## GreenIIT

Did you know...

...Americans throw away enough writing and office paper annually to build a wall 12 feet high, stretching from New York City to Los Angeles? Next time, instead of throwing away that piece of paper, either reuse it for notes or recycle it throughout campus so it can be remade into recycled paper for future use.

The Office of Campus Energy and Sustainability (OCES) is coordinating an effort among students, faculty and staff to define the specific actions, programs and policy changes IIT will make in order to reach the targeted commitments that will define IIT as the most sustainable urban university campus in the United States.
