

Senate Election Candidates

College of Science (4 Seats Available) | School of Applied Technology (2 Seats Available)
Stuart School of Business (3 Seats Available) | College of Architecture (2 Seats Available)

<div><div>Sonia Kamdar</div><div>Third Year</div><div>Biochemistry</div><div>College of Science</div></div> <div>One of the issues that I plan to address is smoking around campus. I would work with the other Senators to find a happy compromise for smokers and non-smokers. I do believe that this is an issue that must be addressed regardless because of the overwhelming concern that has built up.</div>	<div><div>Liang Hou</div><div>Third Year</div><div>Biochemistry</div><div>College of Science</div></div> <div>I would like to work on is expanding the Academic Resource Center into its own, legitimate section. Other issues I am interested in working on is adding more outlets to campus buildings like Siegel Hall, IIT Tower, and MTCC as well as having a more substantial student-professor teaching style feedback mechanism throughout the semester.</div>	<div><div>Toluwani Adesanya</div><div>Third Year</div><div>Biology</div><div>College of Science</div></div> <div>I plan to solve the problems regarding the way IIT students, staff and administrators communicate. I also want to make sure that IIT is a unified community and I want to make sure no one feels left out or neglected.</div>
<div><div>Parth Shah</div><div>Graduate Student</div><div>Computer Science</div><div>College of Science</div></div> <div>My first plan to solve issues about SGA awareness. In my college students may not be aware about this association. So that they can be interact with us and tell the problem and their interests.</div>	<div><div>William Bafia</div><div>Third Year</div><div>Computer Science</div><div>College of Science</div></div> <div>My primary focus will be tackling existing issues within the College of Science. Next, my focus will be on my committee, which will most likely be the Student Life Committee. Finally, I will focus on any future changes or plans to improve SGA and IIT for the long run.</div>	<div><div>Daniel Felipe Lopez Morales</div><div>Second Year</div><div>Biochemistry</div><div>College of Science</div></div> <div>I have found that a problem inside some organizations and Student Government Association is the lack of communication the students have with the presidents and executive board. This is why I will talk to organizations, creating the possibility of making every organization, including SGA, more open to the opinion of its members.</div>
<div><div>Kevin M. Roemer</div><div>Third Year</div><div>Information Technology & Management</div><div>School of Applied Technology</div></div> <div>There are a number of projects which the Senate is working on. Each project has a special place within their committees and if it is apparent that it shows value to the students we will work to complete it.</div>	<div><div>Bhushan Rohane</div><div>Graduate Student</div><div>Information Technology & Management</div><div>School of Applied Technology</div></div> <div>I want to work to create more On-Campus jobs, cater various cuisines at campus restaurants, insist for student friendly hours and more sports utilities at Keating, create shuttle service to King drive and Bridgeport, make MyIIT and Blackboard more user-friendly, and make Galvin 24X7.</div>	
<div><div>Srinivas Jagadeesh</div><div>Graduate Student</div><div>Information Technology & Management</div><div>School of Applied Technology</div></div> <div>I want to help organize On-Campus job fairs in a smooth manner. I would also try to increase the number of On-Campus jobs available at IIT Chicago. I also feel there is a lack of security for students who stay off campus, and would like to take up this issue seriously.</div>	<div><div>Pragnya Manaswini</div><div>Graduate Student</div><div>Information Technology & Management</div><div>School of Applied Technology</div></div> <div>If I am the senator of SAT I shall primarily focus on issues which SAT people face and, as required to solve them. Issues will be solved based on the very acceptable "waterfall model" approach (software engineering approaches) :)</div>	
<div><div>George Batah</div><div>Fourth Year</div><div>Finance</div><div>Stuart School of Business</div></div> <div>Lack of opportunities for business students like the low number of clubs, activities designed to business students and low number of business recruiters</div>	<div><div>Sheng Hao Koo</div><div>Third Year</div><div>Finance</div><div>Stuart School of Business</div></div> <div>The main issue that I would like to solve is the lack of communication between Graduate and Undergraduate Students in the Stuart Schoolx of Business.</div>	
<div><div>Kartik Saraf</div><div>Fourth Year</div><div>Business Administration</div><div>Stuart School of Business</div></div> <div>I want to make the Stuart student lounge students to not only relax, but actually increase their love for business. I also want to make life better for Stuart commuter students by getting lockers in IIT Tower, updating the lounge to accommodate for their needs, etc.</div>	<div><div>Yunhui Kim</div><div>Third Year</div><div>Business Administration</div><div>Stuart School of Business</div></div> <div>The disconnect between undergraduate and graduate departments in the Stuart School is a problem. I am planning to connect the two departments by having social events open to any Stuart students. Also, I will utilize weekly Stuart emails and postings to make all students feel connected.</div>	
<div><div>Gayatri Tawari</div><div>Third Year</div><div>Architecture</div><div>College of Architecture</div></div> <div>I have 4 issues I wish to deal with: the cancellation of the Paris Program in 4th year architecture, certain classes which could have a better location, as in semester wise, changing the study abroad from 4th year to 5th year is worrying, and the introduction of some sort of Professional Practice (internship) as part of the curriculum.</div>
