A.T.S.A. Board Announces Vote to Be Taken Soon on Amendments

Student Officers Also To Be Elected

At the latest meeting of the A.T.S.A. Board, it was divulged that election of officers and a vote on proposed amendments will be held soon. The preliminaries are scheduled to be held on Tuesday, May 14 and the finals on Friday, May 17. Balloting will be permitted from 9:00 a.m. to 2:00 p.m. on each of these days.

In the election, one junior is to be chosen for the office of second vice-president, one sophomore for the office of first vice-president, and one junior for the office of secretary. The sophomore elected for first vice-president will automatically become president in his senior year.

Anyone Eligible For Office

According to the A.T.S.A. constitution, anyone can run for office provided that he submit his name to one of the Board members (Jack Clark, Dick Larsen, Clay DeMont, Fred DeMoney, Roman Mankus, and Rocco DeStefano) or to the Registrar's office and also all within the above classification. In the primaries, two candidates will be chosen to run in the final election. In case of close balloting, a difference of at least 3% must exist between two successive candidates before one is eliminated.

Vote on New Amendments

Besides the election of officers, a vote will be held on two newly proposed amendments. The first proposal is that the faculty representation on the Board be cut from two to one. If this amendment is passed, student influence on the A.T.S.A. Board will be increased considerably. The second proposal is that two Co-op representatives be placed on the Board. One of these would be a 5th

Students Plan Chem Exhibits In Open House

Striving to outdo each other in public appeal, the departments of general, organic and physical chemistry have arranged spectacular displays and interesting demonstrations which bid fair to become outstanding attractions of Armour's Open House this year. With Professor Benjamin B. Freud in charge, the department of chemistry has placed responsibility for the success of open house more directly upon the shoulders of students than has formerly been the case.

Directed by Dr. William L. Wasley, the organic chemistry exhibits will be coordinated by student manager George Orescan and are to be divided into two main divisions, chemical experiments performed by students, and industrial exhibits of plastics. The themes of the industrial exhibits will be "Giant Molecules" as exemplified by plastics and "Chemical Giants on Parade."

Because of the large number of industrial concerns interested in Armour Institute, that portion of the program will feature many new and unusual products such as Lucite, a solid rod, which will conduct light around various twists and bands in an amazing manner. Among the many companies contributing are DuPont, Dow, Catalin Corporation, Carbide and Carbon, American Viscose Corporation, Eastman Kodak Company, Bakelite Corporation, and Chicago Molded Products Company.

Varied Experiments

In the organic section as in other sections more students have volunteered than could be used efficiently. Out of these have been chosen committees to take care of fire protection, traffic control, programs, lighting and wiring, decorations, experiments, signs, and commercial displays, as the students have preferred, when possible.

Assistant Professor Maurice J. Murray, directing the inorganic or general section, has also arranged a large number of interesting experiments, featuring, especially, various

(Continued on page four)

Players to Present Room Service Sat., May 4, in Union

Next Saturday night, May 4th, the Armour Players will fire the gun opening Junior Week festivities. As the day grows closer the cast is becoming more polished and promises to go off without the slightest hitch. With over two hundred sixty laughs the audience is in for a very hilarious evening. This last week is being devoted to closed dress rehearsals. All indications have it that Room Service will be a better production than Brother Rat because of more experienced actors and technical men. The set is rapidly becoming a reality as Edward Wierzbicki directs a skillful crew. In this set the Players will have a new type wallpaper background and should attract a great deal of favorable attention.

Seating Arrangements Altered

The seating arrangements have been altered considerably with the elimination of one hundred sixty "lemon" seats. These seats are not to be sold under any circumstances. Tickets can still be acquired from several of the actors who have been holding them out for the late purchasers. Room service is a cinch to be a complete sellout so the last tickets are bound to be snapped up immediately.

New Names in Cast

Several new names will appear on this year's production and show much promise in becoming mainstays of future plays. This group includes Phil Roarke, Clarence MacDonald, Mort Lowy, and Laurie Donoghue. The rest of the cast include Rocco DeStefano, James Duncan, Hugo Geissler, Albert Sanowski, Robert Underhill, Walter Kahl, Steve Wasilenko, and two very attractive young ladies, Rosemary Mulvihill and Helen Ruoss.

Director Charles Schultz and Assistant Director Art Minwegen deserve a great amount of applause for providing a fine play and bringing out the best in each player involved. To top off a fine evening Don Charlton and his band will entertain for two hours after the show. Remember now this is the starting gun for Junior Week; be there and enjoy yourself.

A.I.E.E. Smoker Shows Movies

On Thursday, last week, at the presentation of Professor D. P. Moreton's technicolor film and the pledging of three junior and one senior electricals, the Armour student chapter of the A.I.E.E. conducted its annual smoker for the school year. Practically the entire personnel of the electrical department, both students and faculty members were present.

Professor Moreton's pictures were those taken on an extended three months trip through the southern portion of the U.S., into the Panama Canal Zone and the northerly portions of South America. The photography was exceptionally good, and supplemented by the lecture proved particularly fascinating regarding the T.V.A. pictures and those of the New Orleans' Mardi Gras.

HKN Pledges Four

At the conclusion of the film, refreshments were offered during the serving of which, Eta Kappa Nu, honorary electrical fraternity announced the names of Messrs. L. W. Holmboe, C. E. Durkee, H. V. Dryer and Alfred Faulkner as pledges to its organization.

Student chapter A.I.E.E. activities will continue this week Thursday, May 2 at the Chicago chapter's annual informal dinner smoker in the Grand Ballroom of Hotel Knickerbocker.

Civil's Classes Dismissed For A.S.C.E. Meet

Since Armour Institute is to be host to the third Midwest Conference of the student chapters of the American Society of Civil Engineers, all sophomore, junior and senior civil engineering students will be dismissed from classes on Friday, May 3, and Saturday, May 4, with the provision that they be present at the conference.

All those attending will be asked to register on Friday morning at 9:30, on the second floor of the Student Union building. The meeting will then be called to order in the Assembly Hall by the presiding officer, George P. Hanna, president of the Armour Chapter of the A.S.C.E. Following this will be a welcome by President Heald of the Institute, after which business will be transacted.

Subway Subject of Talk

Eugene S. Tailor, engineer of the Chicago Plan Commission, will then speak on "Land Use Survey," succeeded by Dick Van Gorp, assistant subway engineer of the design section of the Chicago subways, who will speak on "Building Chicago's First Subway."

At 12:15 p.m., a Junior Award Luncheon will be held at the Chicago Engineers' Club, 314 South Federal Street, and at 2 o'clock, the

(Continued on page four)

Freshman Hop Great Success

Initiating its social life at Armour, the class of '43 staged a remarkably nice dance. Conviviality and good music combined to heighten the effectiveness of the ballroom. As is well known, the floor of the Knickerbocker's grand ballroom is made up of lighted glass panels. When these lights are alternated in tune to the rhythm and mood of the music, the results are very pleasant.

A liberal amount of South American music, a feature uncommon to most Armour dances, was a noticeable characteristic of Pearson Thal's playing. His style was versatile and wholly pleasant.

Congratulations are indeed due to John Peterson and his social committee for their very successful dance.

Although the dance floor was not too crowded, the difficulties caused by Art Hansen and his little truck were numerous. After being primed by these shenanigans, the senior mechanicals performed a snake dance all around the room. About midnight, a large number of coops acquired ten gallon hats displaying the word "Coop." In addition to these decorations, the stage was adorned by a quaint little green haired doll whose services were donated by the senior mechanicals.

Three Editors At ICPA Meet

Officially representing Armour Institute of Technology and the Armour Tech News, four important staff members of the Tech News attended the Illinois College Press Association annual convention at Mac Murray College, Jacksonville, Illinois, last Friday and Saturday.

Peter H. Woods, editor-in-chief, Fred De Money, sports editor, William Speth, business manager, and Tom Brown, assignment editor, taking sort of a busman's holiday contributed a number of their snappiest plans and ideas to the association's round table discussion. In return, they received from the representatives of a large number of other Illinois college papers many suggestions which may improve the Tech News. Two different "dates" were also arranged for each of the boys, so that besides gaining new knowledge of advertising tricks and special methods of organization they also had a good time.

Johnny Gilbert To Play for Junior's Climaxing Jamfest

Beautiful Westward Ho Country Club has been selected as the site of the Junior Informal Dance to be held on May 10. Westward Ho is located at Wolf Road and North Ave.

Close to City

Selected because of its proximity to the city and the ease with which it can be reached by the majority, the Country Club also has convenient, lounging, and parking facilities. The unique arrangements of the ballroom, adjoining dining room, and screened veranda at one end of the floor provide an enjoyable evening whether the weather be clement or stormy.

Music By Johnny Gilbert

Couples will enjoy listening and dancing to the smooth music of Johnny Gilbert. Bids will be unique in not only their design, but in their utility.

One of the highlights of Junior week will be Open House, on Tuesday and Wednesday, May 7-8, with dancing in the auditorium after the exhibits Wednesday night. Interclass and interfraternity events will take place on Thursday and Friday, with the Class Rush on Friday afternoon.

Surprise Kept Secret

On Friday morning, May 10, at 11:30 on the creeping bent of Ogden Field, as announced by members of the committee in charge of Junior Week activities, will be presented one of the more amusing and probably more riotous events of the entire holiday. To the freshmen and sophomores, the committee "ain't sayin'" to the juniors, "come and see it"; to the seniors, "don't miss it."

Through Mr. Frank Pfeffer, head junior marshal, the committee in charge of preparations extends to members of the student body and faculty a cordial invitation to participate in the varied activities of junior week. Particularly so does the invitation apply to all members of cooperative classes. Previously, it was found that coops refrained from direct participation in events proper, but through a renewed invitation it is hoped that a better understanding and friendship will thereby be accomplished.

SCHEDULE FOR JUNIOR WEEK

Tuesday, May 7

1:00 P.M.—Pentathlon.

Prospective Freshmen Will Vie For Ten One-year Scholarships

Armour and Lewis Merger Decree Is Almost Completed

With the announcement that the legal decree ordered by Judge Jerome Dunn, in the case of the Armour-Lewis merger, is rapidly nearing completion, comes high hopes that the haze surrounding the merger will be cleared up very quickly. The decree, ordered as a condition for settlement of the case, is a paper containing the course of action which fulfills the condition imposed by the courts. In other words, with the completion of the case, all problems which may have hindered the progress of the merger will have been wiped aside.

The decree will probably be presented to Judge Dunn within the next week for his approval. Meanwhile, the trustees of both schools are scheduled to meet to plan some of the more advanced merger details. With the removal of these obstacles, plans for the new school will be rushed to completion.

Dance Club Social To be Held May 3 Surprise Promised

Once again Armour's Dance Club will celebrate the conclusion of a very successful season by staging their big social in the auditorium of the Student Union. The doors will open on the event at 8:30 p.m. on the evening of Friday, May 3. Don Charlton's orchestra will furnish the musical background.

Dating Bureau Available

If tickets are purchased in advance from members of the organization they will cost 40c per couple. For the convenience of those men who would like to be supplied with a date, the dating bureau, under the chairmanship of Milton Peva, will take care of the deficiency. Mr. Peva's bureau has a file of over one hundred girls and requests that those who want to make use of his service, contact him immediately.

Among the entertainment features of the evening will be an exhibition dance by a professional dancing couple. Other features will be announced on the evening of the affair. A special surprise has been promised by the club executives. For further details, attend the dance.

Meeting Wednesday

The social is open to all members of the dance club and all of their friends. A meeting of the club is slated for tomorrow at 5:10 p.m. Final arrangements for the dance will be consummated at this time and Mr. Peva will be on hand for details on his dating bureau. Complete attendance of Dance Club members is urged because tickets for Friday eve will be distributed.

Dean Grinter Writes New Book on Design By Automatic Method

Automatic Design of Continuous Frames in Steel and Reinforced Concrete is the title of a new book by Dean L. E. Grinter. This is the third book which Dr. Grinter has published during the last three years.

After a prolonged and continuous study and experimentation for a period of six years, Dr. Grinter goes a step farther in the automatic design method by giving the size of member immediately. Engineers will find in this new book a quicker and easier method of design; the book also contains a rather complete coverage of modern concepts of designing for continuity.

A short review of the above can be found in the publication—Engineering News Record of Dec. 21, 1939, page 72 and which is now available in the school library.

Exams Also Given at Nearby Rural Schools

Saturday, May 4, a host of high school seniors and February graduates will present themselves promptly at nine o'clock in the morning for the purpose of having their minds and memories stripped of worldly haze and subjected to dissection by Armour's faculty. The ten survivors will receive full tuition scholarships at Armour Institute for their freshman year. These men are required to take a three hour written examination which has been devised by the concentrated efforts of seventeen of our professors.

Personal Interviews Given

Since March 25 these prospective 'frosh' have been interviewed personally by the examination staff. The awards will be made on the basis of the personality as shown by these oral quizzes as well as on the basis of the more easily tested mental ability as shown by the exams. The object of these tests is to ascertain that the highest type of men will be selected as recipients of these scholarships.

The examination will aim directly at measuring the candidate's ability in mathematics, physics, and chemistry. In connection with the chemistry requirements include an essay on some phase of the subject. From this essay a grade in English will be determined.

Examinations Given in Rural High Schools

Due to the fact that a great number of men desirous of participating in these examinations are widely distributed over the country, arrangements have been made for these men to take the examination under a duly assigned examiner—in many cases the principal of the high school. This removes any chance of the tests being geographically selective and encourages competition by applicants from far corners of the nation. A considerable number have applied for this modification of the requirements.

The committee in charge of the scholarships is headed by Prof. S. E. Winston. Cooperating with him are

(Continued on page four)

Senior Closed Dance Will Be at Westward Ho

Eugene Worcester and members of the senior social committee are formulating final plans for the annual Senior Closed Dinner Dance, which will wind up the Armour social affairs for the graduating seniors. This year's event is scheduled for Wednesday, June 5 and is to be staged at the exclusive Westward Ho Country Club, also, incidentally, the scene of the Junior Informal.

Since the affair is to be open to seniors only, the committee requests that all those planning to go please fill and tear out the enclosed application blank. The cost of a bid will be approximately \$2.50, but this will vary with the number who turn out. Definite plans can be completed if the seniors will co-operate and answer before May 3.

Band Not Yet Chosen

The orchestra for the dance has not, as yet, been selected, but the group has under consideration, some of the younger, up and coming, 'bands of tomorrow.' Within the portals of the outstanding atmosphere of Westward Ho, the combination of a young band, beautiful surroundings and a small crowd can not help but leave an everlasting memory in the minds of those seniors who will be attending their last dance at Armour Tech.

All seniors planning to attend the senior closed dinner dance at Westward Ho Country Club, Wednesday night, June 5, at a proposed cost of \$2.50 per couple, please sign below and return to E. H. Worcester or members of the Social Committee not later than Friday, May 3.

A Graduate Returns

The other day we were introduced to an Armour graduate who has for four years been a stranger to the Campus. He expressed extreme amazement at the changes which have taken place during his absence. "I can hardly believe it's the same place," he said, and putting ourselves in his position we can understand what he meant. Who in 1935 could picture spacious administrative offices resplendent in glass brick and chromium? Who could visualize clearly a Student Union building devoted entirely to student relaxation and recreation? Even the exterior appearance of the buildings has been altered by tasteful landscaping of grounds.

Renewed Pride

We do not intend to dwell on the material improvements evident to the graduate of five years ago, but rather on something else he said of much deeper significance to us. The young man found after a day on the campus that there was something else besides the improved facilities, something which he felt was of tremendous importance as an indication of Armour's future. He found it difficult to put this idea into words but called it a "re-awakened self respect" of the Armourite for himself and a "renewed pride" in his school.

Combined Effort

A combined drive from all of our scholastic family has succeeded in putting the name of Armour Institute before the nation in a new and creditable way. Not only do we now receive the respect of the public at large, but we are realizing the benefits of a sound working policy with industry. Our Co-operative course, now in its fifth year, has done much to link our endeavors more closely to industry. Our rapidly expanding Research Foundation is proving a great boon to our public-standing. The truly amazing assembly of distinguished authorities in various engineering fields scheduled to conduct classes in our new summer school this year are already producing great interest among progressive engineers and industrialists throughout the Chicago area.

Solution Near

The one great obstacle yet to be surmounted, that of securing and utilizing a campus more nearly suitable to the stature of an institution such as ours does not look nearly so immense as it did five years ago. The progress of the Armour-Lewis merger is being watched with much hopeful anticipation. Somehow, the Armour man feels that his school is "going places" and at a rapid rate.

Open House

However, this does not mean that the long climb is over and that we can now travel in luxury in our speed elevator. On the other hand, we have many new obligations. Now that we are established in the public and industrial mind, we must make every effort to prevent a let down; we must maintain an increasing respect for all activities of the school. This problem must be tackled in a number of ways.

Our public displays, notably the impending Open House exhibit, must be flawless, must have that elusive element of clever advertisement and yet retain a strong backbone of basic science. Our graduate school must continue to grow in a scholarly manner, and faculty and students must be prepared to take on increasing duties in technical societies and intellectual movements both inside and outside of school.

"The Slipstick"

Cleave to "The Slipstick"; let the Slapstick fly where it may

It won't be long now. Nope, in another week, you will see the bodies of innocent freshmen strewn up the grassy landscapes. Little do these sugar dumplings realize the fate that awaits them next week. Amen.

"Ma! Ma! A big truck just ran over Pa and squashed him all over the street!"

"Junior, how many times have I told you not to talk about such things while I am eating."

BUT DOROTHY

O, MLE, what XTC
I always feel when UIC,
I used to rave of LNS eyes,
4 LC I gave countless sighs,
4 KT, 2, and LNR,
I was a keen competitor.
But each is now a non-NTT,
4 U XL them all UC.

Irate Co-ed (walking against the sun): "Hey! Why are you following me all the time? Didn't you ever see anyone like me before?"

Freshman: "Yeah, but I had to pay a quarter before."

They call him Luke because he isn't so hot.

While doing a little work the other night one of these so-called friends walked in. "Whatcha doin'?" sez he. "Writin' a joke," sez we. "Give her my best regards," sez he, and walked right out again.

A young Swede workman got a job as a carpenter's helper. The first morning the boss gave him a two-foot rule and told him to go and get the measure of a long board. In twenty minutes the newcomer returned.

"Well," inquired the boss, "how long is it?"

The young apprentice displayed a satisfied grin.

"Well," he said, "she ban just eight times de length o' dis rule, an' two thumbs over, with dis har brick, an' de width o' may han', an' may arm from har to dar, all except de finger nails."

I calls my gal Double-Mint because she's so Wrigley.

Blessings on thee, little girl,
With your dimples and your curl,
With your short skirts shorter still
'Spite the blust'ry April chill;
Little fore, and less behind.
Honest isn't nature kind?

OH MY

Chorine—Gee, I must remember to take my costume along to rehearsal.
Producer—Honey, just a little string around finger.
Chorine—Oh, so I won't forget?
Producer—No, that's your costume.

Encore

He: "Why is it that the most important men on the campus get the prettiest girls?"
She: "Why you conceited thing."

Dedicated to C.P.P. 859
I envy you little lightning bug.
You worry not a bit,
For when you see a traffic cop,
You know your tail light's lit.

"My brother looks down on nudists."
"You don't say so."
"Yeh, he perches in trees."

A man of six feet eight inches applied for a job as life-guard.
"Can you swim?" asked the official.
"No, but I can wade to beat the devil."

A farmer visiting his son's chemistry class was told they were looking for a universal solvent. "What's that," asked the farmer, "A liquid that will dissolve anything?" "That's a great idea," replied the farmer, "when you find it what are you going to keep it in?"

He—"Darling, I can't give you anything but love."
She—"Well, hurry up; let's have it!"

"I'll see you," said our hero as he laid down four aces in a strip poker game.

Captain: "So you're going to spend the rest of the afternoon in a steamer chair?"
Passenger: "Why, yes, if nothing comes up."

The girl was mad and called him mr.
Because in fun, he merely kr.
And so for spite
The sappy mr. kr. sr.

Lena—Gee, but that date was fresh last night!
Sadie—Why didn't you slap his face?
Lena—I did, and take it from me, sister! Never slap a guy when he's chewing tobacco.

Girl: "Don't make me yawn."
Boy: "My name ain't Yawn, it's Yim."

"Say, is she a sorority girl?"
"Gamma Phi know!"

Speakin' of nothin' Why should a traffic cop, after winning such a swell race, seem so mad about it.

OH MIN!

By Charles I. Ball

Henry Shull, senior at Northwestern University, has paid all his expenses in college by winning contests of every type from cross-word puzzles to endorsements. He has entered over 300 contests and won 60 prizes totalling a cash equivalent of \$3,500. The prizes won by this energetic fellow included such varied items as women's hosiery, a trip to Mexico City, six cans of tuna fish, and a Packard Automobile.

The average college student gets the most hours of sleep on Tuesday nights.

Short but sweet:

Son to father: "No mon, no fun, your son."

Father to son: "How sad, too bad, your dad."

A CIB survey has found out that students in eastern colleges work 70% of the time and loaf 35% of the time they think they are doing school work. The extra 5% of loafing must really be a luxury.

A student in a southern university noticed angry shouts as he drove his car away from the curb, but he looked back and saw nothing. A mile farther on he became aware of a persistent horn blowing. Stopping the car, he got out. So did the driver of the midget car he had unknowingly towed after their bumpers had become locked.

The social pathology class of Kansas State Teachers College made a field trip to the Lansing, Kansas state prison to see if they could discover any difference between the people inside the walls and those outside.

For \$2.50 you may attend the De Pauw University Senior prom which will be held in the school's tennis courts. If it rains you can dance in the gymnasium.

Many colleges and universities throughout the United States are holding mock national political party conventions this month.

"Our Town" by Thornton Wilder seems to be the most popular play being presented by colleges right now. Maybe this is in the interests of economy because the play has no scenery.

CO-OP NEWS

E. P. Hanuska

Joe Olchawa 4B has plenty of reason to strut his stuff these days. The results of a turbulent election of the junior class last Thursday made Joe the Co-op Junior Marshal. He will take his place with the other departmental Junior Marshals in directing the activities of Junior Week.

The boys were calibrating a weir. Listen: "The level is too high, Hayes. . . . Now it's too low. . . . Haven't you any judgment? . . . My God! man, we'll never get out of here by one o'clock. . . . O.K. now. . . . What's the weight, Hanson? . . . Got it, Erickson? . . . 20 seconds, 10 seconds, o.k. switch the tanks, Hanneman. . . . Watch out for your feet!! . . . 1700 lbs., left. . . . Is it empty yet, Hanson? . . . 30 seconds to go. . . . Hurry with that valve, Hanneman! . . . 25 seconds. . . . Watch that scale, Dudley. . . . 15 seconds. . . . &\$!"; Weir are you going Erickson! . . . 10 seconds. . . . The water—it's coming too high, YOW! Man the pumps!" Boy, what a day.

Notice of the formation of a general discussion group, the "Wranglers", will be made to all the classes today. The sole object of the organization is to encourage and foster the development of public speaking among its members. An engineer should be able to speak with ease and assurance before any type of audience and Wranglers offers serious Co-ops a chance to cultivate just that type of manner.

Aside to our Profs: Mr. Perry, you're not the only one who has a class that just f-a-l-l-s asleep. . . . Dr. Perlis, you'd be a lot more popular with your freshman class if you'd arrive on time and dismiss them promptly at 5:00 P.M. . . . Dr. Davey, if rooting for your Boosters helps to keep your brain cells as sharp as they seem to be, then don't be surprised if we join you at their next game. . . .

As a token of their warm affection for Henry Heenan who is at present confined to the Municipal Tuberculosis Sanitarium, the junior class presented him with a gift in the shape of a pair of leather slippers. . . . For a surprise, ask President Whittingham to tell his "Rosalie" story. You're sure to draw an icy stare. . . . The sophomore class has decided to buy grey sweaters with red emblems. . . . We understand that the "Conclusions" of Bobco's mech lab reports are packed with dynamite. . . . Grand Rapids, Michigan holds a powerful influence on Vern Parter 5B. He goes there every week-end, but that "cousin" story won't hold water. . . . Mr. Cowie gave the pre-juniors a frightful scare last Friday. He had them sweating, and we do mean sweating, over a stingeroo of a quiz for an hour and a half, and then told them it was just for practice!

Wie geht's Amigos. . . . The Shovel has nothing but abject and profound apologies to offer for the misstatement of last week. We announced that Spring was here and flourishing. We were definitely wrong. . . . Spring is here but is in a coma. . . . The slush rolls on and on. . . .

All the boys who patronize that "Shimmy Shack" across the street from Goldblatt's will sympathize with us on "Mo" Bell. Mr. Bell, founder of the Nobel prize, met with one of our local constabulary, who presented him with a gentle reminder (cost \$2.00) that one must not park in front of the "Hub" while gazing at the undulating Amazons. . . .

We have it from a very unreliable source that the boys on the Frosh dance committee really had a time last Friday night. "Pee Wee" Peterson and "Onions" Cibula were reported seen kicking in windows all along Michigan Avenue.

That peculiar fellow Byron "Amorous" Ellis has a peculiar faculty of getting his name into this blurb. . . . Scene in the Armour Grassy Spoon. . . . B. E. playing a miniature sweet potato midst a shower of pennies tossed by understanding and sympathetic fellow stoogeists. . . . The take amounted to 2 (yes I said 2) cents . . . a profitable business eh what. . . .

Last Friday night, Dorothy Kennedy, you still remember her as the heroine in the two last Armour productions, "Captain Applejack" and "Brother Rat," slayed the audience again as Miss Shea in the Southtown Theatre Guild's play, "What a Life." Atta girl, Dorothy!!

The "Smoky Joe" Marin and "Dutch" Schultz have been staging a race to see who can leave the Mechanics class first. . . . Due to past performances "Dutch" is now odds on favorite but "Doc" Marin has been pulling up fast in the stretch in his last few races and is about ready to cop a sprint. . . .

The lads are just waiting for this honeybunch belonging to Bob Jensen to appear on the scene. Yeah men! So is we. Reason: The little gal who answers the name Betty was just selected the May Queen at Florida State College for Women. By the bye, over 1800 co-eds attend the school.

Johnny "Women—they're the downfall of every man" Butkus showed up at the Civil Party last Wednesday night with a peacherino named Mildred. From the reports, Johnny isn't a slow worker either, if'n you know what we means.

Another two-some that resulted from the casting in "Room Service" is Brother De Stefano and Helen Ruoss. Rocco is making dates three weeks in advance mind you. Ain't love grand, though.

Speakin' o' the Civils Party before, it's a known fact now that "Wolf" Eliason is quite a ladies' man. In spite of this fact, he still left the party unaccompanied. Tsk. Tsk.

Take up room at Room Service
We'll be looking for you.

Prof. Cleveland had a written vote as to whether the lads in the class were in favor of attendance being taken every day or not. . . . The result much to our amazement read something like this. . . . No, No, No, No, a thousand times No, and away down at the bottom of the page was a single and solitary yes. . . . The person has as yet not been apprehended but a score of handwriting experts have been called in and an arrest is promised in 48 hours. . . .

Very Soggy and Good Pie.

Arx News

This pre-open house period known as ye Arx lazy week (oh yeah!) has finally caught up with us. . . . Such industry. . . . such diligence. . . . in fact, Pointek is so busy making his model that he is doing it at home to save time spent on the "L". . . . Tough, too, with Pehta claiming Pointek's recent actions have definitely established that spring is here. . . . Another sign is that the frosh freehand class was held outdoors. . . . amid the trees and bees, etc. . . . The sophs turn out en masse for baseball every noon. . . . The juniors tried it but the next day stiffness banished any further thoughts of baseball for a while. . . . Which just goes to show that they work too hard. . . . Hutton, Horton and Mandel (the silent partner) are building a model of "How Kenasha should be" by "In Another World" Goldsmith and Monson who incidentally took a certain prof. by surprise by coming to class protected from the glare of. . . . what?

Chief in the talk of the Arx Social is the loud suit Salz showed up in. . . . Junior Marshal Dodge has been fidgeting with his tie lately, due to some remarks of the past social. . . . The seniors have challenged the juniors to a baseball game some time after open house. . . . The juniors claim the seniors rank amateurs. . . . The seniors think different. . . . The best part of the challenge seems to be Mr. Dornbusch's offer of refreshments after the game. . . . So, pencil-pushers, adieu for another million lines.

SPECS.

Boosters Upset Senior Chems; Comets, Junior, Senior Mechs Win

Senior Mechs Win Two, Comets Shut Out Junior Chems

Two startling upsets of highly touted teams occurred in this week's softball games. The Davey Boosters upset the Senior Chems 1 to 0, and the Freshman Comets beat the Junior Chems 2 to 0. Both of the Chemical teams had exhibited prodigious power in previous games and were considered potential tourney victors.

Pollack Singles

In their game, the Boosters scored a run in the second inning on a sharp single by Russ Pollack, driving in Wally Gow from second base. Gow had reached second on an error by the Chems. The umpire called him out when he slid into second, but Doctor Davey through the use of his glib tongue forced a reversal of the decision.

Pitchers' Battle Wages

The game then evolved into a pitcher's battle between Jim Fahey of the Chems, who allowed only two hits, and Marius Silla of the Boosters, who allowed but three hits. Although the score was close, the Chems were decisively outplayed by the Boosters who fielded flawlessly while the Seniors were making six errors.

Comets Beat Junior Chems

The Comet-Junior Chem game also appeared to be a pitchers' battle, the game being scoreless after five innings of play. But in the first of the sixth, the Comets broke loose and scored two runs to supply the margin of victory.

Mechs Beat Coops

The favored Senior Mechs overwhelmed the 3B and 2B Coops by scores of 10-2 and 11-6 respectively. The Senior Mechs obtained their runs in clusters by grouping a barrage of hits and taking advantage of the Coops' miscues. The Mechs came through in fine style with timely hitting, fine fielding, and superb work by moundman Epstein. It is becoming evident as each game is played that the team winning the tournament must first topple the Senior Mechs.

Obergfell Hits One

In spite of the poor showing the Junior Mechs won their game with the Senior Fire Protecs by a score of 7-6. In the first inning, the Mechs scored one run by a double by Stoolman. Errors by the Mechs gave the Firemen the lead in the second by three runs. Behrens, after turning the tide with a double into right field, was brought in on a hard single by Stoolman. Obergfell, with the bases loaded and two outs, drove a very hard liner into left field which enabled the Mechs to score two runs.

Softballers Drop Opener to De Paul

Armour's softball team dropped its opening game with DePaul, last Friday by a score of 8-1. DePaul coupled thirteen hits with some ragged fielding on the part of the Techawks, to hand Armour its first loss in the college softball tourney. DePaul practically batted around in this half of the first inning, getting four runs on two doubles, a triple, and an error. Armour went out in order in the last of the first, as did DePaul in the first of the second inning.

Wolniak got the first of his two hits in the last of the second and Stimpf followed with another hit, but no score developed as Puhl ended the inning with an infield out. DePaul added a run in each of the third, fourth, fifth, and sixth innings to total the eight runs. Frank Pfeffer, playing right field for the Techmen, batted out two hits, one of them being a home run over the left field fence in the third inning for the lone Armour tally.

LAST WEEK'S SCORES

Sr. F. P. E., 7; Jr. C. E., 4.
Jr. Ch. E., 11; 4B Coops, 1.
Technologists forfeited to 1B Coops.
Comets, 2; Jr. Ch. E., 0.
Sr. M. E., 10; 3B Coops, 2.
Jr. M. E., 7; Sr. F. P. E., 6.
Soph. Ch. E., 11; Sr. E. E., 5.
Soph. E. E., 12; Soph. F. P. E., 4.
Sr. M. E., 11; 2B Coops, 4.
Nameless Wonders, 6; 1B Coops, 5.
Soph. C. E., 9; Jr. C. E., 0.
Boosters, 1; Sr. Ch. E., 0.
3B Coops, 9; Jr. M. E., 2.
Soph. M. E., 3; Buzzards, 0.
Nameless Wonders, 5; Sr. C. E., 3.
Jr. M. E., 5; 2B Coops, 0.
Meechs forfeited to Jr. E. E.

By Art Hauswald

Since Fred DeMoney attended the College Editor's Conference in Jacksonville last week end, we assumed the responsibility of turning out the sports page this week.

One of the biggest surprises of the week in the softball tourney was the Senior Chem's loss to the Boosters last Thursday. It was the third game the Chems had lost in three years of tournament play. Lloyd Norkus and Jim Fahey of the Chems played on the freshman team which won the softball tourney in 1937. Eggers, Lurz, Wolniak, and Rehwaltdt are some of the men who played on that team which lost their first game, 1-0, and then went on to win the tournament.

We wonder why the entries for the spring tennis tournament have been coming in so slow. This year for the first time the winners are to get medals. First and second place winners are to get gold and silver medals, respectively. Everyone is eligible to enter the tourney, except those who have won letters in tennis here. Entries close this Friday, so how about signing up?

Ed Krause has certainly been smacking that ball for the Techawk nine. To date he has an average of .450, cracking out nine hits in twenty trips to the plate. Six of those nine hits were driven out in the last two games against Elmhurst and Lake Forest.

Waistlines—Martin Mongeau, Techawk trackster, who piled up thirteen points in field events against Morton, looks like new hope for the track team, for he is only a freshman... Hope Red James' actions at the Lake Forest game cast no reflections on the rest of the Armour

Netmen Score First Victory

The netmen evened up their meet standing with a victory over George Williams, 4-3, last Wednesday on the Midway courts. The Techawks took three of the five singles matches while splitting the two doubles matches. Nick Natinchek and Bob Lange were the George Williams' victims in the singles and doubles losses.

Natinchek Loses Singles

Natinchek, playing No. 1, lost the first set to Manire, 6-8. Nick came back to take the second set, 6-4, but dropped the third set, 6-2, being handicapped with several blisters on his hand. Lange, at the No. 2 spot, was defeated by Behrens in two straight sets, 6-0, 3-6.

Wagner Gets Win

Captain Ralph Wagner came through with his first victory of the season, defeating Simpson by taking the second and third sets of their match 6-3, 6-3, after dropping the first 3-6. Schultz, playing No. 4, beat Clark in straight sets 6-2, 3-6, while Dunworth won easily over Moline, George Williams' No. 5 man, 6-1, 6-1.

Win No. 2 Doubles

Natinchek and Lange, playing No. 1 doubles, lost to Behrens and Manire, in two straight sets 5-7, 0-6. Shultz and Wagner teamed up to beat Christie and Simpson, 6-2, 6-3.

Play DeKalb Today

This afternoon the netmen take on DeKalb on the Midway courts in the first of two encounters scheduled for this season. Tomorrow afternoon, on the Midway courts, the Techawks will play Loyola. Last year the racketmen lost two meets to Loyola, 6-1 and 4-3, but perhaps they can turn the trick this year.

... Red refused to pitch to catcher Rehwaltdt... What about the third semester boys who are still playing with the Boosters?... Player, freshman left hander, looked pretty good against Lake Forest... Wonder why the rifle team lettermen aren't invited to the athletic banquet?... It's a major sport now.

Techawks Lose to Cardinals, 3-2; Lake Forest Whips James, 6-2

Errors Give Foresters Advantage Over Tech Nine

Lake Forest finally solved Red James' curves and plastered him unmercifully for six hits to defeat Armour 6-2 last Wednesday. The Techawks helped the Foresters' cause along by making three errors and but five hits. The game was played on the grassy plains of the suburban school.

Krause Gets Single

Armour waited until the good old seventh inning to go into action. In that inning, the Stengermen scored their only runs. Rehwaltdt opened the inning and reached second on a bad peg by the third baseman. Krause then rifled one of his three hits and sent Rehwaltdt home. Krause later scored on Player's bingo. This concluded Armour's scoring for the afternoon.

Honan Seeks Homer

In the third inning Honan caught hold of one of James' specials and sent it down the right field line for a four bagger. Again in the following inning the Forester's bats began to swing and two more runs came across the plate. The Lake Forest nine made the total six runs in the eighth on Krause's error in the outfield.

Krause led the Techawk lineup with three hits. Player allowed no hits for his two innings of effort and struck out two while walking one.

BOX SCORE

Rehwaltdt, Krause Score All Armour Hits In Thriller

In the first extra-inning game of the season, the Armour nine lost a thrilling eleven inning game to the North Central Cardinals by a 3-2 count. The game was played on the Naperville diamond Saturday, April 20.

Two Hits Score Winning Run

North Central scored its winning run on a triple and a single. Shatzer, the pitcher for the Cardinals, cracked one over Krause's head in left center for the three bagger, and Kailer, North Central's lead-off man singled past the shortstop to drive in the winning run.

Armour scored early in the game, getting one run in the first and the other one in the fourth. Captain Leonard crossed the plate with Armour's first tally after getting a walk stealing second and scoring on Rehwaltdt's hit.

Score Tied in Fifth

By sending runners across the plate in the fourth and fifth frame, North Central tied the ball game. For their part of the ninth, the Techawks missed their chance to win the game as Rehwaltdt was tagged out at the plate by the pitcher.

The game was punctuated by a series of misplays and injuries on the part of the Armour nine. Both Bauch and Lukens received finger injuries, and the total of six errors were a big factor in producing North Central's two runs.

BOX SCORE

Armour Tech (2)	AB	R	H	E	North Central (3)	AB	R	H	E
Mueller, 2b	5	0	0	0	Kailer, ss	5	1	2	0

"FASTEST BASE-RUNNER IN BASEBALL"

OFF THE DIAMOND, George Case (below, right) prefers a slower pace... he likes to fish... smokes Camels a lot. He says: "Slower-burning Camels are more than mild—they're extra mild and extra cool. The more I smoke Camels, the more I like their full, rich flavor." Yes, the more you smoke Camels, the more you'll appreciate their extra mildness, extra coolness, and extra flavor.

HE'S SAFE AT SECOND BY A SPLIT SECOND! Yes, it's another stolen base for George Case. He stole 51 bases last season... led the major leagues... won wide acclaim as the "fastest man in baseball." It makes your legs ache to watch him, he runs so hard... so fast. But when George lights up a cigarette, speed is out. "No fast burning for me," he says. "I always smoke the slower-burning brand... Camel. Camels give me several big extras in smoking."

Fleet-footed George Case—leading base-stealer of the major leagues—SMOKES THE SLOWER-BURNING CIGARETTE—CAMEL

GEORGE CASE, Joe DiMaggio, "Bucky" Walters, Johnny Mize...so many top-flighters in America's favorite sport prefer America's favorite cigarette...Camel. George Case tells his experiences above. Let your own experience convince you how much more pleasure there is in smoking when your cigarette is slower-burning... made from costlier tobaccos. Smoke Camels. Enjoy the extra mildness, extra coolness, and extra flavor that only Camel's matchless blend of costlier tobaccos and slower way of burning can give. Get more pleasure per puff and more puffs per pack (see panel, right).

In recent laboratory tests, Camels burned 25% slower than the average of the 15 other of the largest-selling brands tested—slower than any of them. That means, on the average, a smoking plus equal to

SLOWER-BURNING CAMELS GIVE YOU

Measurements Illustrated In pH Meter Talk

Mr. E. D. Coleman of the Coleman Electric Company was the speaker at the last session of the course on Instrumentation and Control. He spoke on the theory and applications of the Coleman pH Meter. This instrument, by means of a glass electrode, measures the hydrogen ion concentration of a liquid, and has applications ranging all the way from growing mushrooms and making honey to treating sewage and dyeing cloth. The basic theory behind it, is that a liquid with a given hydrogen ion concentration develops a proportional internal potential. The difference between this potential in the unknown and that in a neutral, saturated solution of KCl is measured by means of a bridge, and thus the pH is accurately determined.

Meters Developed

Mr. Coleman was formerly a professor of chemical engineering at the University of Wisconsin. Later he, with fourteen other men, organized the Coleman Electric Company, which is engaged in the technical applications of electrical methods.

The course on Instrumentation and Control, under the supervision of Professors Thompson and McCormack, has had sessions on temperature measurement and control, flow meters for fluids, proportioning of liquids and solids, pressure control devices, and now hydrogen ion measurement and control. The guest speakers have been representatives from such companies as Leeds and Northrup, Rotometer Company, Republic Flow Meters Company, Powers Regulator Company, Proportioners Incorporated and the Coleman Electric Company.

Inspection Trips Helpful

"A very valuable item in the work to date," says Dr. Thompson, "has been an inspection trip to the new Southwest Sewage Disposal Plant of the Sanitary District. Here many of the instruments under discussion are in use, including the largest Venturi meter in the world—over nine feet in diameter."

Future speakers will be invited who are industrial specialists on electrical meters and control devices, humidity and air conditioning and the use of amplifiers and associated circuits in instruments.

SCHOLARSHIP—

(Continued from page one)

Prof. S. F. Bibb, Dr. H. W. Davey, Dr. W. M. Davis, Dr. H. A. Giddings, Mr. C. O. Harris, Mr. W. E. Kelley, Dr. G. McColley, Mr. W. J. McLarney, Dr. M. J. Murray, Dr. J. G. Potter, Mr. A. L. Mell, Mr. A. M. Sear, Mr. W. H. Seegrist, Prof. S. M. Spears, Dean C. A. Tibbals and Dr. W. L. Wasley.

Scholarship examinations are a regular semi-annual occurrence. At some time during each semester prospective graduates are given this chance to compete for full tuition scholarships for their freshman year. The last one was given January 6th of this year. Fifty-five took the exam at that time and a somewhat larger group is expected this time since June classes run larger than February classes. Professor Winston estimates that the number of candidates will exceed 250.

Physics Dept. Plans Exhibits

Tuesday and Wednesday, May 7 and 8 will see one of the biggest and best Open House demonstrations given by the Physics Department in the history of Armour. The Physics laboratories on both the first and second floors of the Physics Building will be open, and will present demonstrations in mechanics, sound, light, and electricity. The exhibits and demonstrations will be:

First Floor:

- 1) Polarized light experiments including large 2 foot polaroids. Applications to many problems of glare elimination, strain analysis, etc.
- 2) Liquid air demonstrations—Properties of materials at very low temperatures.
- 3) Stroboscope— Illumination of rotating and vibrating equipment, water jets, etc.
- 4) Fluorescence and Color—Applications to tube lighting.
- 5) Electromagnetism—Induced currents, Electromagnetic waves, Thermal magnets.
- 6) Flow of Fluids—Rotor ship—Flow meters, etc.

Second Floor:

- 7) Photographic Laboratory.
- 8) Electronics Research Laboratory—Studies in mercury arcs.
- 9) Sound wave demonstrations showing the similarity in the behavior of light and sound.
- 10) Discharge tubes— Applications to tube lighting, smoke precipitation, high frequency discharges.
- 11) Compton Charts demonstrations concerned mostly with electromagnetic radiations.

Salon Planned By Armour Eye

All the Armour elbow-benders will be interested in the Camera Club salon to be held in the library during Open House. Of course, one of the "o's" will be missing, making it a salon, and a photographic one at that, but President Pete J. Stanley of the Armour Eye promises that what the salon lacks in alcohol, it will more than make up in interest, artistic excellence, and popular appeal.

Open to any member of Armour, from the mightiest freshman down to the lowest faculty officer, the Eye's Fourth Annual Salon will be judged by the visitors to the Open House. The last salon saw more than 1,000 ballots distributed to an interested throng crowding in and out of the library. This year, due to the doubling of the exhibition time, and the material increasing of the club's membership, 2,000 ballots are expected to be used in the decision.

There will be ribbons for first, second, and third places, as well as three honorable mentions. The first three will also receive a dozen sheets of enlarging paper each. All the prints shown will have a sticker placed on their reverse sides to show that the pictures were in the salon. All pictures must be in by Friday, May 8.

Professor Bliss, Chairman of the mathematics department of the University of Chicago, will address the student body this Wednesday at 12 noon in room 2W of the Student Union.

Math Open House Exhibit To Feature 'Million' Magnitude

The exhibit of the Department of Mathematics at the 1940 edition of Open House on May 7th and 8th, will appear under the general title "How Much is a Million?"

In these days of New Deal spending and lending, the "Billion" has become a common term, while the "Million" is about the smallest unit worth talking about in national finance.

This being the case, the term "Million" seems to have lost much of its hugeness, and just as the world grows smaller with modern transportation the million seems to grow smaller with modern government. If, however, one actually attempts to visualize this "smallest unit" in terms of familiar object or periods of time, it again assumes staggering proportions, difficult to comprehend and a challenge to the imagination.

Professor Ford, the head of the Mathematics Department is in charge of preparations for the exhibit. He is being assisted in his work by sophomore members of his class in Math 210.

SUBWAY—

(Continued from page one)

entire group will go underground and visit the river section of the Lake Street-Milwaukee Avenue division of the subways, through the courtesy of the contractors, Paschen Brothers. They will first meet at the office of the contractors at Desplaines Street and Milwaukee Avenue. Following this, there will be a dinner at the Chicago Engineers' Club.

A.T.S.A.—

(Continued from page one)

year man from the B group, and the other would be a 4th year man from the A group. The 4th year co-op is to be elected for two years, much like the 1st vice-president of the A.T.S.A.

One of the most recent accomplishments of the A.T.S.A. Board is the standardization of awards given to captains, graduating seniors, lettermen, etc. A complete set of rules has been established whereby the type of awards given for a certain activity is not left to the discretion of the coach or sponsor of the activity.

CHEM EXHIBIT—

(Continued from page one)

invisible inks and electricity, colored flames, colloids, fire and fireproofing, electrochemistry, chemical continuation group, and a special exhibition in luminescence.

Lab Experiments Featured

The physical chemistry section will be directed by Dr. Bruce Longtin. Its open house projects will not feature any "spectacular" exhibits. They will feature, rather, the regular laboratory experiments, merely dressed up for the benefit of the visiting public. These experiments will be very interesting because of the very nature of the work as well as the appeal to the eye, and will include such setups as a series of colored solutions to trace out the curve of their refractive indices by means of the light passing through them, and the "chemist's clock," wherein two solutions when mixed, change color suddenly at the end of a specified time interval.
