

Heald To Speak Armistice Day; Rain or Shine Assembly To Be Held in Ogden Field

Ever since the first Armistice twenty years ago, Armour students have observed Armistice day in a significant and dignified manner as a befitting memorial to those who made the final sacrifice in the great war. In previous years services were held in Armour Mission and an address was made by a prominent speaker. Last year the speech was given by Bishop George Craig Stewart.

Contrary to previous years, the ceremony this year will be entirely Armour and will be held in Ogden Field. Following a short talk by President Heald, the band will play taps and the entire assembly will face east.

This program, expected to be held "rain or shine," will be conducted with the aid of the student marshals. A detailed account of the procedure will be given in next week's issue of the *Tech News*.

Armour Eye Plan Monthly Meetings; Becker to Speak

November 4 will mark the first of a series of monthly meetings to be held by the Armour Eye, Armour's photography club. The program will start at 6:30 in the rooms of the club which have been remodeled to give a very pleasing interior.

Harold F. Becker, the principal speaker of the evening, will give a demonstration - lecture on studio lighting technique. Mr. Becker will also judge the entries of the monthly photography contests. These contests, which are conducted for the members, are of two types, one general contest and the other of the so-called grab-bag type. The latter is unique; each contestant draws a different subject to photograph. The meeting will be concluded with the serving of refreshments. All pledges and members are invited to attend.

TAU BETA PI—

(Continued from page one)
pledge button and ribbons from an active member. The new pledges with a list of their activities follow:

Roland B. Boertitz, Ch.E.: treasurer of Alpha Chi Sigma, president of Phi Lambda Upsilon, treasurer of the Armour branch of the American Institute of Chemical Engineers, student representative of the *Armour Engineer and Alumnus*, member of the senior jewelry committee.

Howard R. Coyle, Eng. Sci.: Sports editor of the *Armour Tech News*, Alpha Chi Sigma, Sphinx, secretary-treasurer of the Armour Glee Club, Triangle Social fraternity, and student assistant in the sports division of the Armour Tech publicity department.

Paul F. Henriksen, M.E.: president of the Armour Chapter of the American Society of Mechanical Engineers, treasurer of Pi Tau Sigma, vice-president of Honor "A," senior scholarship winner, co-captain of the basketball team, winner of two major letters in basketball and freshman numerals.

Robert I. Jaffee, Ch.E.: present managing editor of the *Tech News*, member of Sphinx, present treasurer and former vice president of Rho Delta Rho social fraternity, secretary of his sophomore class, won an award in wrestling, member of the Armour Players, prominent in interclass and intramural sports.

Joseph J. Janicek, M.E.: member of his freshman basketball team, active in interclass and intramural athletics, played two years of varsity basketball, head junior marshal last May, president of Pi Tau Sigma, secretary of the Armour branch of the American Society of Mechanical Engineers, student assistant in the mechanics department.

John D. Keane, Ch.E.: Alpha Chi Sigma, treasurer of Phi Lambda Upsilon, president of the Armour Glee club, Armour Players, Re-write editor of the *Armour Tech News*, student assistant in the mathematics department.

Ambrose M. Richardson, Arch.: past president of Scarab, senior commission representative, winner of Spiering prize in national competition in architectural design, has worked forty hours per week while in school.

Steam Shovel

By GENE WORCESTER

RALPH WAGNER led with his nose, and the result? . . . he broke it. It seems that he and his father, while on a hunting trip, jogged their car right when the road jogged left, and hence a tree mowed them down. The nose is doing nicely.

"JOURNEY'S END" has just begun its journey, and from the looks of the cast selected, the dramatic story to be portrayed and the ace director, Mr. CHRISTOPHERSEN, who will have charge, it should be well worth seeing. Unlike past performances, the play will be of over two hours in length, and given in the evening.

"Second Childhood" is the term that might be applied to the senior juicers—by their own admissions. "Gosh, juice lab is fun," said one, "only we have to do a little work occasionally." Ask STROCCHIA and MARK.

Halloween was last night, and more than one Armourite left his books to gather dust while he over-turned ashcans.

Who is the senior electrical that tries to get dates for his fellow students? After showing his friends a cute picture, he then proceeds to give him a telephone number which soon turns out to be the number of the County morgue or what have you?? Don't ask Wooding for telephone numbers.

The junior and senior mechs had a real holiday last Wednesday. Besides being taken through the entire Studebaker plant at South Bend, they were treated to a TURKEY lunch gratis, and had plenty of time afterwards to (try to) wolf at St.

'Night Hawks' Dance Held Saturday Night

Swaying to the faultless rhythm of Pierson Thal and his orchestra, Armour's Night Hawks revelled merrily last Saturday night at their pre-Halloween dance. This affair, held in the North Room of the Stevens Hotel, was considered to be highly successful by the committee. The night school students attended as well as did the day school men. Marge Warren, the vocal attraction of the orchestra, was especially appreciated.

The management of the dance was entrusted to a dance committee under the leadership of Harold Lynette. Other members of the committee were Harold Koch and Albert Simandl. This dance, which was an informal table dance, was the first such affair held this year by the Evening Division Students' Association. A series of social affairs has been planned by the association for this year in order to foster school spirit and to bring about a closer relationship between night school students.

Co-ops To Visit Crawford Edison Plant Next Friday

Berger Johnson, president of the A group Co-op Club and Co-ordinator Lease have arranged an inspection trip through the Commonwealth Edison plant on Crawford Avenue at the Chicago river next Friday at 9 a.m.

The Crawford plant is one of the finest in the world and is visited annually by student groups from prominent technical schools, among them, Wisconsin and Michigan.

This trip concludes a highly successful year under the guidance of the present officers, Birger Johnson, John Kucera, Walter Meyers, and Mike Larinoff. Nomination of their successors will be made at the next meeting.

Mary's, across the road from Notre Dame. They might as well have tried to recapture Ethiopia.

Ray Mueller, Hal Dahlin and Wally Johnson were convinced that the sixth floor of the Studebaker plant was most interesting. Of course, the young ladies employed there sewing upholstery had nothing to do with it.

KNOW YOUR PROFS—

(Continued from page two)

will find he needs as much to know how to eat on a diner as he needs to know his engineering facts. As an employer, I would take an applicant out to lunch before I hired him."

Is his picture complete? If we adjust our focus a little better we find two more facts about him. None of the present students would know it, but Professor McCormack was track coach at Armour for many years. He claims his spare-time hobbies, well-liked as they are, are bridge, billiards and loafing.

Students Invited to Hear H. W. Dickenson

At the Rosenwald Museum of Science and Industry tomorrow afternoon at 3 p.m., Mr. H. W. Dickinson, eminent English engineer, and foremost authority on the development of the steam engine, will address the Chicago branch of the Newcomen Society. This society, which was founded in Birmingham, England, at the Watt Centenary celebration in 1920, was founded to foster study of the history of engineering and technology. Membership in this society is open to anyone interested in technology and engineering.

The topic of his address is one on which he is an acknowledged authority. As a supplement to his talk, he will show a film on the Royal Scottish Museum.

Dr. Phillip Fox, director of the museum, in a letter to President Heald extended an invitation to members of the Armour faculty or of the student body who are interested, to attend.

AURORA CO-OPS

(Continued from page one)

They are: Ben E. Kallevik, third year Co-op in group A, and Bob Schmitt, third year Co-op in group B. While one president is attending school, the other will be in industry and will be in charge of selecting and inviting speakers and calling meetings. Under this plan, the presidential duties will not interfere with the student's school work. Another advantage of this system is that the officer at work will have more time and be better able to contact prospective speakers.

Mell Selected As Faculty Advisor By Student Arx

Scarab, Armour's architectural fraternity, held a meeting at the Art Institute last week at which Professor Mell was elected as faculty adviser for the current school year. Along with the new regime, Scarab has decided upon an entirely different program than that followed in past years.

It is following the custom of monthly meetings, at which a well-known speaker will talk on subjects of particular interest to the members. As has been another custom in the past, the Annual Scarab sketch competition is now being held. A prize of a one-year's subscription to Forum, the architectural magazine, will be awarded the winner.

Eight Ch.E.'s Pledged by Alpha Chi Sigma

The pledging of eleven men culminated the smoker held October 14 by the members of Alpha Chi Sigma, the professional chemical engineering fraternity. The men pledged are: George P. Baumann, Ch.E. '41; Casimer L. Bigos, Ch.E. '40; Harold A. Doolittle, Ch.E. '40; Sidney A. Heeman, Ch.E. '40; Donald W. Long, Ch.E. '40; Robert J. Mead, Ch.E. '41; George W. Minard, Ch.E. '41; Henry R. Newman, Ch.E. '40; Lloyd W. Norkus, Ch.E. '40; Edward Post, Ch.E. '41; Henry Wessel, Ch.E. '41.

The Illinois, Armour, and Northwestern chapters will unite in initiating the new men. The Armour group will motor down to Urbana.

The annual Alpha Chi Sigma essay contest will be run as in the past on the subject, "Why Choose Chemical Engineering?" The essay is to be not longer than 500 words. Selections of the outstanding essay will be made by three members of the chemical engineering faculty. The prize will, as usual, be a chemical handbook. Interested chemicals should begin work on their themes at once, since the deadline is the 18th of November.

Have you noticed that worried look on the seniors for the past week? Maybe they're working too hard, maybe . . . No, no, it couldn't be that, maybe it's 'cause winter is coming on, maybe it's Johanson . . . Well, I hope they'll pull through. Good luck, fellas.

It seems as tho the sophs have got the frosh worried also. Quotes young "Mike": The frosh is worried about the coming initiation. Unquote. Hah, activity. Ye Armour Arx Initiations are gala occasions. The date is to be about two weeks from now. It is rumored that there will be a good get-together after the fun.

Faux-pas of last week: The printer left out of the column the item stating that Mrs. Rodgers, Mrs. Mell, and our own dear Mrs. Sanders (how's that?) also attended ye Armour Arx dance.

Did you know that Hutton is in this month's issue of Esquire? He is! The fame of Armour students spreads afar, unquote.

The Beaux Arts Ball is coming soon, in fact some of the friends of the Arx are getting ready for it now. Mrs. Sanders has already written a letter to Mae West asking for one of her costumes in "Diamond Lil." Yes, our librarian is going to vamp the boys with: "Com up'n see me sum time." mmm, mmm. . . . Hutton's going as a Hoosier Hot-Shot, I hope. It sounds good anyway.

Love-nut: We hear it's the real thing with Pointek; her name's Margie.

Adv.: Ye Arx News will help you out with your girl. Have your name and her name linked together in "Love-Nut." Of course there will be a \$5 service charge to cover mailing, paper, etc. See

BOZ-ART.
