

## JUNIOR CLASS "SUPER STUFF" JEWELRY NOW AVAILABLE

•Orders are now being taken for the junior class jewelry by Betty Kennedy at Lewis, and Richard Roberts and Charles Peller at Armour. Early plans have been arranged so that priorities on the metals used will not effect delivery.

•Students can now get their rings and pins at a reasonable cost and can display them throughout the year. A down payment of two dollars is required upon ordering,

and orders received before April 17 will be delivered before the close of this semester.

•The selection of this "super stuff" has been very important and the committee hopes it will suit all students. The jewelry is on display in the information office and Miss Kennedy can be seen there any day from 4-8 p.m. Orders from the south campus will be taken in the TECHNOLOGY NEWS office, any time of the day.

## HENRY ANDEREGG, LEWIS ENGINEER, RETIRES TO FARM

•After 20 years service in the maintenance department of Lewis institute and IIT, Henry Anderegg, night engineer at the west campus, retired last week to his farm near Loretta, Wisconsin. He came to Lewis in 1923 as a fireman and rapidly advanced to the responsibility of stationary engineer. Desiring to devote all his time to the upkeep of his acreage up on the farm, he decided to end his long tenure at Lewis and left for a well deserved rest.

## SOPH INFORMAL FRIDAY, APRIL 17

### SCHOMMER TALKS ON OPPORTUNITIES

•"Opportunities for Seniors" was the topic presented to the seniors of the west campus in a lecture given by John J. Schommer, director of placement, last Friday in the art room.

•At the present time, new factories as well as new industries have sprung up, giving opportunities to all graduating students especially economists and engineers. In seeking a job, one's college rating is very important for Mr. Schommer stated that "in choosing engineers one's electives such as advanced calculus and physics etc., count more than those in gymnastics, music, or aid grazing and those having these points are therefore given preference to.

•Advice was given to both boys and girls. Men who believe they are going to be drafted should apply for the V-7 training offered. Women should take a short secretarial course after a completed college course for it will "always come in handy." There are many opportunities for these women for in time they will take the place of men in industry.

•Continued education was also stressed for progress is made in all fields, and one should keep up with the world's happening and not become "stagnant." Placement cards were distributed, greatly stressing the points of personality, character and aggressiveness.

### \$12,000 PROJECT ADDED AT IGT

•A \$12,000 research project has been established by the Rochester Gas and Electric company at the Institute of Gas Technology, it was announced by Harold Vagtborg, director of the Institute.

•The project, one of the initial sponsored programs set up at the eight-month-old Gas Institute, relates to the removal of organic sulphur from manufactured gas.

•A five-member steering committee, including three representatives from the Rochester Gas and Electric company and two from the Gas Institute, will direct work on the project. Representing the company on the steering committee are A. M. Beebe, R. E. Kruger and Louis Shnidman; representing the Institute are Professor R. C. Kintner and R. L. Hicks.

### FPES HEARS ABOUT CHICAGO'S DANGER

•Lieutenant Harry Wolf of the Drill School of the Chicago Fire department presented two sound movies to the members and guests of the Fire Protection Engineers society, on Friday, March 27. As an introduction Lieut. Wolf brought out the probability of Chicago being raided by enemy air forces. Chicago is a defense center and can, relatively speaking, be easily reached via Norway and the Polar Region.

•Promising to be as successful as it is enticing, the Sophomore dance will be held this Friday, April 17, at the Lake Shore club of Chicago. The Sophomore Informal, always one of the top dances of the year, will feature the music of Gay Claridge and his popular band. The vocal entertainment will be provided by beautiful, vivacious Joan Ryan, our only regret being we couldn't get a picture of her in time to print it in this issue of the NEWS.

•All of the facilities of the club are at the disposal of the dancers including spacious lounge, private entrance and checking facilities, free parking and private bar.

•The price of one of the silver and red bids is \$1.65 (tax included) and it represents the best value in entertainment ever offered at Armour.

•There has been some question as to the location of the club and the simplest way to get there. The club is located at 850 N. Lake Shore drive, only one block north of Chicago avenue and the club's private entrance is located on Chestnut street. For those who drive, Lake Shore drive is the best way to get there, for those who have to travel by other means; take the elevated to Chicago avenue and transfer to the Chicago avenue street car EAST to the end of the line at the lake then walk one block north.

•The social committee under the guidance of Bruce Worcester urges that all students who have bids out please turn in the bids or the money for the bids by Thursday evening. There will be somebody in the Information office every afternoon of this week. Bids may be purchased at the Bookstore or at the Information office.

### JUNIOR CHEMISTS WANTED BY U.S.

•The United States Civil Service Commission is now seeking Junior Chemists to perform research or other work in chemistry. The positions pay \$2,000 a year. No written test is required. Applicants' qualifications are judged from their experience, education, and training.

•Women especially are urged to apply. The navy yards, arsenals, and other government laboratories are now employing women in chemical work. Completion of a four-year course in a recognized college with thirty semester hours in chemistry is required, although senior students who will complete the required course within four months of the date of filing application may apply. Experience is not required, but is, of course, highly desirable.

•Application forms and further information may be obtained from any post office.

# NAVY ANNOUNCEMENT TO COLLEGE FRESHMEN AND SOPHOMORES 17<sup>THRU</sup> 19

## You want to serve your country! Why not serve where your college training will do the most good?

Under the Navy's newest plan, you can enlist now and continue in college. If you make a good record, you may qualify within two years to become a Naval Officer—on the sea or in the air.

### Who may qualify

80,000 men per year will be accepted under this new plan. If you are between the ages of 17 and 19 inclusive and can meet Navy physical standards, you can enlist now as an Apprentice Seaman in the Naval Reserve. You will be in the Navy. But until you have finished two calendar years, you will remain in college, taking regular college courses under your own professors. Your studies will emphasize mathematics, physics and physical training.

After you have successfully completed 1½ calendar years of work, you will be given a written examination prepared by the Navy. This examination is competitive. It is designed to select the best men for training as Naval Officers.

### How to become an Officer

If you rank sufficiently high in the examination and can meet the physical standards, you will have your choice of two courses—each leading to an officer's commission:

1. You may volunteer for training as an Aviation Officer. In this case you will be permitted to finish at least the second calendar year of your college work, after which you will be ordered to active duty for training to become an officer-pilot. Approximately 20,000 men a year will be accepted for Naval Aviation.

2. Or you will be selected for training as a Deck or Engineering Officer. In this case you will be allowed to continue your college work until you have received your degree.

After graduation you will be ordered to active duty for training to become a Deck or Engineering Officer. Approximately 15,000 men a year will be accepted.

If you do not qualify for special officer's training, you will be allowed to finish the second calendar year of college, after which you will be ordered to active duty at a Naval Training Station as Apprentice Seaman.

Those who fail to pass their college work at any time may be ordered to active duty at once as Apprentice Seamen.

Your pay starts with active duty.

Here's a real opportunity. A chance to enlist in your country's service now without giving up your college training... a chance to prove by that same training that you are qualified to be an officer in the Navy.

## DON'T WAIT... ACT TODAY

1. Take this announcement to the Dean of your college.
2. Or go to the nearest Navy Recruiting Station.
3. Or mail coupon below for FREE BOOK giving full details.
