president by repassing a bill by a two-thirds majority. Should Congress also have the power to repass an act declared unconstitutional by the Supreme Court?	53	108	21
Congress has been accused of delegating some of its powers to the president. Do you approve of extensive powers in the hand of a president?	47	107	22
The present administration attempted to solve the farm problem by the A.A.A., which was later declared unconstitutional. Do you believe the A.A.A. if continued would have solved the farm problems?	40	89	51
By which method do you believe relief should be distributed?			
(a) Public relief program	154		
(b) Cash relief	21		
Why?			
Do you believe that an amendment making state minimum wage laws constitutional is desirable?	120	33	18
Should the government aid the American farms			
(a) By protective tariff	113	41	17
(b) Cash subsidy	15	90	20
(c) Regulation of prices	75	53	17
Should relief be administered			
(a) By the local government	98	40	11
(b) By the national government	68	58	11
Why?			
Are you eligible to vote in the November election?			
Yes, 94	No, 103		
Students, 188	Faculty, 7	Others, 2	

### KALEIDOSCOPE

OF PARTICULAR interest to the Armour student will be the following article, a parable written by D. B. Steinman, president of the New York State Society of Professional Engineers. In spite of the fact that it is more truth than parable, it should be amusing. We wish to thank H. O. B. for bringing it to our attention.

#### THE ENGINEER—A PARABLE

ONE DAY three men, a lawyer, a doctor, and an engineer appeared before the angel St. Peter as he stood guarding the Pearly Gates.

The first man to step forward was the lawyer. With confidence and assurance he proceeded to deliver an eloquent address which left St. Peter dazed and bewildered. Before the venerable Saint could recover, the lawyer handed him a writ of mandamus, pushed him aside, and strode through the open portals.

Next came the doctor. With impressive and dignified bearing, he introduced himself, "I am Dr. Brown." St. Peter received him cordially. "I know how you feel, Dr. Brown. Any who preceded you said you had sent them here. Welcome to our city!"

#### Engineer Is Diffident

The engineer, modest and diffident, had been standing in the background. He now stepped forward. "I am looking for a job," he said. St. Peter heavily shook his head. "I'm sorry," he replied, "we have no work here for you. If you want a job, you can go to Hell." This response sounded very familiar to the engineer, and made him feel more at home. "Very well," he said, "I guess I had Hell all my life and I guess I can stand it better than the others." St. Peter was puzzled. "Look here, young man, what are you?" "I am an engineer," was the reply. "Oh, yes, do you belong to the Locomotive Brotherhood?" "No, I am sorry," the engineer responded apologetically, "I am a different kind of an engineer." "I do not understand," said St. Peter, "what do you do?" The engineer recalled a definition and calmly replied, "I apply mathematical principles to the control of natural forces." This sounded meaningless to St. Peter and his temper got the best of him. "Young man," he said, "you can go to Hell with your mathematical principles and try your hand on the natural forces down there." "That suits me," the engineer responded, "I am always glad to go where there is a tough job to tackle," whereupon he departed for the Nether Region.

#### Strange Things Happen

It came to pass that reports began to reach St. Peter. The celestial denizens, who had amused themselves in the past by looking down on the less fortunate creatures in the Inferno, commenced asking for transfers to that domain. The sound of agony and suffering were stilled. Many new arrivals, after seeing both places, selected the Nether Regions for their permanent abode. Puzzled, St. Peter sent messengers to visit Hell and to report back to him. They returned all excited and reported.

"The engineer you sent down there," said the messengers, "has completely transformed the place so you would not know it now. He has harnessed the Fiery Furnace for light and power. He has cooled the entire place with artificial refrigeration. He has drained the Lake of Brimstone and has filled the air with cool, perfumed breezes. He has flung bridges across the Bottomless Abyss and has bored tunnels through the Obsidian Cliffs. He has created paved streets, gardens, parks, and playgrounds, lakes, rivers, and beautiful waterfalls. The engineer you sent down there has gone through Hell and has made it a realm of happiness, peace and industry."

YOUR contributions, suggestions, and criticisms will be welcomed. Drop a note in the *News* box near the elevator in the main building. All letters or notes will be acknowledged in this column, whether the contributions are used or not. R. W.

### THE STEAM SHOVEL

Last week's Steam Shovel, with its attendant puns, has taught us a lesson. Having been at the receiving end of all the brickbats, we are dejected, dismayed, downcast, reprimanded, chided, humbled, disillusioned, disappointed, regretful, apologetic, despondent, despairing, put out, bawled out, beat up and taken down. NEVER AGAIN!!!

According to the latest fashion notes, moustaches are definitely out this season. Avgerenos put up a great fight to save his foliage, knocking twelve ambitious shavers into various shapes, but when re-inforcements arrived he was subdued, although it took eighteen guys to do the honors. Simeon also had a sad parting, but not nearly as violent.

Somebody ought to invent a week-end moustache for college students. As an example, we suggest a pot of glue and a pair of scissors, but heaven help the cats in the neighborhood!

#### ADVERTISEMENT

Industrious, studious, and capable young Ch.E. student wishes to secure desirable wife. Must be attractive, witty, and good body. Blonde preferred, though not necessarily platinum. Applicants write or phone George Thodos, care of Armour Tech. 3300 S. Federal st.

NO, NO, YES, YES, YES, NO, YES, NO, NO, YES. . . . It may sound like Gene Worcester and his girl, but it's only the editors counting ballots in the *News* office.

We wonder if C. Abomelique Carstens had anything to do with the writing on the walls mentioned in the letter in last week's *News*. Come on, Cliff, confess!

When the *News* moves into the new offices, a new rule goes into effect. Any person who is found writing on the walls will be dismissed from the staff without delay. Who's going to write the paper then?

Seegrust: Coal from Kansas is high in moisture, although Kansas is dry. Sheehan: Kansas isn't very dry. . . . And Sheehan ought to know. He worked in Kansas all summer.

O. GORDON ERICKSON, during Glee club practice, remarked to the song birds, "Can't you just picture yourselves out in a boat on Lake Michigan, singing that song?" And EEJAY sang out, "Yeah, on a garbage scow!!!"

Bacchanalia (definition by Webster): A festival celebrated by the Romans every three years characterized by reveling and intemperance, the lawlessness to which it gave rise causing its prohibition in 186 B. C.

First real work of the season in the heat and power course being done by PERLET and STURGEON the other day. After forty-five minutes of intensive calculations they spread the result around that only \$120 a month would set an Armourite up as a married man.

OUT ALL NIGHT. Phreddy Jost, the phire protect, didn't get home at all on a Sunday night; what's more, he won't tell where, etc. . . . maybe he doesn't know himself.

Out in the cold again. Senior mechanicals got forgot by Prof. Charley Nash on account of because he forgot to go to his class last Tuesday.

### A.S.M.E.—

(Continued from page one)

making molds by machinery. In the electrical shop, the automatic train control apparatus was demonstrated. By means of this apparatus, the engineer's duty as pilot is greatly simplified.

As a grand finale to the trip, the entire group witnessed the body of an engine lifted bodily from the driving wheels and set aside for dismantling. The body of the engine weighed about 197 tons.

In the morning, the members of the diesel class went through the shops where the Union Pacific streamliners are conditioned. The feature of this trip was the yards in the streamliner in the yards.

### ARX DANCE—

(Continued from page one)

—definition of the word 'Bacchanale'

To aid the spirit of Diana, the site of "Diana's Bacchanale" has been carefully selected. It is to be Diana Court located in the Michigan Square building. The atmosphere which this ballroom promotes can only be verified by practical application. Dancing floors are on several levels. This is exceptional, enabling dancing engineers a variety of atmospheric pressures. In the center of the main floor—level No. 1—is a beautiful fountain, which, although it infers the sylvan streams of Aricia, is more closely related to her aquatic sisters.

And what could be a more appropriate supplement to this setting than sophisticated melodies supplied by Arthur Wise and his lute and lyre instrumentalists — more commonly known as the Royal Club Orchestra. Bids will soon be on sale for \$1.50 per couple. Watch for the announcement.

## RAILROADS

### Welcome New Ideas

Young people today should find much to their liking in the policies of management adopted by our policies are based on the findings of current public usefulness and favor. Consider these evidences of railway experimentation: Reduced fares, faster and more convenient schedules, streamline trains, added comfort and beauty in passenger equipment, lower-priced meals, air-conditioning, free pillows for coach passengers, free pick-up and delivery of less-than-carload freight—such innovations bring luster to the long-haul railway advantages of safety, economy and dependability. The Illinois Central System is especially proud of its Green Diamond, \$425,000 mile-a-minute streamline train recently placed in service. It has been called a rolling laboratory, in which will be worked out principles affecting the development of future passenger transportation, and it embodies the latest findings of science in a wide variety of fields. Favorably received, it gives every promise of fulfilling its chosen mission. Thus deeds give proof of progress and confirm the skilled determination of railway management and personnel to keep in the very forefront of transportation. American railroads in such ways are daily justifying their kinship with the college and university world.

REMINDER . . . Education today must keep in touch with the railroads. Fundamentals everybody ought to know are what the railroads mean as carriers, employers, taxpayers, purchasers, fields of investment and foundations of national defense. Educators especially should remember that railway taxes keep 1,600,000 students in school; that railway bonds are the backlog of many an endowed institution; that the railroads today, in keeping with the spirit of all true education, are forging ahead progressively to new goals.

President

# ILLINOIS CENTRAL SYSTEM

—AN ILLINOIS RAILROAD—

## SOPHS AND FROSH TO CLASH TODAY IN CAGE TOURNEY

### Yesterday Saw Opener Between Juniors and Seniors

#### FINAL TO BE THURSDAY

Gene Heike's proteges of the class of '40 will have a chance to show their stuff tonight when they meet the sophs in the second tilt of the interclass basketball tourney. They closed the practice week last Friday with a snappy drill, selecting a tentative starting lineup of Norkus at center, Gerwig and Eggers at guard positions, and D'Amata and Pincus playing forwards.

#### Sophs Show Fight

Showing the same spirit, fight and smooth playing as in their warmup session, they should offer the sophs some fast and stiff competition. Several of the squad are prep school lettermen who should make good varsity material in a year or two.

The juniors, with Hebenstreit, Kubik, Brown, Dunbar, and Sheehan, and coaches like O'Brien, O'Connell and Wagner, are bidding again for the title which they captured as freshmen and retained last year when they trounced both the frosh and the juniors. The question of supremacy will be definitely settled Thursday at 4:30 when last night's winner and the victor of the frosh-soph contest tonight meet to vie for finalist honors.

#### Seniors Have Smooth Team

The seniors are back again this year, managed by Ray Bacci. They have a smooth team with Liebmann, center, Taradash and Ikenn in the forward line, and Dreis and Skuza at guard. They lost in the finals last year to the sophs after whipping the graduated seniors.

### Cage Practice to Begin November 3

The first basketball practice will be held in the gym November 3 when Coach Grant Stenger will undertake the coaching of an Armour cage squad for the first time. All aspirants for the varsity are urged to come out at this time. After about two weeks practice in the gym the squad will move to the armory at 3401 Wentworth avenue where all home games are played.

#### Tough Schedule Ahead for Cagers

A tough schedule has been arranged for this season. Fourteen games have been booked to date, with prospects of another to be played about the first of December. The usual trip will be made in February, after the finals, to play Detroit University and Michigan State Teachers College.

With the return of three lettermen and several capable substitutes Armour has an excellent chance for a fine showing. Heike, returning letterman and star forward, was high point man last year, netting 185 points in 15 games. Merz and O'Brien, also lettermen of last year, netted a total of 118 points in their number of games played. The loss of co-captains Warner and Dollenmaier, veteran guards, will be severely felt but likely prospects for their positions are O'Connell and Wagner.

#### Freshmen to Start Later

Freshman practice will be announced at a later date. The freshman team will be coached by Warner and will play freshman squads of schools in the Chicago area.

#### BASKETBALL SCHEDULE 1936-37

- Dec. 8—Arkansas, here.
- Dec. 12—Lake Forest, there.
- Dec. 15—Beloit, here.
- Dec. 19—Chicago, there.
- Jan. 5—Lake Forest, here.
- Jan. 8—Beloit, there.
- Jan. 15—Western State Teachers, there.
- Jan. 19—Wheaton, here.
- Jan. 22—Michigan State Normal, here.
- Feb. 4—Michigan State Normal, there.
- Feb. 6—Detroit University, there.
- Feb. 9—North Central, here.
- Feb. 19—Western State Teachers, here.
- Feb. 20—North Central, there.

From all indications, upper class jeers will turn to cheers when the frosh turn out for basketball against the sophs tonight. The boys of '40 earned their poor reputation in the touchball tourney, having forfeited two games.

The newcomers blame their poor showing on the fact that they have too much homework (teh, teh!) and that they don't know how to go about organizing a team. Why doesn't some upper-classmen lend a hand?

Rain and mud! Mud and rain! Out of six touchball games scheduled for last week, only two were played. Two games were postponed and two forfeited.

A novel play in the senior mech-junior fire protect game last week was when one of the F.P.E.'s lateralled to a team mate who obligingly lateralled into the waiting hands of one of the mechs who came close to scoring a touchdown. Not a bad way of cutting down one's offensive!

The kindly ministrations of this department in an effort to straighten out the touch football tangle seems to have resulted in a worse one. The rules printed last week, differentiating between a touchback and a safety are hereby stricken from the record. Difficulty with the

playing field makes it necessary to rule that any ball carrier caught behind his own goal donates two points to the other team. In addition, Frank Hackman said that any ball hitting the ground is a dead ball.

Wanted!! An assistant manager for the swimming team. Candidate need not be a swimmer or diver, but he should have a healthy interest in the sport and should be in his junior year. Incidentally, the job leads up to a manager's position next year and, since swimming is a major sport, a major letter.

With indoor track still a long ways off, several of the lads may be seen daily, braving the wintry winds in anticipation of the coming cross-country meets. Those listed on the distance team are Captain Faust, Bodnar, Dannis, Close, and Deuter.

From latest reports, the rifle club is about to begin its perennial range remodeling. The club will be after more men due to the additional space to be provided.

The riflemen plan to inaugurate a new system, classifying all members as sharpshooters, marksmen, or beginners depending on the candidate's proficiency.

Wow! Seventy-one men out for boxing and wrestling. We're looking for a championship season on the mat and in the ring.

Interclass basketball this week should see a large turnout of fans in the gym. Come up and root your class to victory.

## Wrestlers Face Tough Schedule

### Seventy-one Boxers, Wrestlers Out

With a little over a month remaining before the season gets under way, the wrestling team is working hard in an effort to get into condition for one of the hardest schedules that an Armour squad has faced for quite a while. Although the team feels the loss of such men as Schmidt, Sumner, and Patterson, all captains in their day, a huge turnout of candidates, along with six regulars and five alternates from last year, bids well to bring forth a team of no small capabilities.

#### Seventy-One Men Out

At present there are a total of seventy-one men signed up for boxing and wrestling. The wrestling squad which will probably start the season is made up chiefly of men from last year. In the lightweight division at 118 pounds there is McDaniel, while at 125 pounds are Basile and Adelson. Dunne, one of the returning regulars along with Ropek, who has moved up from 125, will work in the 135 pound division. Going up the scale, Jaffee and Schuman will emit grunts at 145, and Popper will start at ex-captain Schmidt's weight, 155. Kreml, this year's captain will again do his bone-crushing at 165, with Tullgren at the post for the light-heavyweights.

The schedule, which will start the first week in December with Wheaton, includes about sixteen meets. Those schools on the schedule are Northwestern, Wheaton, DeKalb,

## Review of Last Year's Interclass and Interfrat Cage Tournaments

In review of last year's Inter-Class Tourney, the juniors and sophs trounced the seniors and freshmen respectively to qualify for the finals. In the junior-senior game, the juniors piled up a comfortable lead of 9-3 in the first half. During the last half, the seniors retaliated through excessive use of long shots but were behind 13-11 when the whistle blew. The sophs exercised their superiority over the frosh by smearing them 21-14. They overran the frosh in the first half by holding them scoreless and piling up a heavy lead. After a pep talk by Coach Krafft, the freshmen came back with new vigor and almost tied the score but were unable to keep the pace and succumbed to the sophomores, the final score being sophs 21, frosh 14. The finals were played off between the juniors and the sophs.

#### Sophs Win in Final

Play during the first half was slow, each team playing very cautiously and feeling out its opponent. The juniors started the ac-

North Central, Illinois Wesleyan, and Morton, Wright, and South Side Junior Colleges.

**Boxers Need Lightweights**

The boxing team, which has also fared well as far as candidates go, is well filled out in the heavier weights, but is lacking in lightweight material. Nothing has been done yet in the way of arranging a schedule, but with the team as large as it is, they are sure to have a good one.

tion with a burst of speed which gained them six points at the end of the first half, but the second half belonged to the sophs. The scoring for the sophs began on two successive tip-off plays and then two charity tosses. The sophs donated several personal fouls but the juniors failed to take advantage of them. Later the juniors scored two baskets but the sophs were so hot that nothing could stop them. The game ended with the sophs on top 21-14, with the inter-class championship falling to the class of '38.

#### Phi Pi's Defeat Delts for Title

The opening of the inter-frat tourney went off with a bang. After the first round of the tourney, Rho Delta Rho, Pi Kappa Phi, Kappa Delta Epsilon, Phi Pi Phi, and Delta Tau Delta, outclassed their opponents thus qualifying for the second round. In the semi-finals, Delta Tau Delta whipped the Rho Deltas to the tune of 14-13 in a last minute rally and Phi Pi Phi walked all over the Kappa Deltas, humbling them to the score of 36 to 14. In the finals, the Phi Pi's walked off with their eighteenth consecutive Inter-Frat championship by defeating the Deltas 28 to 13. During the first half the Phi Pi's produced a heavy lead and retained it, but in the second half, the Deltas got back some of the old pep and came within one point of tying the score. However, they couldn't keep up with the champs and lost the game 28-13, giving the Phi Pi the championship for their eighteenth successive year.

# Lucky for You

## — It's a Light Smoke!

For "Night-and-Day" Smokers — A Light Smoke!

Even though you've been smoking through most of the day, and all through the evening, you'll find that your midnight Lucky tastes as good as your Lucky at noon. For a clean taste, a clear throat... reach for a Lucky—a light smoke!

### When Fun and Smoking Last Way Into the Night...

On party nights—or whenever you do a lot of smoking—you'll find that Luckies, a light smoke, are a comfort as well as a joy! For since Luckies are a light smoke, there's no wear and tear on your throat. Luckies wear well...they're the only cigarette that's "Toasted"... your protection against irritation. So tomorrow, or better, right now, reach for a Lucky—rich with the taste of fine center-leaf tobacco. It's a good morning smoke with a clean, fresh taste. And it's a good night smoke... easy on you... gentle. It's never too late for a light smoke... never too late for a Lucky!

# Rain and Mud Overrule Touchball Contest; Only Two Games Completed

Using the same rough-and-tumble tactics that characterized last year's play, the junior mechanicals downed the junior civils by a score of 30 to 6. A spirited mechanical offense early in the game swept the civils off their feet and netted three touchdowns for the mechs, leaving the score 18-0 after only about ten minutes of play. Near the end of the half, however, the mechanicals slowed up, and a wild pass, intercepted by Machulis, put the civils in scoring position. Two plays later, a short pass from Braun to Machulis was completed for the civils' first score. For the remainder of the half the ball seemed to change hands after each down as first one team and then the other intercepted wild passes.

### Mechanicals Score Twice

The second half opened with the score still standing 18-6, and neither team was able to change this tally or get into scoring position until about the third quarter. At this stage of the game, the mechanicals made some changes in their line up. A long, high pass from Seidenberg to Engelthaler then brought the tally to 24-6. With the time growing short the civils launched a desperate aerial attack but lost the ball on downs, leaving the mechs in scoring position again. A short basketball pass intended for Seidenberg was partly blocked behind the goal, but landed in Faust's arms for the final score of the game. In the few remaining minutes the civils succeeded only in throwing a wild pass which was intercepted by Simeon. The game ended at this point with the score standing 30 to 6, tying the high score record of this year's tournament.

The senior and junior mechs play to a 6-6 tie. Left to right: Logullo, '37, Skeppstrom, '38, Faust, '38, Hazelton, '37.

### Senior Mechs Win 14-2

Last Tuesday in the first game of last week's schedule, the senior mechanicals defeated the junior fire protects by a score of 14 to 2. The game saw a well organized team of mechanicals outplay somewhat a fire protect squad. The outstanding ball-carrier of the game was Logullo, who turned in a fine performance, scoring both of the touchdowns and making several nice end sweeps and off tackle runs. Harrold of the mechs also did a good job in the kicking department, getting off many fine punts.

Harrold kicked off for the senior mechs to open the game, and a few seconds later they opened the scoring by tagging Dunbar, who fumbled the kick-off before he could get out of the goal. The fire protects made sev-

eral threats on long passes from Downing to Dunbar and Sheehan, but it fell short with nice defensive play by the mechanicals. The first touchdown came after Logullo intercepted a 35 yard pass from Downing, and the mechs staged a march down the field, ending in Logullo's slide over the goal for the score.

### Safety Opens Second Half

Another safety started the second half. This time the mechs fumbled the kickoff, giving the fire protects their only score. The final tally came after Harrold intercepted a short pass and Logullo made a nice end run over the goal line.

Of the other four games scheduled, two were postponed because of rain or a muddy field and the other two were given away by forfeits. In

## Jr. Civils Swamp Sr. Schmiers, 18-6

In a semi-official game last week the junior civils, with the aid of Irv Seidenberg, defeated the senior chem "B" team 18-6 to give them their second defeat. Seidenberg, who is a junior mechanical, was drafted with the permission of the chemicals in order to make a complete team for the civils, and figured in all three of their scores.

### No Scores in First Half

No scoring occurred until late in the first period when Zar, playing safety man for the civils, let Holland get behind him and snare a long pass from Bliss. Marty Holland out-distanced all pursuit to cross the goal for a touchdown.

The juniors tied the score early in the second half when Basile passed to Seidenberg in the clear. After an exchange of kicks the juniors ran the ball deep into the chemicals' territory. Seidenberg's pass over the goal was knocked into Basile's hands for another score.

### Juniors Miss Chances

The juniors missed two opportunities for further scoring. Once Basile tripped over a fence brace as he was about to catch a pass over the goal and another time Seidenberg intercepted a pass and ran thirty yards, only to learn that he had stepped offside. In the closing minutes, however, he intercepted another pass and this time stayed inside while crossing the goal for the juniors' third score.

Wednesday's game, the frosh squad failed to put in an appearance, thereby giving the senior electricals a free ride through the second round. In the other forfeit game, the soph chemicals took their pass through the second round from the junior electricals.

The juniors are calling it "DIANA'S BACCHANALE" this year, but to everyone else it is another ARX DANCE, which portends a high old time for everyone who wants to SWING IT! OH, SWING IT! This "shindig", as the Times would call it, is to be held on the evening of Friday, November 13 and will make "Stomping at the Savoy" seem like a gymnasium school social. Every one of you has probably guessed by now that the title of the dance has been taken from Diana's Court, in the Michigan Square Building, where the dance is to be given.

Diana's Court is one of the best pieces of modern architecture that Holabird and Root have ever done and a lovelier place to hold a dance would be hard to find. The court towers four stories and there are balconies at various levels on which to dance (?). Honestly though, there are three dancing levels so that the budding Astaire-Rogers duos can do that "up and down the stairs" Continental to the sophisticated rhythm of Arthur Wise and His Royal Club Orchestra.

To qualify yourself for admittance you only have to comply to four iron-clad rules. 1. Pay \$1.50 for your bid. 2. Get yourself a date (the less stags wolfing the better). 3. No wading in

## NIGHT SCHOOL

(Continued from page one) have 49 in the class, and three others have 48. The latter are mechanics 1, practical mechanics, and strength of materials.

### Large Fluctuation

Of special interest is the enthusiasm for the graduate division which boasts an enrollment of more than 180 registered students who are doing specialized work in their classes and research problems in the various departments.

Looking back over past years it is seen that immediately after the war, the enrollment began a decided increase, growing from 499 in 1918 to 1034 in 1920. It is also seen that at the end of the prosperity era, the enrollment showed an increase from 952 in 1927-28 to 1155 in 1928-29, and then to 1248 in 1929-30.

the fountain. 4. No dancing with the statue of Diana, she's mine. More marvels about the dance later.

In again, out again: Professor Skidmore returned from New York Tuesday but could only stay with us for two days. He will be back again to stay in a few weeks.

With November 2, the day for the senior judgment, approaching all too quickly, the niggering crews have been called to work and are getting excellent practice by making mistakes on somebody else's plate. Niggering is certainly swell, you can't lose.

Kubicka was intimidated into shaving off his mustache. Yeh Juniors! That's all for this week, mustache you to wait until next week. Art Gum.
