

ASSININE, PURILE, banal, moronish—that can be the only description of the actions last week of a number of students. It is inconceivable that college students could act in the purely idiotic and childish manner in which some students carried on during last week. Several visitors left the comment that such persons should not be allowed to remain in college. Visiting newspaper men left disgusted.

Perhaps the first childish acts were committed Tuesday, when water bags were dropped from the fourth floor, Main. One bag struck a member of the faculty. Although Dean Tibbals ordered a halt, the practice was resumed Friday. Then several idiots began anew, this time striking two young ladies. It is said that they took pride in their accomplishment.

The lowest action took place when a demented "louse" threw a firecracker at the feet of the "leg art" contestants. Fragments of this struck one person near the face and another in the leg. Both sustained burns. Miss Jacobs narrowly missed being burned. No one saw the coward who threw it even apologize.

Seniors and juniors portrayed themselves in their worst manner when they began throwing rotten vegetables at freshmen and sophomores. This action in itself might be all-right, but they did not have sense enough to restrict their activities to Ogden Field. They had to litter the grounds in front of the Student Union and Main with debris.

There will always be a few persons to ruin an otherwise well planned affair.

JUNIOR MARSHALS should be complimented on their thorough planning and the efficient manner with which they carried on their work. Men such as they represent the leaders of IIT life. Good work, fellows.

2 Men to Receive Ph.D. Degree at IIT

The first Ph.D. degrees in chemistry ever given by Illinois Tech will be conferred upon Robert H. Saunders and Harvey J. Taufen at the coming June commencement.

Saunders, now engaged in industrial war work, completed his Ph.D. requirements before leaving IIT several months ago.

Taufen, who is an instructor in chemistry, passed his doctor's examination last week. At the close of this semester, he will accept a position with the Clinton Engineering Works of the Tennessee Eastman Corporation at Knoxville. His work there will be of a fundamental war nature.

Photography for Integral Begins Today, Appointments Taken In Student Union

Photography work on the Integral starts today with the June and October seniors. Blanks for biographies and appointment cards for sittings will be available in the Student Union lobby on Monday, Wednesday, and Friday between 9:30 and 2:20. They must be obtained during this time.

ARF to Open Loop Office This Week

A new loop office of the Armour Research Foundation will be opened this week, announced Dr. Francis W. Godwin, assistant director.

Housed in the suite of rooms on the sixth floor of the Willoughby Towers at 8 S. Michigan Blvd. will be Lucius A. Crowell, chairman of industrial and educational uses of the wire recorder.

In addition to Crowell's office there will be a reception room and a small sound studio for demonstrations and tests on the recorder. Another room will be used by the ARF to hold conferences for persons in the loop area who do not have sufficient time to go to the south side offices.

General information inquiries about the Foundation's work will continue to be handled on campus.

10 Men Pledged To Tau Beta Pi Seven Seniors, Three Juniors Honored Friday

Seven seniors and three juniors were pledged to the IIT chapter of Tau Beta Pi last Friday afternoon.

Tau Beta Pi was founded as a national honorary fraternity to bring recognition to outstanding engineering students. The men were selected on the basis of scholarship, extra-curricular activities and character.

The list of pledges, as they were introduced to the student body, is as follows:

Kenneth G. Black, Sr., E.E.: Eta Kappa Nu-3,4, Vice Pres.-4; Rho Epsilon-3,4, Pres. 4; Band, 4; Orchestra-3,4; AIEE-3,4; Transfer student from Elmhurst College, (See TAU BETA PI on Page 6)

3A's to Hold Farewell Dance

A 3A Farewell Dinner Dance will be held Saturday, June 10 in the Edgewater Beach Hotel, announced William D. McThomas, class social chairman.

This is probably the first class to hold a farewell dance before reaching its senior year. The fact that one third of the class will leave IIT in the next few weeks made the decision to hold the dance now, stated McThomas.

The dance will be a closed affair with only 3A students from Lewis and Armour being eligible to attend. A deposit of \$2.50 must be given to McThomas by Friday to ensure the student of a dinner. It is expected that the cost per couple will be \$5.25 with an additional amount of \$100 to be taken from the class treasury.

Dancing will be on the Beachwalk to the music of Eddie Oliver and his orchestra. In case of rain, the dance will move indoors to the Marine Dining Room.

At 8:30 p.m. a fried chicken dinner will be served in the North Room. On the menu are shrimp cocktail, french fried potatoes, new budded peas, fruit salad, tortoni and iced tea or coffee.

Floor shows are scheduled at 9:15 p.m. and 12:10 a.m. Professor and Mrs. Stanton E. Winston have consented to act as host and hostess.

Photography for Integral Begins Today, Appointments Taken In Student Union

Photography work on the Integral starts today with the June and October seniors. Blanks for biographies and appointment cards for sittings will be available in the Student Union lobby on Monday, Wednesday, and Friday between 9:30 and 2:20. They must be obtained during this time.

Seniors may have their pictures taken at their convenience, but they must be taken before June 10. However they are advised to call for a reservation. Marshall's studios, who will make the yearbook pictures, are located at 162 N. State. A fee of \$1.00 will be charged for each picture printed in the Integral to cover engraving costs. This charge will be waived by the studio if other portraits are purchased.

Don Arenson, new editor-in-chief replacing James Leichti who is leaving for the navy, said that most of the other photography work for the Integral will start Wednesday. Said Arenson, "The new offices of the Integral in the Armour Eye clubrooms, 2nd entrance Chapin, 4th floor, will be used for editorial work as well as business meetings. However, we will still use our old office that we share with the co-op."

Link Files Include Telephone Numbers Of 300 Dateables

300 dateable females and no one to date them out—that is the dilemma facing the Link, IIT's date bureau.

The sad situation is caused, according to Tom Dressler, chairman of the group, "Because most of the members of the staff have graduated leaving only Tom Kilgariff and myself to handle affairs of the Link. With the lack of time and help we have been unable to accomplish very much."

The Link was organized in October of last year for the purpose of establishing social relationships between the men of IIT and the fairer sex. At that time questionnaires were sent to the girls in various parts of the city and some 300 of them expressed their willingness to face the perils of a date with IIT males. This was a fine beginning, but it was about as far as things got. A few dates were secured but the majority of the choice names and addresses now lay dormant.

The future of the Link will depend upon the help situation and whether or not the All School Social Committee will continue the Link.

Grants On Tuition to Be Given Worthy Students: States Heald

The following announcement concerning changes in tuition and fees was made by Henry T. Heald, president of IIT, today.

"The Board of Trustees has approved the following new policies for tuition and fees:

"Beginning November 1st, 1944, the tuition for all courses for full time attendance will be \$200.00 per term. This charge will include tuition and all fees. The only additional charges will be the refundable laboratory breakage deposits as now required, the penalties for late registration or for the non-payment of tuition in full, and the fee for special examinations. There will be no separate course fees, student activity fee, student union or student lounge fee.

Beach Party to Be Held by 3A Class

A beach party at the Indiana Dunes this Sunday will be the first event on the 3A social program, stated William D. McThomas, social chairman.

Class members will meet at the Illinois Central Station at Michigan and Randolph at 8:30 a.m. in order to board the excursion train at 9:00 a.m.

At last week's 3A meeting, the class voted with but one dissent to go on record as favoring free *Technology News* subscriptions to men leaving for the service.

"After a man has attended a college for two or three years it stands to reason that he'll not forget his remaining classmates and instructors just because he happens to change his type of clothing. A year subscription to every man leaving IIT would cost the ITSA approximately 300 dollars—a well-spent amount," stated Dumelle, 3A president.

The class will meet at 1:30 p.m. Friday in Room 202 Main.

Bids to Go On Sale For Senior Farewell

Senior Farewell bids will go on sale at 1:30 p.m. Thursday in the Student Union lobby. They will cost \$2.50 each.

In addition to the music of Russ Grimes and his orchestra, there will be two additional acts of entertainment at the dance June 9, stated Tom Artingstall, ASSC chairman.

The dance will be from 9:30 p.m. to 1:30 a.m.

"Souvenir bids will be presented to the women at the dance, and a surprise gift will be given to the men," said Artingstall.

Dr. G. D. Birkhoff to Speak At Graduation Ceremonies

Rosenwald Museum Is Site for Commencement; Dr. Roupp Will Speak at Baccalaureate Service

Dr. George D. Birkhoff, world renowned scientist, will be the speaker for the coming June graduation exercises. The graduation will take place on Sunday, June 18 at the Museum of Science and Industry, at 4 p.m. Dr. Harold Roupp will give the baccalaureate sermon.

Shipyards Now Need Engineers

The Kaiser Ship Building Company is in urgent need of engineers. This was the problem put forward by a Kaiser representative who spoke to the graduating senior civilians last Wednesday.

Engineers are particularly needed to do a new type of drafting in which blue prints are drawn in perspective. Much of the work is concerned with prefabrication, a process which speeds up ship building tremendously.

Kaiser's main ship yards are situated in Vancouver, Washington, where living conditions are reported favorable. The pay rate for a starting engineer is \$1.08 per hour. Men with drafting experience receive \$1.20 while the top pay is \$1.58 per hour.

Dr. Birkhoff, stated President Henry T. Heald, who made the announcement today, is one of the foremost scientists of our day, and is the recipient of almost every scientific award that can be given to a man. Dr. Birkhoff is a former Lewis student, who graduated with an Arts and Associates degree in 1902, and is now a professor of mathematics at Harvard University.

He was to have received an honorary degree during the February graduation, said Heald, but was unable to attend the ceremonies due to a necessary trip to Mexico. He will receive the degree during the coming program.

The baccalaureate services will be held one week prior to the graduation, June 11. For the twenty-fifth consecutive year, they will be in the Central Church at Orchestra Hall. This will probably be the last time they will be held there, said Heald, since the church will move from its present location the week following. Its new temporary home will be the Studebaker Theater.

Alpha Sigs Win Singing Trophy

Alpha Sigma Phi, at the fraternity sing last Thursday evening, won the trophy for singing for the third successive time. The trophy was presented by Gordon Fleischer, president of the Inter-Fraternity Council, to Ronald Lind, president of Alpha Sigma Phi. The fraternity which wins the trophy three times become the permanent owners of it.

The new trophy which was to be given this time had not arrived and the Alpha Sigs donated their trophy for the presentation.

The fraternity sing followed the Annual Spring Concert given by the Orchestra, Glee Club and IIT's new musical organization, the Navy Band. About 150 people attended the combined affair.

Students Classified in Limited Service Are Eligible to Apply for Deferment

The induction of all limited service men into the army will be halted after May 30. This was learned Friday from John J. Schommer, selective service adviser. All men classified 1-AL should have Dean James C. Peebles' office send a form 42 to their local board.

Students holding 1-AL, 1-C or 4-F draft classifications thus have an excellent chance of remaining in school until they take their degree, said Schommer.

The newest regulations were interpreted by Schommer as follows:

"Men disqualified from military (See STUDENTS on Page 5)

All civilian students who can speak, read and write FLUENTLY any of the following languages should see Prof. John J. Schommer at once. These languages are: German, French, Belgian, Dutch, Italian or any Scandinavian or far eastern tongues.

These men must have their placement records filled out when they appear at the Placement Office.

Navy Welfare Fund Now Contains \$215

A total of approximately \$215 is now in the V-12 Welfare Fund at Illinois Tech, according to Lt. P. H. Lynch.

The money in this fund is used to purchase general supplies for the navy men which are not usually supplied by the Navy Department. Athletic equipment, ironing boards, washing machines, and daily newspapers for the various quarters are some of the items for which this money is used.

The fund results from the profits received from the vending machines in the quarters. Lynch stated that the vending machines in the quarters were changed last week because the new company supplying candy bars pays 10% while the other paid only

Member, Associated Collegiate Press

Official student publication of Illinois Institute of Technology, 3300 Federal Street, Chicago, Illinois. Published weekly during the college year. Represented for national advertising by National Advertising Service, Inc., college publishers representatives, 420 Madison Ave., New York, N. Y., Chicago, Boston, Los Angeles, San Francisco. Entered as second class matter October 10, 1940, at the post office at Chicago, Illinois, under the Act of March 3, 1879. Subscription rate 1.00 per term.

This Is Your Problem, Navy

What is to be done with the ITSA funds? Faced with this question, and with the determining question of, will the navy support it, and that means support it financially, a long and heated debate marked the regular ITSA meeting last week.

While the ITSA has set up two committees to determine what will be done with the present reserve fund if the navy does not support it, they have done nothing to find out whether or not the navy will support it. It would appear at this time that they disfavor the idea, but they may change their minds. An assembly should be held in the very near future where the pro's and con's of the issue can be aired. Then a vote could be called for, with the will of the majority deciding the issue. If the majority want the ITSA, then all navy men would have to support it. The fees could be deducted from their pay checks.

If the navy disfavors support, then the entire reserve fund of the ITSA should be put in trust until the return of a greater number of civilians. There can be no question about this decision. One, after all, does not build up a \$10,000 fund over a number of years and then hand it to a non-contributing group so that they might reap the benefits of it. The civilian students will not allow such action to take place.

Certainly, one thing that is not expected next semester is that the remaining civilians carry the burden by paying for themselves and their fellow students in blue. The minority cannot be called on to pay the check for the majority's needs.

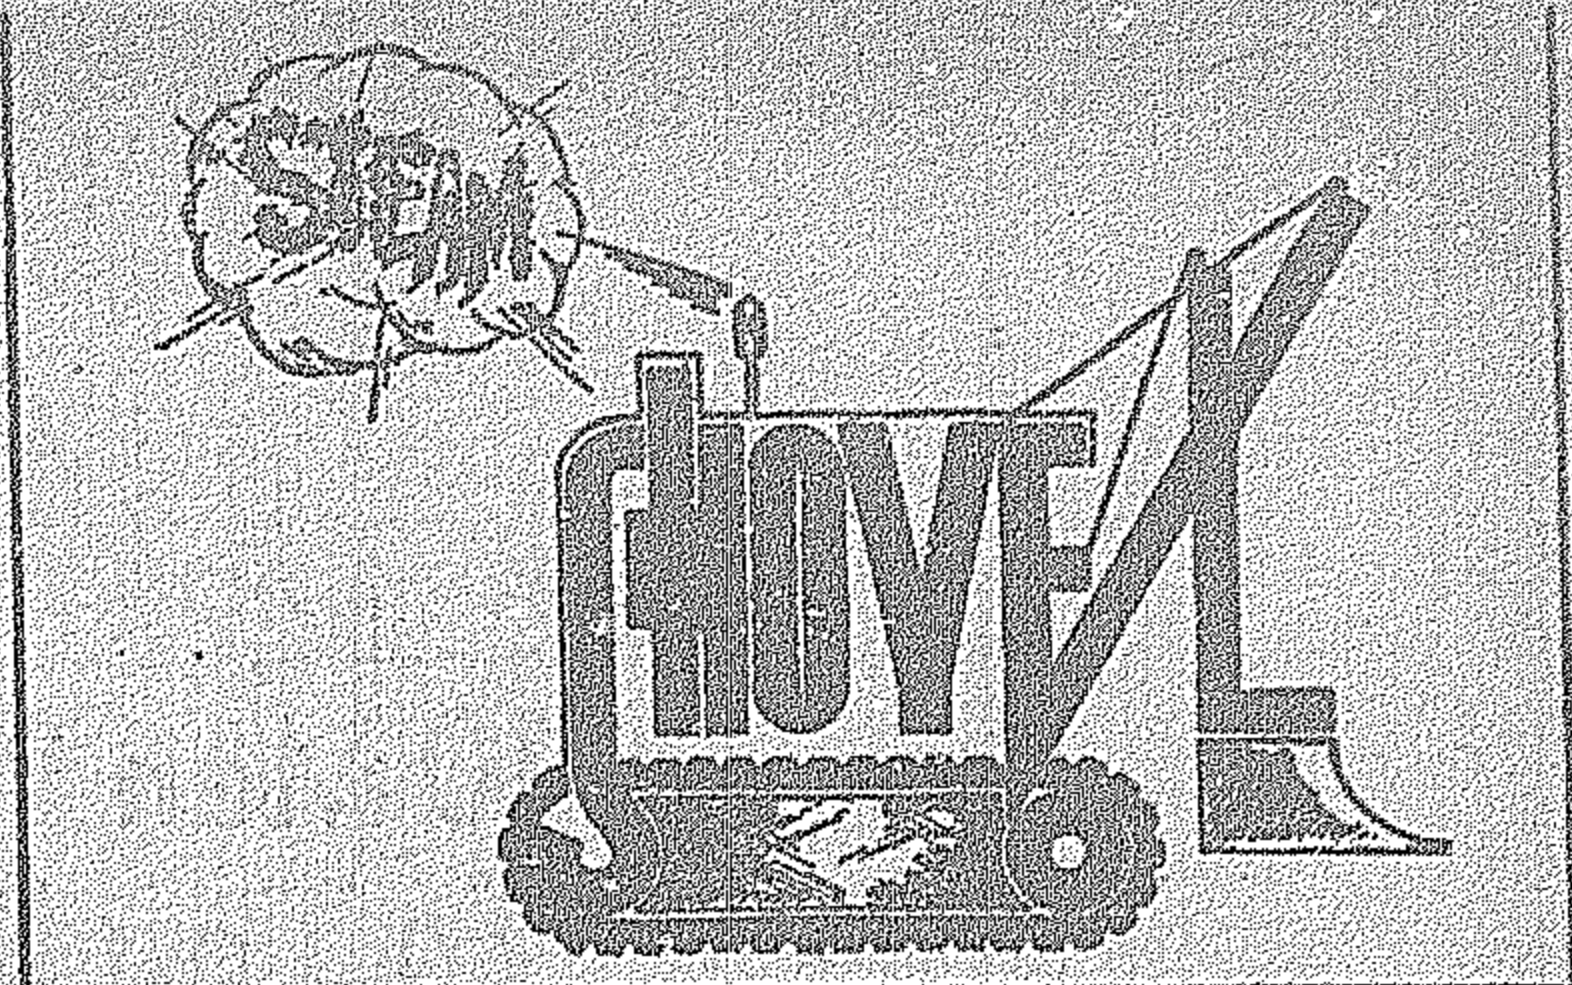

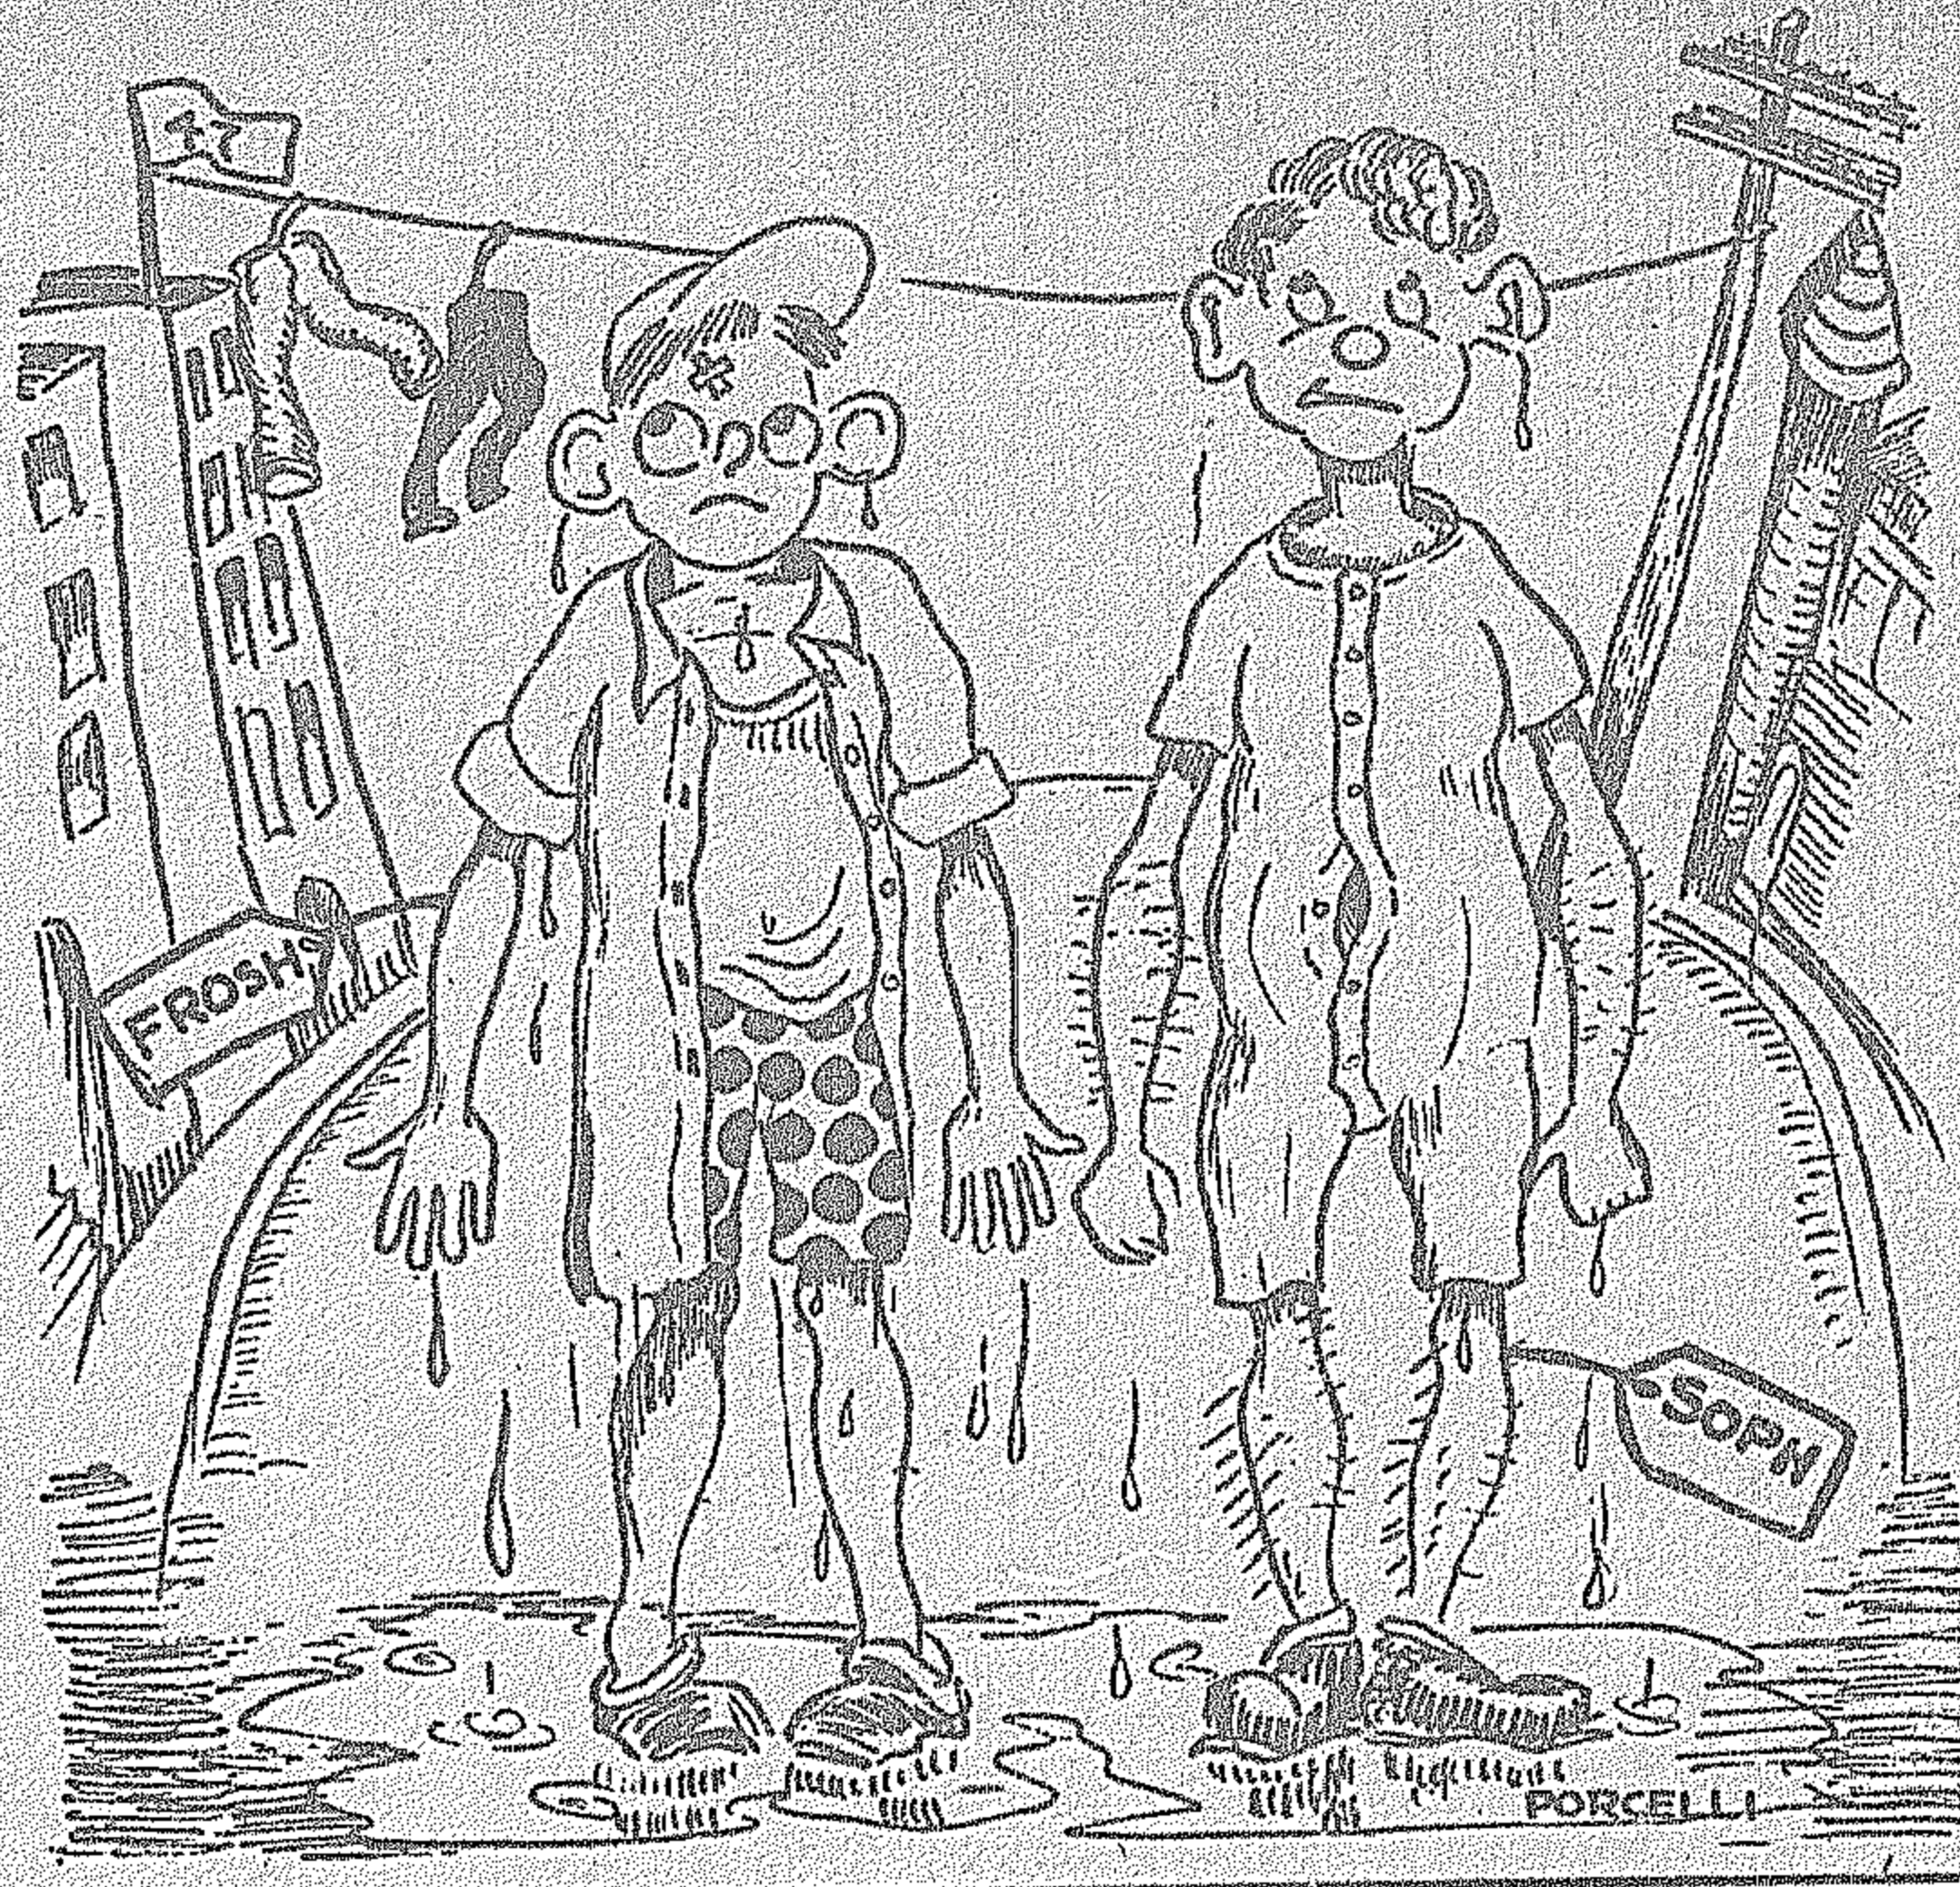

The next question to arise is whether or not the ITSA should continue as the student governing body. Most certainly it should. There will always be a need for such a group where the student can meet on common grounds with the faculty and administration. Of course, the field of the ITSA activity would be greatly restricted, but it would still be a necessity.

At this stage, it would be well to point out some of the confusion that may exist if the navy does not support the ITSA. Under such conditions, both the Integral and the *Technology News* would go on a voluntary subscription basis. Until sufficient numbers of students had subscribed, work on both publications would have to cease. Since many students are reluctant to take the time to pay for such items, publication of this paper might be suspended for several weeks. In addition to this, some other means would have to be devised to pay for the necessary expenditures of the athletic teams, of the orchestra and intramural events.

Certainly there will be no group to finance the ASSC, and there will be no group willing to back a dance such as the Navy Ball. There will be no group willing to lose \$1,200 on such a thing as the Navy Ball. If there is to be a dance, the money will have to be ready beforehand if the students wish to enter into a contract with a band or ballroom. There appears in the offing a drought of social activities during the next few semesters.

What will happen is dependent upon the navy. Their stand should be determined this week.

—H. BURKART

Oh, that Navy Ball! What an affair! The biggest in ages! Could have anyone resisted? I saw that all of you had a bit of that verve and vigor for a violent affair. It seems that all that is seen at present is that sparkling eye after a rampageous evening. From what we found out, plans were formed in those calculating minds for that night of hectic romance.

It seems that these boys with their girls from out of town really had some gay times. Especially some of those who had arranged for a room for their women.

From what was sniped out we found that Bob Petrillo, Wesley Muthig, Dick Graham, Charles Hendries (and those I have not yet put the finger on) came back to the apartments and had a drink or two. Many of them claim to have had an interesting time playing cards (that new game Shauflkoph). Oh these engineers! They are the gay boys. Most of the others spent the evening trampling thru the various night clubs in the district whooping it up and I mean that. Ray Bojonowski, Charlie Smith, Vernon George and Bob Anderson really whooped it up. A few of them found navigating quite unfavorable. I hope they didn't keep those gay young ladies out so long that they yielded.

But I really feel sorry for those lads who were financially unstable and had to return home early for night clubbing is the thing. However, if I know these engineers they enjoyed themselves just as well if not better. All and all it was swell to see those smiling satisfied faces with their gorgeous women in arm. Those ravishing formals were very tempting to the eye and it was swell to see such a fine gathering of beauty.

A/S Riesinger of House 5 seems not satisfied with his three beautiful females. He has to rub it in with the rest of the boys by having them meet him in front of the house in a huge Buick convertible.

It's rather hard to understand why some guys always wait around until the last minute to do things. A/S Jack Marsh is the kind of a guy who waits until the telephone begins to ring before he answers it. He waited until last Thursday night before the Navy Ball to begin to get a date. It began to look bad, because most of the girls resented Marsh's suggestion that they wear a red, white, and blue formal to go with the corsage he had already ordered. But one girl finally consented—she ripped up an old Uncle Sam costume her brother had once worn in a play!

Beta Nu fraternity announces initiation of new member, A/S Bob Hammack. It seems that the Mississippi Kid would rather pound a typewriter than take calisthenics in his P. T. class. Hammack has been making the Aragon regularly to meet a certain slick chick, too.

One of the chief duties of James R. Cavanagh seems to be that of keeping the wolves away from his secretaries in the War Training Office. The manpower shortage being what it is, the secretaries show little cooperation in this work, thus creating just about the most difficult job on the campus for Cavanagh.

For conduct unbecoming to naval officer candidates, two men, members of the IIT V-12 Unit, have been recommended for the rank of SSNO (Smallest smallest naval operators). They are A/S Bill Cannon and A/S Wendell Omer of Quarters No. 7. Both claim the record of never having a date since their arrival to Chicago last July. However, they say that this is not because they are SSNO's but actually because they are remaining true to their respective fair friends in Salt Lake City. Maybe so, but, 11 months is a long time to be dateless.

A/S Wesley Spear, the "Grant Park Gladiator" of Quarters No. 7, has of late developed the title of "homewrecker". It seems that he struck up a "fairly platonic friendship" with an engaged young lady whose spouse to be is off to the wars. Everything was fine in a "purely platonic way" of course when the above mentioned young lady announced, with star light in her eyes and a smile upon her lips, that the engagement is off and that she is again available. We wonder what Seaman Spear's next move will be. However, we all must wish him the best of luck.

Those gay old M.P.s on patrol who let no obstructions hinder them, and drive over coal piles just because they are in the way, have nothing on Bill Krone. If anyone saw him barrel around in his little coca-cola truck, they would surely sign him up for M.P. service.

—BROTHER ALOYSIUS

Research Reports—

Nash Delves Into Stresses Beyond the Elastic Limit

(EDITOR'S NOTE: This column will present each week a brief report of the various research projects being carried on at IIT. Since Technology News is the student newspaper of a technical school, these articles will be of a more technical nature than would be possible in an ordinary newspaper, but they will nevertheless be written in such a manner as to be accessible to the majority of the student body.)

The condition of structural members after being stressed beyond their elastic limit is being investigated by William Nash, research assistant in mechanics. Nash received his BS degree in civil engineering at IIT last February. He is working under the supervision of Dr. Le Van Griffis of the mechanics department, on a project for the Chicago Bridge and Iron Company.

It is well known that up to a certain point the elongation of a metal bar subjected to tension is directly proportional to the force applied to the ends of the bar. This point is called the elastic limit. When the load is further increased, the elongation is no longer proportional to the force and the bar is said to be in the plastic state. Very little is known of the actual stress and strain conditions that exist after the elastic limit has been passed. The case of a bar subjected to end forces causing only tension, one of the simplest cases in the plastic region. When a specimen of metal is subjected to stress in more than one direction, the problem becomes increasingly difficult.

Many structural and machine members are often in a state of plastic stress, although they are seldom designed as such. Due to a demand for more knowledge by machine designers, structural engineers, etc., more must be known of exactly what happens after the elastic limit has been passed.

One common example of a structural member in the plastic state is a water tank, formed of cylindrical sides and either a conical or

ellipsoidal bottom. The tank, after completion, is first subjected to an initial internal pressure of twice the actual pressure that will exist in it when it is filled with liquid. This pressure is then removed, but it will be found that the part of the tank at the junction of the cylinder and cone has suffered some permanent deformation, i.e. it has not returned to its original shape or size. This difference probably will not be noticeable to the eye. The metal at the junction is said to have been deformed plastically.

After the tank has been placed in service, the internal liquid pressure again gives rise to stresses at the junction. These stresses are still more difficult to analyze, because they are affected by the initial plastic deformation of the material mentioned above, that is, there are "residual stresses" in addition to the stresses set up by the fluid pressure. This is the specific problem of the Chicago Bridge & Iron Co.

Approximately a year will be devoted to an analytical study of the fundamental problem. This will be supplemented by experimental work. A thorough study of the literature of previous work done in the field of plasticity is being made, as a prerequisite to any original work.

Yup, the life of a newspaper columnist ain't what its cracked up to be. How'd you like to be faced with a blank piece of paper, and not have a single printable thought in your head. You have to pound out 250 words about something you hope will interest the public, but when you get through with your effort, it looks as if the Russian army had walked through it with their shoes off.

The guys who hack out the stuff for the big dailies must lead a hell of a life. But they get paid for it, I suppose, so it helps feed the baby and pay the income taxes. The odd thing about newspaper columns, though, is that the big dailies buy

them, not for their prestige, but because they are cheap. We have all heard that a big-time writer has a salary ranging into hundreds of dollars a week, but this is due to the appearance of his or her column in about a hundred papers each day. If you figure that the writer makes half a grand each week, with 100 subscribers every day, it figures out that the poor jerk gets only one U. S. dollar per column per paper. If that isn't cheap, what is?

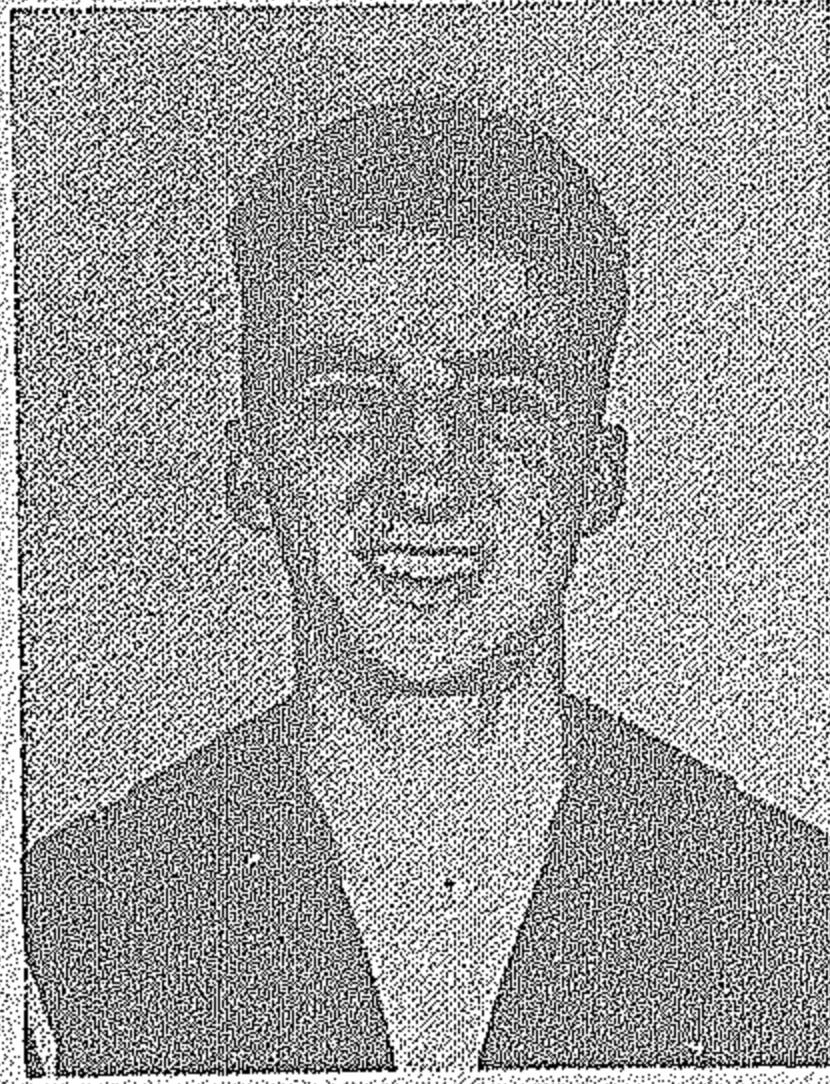

Yup, such is life. A dollar a day. A million days, a million dollars, but a million days is about 300 years, and who wants to wait for 300 years for the draft board to make up its mind?

Man Of The Week—

Sports, Honor Board and ITSA Identify Smiling Tom Kilgariff

An outstanding athlete, and a member of the Honor Board, Junior ITSA Representative A/S Tom Kilgariff is one of the handsome, smiling, happy-go-lucky campus figures.

TOM KILGARIFF

Tom's athletic career began as a freshman when he played forward on the Techawk basketball team. He was second highest scorer and the only freshman basketballer to win a major letter.

This season Tom was elected co-captain of the most successful basketball team in IIT history and was the second highest scorer again. Crowning his athletic achievements was his election to Honor I this semester.

When the first all-school Honor Board elections were held last semester, Tom became one of the junior representatives. His faithful service was rewarded by his reelection to the Board this semester. Also, Tom was elected to the post of junior ITSA representative this term.

Tech News has claimed Tom as a reporter ever since his second semester. For the past two semesters, he has served as a Copy, Headline,

and Rewrite Editor and is one of the mainstays of the sports staff.

Intramurals have played a big part in Tom's activities. He played on the champion Cicco Wizards basketball team and on the champion Soph Mech touch-ball team.

Now a junior mechanical, Tom has been a leader on the campus since he first came to IIT from Leo High School. This past semester, he exchanged his civilian status for a place in the V-12 unit.

As for outside activities, Tom likes nothing better than to "go out with the boys", as he puts it. In the summer, he has been one of the most prominent and constant visitors to the "renowned" town of Delavan, Wis. He sadly reflects now, though, that the Navy may seriously hamper his frequent trips to that delightful spot.

When asked about his going around with women, Tom claims that there is nothing to tell. None of his friends are convinced of that, however, but no one as yet has been able to get any dope on that side of his social life.

—JAMES OLDSHUE

—By ALAN GRANT

With the majority of marriageable males in the armed services Westminster college co-eds believe in "getting their men first" before doing any wistful planning like beginning the traditional hope chest of linens, china and silver. In a survey made among 350 co-eds it was found that only about a dozen girls own the old-fashioned cedar chest filled with luxuries.

For the first time in its 127 year history the University of Michigan is operating a residence hall exclusively for foreign students. Known as the J. Raleigh Nelson House, after the former head of the International Center, foreign students organization, the residence already houses 16 students from China, India and Latin America.

The average person consumes a little more than a minute in brushing his teeth, Dr. H. B. Robinson of the University of Washington dental school found in studying the methods of 405 individuals. He told the International Association of Dental Research that although Americans have mastered the approved rotary or up-and-down method of tooth brushing they pay too little attention to less accessible tooth surfaces.

When Dallas county Democrats decided to bar members of the Mongolian, Malayan and "Ethiopian or Negro" races from voting in the precinct presidential convention, Texas anthropologists indicated that it would take a Solomon to determine just who could vote. Comments came in from faculty members of Rice Institute to the effect that the determination of a man's race by looking at him would be extremely difficult. The controversy that has arisen is whether the American Indian (Mongolian) can vote or not.

Eggs frozen in convenient blocks (one egg or up to five pounds) will be ready for the housewife or confectioner in the post-war era, predicts Dr. Luis Bartlett, University of Texas test engineer and inventor of the "flash freezing" process.

A workable Honor System has recently been approved by the students of Grinnell College. The rules state that no faculty members or proctors will be in the room after the first ten minutes of the quiz. The student will sign the same type of pledge in existence at IIT. The penalty for a first offense is an I in the course and two weeks suspension from the college. The second offense will bring about the permanent suspension of the student from the school. This is a workable Honor System.

The men of DePaul University drove the female members of their newspaper staff away and put out their own traditional "he-man" addition recently.

Boogie Woogie:

I am only one of the many IIT students who were unfortunate enough to miss Prof. S. I. Hayakawa's lecture on Boogie Woogie. From the comments voiced by those who were lucky enough to hear it, not only on Prof. Hayakawa, but also on his assistant Jim Wangerheim, I am anxiously awaiting the chance to hear it again, during the day. I am sure that I speak for many.

R. E. D.

Elevators:

The other day I noticed that some IIT madmen were opening the door to the elevator by putting their hands through the grating releasing the safety catch and then slamming the door back and forth.

Apparently these men feel it takes engineers or people with a great deal of mechanical ability to pull such daring feats, but they lose sight of the fact that they are in college and are supposed to show some signs of intelligence.

Do these people realize that what they are doing may not only cause misfortune to themselves, but to innocent people?

Are we, in an institute of higher learning, going to sit back and let a few non-thinking members make the student body look like a bunch of imbeciles? Is activity of this sort to be characteristic of the student body of IIT?

We, the thinking students, must take up this challenge and try to uphold the standards of the school. If we see another act of this sort it is our duty to remind these culprits in no uncertain terms that they should show consideration for IIT and for other students.

K. N.

Good Techmen:

It seems as though Tech News has finally bowed and given the navy man on the campus some thing to be proud of. Its about time the navy man has been put into the position of "good Techawks." We are very pleased to be able to work as brothers with you on Friday

evenings.

Certainly the athletic teams should be faced with a tough situation if it weren't for our "good Techmen", the navy students. And what about our navy band that plays for the dance club? Let's not forget that the members of the band forfeit an hour of their precious liberty time each time they provide music, just to be "good Techawks."

Keep it up Tech News. Perhaps if we hear more of the good work the V-12 students are doing, we can get a little more campus unity.

R. F.

The writer is referring to the recent co-operation between civilian and navy students on Technology News.

—ED.

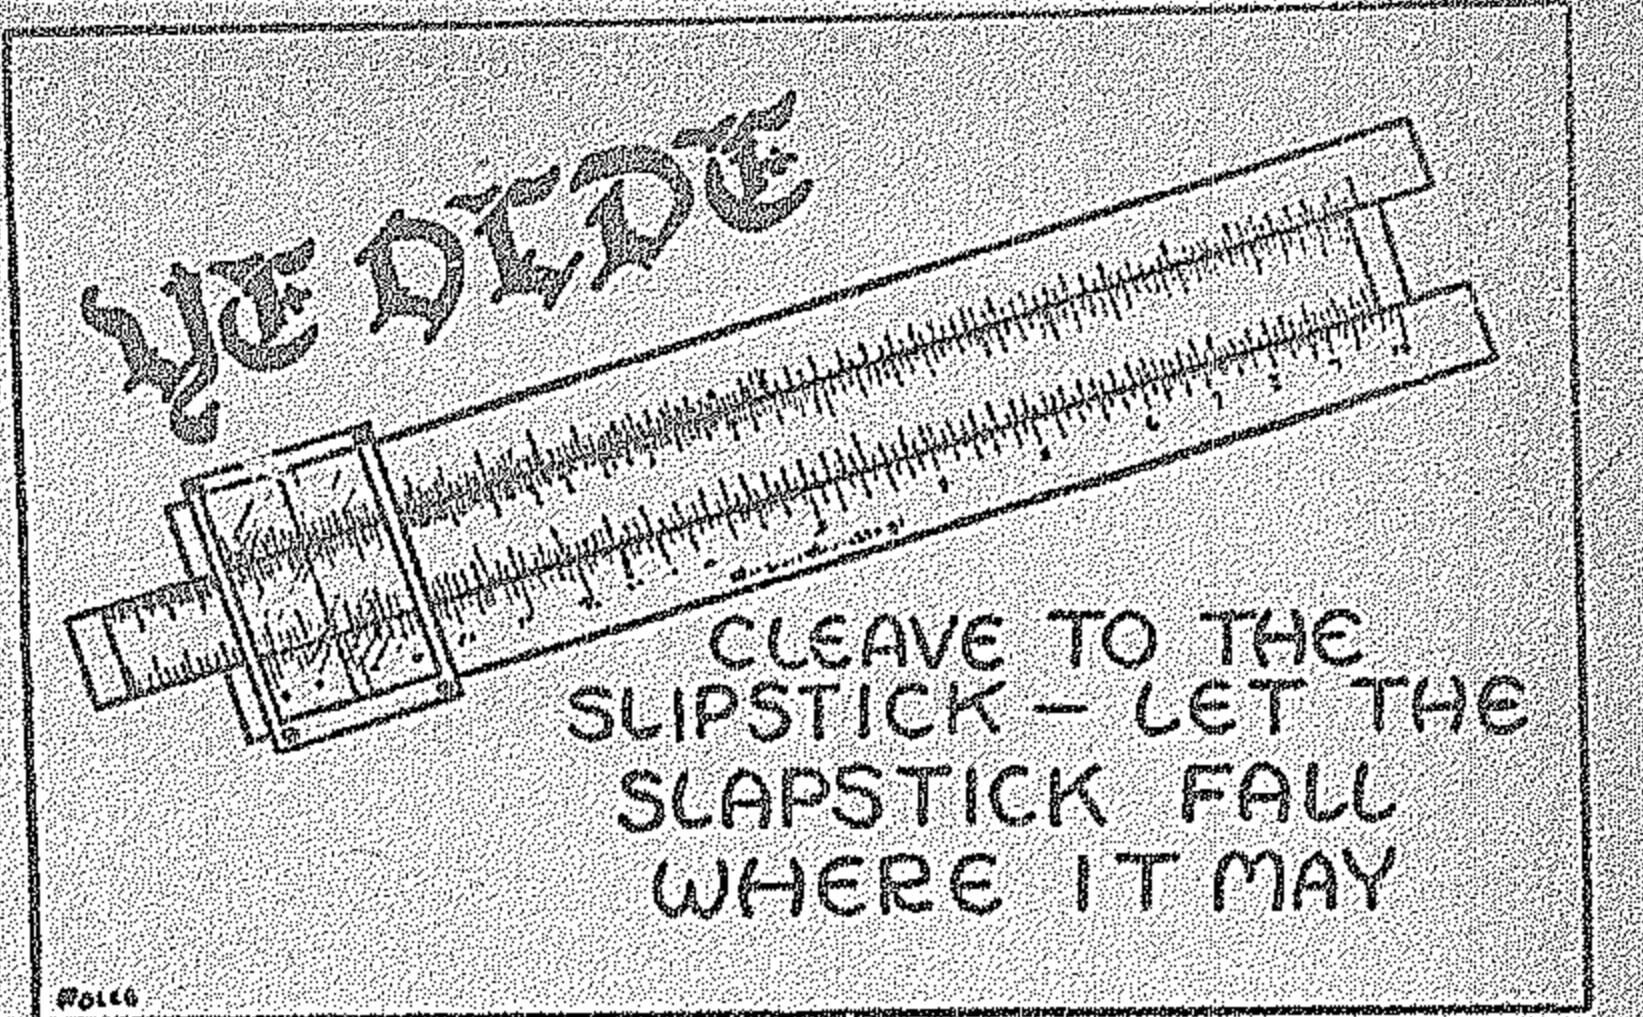

Where Credit is Due:

I believe that credit should be given where it is due. I am referring to the maintenance department. One of the biggest jobs on the campus is to maintain the campus in a fashion that will make the student body proud of its campus. This job under the present conditions has been carried out by the maintenance department.

Such work as converting the houses on Michigan Ave., into navy barracks was done by the Maintenance department on time to house the incoming navy men. This alone was more than most colleges in this area could do. From the plastering and plumbing to making the beds that the men sleep in were done by the maintenance department. This job was also done for the ASTP. Such jobs as building the Lewis lounge, building the horseshoe courts, and thousand other small jobs are done all at the same time by this department.

"The best is none too good for the students on the campus", is the motto of the maintenance department stated Mr. Walter J. Parduhn, superintendent of the maintenance department. This motto I believe has been carried out in every situation that it was possible. How about a salute to the maintenance department.

Ed Rubin

Here we go with a new week, new circumstances and some new slavery to keep up the old grades, but what do we have here; just the same old jokes.

Has anyone heard about the poor farm lad that came into the city and found himself a job in a girl's college? It seems that they thought that Oscar would make a perfect janitor, so with this job he was given the pass keys to every room.

The following week the Treasurer ran across Oscar, who was busy running here and there, and asked him why he didn't come around on payday for his check.

Oscar was dumbfounded and said, "Vot, do I get vages too?"

Daffynition No. 1.

Watch:

Something which if you look at long enough, it will be too late to do what you were going to do before you looked at it.

Fraternity Trouble:

Pledge: What is the big idea of wearing my raincoat?
Active: It's raining out, and you wouldn't want me to get your new green suit wet, would you?

Ruck: I can read you like a book.

Mable: Well, don't be so anxious to thumb the pages.

Note to those bewhiskered fellows: How sweet the girl, How true, how brave, Who can kiss her man, When he needs a shave.

"Morphy, Morphy," called a Negro to her little boy.

A bystander, struck by the name, spoke to her. "Surely you mean Murphy," he said.

"No suh," she said. "His full name is Morphine." "What ever made you call him Morphine?" asked the stranger.

"I don't know what to name him 'till one day I hear two gentlemens talking an' one says that morphine cowed from the wild poppy. Well, no boy's poppy was ever wilder than that boy's."

Rynkus: We're going to give the bride a shower.
Binder: Count me in, I'll bring the soap.

They were dancing together. The soldier was far from home.

"Do you mind," he asked, "if I close my eyes?" "Why, darling?" she asked.

"Well," he said, "I promised Myrtle in Brooklyn never to look at another girl."

Ensign: The sailor who sneaked out of quarters last night and met a girl on 35th and Michigan will step forward—COMPANY HALT.

WAR NOTE:

Out in Italy a squadron observer went to report to his commanding officer after returning from a raid.

"Were you nervous during the attack?" the CO asked.

"Who me," asked the observer, "I was cool as a cucumber during the whole show."

"Swell," said the CO. "I thought you might have been a bit nervous when you radioed in that 27,000 enemy bombers were coming in at 8 feet."

Salesman: Here, this machine will do half your work for you.

Engineer: It seems like a good deal. I'll take two.

Cernauskas say:
To get heat from a hot body to a cold body work must be done.

Wilson: Won't you give me your phone number?

Sally Jane: It's in the book.

Wilson: Splendid, and what's your name?

Sally Jane: Oh, that's in the book too.

Captain: All hands on deck. The ship is leaking.

Voice from the forecandle: Aw, put a pan under it and go to bed.

My idea of a lazy student is one who pretends to be drunk so his fraternity brothers will put him to bed.

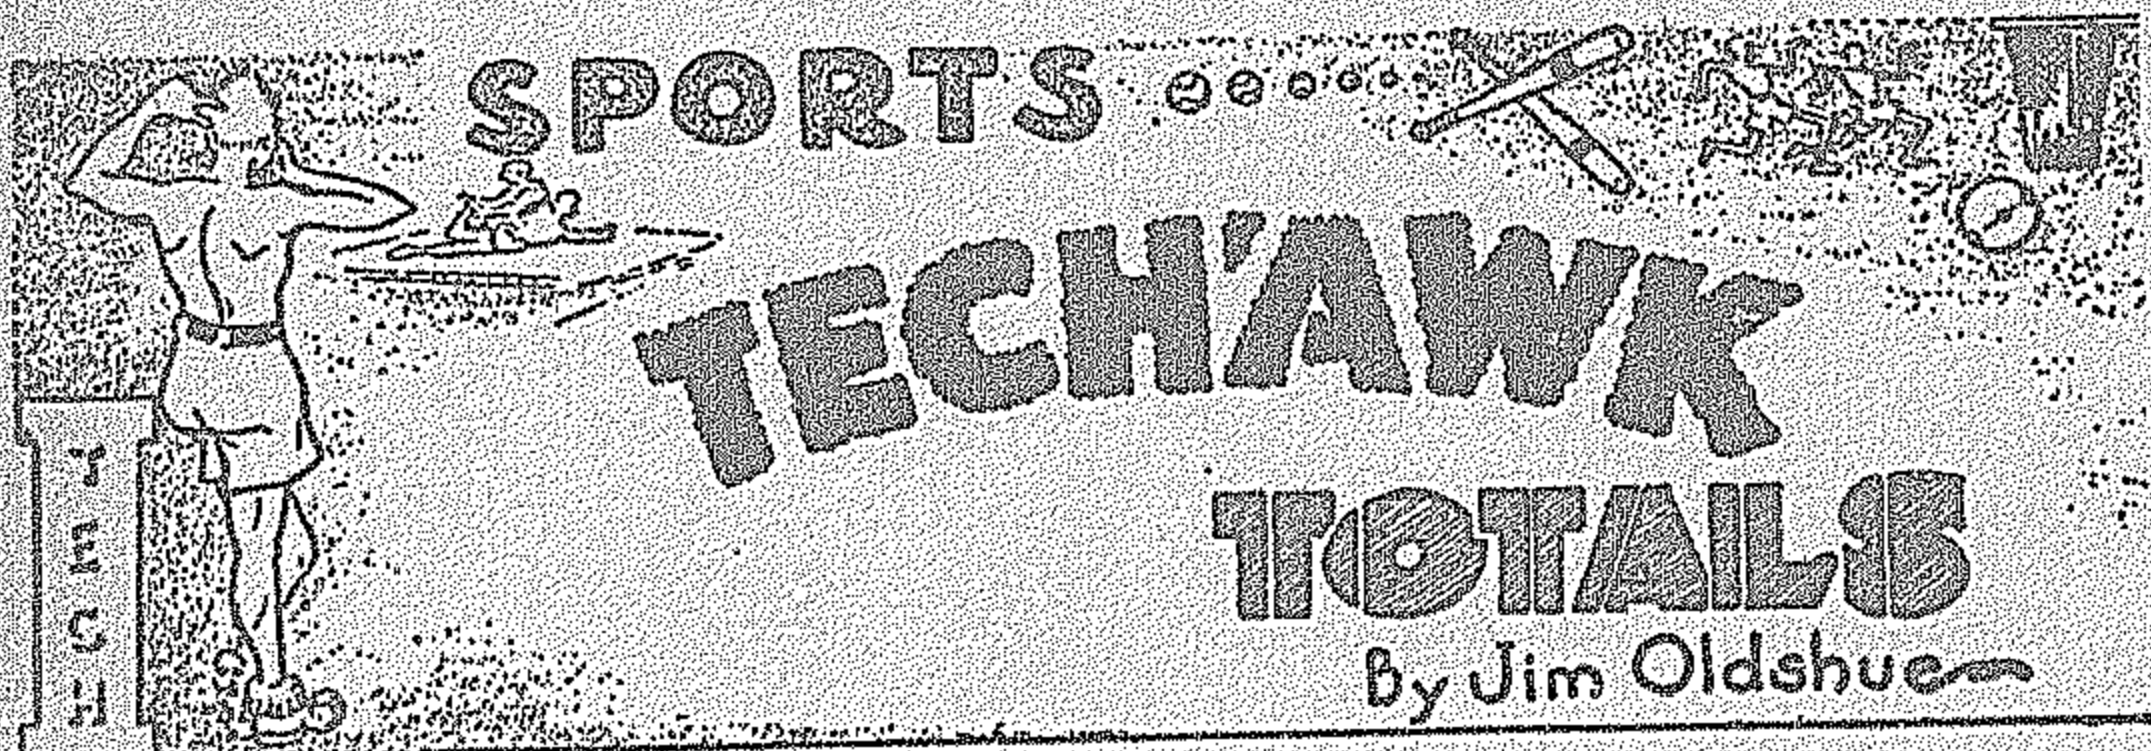

The church service was proceeding successfully when a woman in the gallery got so interested she leaned out too far and fell over the railing. Her dress caught in a chandelier, and she was suspended in mid-air. The minister noticed her undignified position and thundered at the congregation: "Any person who turns around will be struck stone blind."

—LARRY VYTAUTAS CERNAUSKAS

BERNARD GOODMAN is the only student majoring in architecture who will graduate in June . . . CLARENCE SIKORSKI, freshman ME, once took a bicycle trip in which he traveled through six states . . . The oldest student enrolled in the civil engineering department is JOHN HIRAMOTO, 28 . . . A graduate student, THOMAS HUNTER, is an instructor in three different departments. He teaches physics, mechanics, and fire protection engineering courses . . . DONALD RAPPEPORT, freshman EE, formerly attended the University of Illinois, where he had Dr. ALFRED AMES for freshman English. At the end of the semester, both Don and Dr. Ames transferred to IIT where Don again has Ames for freshman English.

Junior Week Sports Headed by Decathlon and 5 Softball Games

Another Junior Week has come and gone and although the sophomores were judged the champions of the day, the softball championship goes to the senior team. One of the discoveries of the game was the pitching talent of Auggie Clemens. Although he played a lot of hardball, Auggie hadn't played much softball at IIT, but his pitching demonstrated that he is a master at the art. His non-twirling fast ball is a real "umpire fooler".

It looks as if the Junior Mechs have the best team in the intramural tourney but when the entire senior class gets together, they have the superior team on the campus. They are too split up on the three senior teams in the tourney to give any one team a championship outfit.

I think that some kind of a record has been set on the softball scene by Paul Ridings, the Faculty and Tech News pitcher, in the games this week. In the two games he pitched this week, it seems that a total of 41 runs crossed the plate in 13 innings. The intramural officials are afraid to let him pitch much more for fear that their scarce supply of bases will be worn out by the constant trampling by so many base-runners.

One of the many troubles of the intramural department is the sad quality of the softballs which they have to use. The balls are good for about one game at the most before the cover rips. There are some good balls still left for the finals, but the balls now in use are certainly bad.

The Navy 16-inch softball team played down at Grant Park last week in the service men's league. The IIT boys really showed their stuff, trouncing the opposing team in their first game in the league 19 to 1. Observers state that the Tech Navy team has a good chance to win the title in the league.

Between the draft and several other unfortunate situations, the Tech baseball team is having a hard time keeping their catchers. Vince Bicicchi is gone now and A/S Vic Meizscowski is still out so the catching department is in a bad way. Coach "Sonny" Weissman is trying to break in little John Hiramoto as a catcher, but it remains to be seen as to how successful the transformation will be. The team is still going on about as usual in the other positions, so they should continue at a fairly good pace.

In their game with George Williams two weeks ago, one of the rare happenings in baseball, especially rare for Illinois Tech, occurred. In every inning only three men were up and all went down before A/S Bob Steward. Three times during the game men were on base, but two double plays and a perfect throw by Bicicchi on an attempted steal eliminated the runners.

Sixteen Games Played in V-12 Softball; Rain Delays Others

Even though play in the Navy V-12 twelve inch softball tourney was partially stalled last week due to the inclement weather, sixteen games have already been played.

As yet no outstanding team has been evident from the few games contested, but 7A and 2B show signs of being in the foremost group when the tourney ends.

The record of games played is as follows:

TEAM STANDINGS		
Quarters	Won	Lost
1B	2	0
2B	2	0
7A	2	0
6A	1	0
5B	1	0
7B	1	0
1A	1	1
2A	1	1
2D	1	1
4A	1	1
4B	1	1
3B	1	1
5A	1	1
6C	0	1
6B	0	2
3A	0	2
2E	0	2
2C	0	2

Golfers Schedule Matches for June

The IIT golf team will be the guests of the Notre Dame golf team June 30, announced manager Leonard Baness. Other matches scheduled during June are contests with the faculty and alumni.

Robert Negele, number three man on the golf team, left for the navy last week. This means that the number four, five and six men will move up one place, leaving a vacancy on the team.

Mental Value Of Sports Told

The value of competitive sports as a mental conditioner was emphasized today by John J. Schommer, director of athletics.

"It is my belief, along with many others, that fully half of the men in this country classified as psychoneurotics could be made available to the armed forces through sports," said Schommer.

"The trouble with most of these men is that they have no form of regular exercise. They are physically soft, they brood—the result is another neurotic develops. Were these men to engage in some sport, preferably an outdoor type, they would undoubtedly sleep better and brood less.

"It will be my purpose after the new fieldhouse is built, to introduce the rank and file of the students to sports which they will play after leaving school. Sports such as golf, tennis, volleyball and handball can be played by older men almost all year 'round. Every man should have some form of regular exercise, no matter what his age," concluded Schommer.

Ship's Company Meets In Volleyball Matches

"War" is being waged among the members of the Illinois Tech V-12 Ship's Company.

For several weeks the storekeepers and pharmacist's mates have been meeting the yeomen in volleyball games. Storekeeper 1/c C. E. Tracy states his team beats the yeomen through force of habit.

19 Compete In IIT's Decathlon

Gavin, Papps, Hammack Pospisil Garner Honors

Winners of the decathlon, premier sports event of Junior Week, were Tom Gavin, Dick Papps, Robert Hammack, and John Pospisil in the senior, junior, sophomore and freshman divisions, respectively.

A total of 19 men competed in the event with the majority of them, 10, coming from the junior class.

John Pospisil garnered a total of 19 points to win the freshman division title from Allen Kukral, who had 18 points. Kukral placed first in four of the ten freshman events but took third places where Pospisil was winning seconds.

In the soph division, Bob Hammack showed his versatility by winning five of the nine events he entered. Dick Papps, winner of the junior title, won four events out of the seven in which he competed.

The winners of each event were as follows. Unless otherwise noted the first man listed was the senior division winner, the second the junior winner, and so on.

- 100 yard dash
Gavin
Kilgariff
Hammack
Kukral
 - Baseball Throw
Gavin
Ruck
Marrin
Gost
 - Football Throw
Gavin
Papps
McElhaney
Gost
 - 880 yard run
Goldman (Junior)
Kukral (Freshman)
 - 220 Yard Dash
Gavin
Kilgariff
Hammack
Kukral
 - Potato Bag Race
Hammack (Sophomore)
Kukral (Freshman)
 - Shot-put
Odehnwalt
Papps
Hammack
Gost
 - High Jump
Gavin
Papps
Boston
Pospisil
 - Broad Jump
Papps (Junior)
Hammack (Sophomore)
Pospisil (Freshman)
- Point totals for each man were:
- Senior division
Gavin 11
Odehnwalt 5
 - Junior division
Papps 32
Ruck 21
Kilgariff 19
Niemi 15
Slaughton 12
Kovnat 6
Goldman 5
McGuire 4
Schinke 4
Porcelli 0

Hammack 27
Marrin 21
Boston 18
McElhaney 10
 - Freshman division
Pospisil 19
Kukral 18
Gost 16

Senior Announcements Will be Available Soon

June Graduate announcements will be available the latter part of this week. Ed Neidel, committee chairman, stated. The announcements will cost \$.15 each; details will be posted on the main bulletin board.

A limited number of extra announcements may be obtained by those who had not previously ordered.

Senior Softball Team Wins Class Title; Whips Faculty 16-4

The senior softball team proved itself to be class champions by beating the juniors 5 to 2 and defeating the sophomores 12-8. The sophs had previously beaten the freshmen.

To prove that they are the champs of the campus, the seniors then proceeded to trounce the faculty team 16 to 4 last Friday.

In another Junior Week game, the Integral defeated the Technology News team 27 to 20 Wednesday in a blinding down-pour which turned the field into a sea of mud.

2 Games Set For Ball Team

Illinois Tech's climbing baseball team has two games on its schedule for this week, playing 87th St. Navy on Wednesday and Joliet State Penitentiary Sunday.

Joliet is one of Tech's foes each year and has always had one of the stronger teams in the state. Last year, the Techawks battled them to a 4 to 4 tie in 12 innings.

87th Street Navy is IIT's adversary this Wednesday at 6:00 p.m. at Ogden Field. Tech beat the Navy 5 to 2 in a previous game this spring.

The services of three of the Techhawk players this year have been lost so far. The team's regular catcher, Vince Bieicchi, is the last man to leave; he is being inducted into the Army today.

A/S Vic Meizscowski, another catcher, was injured in the first game of the season. A/S Ray Schimmelpfenig, an outfielder, has been in the hospital with pneumonia for several weeks. Ray's batting average was .500 when he was hospitalized.

Rain Halts IM Softball Race

The only result of the intramural softball tournament last week was the forfeit by the Mad Chemists to the Freshman Flashes. All other games were rained out.

The games which were postponed will have to be played at some future date, announced Henry Dirksen, intramural manager.

3A Bowlers Defeat First Term Juniors

The second semester juniors defeated the 3B's in their challenge bowling match last Tuesday. The 3A's swept every game and totaled 173 pins more than the losers.

Chet Pachuki of the winners was top man of both teams, with a 505 series. Jake Dumelle, captain of the 3A team, began his third game with four strikes but slowed to end with 209 and a 499 series. George Ehrhart, 3B captain, was high man on his team with a 493 series.

The two classes are now even in their inter-class athletic feud with one victory for each. The remaining contests in softball, touchball and basketball will be played this week because of the draft situation.

SOFTBALL SCHEDULE	
Monday, 5:30	3A Mechs vs. Senior Civils
Tuesday, 5:30	Mad Chemists vs. Senior Chems
Junior Mechs vs. Senior Civils	Senior Mechs vs. Freshman Flashes
Wednesday, 5:30	Junior Chems vs. 3A Mechs
Senior Juicers vs. Mad Chemists	Thursday, 5:30
Senior Juicers vs. Frosh Mechs	Lewisites vs. Junior Mechs
Friday, 5:30	Lewisites vs. Senior Mechs
Frosh Mechs vs. Senior Chems	

Faculty Use Schommer But Lose to Seniors 16-4

Junior week activities last Friday began with the senior-faculty softball game. The seniors overwhelmed their opponents by the score of 16 to 4.

The game was highlighted by the appearance of John Schommer, who pinch-hit in the faculty lineup during the sixth inning after the crowd began chanting, "We want Schommer." He hit a grounder to the third baseman and was thrown out at first.

Auggie Clemens pitched for the seniors, while Paul Ridings was on the mound for the faculty. Bernard "Sonny" Weissman relieved Ridings in the last inning.

Considerable commotion arose when it was discovered that the faculty team was using five outfielders. However, even this number seemed insufficient to cope with the abundance of home runs clouted by the seniors.

Seniors Halt Late Rally By Sophomores, Win 12-8

To clinch the class title, the seniors trounced the sophomores 12 to 8 Thursday. A/S Bob Steward was the winning pitcher for the seniors.

A/S Dick Gilfert and A/S George Schober both hit home runs for the winners. Dave Meissner hit for the circuit for the sophs.

The seniors were never behind and held a good sized lead throughout the game. However, five hits for the sophs in the last inning enabled them to start a rally, but it died out after three runs had scored.

Clemens Gives Juniors 2 Hits; Seniors Win on Homers, 5-2

Probably the tightest game of the week was the senior-junior tussle. Hurling for the seniors was Auggie Clemens who allowed the juniors only two hits, both in the first inning.

Home runs by Bill Lenzi and Joe Rimac led the senior attack. Both of the juniors' runs were scored on Jim Oldshue's circuit clout.

In the first inning, Bob Kasnicka walked after two were out and came home on Oldshue's homer. A/S Don Lange followed with the juniors' only other hit, but was stranded on the sacks.

The seniors came right back to score two on Lenzi's homer. They added runs in the third, fourth and sixth innings to make the final score 5 to 2.

Sophomores Defeat Freshmen In Well Layed Game, 9-3

Last Monday afternoon the freshmen and sophomores moved their rivalry from Federal Street to Ogden Field, where they sought to settle their differences by the medium of baseball.

The sophomores emerged the well satisfied victors, with a 9 to 3 score over their underclassmen and rivals.

The game was well played, with few errors on either side, and some outstanding pitching. Contrary to most freshman games, which are usually full of errors, this game was played with professional-like fielding. The main freshman disadvantage was their consistent lack of "power" hitting.

The game was well attended by spectators who witnessed a constant parade of players on both sides.

Schedule for Integral Photos

Dean Tibbals has given permission for students to leave classes to have their pictures taken during their scheduled time this week. Every group should have their picture taken whether they plan to purchase a page in the Integral or not.

Wednesday	10:00 Jr. Chem	A-M	11:10 Honor Board

IAeS to Hear Talk On Engine Testing

M. J. Leonard, supervisor of the engine testing laboratory of the Dodge-Chicago plant, will speak at a meeting at the IAeS to be held Friday in Room 220 Chapin at 1:30 p.m.

Leonard will present an illustrated talk on "Methods of Testing Aircraft Engines." As the Dodge-Chicago Plant, a division of the Chrysler Corporation, maintains the engine testing laboratory not only to repair engines, but also to develop and improve engine designs, Leonard's talk will be concerned mainly with these engines.

The meeting is open to anyone who is interested.

Bookstore Will Have Log Logs

One hundred log log polyphase duplex slide rules will be on sale at IIT's bookstore by June 1 to civilian students only, according to Alfred Bruhn, manager of the bookstore. They will be sold on a first come, first served basis, he added.

There are also a number of runners for these rules on sale to both navy and civilian students.

Navy Transfers Mangolis To South Side Campus

The transfer of Pharmacist's Mate Jack Mangolis from the George Williams to Armour was revealed today by the medical department.

ARX Society Plans For Reorganization

The Armour Architectural Society is being reorganized. At a meeting last Thursday, the architects discussed plans for future undertakings. Next Thursday officers will be elected and installed.

The AAS has not been functioning since last February. There have been many attempts made by various pupils in the architectural department to reorganize this society, but due to lack of interest they were not successful.

The faculty adviser has been selected. He is Ludwig Hilberseimer, professor in city planning.

At the present time there are only 22 architectural students here. Few are expected next semester.

TUITION

(Continued from Page 1)

"Athletics including the inter-mural program, musical clubs, and those student activities which operate under faculty direction will be financed from the general funds of the Institute. For example, the budget of the Department of Physical Education will include all salaries for instructors and coaches and all the expenses incident to the athletic program.

"The Illinois Tech Student Association will continue its jurisdiction over student government, student publications and those activities which are essentially student controlled. The Institute will for the time being appropriate to the Student Association \$3.00 per student per term to finance these activities. This allocation may be changed from time to time as special conditions require.

"The Student Association Board will be responsible for the administration of this fund under the guidance of the Treasurer. The present reserve funds of the ITSA will remain under the jurisdiction of the Student Association Board.

"In a similar way, the operating expenses of the Student Union and Student Lounge will be borne by the Institute from its general funds. Operating policies will continue to be set by the Student Union Board of Control and the Student Lounge Committee.

"The change in tuition policy represents an average total increase of \$25.00 per term per student in cost of attending the Institute. In some courses, such as chemical engineering, the increase is much less. In others such as the Arts and Science courses, it is substantially greater. It is, however, considered desirable to establish at this time a uniform tuition charge for all divisions and departments.

"In order that the increase in tuition will not work a hardship on students who have very limited financial resources, the Board of Trustees has authorized a substantial additional appropriation for scholarships and grants in aid. These awards will be made on an individual basis after consideration of the student's need and ability.

"In the award of these scholarships and grants in aid, special preference will be given to students in the Lewis Division for whom the increase in tuition is most substantial. Sufficient assistance will be available to insure that no deserving student need withdraw from the Institute for financial reasons."

Keeney to Head Cafeteria
Andrew Keeney has been appointed the new IIT Cafeteria Manager, replacing Elizabeth Ferguson. Keeney previously acted as assistant to Miss Ferguson.

Visual Education Lacks Operators

The visual education department is sending out a distress call to all motion picture fiends. Movie projector operators are urgently needed to replace men going into the armed services.

Operators work on a part time basis at any time suited to their convenience. All interested students should apply at its offices at 43 W. 33rd St.

STUDENTS

(Continued from Page 1)

service (1-C) or classified 4-F are absolutely exempt from military service unless their physical condition changes. They may pursue their college courses unless Congress passes a new law requiring men of this class in some sort of specialized service.

"From the best available sources, it does not seem that any such law will be passed this year.

"From new orders, it will be extremely difficult and almost impossible for men aged 18-25 without the preceding classifications to obtain a deferment; only those in a few specialized defense jobs are eligible. Even then, a deferment may be obtained only if the request is signed by the proper certification officer or bureau and if the 42A Special is signed by the State Director.

"As a matter of fact, so stringent are the present regulations that I don't have a leg to stand on, especially now that the twelfth week is past. Unless a student is a June graduate, I can do nothing now when he receives his induction notice.

"All I can say to the men now leaving school is to take with you a transcript of your college credits and a copy of your high school grades, especially if you came from a technical high school. The results of your orientation tests should also be obtained from Dr. William C. Krathwohl.

"Those men who chose the Army on their first preinduction physical should go to their draft board at once and ask for another examination. Explain that your engineering training in mathematics, physics, and chemistry will be of more value to the Navy in some specialized field than to the Army as an infantryman," concluded Schommer.

Sensational JOHN NESBITT'S PASSING PARADE Tues. Wed. Thurs. Nights all CBS Stations

SIX Junior Week Festivities Go Off In Traditional Manner

With an old-time fervor not seen in two years, another Junior Week season was successfully closed last Saturday. Marked by frequent inter-class slashes and de-pantsing incidents, the planned events were run off as smoothly as possible.

The only serious part of the program was the Tau Beta Pi pledging, which was at once followed up by skits. Much unrevealed acting talent was then uncovered. The winners of the event, a trio of senior chems, gave a vaudeville performance that indicated much barroom practice.

The pie-eating contest, leg art, and beard contests were significant by their attraction for photographers. Dorothy Jacobs and Marion Lindstrand both contributed to the leg art contest.

The tugs-of-wars were both brief. The sophomores promptly won their contest with the freshmen, and the rope broke when the juniors and seniors took over.

The principal distraction on Friday was provided by the fire hose which two enterprising seniors imported to liven up the festivities.

Senior Chems Take First Place in Skit Contest

Taking off on "Old Fashioned Vaudeville", Al Petronis, Roy Boedecker, and Gordon Fleischer, representing the Senior Chems captured first place in the class skit competition Friday afternoon. They were closely followed by the Science Majors, and the Freshmen, who took second and third places, respectively. The Science Majors portrayed a "Great Scientific Society," and the Freshmen "A Push Button Radio Goes Berserk".

Other stunts were given by the 3A Mechs, 4A Mechs, Lewisites and the Junior Chems. All stunts were considered good, and the judges had a hard time picking the winner. The Junior Chems gave an impromptu skit, on the "Illustrious Chems, better known as the 'Card Playing Chems'."

The Freshmen, by placing third, showed up the Sophs who failed to produce a stunt.

Freshmen Pulled Through Mud in Tug of War Tilt

The sophomores defeated the freshmen in a tug of war in an extremely short time. The sides were fairly evenly balanced so far as number of men was concerned. If there was a numerical superiority, however, the sophs had it.

The tug of war was started with the center of the rope over a very large pool of water in Ogden Field. After the first second or two the freshmen lost ground, and footage, at an increasing rate. The tug was ended after most of the freshmen were in the mud.

The sophomores said that they never felt any opposing pull from the freshmen. The freshmen have claimed that more freshmen were in the mud at the start than sophomores.

Milton Schwartz's Legs Judged Most Beautiful

The leg art contest was won by Milton Schwartz, while the runner up was Carl Weber. Judged by Dorothy Jacobs and Marian Lindstrand, the participants were to display the exotic and shimmering glamour of their legs.

Preceding the contest a newspaper field day took place with photographers capturing the allure of the men and secretaries taking part. Dotty Jacobs posed for the shutterbugs, showing them what the real thing looks like. Meanwhile the photographers showed the desirability of their profession by having the privilege of placing Dotty in the proper position.

After Dotty finished showing her charms Marian, the new physics secretary, exhibited her pulchritude in a similar way. During this posing one student lit a fire cracker injuring one of the contestants and generally upsetting the program.

Leonard Brown, Bill Woods Win Beard Growing Contest

After three weeks of growing, two IIT beardsters were rewarded for their trials and tribulations last Friday.

Leonard Brown, junior in aeronautical engineering, was adjudged to have the most beautiful beard. He was awarded an antique mustache cup. Bill Woods, junior physics major, had the next longest facial adornment. His prize was a shaving mug with soap to use in shaving it off.

Out of 23 original registrants, only three men survived to participate in the judging. Dr. William C. Krathwohl, Dorothy Jacob, and Junior Marshal Robert Misch acted as the judges.

Don Slager Wins Pie Eating Contest in Only 65 Seconds

Sixteen bodies were arranged along the ground, heads poised above sixteen fresh blueberry pies. The pie-eating contest was ready to begin. At the signal, faces fell into the pies and mouths began to engulf the food.

After sixty-five seconds, Don Slager, soph ChE, jumped up and was proclaimed winner. His face tinted a light purple, Don accepted the first prize of a leather wallet.

Junior-Senior Tug of War Ends When Rope Breaks

The junior-senior tug of war was ended abruptly by the breaking of the rope.

The event started with nearly equal numbers from the two classes. However, neither team had advanced more than a few inches before the heavy rope suddenly snapped. The ends were quickly tied together, but the rope immediately broke again at the next tug.

At this point, both juniors and seniors claimed victory. The ensuing argument resulted in a muddy wrestling match between Casey Puchalski, senior mechanical, and John Sachs, junior chemical. When they were extricated from the black slime, both were completely unrecognizable.

Sophomores Outdistance Freshmen in 20 Man Relay

The freshman-sophomore rivalry of Junior Week was brought to an end by the sophomores' half-lap victory over the freshmen in the "20" man relay Friday afternoon.

The sophomores were in front from the crack of the gun and never once was their lead seriously threatened. The lead built up by the five navy men who ran the 1 to 5 positions was more than the freshmen could offset.

The event, originally scheduled for 20 men from each team, was cut down to 13 runners apiece, due to the lack of contestants.

Students who ran the sophomores to victory were: Charles Adler, A/S Alfred Boston, Harold Brown, A/S Max Cleuse, A/S Allen Dimoff, A/S Robert Hammick, A/S John Light, A/S Paul Martin, Clarence McElheny, Marshall Newcome, Allen Phillips, Bart Toppel and Robert Swanson.

Freshman baton carriers were: Johnny Arima, Howie Baum, Bill Christiansen, Anthony Dini, Paul Flood, Bernard Harris, Ray Kartusak, Len Katuno, Chalmers Marquis, Mikio Miyashita, Joe Pope, George Sullivan, and James Wangersheim.

Medical Arts Guild to Present Movie

"Pathogenic Fungi", a technical movie filmed at Harvard University, will be featured at today's meeting of the Medical Arts Guild. Dr. Alvin R. Whitehill, instructor of biology, will present a commentary along with the film.

Miss Ruth Severud, of the home economics department, will pour at the Guild member's tea, at which outstanding high-school biology students will be guests. The tea will be held at 4 p.m. in the faculty dining room, to be followed by the movie and lecture at 4:30 in the visual education room of the west campus.

High school students are invited periodically to attend these lectures.

"Your help really counts when you're a WAC!"

say America's college girls

★ Corporal Margaret E. Wyant, University of California. "My family has three men in the Armed Forces, so I couldn't just wait for the war to end. In the Women's Army Corps, I'm working for victory—and I know it's work that'll help bring our boys home sooner."

★ Sergeant Anne MacIntosh, New York University. "My job is one that any college girl would be proud to do—intelligence work at an Army post! With 239 different jobs to choose from, every Wac has a chance to do work she's fitted for and enjoys."

★ Private Mary E. Murray, South West Missouri Teachers' College. "Being a Wac makes me feel I'm helping my country—while I help myself, too. I'm getting valuable training and experience for a post-war career. And I'm all set to go new places."

★ Major Cora W. Bass, Mississippi State College. "As a member of the General Staff of the Second Service Command, I see daily the urgent need for more and more Wacs. To every college girl it's a chance to serve her country in a truly important way."

Browning to Speak At Kiva Meeting

Mrs. Alice C. Browning, co-editor of "Negro Story," will address this Friday's meeting of the Kiva on "The American Negro Novel". Mrs. Browning is a teacher in the Chicago public schools.

Members of the Kiva and their friends will attend the musical production "Tropical Revue" on June 9 in place of a regular Friday evening meeting.

The ninth and final meeting of this semester will be a closed meeting on June 16, with a lecture on art by the Kiva's sponsor, Dr. S. I. Hayakawa.

The group meets Friday evenings at 7:30 p.m. in the faculty dining room on the west campus.

These students have received their induction notices during the week and have made arrangements to leave IIT, according to Dean Peebles' and Dean Walker's records.
