

Council Asks Change In Faculty Rating

Mayor Kennelly To Address Honor Banquet Tonight

Mayor Martin H. Kennelly is to be the featured guest of the evening at the Illinois Tech Honor banquet which will be held tonight in the Crystal Ballroom of the Windemere East hotel at 6:30 p.m.

Campus Leaders Honored

This banquet is an annual affair sponsored by the Illinois Tech Student Association and is held to honor those who are active in athletics and are outstanding in campus affairs.

Bob Ricker, president of ITSA, will preside as master of ceremonies. Other guests besides Mayor Kennelly are Pres. Henry T. Heald, Dean John F. White, Dean James C. Peebles, Prof. John J. Schommer, Prof. Phil. C. Huntly, Capt. Donald McGregor, and Earl C. Kubicek, director of alumni relations.

All Activities Included

The annual banquet originally was intended to honor those who had attained membership to Honor I, but gradually, through the years it has come to include many other activities.

Among the 200 people expected to attend are members of the various athletic teams and coaches, 4A class officers, members of the ITSA Board of Control, Publications board, Interhonorary council, president of the Pan-Hellenic council, the members of the managing board of *Technology News*, and the chairman and two sub-chairmen of Junior Week.

Invitations For Kiddie Party Mailed To Illinois Tech's Tykes

Invitations to the "Kiddies on Kampus" party are now being mailed to the over 200 student-parents of Illinois Tech.

This party, sponsored by ten campus organizations, will be held on May 22.

Members of the ITWA and the Home Economics club, two sponsoring groups in charge of entertainment, held their first joint meeting yesterday. Games, prizes and forms of entertainment were discussed at the meeting and shopping committees were formed.

DONALD D. FEAR, JR. shows wide-eyed enthusiasm after receiving his invitation to the coming "Kiddies On Kampus" party. His dad is a second term ME.

Several of the mothers who have already indicated their desire to attend the party with their children, have been asked to become members of the entertainment committee. Julie Balich, president of the White Collar Girls, and in charge of invitations, indicated that all Illinois Tech student-parents who do not receive invitations by Tuesday, through some oversight, should pick up their invitations in the *Technology News* office.

BOB ELLIOTT, SENIOR SUBC representative, offers for sale a text book in ITSA "closet cleaning" auction.

OPERATION CROSS SECTION

Preregistration 'Lacks Personal Attention'

By *Technology News* Survey Staff

Pre-registration is now completed for another semester. This week's survey was taken to find student reaction to the system, in line with the *Technology News* policy of keeping students up-to-date on campus activities.

The first question asked was: "Did your counselor offer any aid in your selection of courses for your curriculum?"

"No," said two-thirds of those surveyed; 56% stated they had desired aid in their selection of courses. Many of those felt that even if counseled, the advice would have been unsatisfactory because of the lack of knowledge of the counselor on student programs.

"Do you know the avowed purpose of pre-registration?"

Of students questioned, 67% said they did. This purpose, according to the registrar's office, is to facilitate the scheduling of courses for the following semester. Considering this purpose, most of the students felt that the system operated satisfactorily. Many of those who didn't feel this way were students whose classes had been arbitrarily changed at the beginning of the semester.

"Did you have trouble making an appointment with your pre-registration counsellor?"

Over 75% of those interviewed said, "no." In many cases students had been required to wait in line, but the general consensus seemed to be that they had not been greatly inconvenienced.

A major comment offered on this point was that a counselor should be assigned each student at the beginning of study at Illinois Tech. This counselor would follow the student through school, having his records available at all times. In this way, the problems of the student would be able to be given intelligent and individual interest.

In general, the pre-registration procedure was considered satisfactory by a majority of those questioned, the lack of individual attention being the most unsatisfactory part of the program.

Keep Poll Results Confidential, Recommends Faculty Group

In a memorandum to President Henry T. Heald, all deans, department heads, and Tau Beta Pi, the Illinois Tech Faculty council indicated last week that it strongly recommends a modification of the faculty rating system to be inaugurated by Tau Beta Pi this semester.

ITSA Auction Nets Over \$40; Proceeds Go To Activities

Unclaimed articles lost during the past semester were sold at auction in the South Union lounge Thursday and yesterday at 11 a.m.

Proceeds of the sales, slightly more than \$40, were turned over to the Illinois Tech Student Association treasury. The funds will be used to finance student activities and organizations.

Items sold included everything from an egg beater purchased for five cents to a fountain pen that brought \$3.75. The pen was sold to the original owner who had failed to claim it before the start of the sale.

The auction, the second of its type at IIT, was conducted by Robert Elliott, senior Student Union Board of Control member, with Leonard Druian acting as cashier.

Lost articles of clothing, consisting of two jackets, 20 hats, 32 scarves, and assorted work clothes, were given to the Community Service committee for distribution to needy families in the neighborhood.

The memorandum stated in part, "The council is irrevocably opposed to and condemns without qualification any form of faculty ratings which involve the dissemination of survey reports beyond the particular instructor to whom they apply."

Survey By Questionnaires
The rating survey was to be given in the form of questionnaires which would be distributed to students by class sections. Points covered in the extensive forms would give students opportunity to evaluate and criticize the manner in which their education was being handled.

Professor Eli Sternberg, council secretary, told a *Technology News* reporter, "The Faculty council reaffirms its stand with regard to student rating as set forth and explained in its recent memorandum on this subject."

Council Recommends Conditions
"The council wishes to add that it is not opposed to student polls conducted under the following conditions:

- 1) That the polls are administered by a student committee composed of representatives of honor societies.
- 2) That the poll results are transmitted directly to the individual in-

Turn to page two for digest of the Faculty council memorandum stating why the council recommended these modifications.

structors concerned and are not communicated to anyone else.

"In connection with the foregoing recommendation the Faculty Council would like to emphasize that it has neither the authority nor the intention to interfere with the rights of students to conduct polls."

Honoraries Originated Survey
This survey, entirely a student project, was originated by Tau Beta Pi and the Interhonorary council. These groups have not as yet taken action on the recommendation of the Faculty council.

William Gauthier, chairman of IHC, stated, "The recommendation of the council will be carefully considered. Whatever action we take will be aimed at improving the level of instruction at Illinois Tech. However, I feel that the desired results cannot be accomplished without the support of the faculty as a whole."

Faculty Elects Council
Organized about three years ago, the Faculty council was formed with the express purpose of representing the faculty in all matters pertaining to the faculty body. The council is an advisory board with no authority except that of recommendation. The 12 representatives on the faculty council are elected in groups of four, each serving for a three year period.

Dr. Lee Roy Wilcox, president of the council, in a statement to *Technology News* said, "I believe that the council generally reflects the views of the faculty body."

A SIDEWALK OBSTRUCTION is viewed by Donald Hoeflar, freshman BE major.

Students Balked By Zealous Gardeners

By John Tyner

Gardeners and painters at Illinois Tech evidently do not see eye-to-eye. The situation would be comical if someone was not in danger of breaking a leg.

On the southwest corner of 33rd and Dearborn an unsuspecting pedestrian can step off the curb going north, confidently guided by broad white lines painted on the street. But the smooth course of events comes to an abrupt halt shortly after our Techawk gains the haven of the opposite side of the street. A thick black clothesline is stretched across the walk, chest high.

Gardeners, apparently in their eagerness to protect newly seeded grass on both sides of the sidewalk, completely ignored the pedestrians' right of way.

Peanuts, Popcorn

A grand old tradition is about to be broken. Since the early days of Armour Tech, the coming of the baseball season has resulted in a steady pilgrimage to Comiskey park from the afternoon laboratory classes.

But now things are different; faithful rooters who used to go to Sox park chanting, "We'll stick with those White Sox," now march obediently to their labs muttering, "We're stuck with those White Sox."

If the Sox and attendance don't pick up soon, the popcorn vendors may have to migrate to crowded Chapin hall to make a living.

We Believe . . .

The Faculty council indicated its lack of confidence in the merits of faculty rating by students when they recommended that poll results be distributed only to individual instructors concerned.

One of their reasons given for this decision is that "Student reaction is frequently an unreliable and misleading index of teaching ability and performance." It is apparent that the results of a survey conducted for the sole purpose of improving instruction at Illinois Tech will accomplish little if this attitude is maintained by the majority of the faculty body—regardless of who sees the results.

They also claim that "Poll results, if known to deans and department heads, will inevitably influence their relations with faculty members..." This is a curious statement, for if a department head learns that a majority of students object to a certain teaching characteristic of an individual instructor, it should influence his relations with the faculty member. He would not fulfill his function as head of his department if it did not.

Faculty rating by students is not new. In fact a number of studies have been conducted on its effectiveness in relation to improving instruction in educational institutions.

"Student judgment as measured by the Purdue Rating Scale for Instructors has a considerable degree of reliability and validity," so reported H. H. Remmers and G. C. Brandenburg in their "Experimental Data" study.

In a research thesis by a graduate student at Columbia university, the following points were noted:

- 1) Student rating has value because it often calls attention to certain undesirable attitudes and features of instruction, teacher personality, and course of study which the teachers were not aware of.
- 2) The importance of the learner's attitude in any teaching situation is so great that some systematic effort should be made to measure it.
- 3) Student rating of teachers reveal certain kinds of information that cannot be gotten from any other source. Students have an opportunity for observing the quality of teaching that no fellow teacher, head of department,

WELL, GENTLEMEN, THIS TEST WILL SEPARATE THE MEN FROM THE BOYS

as I see IT

By Sherwood Benson
 Editor-in-Chief

BECAUSE MANY EXPERTS believed that modern street noises would be unknown in the cities of the future, records of typical street and sidewalk sounds were recently sealed into the cornerstone of a New York building.

Recordings of honking horns, squeaking brakes, police whistles and other familiar urban noises were made on chromium-plated copper disks, coated with an imperishable tarry compound, and locked in a copper box.

I was reminded of this story as I stepped out of Alumni hall at 10 p.m. on the last night of Open House. The entire campus was lit and visitors still milled about the walks. Main building, with its fluorescent lighting and old fashioned windows stood out as a symbol of the past and present campus, while the Metallurgical building with its long, low sleekness and "glass" walls echoed the future—a future with five or six cafeterias on campus, unlimited classroom and study facilities, a mammoth gymnasium, plus a new student union with adequate recreation and club rooms.

This is still a decade and \$15,000,000 away, but I wonder when Illinois Tech reaches that stage will anyone remember the time a baseball game and a relay race took place simultaneously on Ogden field, a small sized lot? Who will recall the dangerously narrow and crowded stairs of Chapin hall, or the miniature Rock Island earthquakes that shook ancient Main building?

Perhaps we should make records of these sights and sounds that are destined to obscurity and put them carefully away in a copper box. Then we would have suitable stuffings for the next cornerstone to be laid in our building program.

Collegiate World

Why Don't Women Like Men? Polls Give Answer

By Johnnie Best

Techawks were recently given an opportunity to tell the *Technology News* survey team what they want in the way of wives. Women here were not interviewed because of the difficulty of getting an adequate volume of information.

Let's look at some of the replies given by individual co-eds at the University of Miami when asked "What's Wrong with Men?" Janice Goldiner says quite frankly "I don't like a fellow I have to wrestle with on a date." But another coed, Janice Levin, says simply: "It's no crime to remember good breeding."

The more extreme attitude is summed up by Dolores Shea: "I'm disgusted with all men."

We'll go along with the *Northeastern News* writer who settled on this headline for the results of a similar survey on that campus in Boston: "Men Want Sex, Companionship; Women Want Money, Poll Reveals."

"You Are Now Attending The Brand New GI Tech" read a headline in *The Technique* as Georgia School of Technology officially became Georgia Institute of Technology the other day. Although a majority of the students and alumni appeared to favor the change, dissenters were strong in their objections.

Wrote one alumnus, "If the name is changed, I want a new diploma, a new ring, and a new transcript—free! I like it and love it as it is!" Others declared they didn't want to have to say that they graduated from an Institute.

"I don't care what you change the name to, it will still remain the damndest rathole on the face of the earth, and to mention it in the same sentence with those other decent schools is disgraceful. 'Podunk Abnormal' would be proper." So commented another proud "Ramblin' Reck."

or school authority enjoys. They alone have direct classroom acquaintance with their teachers.

4) It was further noted in the Columbia report that since student opinion does have an influence on teachers and school administrators even in the form of gossip and rumors, why not admit this fact and make systematic plans to capitalize on its full value?

* * *

It was also found that grades do not influence the student ratings of instructors.—"The average correlation between marks and ratings for all traits is practically zero." Concerning the belief that students rate popular professors high and disliked professors low on all traits, H. H. Remmers and J. M. Stalnaker indicated that "Clearly there is a gratifying absence of this effect."

We believe that the primary function of the college professor is to teach, with research as only a secondary project. The student does not concern himself with judging professional standards of competence—but he does compare the teaching ability of each of his

instructors throughout his four years of college. This teaching ability is measured in the most practical terms—in terms of how well the student felt that he was led to higher levels of understanding.

Since this appears to be the season for recommendations, we would like to recommend that their faculty rating results be made available to both individual instructors and department heads. Also in line with the spirit of this poll we would further like to suggest that in order to eliminate any possibility of indiscretions, department heads and instructors make a habit of getting together and informally discussing their survey results and methods by which teaching at Illinois Tech can be improved.

Faculty Council Memo

The following is the major portion of the Faculty council communication to President Heald, deans, department heads, and Tau Beta Pi:

The council is irrevocably opposed to and condemns without qualification any form of faculty ratings which involve the dissemination of survey results beyond the particular instructor to whom they apply. This resolution is based on the following considerations:

a) Student reaction is frequently an unreliable and misleading index of teaching ability and performances. The judgment by students of their teachers is often influenced by their own success in the particular course, and is apt to be prejudiced by the more superficial aspects of "good teaching."

Moreover, students are generally not in a position to evaluate the professional competence of their teachers.

b) The results of such surveys are not suited to serve as a standard of judgment of faculty members on the part of the administration. . . . The poll results if known to deans and department heads will inevitably influence their relations with faculty members and may even affect the advancement at the Institute of the individual concerned.

It might be added that department heads who wish to ascertain student reactions to any member of their department, can find other opportunities to do so . . .

c) The system under consideration is bound to give rise to indiscretions on the part of the officials who have access to the results. . . .

d) The effects of the system on faculty members may cause teachers to sacrifice teaching standards in favor of student popularity, and tends to set a premium on superficiality in teaching rather than on intellectual honesty and responsibility.

Letters To The Editor

Techawk Fails To Understand 'High' Cafeteria Milk Prices

Dear Sir:

About 16 months ago a long-sustained student campaign against exorbitant milk prices charged by the school cafeteria came to a successful conclusion, as the price of that food was reduced to 15c a pint, only slightly more than the off-campus grocery store price.

Since then the price of fluid milk in Chicago has fluctuated widely. Prices in the school cafeteria have varied, too, dipping once to a low of 22c per quart.

Generally, however, the cafeteria price has tended to edge upward. At present nature's most essential food product "retails" on campus for 25 cents a quart and 18 cents a pint.

The writer is unable to understand why the cafeteria management must sell the most vital food at a premium. (Grocery stores are now charging only 19½c a quart). Is there prejudice in favor of other, less nutritious beverages? Or is it bad management?

J. Best

Separate Cash Customers

Dear Sir:

I found out that during the recent *Technology News* survey of the student body's opinion on registration, a number of complaints were received about the efficiency of the IIT bookstore.

It seems to me, however, that the problem is rather a year-round trouble. It is not uncommon to see a dozen-long waiting line with only one attendant at the supplies counter. Many give up and walk away discouraged.

Under such circumstances, the hardship naturally falls on cash customers. Catering to one vet sometimes takes as much as fifteen minutes. The process of locating his file, listing his items, and replacing the file takes at least three times as long as the actual purchase.

Why not have a separate section of the counter for cash customers? It would facilitate sales and it would ensure that a student in a rush before a test could get what he needed.

I trust that an opinion poll among the civilian students would agree to this change.

Paul Geiger

Suggests Gym For Dances

Dear Sir:

One of the many high points of the Junior Week activities was the Open House dance. It seemed to crystallize the spirit of the week. The large group in attendance, estimated to be in excess of 2000, certainly was indicative of the enthusiasm on the part of students and visitors.

It is hoped that similar all school dances may be held more frequently in the future and even become a bimonthly event.

The practical consideration of such a proposal brings to light the inadequacy of facilities afforded us. Investigating all possible locations for such affairs, it seems that an ideal location would be the gymnasium. It seems reasonable that Illinois Tech could do as other schools, and in the future allow dances in the gymnasium, whose facilities more adequately meet the requirements of these affairs.

Sophomore Class Officers He Wants To Argue

Dear Sir:

One activity that is lacking at IIT is a debate squad. The contention that this school as an engineering school does not have a need for an active debate group is absurd. This is borne out by the fact that other prominent engineering schools have active debate programs. IIT should not be the exception.

Certainly the engineering student, if not more so than the liberal arts students, should have the ability to argue effectively.

There is undoubtedly a wealth of debate talent among the student body. I believe it is about time to seek this talent out and present it to other schools.

Don Cumming

DAVE PASIK, Warren Brockmeier, and Ken Thompson look over regulations under which they will conduct the coming class elections.

Elections Scheduled May 19; All Class, ITSA Offices Open

Selection of class officers for the fall term will be made by students voting in the all-school elections May 19. The present senior class will not elect new officers at this time.

Each class will elect a president, vice-president, secretary, treasurer, and social chairman. There will be no election of an SUBC representative.

Also up for election are the positions of president, vice-president, treasurer, and secretary of the Illinois Tech Student Association. Candidates for ITSA president must be in their fifth or sixth term, and candidates for the other three offices must be in their fourth, fifth, or sixth term.

Platforms To Be Printed

Besides the names of candidates running for office the ballots will also contain a request for ratification of the revised ITSA constitution.

Those wishing to run for office may obtain petitions in the ITSA office in the South Union. Twenty-five signatures are required on the petitions and they must be returned to the ITSA office by 11 a.m. May 14.

In order to insure equal publicity and to inform the voters, *Technology News* will attempt to print a short summary of the activities of each candidate and a brief statement

from each informing the student body of his or her platform. Each candidate should place a list of his activities and his statement on the back of the petition before turning it in.

Preferential System Used

The candidates' names will be placed on an election scoreboard in the South Union as the petitions are returned. Names will appear on the ballot in the order that petitions are turned in.

The election will be run on the preferential system, eliminating the use of a run-off election. Voters will indicate their preferences among the candidates by numbers.

The number of first place votes for each candidate will be tabulated, and the low man will be eliminated. His ballots will be distributed among the other candidates according to the second choice marked on each ballot by the voter.

The process of elimination will continue until one candidate has a majority.

SAE Groups Tour United Airlines Hangars, Shops

Combined student groups from Illinois Tech, Aeronautical university, and Northwestern university will inspect the hangars, shops, and facilities of the United Airlines at the Chicago Municipal airport May 13.

The tour, sponsored by the aircraft and student activities committees of the Chicago section of the Society of Automotive Engineers, will start at 5 p.m., with additional tours starting every half hour.

No dinner will be held, but the restaurant facilities of the Cloud room will be available to all attending.

John T. Rettaliata, chairman of the mechanical engineering department, will present a paper on jet propulsion in the United Airlines executive offices at 8 p.m.

All SAE members desiring free transportation should contact Jerome Greenstein, club chairman, by Friday.

Freshmen And Sophomores Eligible For New Lockers

New lockers will be available in September in the basement of Metallurgy building, according to an announcement made by Bernard Weissman, director of the Student Union.

This will make it possible to allow freshmen and sophomores to obtain lockers for the first time. However, preference will continue to be given to juniors and seniors. Lockers will be assigned on the registration days, thus giving the juniors and seniors first choice.

A proposal is now before the administrative committee providing a locker deposit of 50 cents, plus a nominal fee of 50 cents. If the proposal is approved, the system will go into effect in September. The final plan will appear in a later issue of *Technology News*.

All students now occupying lockers are asked to vacate them by June 11. During the summer, all the lockers will be cleaned, painted, and renumbered.

Mr. Weissman emphasized the fact that all persons now occupying lockers are assured of having a locker next semester.

Warren Sivertsen To Leave Institute

Warren S. Sivertsen, director of admissions at Illinois Institute of Technology, has resigned to accept a position June 1 with the staff of the international committee of the YMCA in New York. Mr. Sivertsen, who came to Illinois Tech last September, will become public relations director of the armed services division of the YMCA.

Before joining the Illinois Tech staff, he was assistant to the Warren Sivertsen president of Denison university, Granville, Ohio. Prior to World War II, Mr. Sivertsen was on the staff of the Boston YMCA as boys' work secretary.

'Best' College Band To Play For Soph Dance, 'May Apple,' On May 15

"May Apple," sophomore sponsored informal dance, will be held on May 15 at the Lake Shore Athletic club, 850 N. Lake Shore Drive.

Bids will be on sale in the South Union between 10 a.m. and 2 p.m. daily. Ray Van Zelst, sophomore class president, said that reservations will be made on a first come first served basis. A private entrance, at 257 E. Chestnut, will be used for the dance. Ray said that the club's facilities include "loads of dancing space."

Music will be provided by Dan Belloc and his orchestra. During the war Belloc, who plays an alto sax, led an orchestra which played at the Royal Hawaiian hotel in Honolulu. The same organization played with the Jack Carson group on its overseas tour.

Van Zelst said that the quality

Dramatech's Final Production Of Term Commences May 13

"The Miracle on 33rd Street" opens on May 13 in NU auditorium as the third and final production of Dramatech's 1947-48 season. It will run for two successive nights, the curtain rising at 8:15 p.m.

"The Miracle," a musical in two acts, was written by Frank M. Hrachovsky, assistant professor of technical drawing. The plot discloses the trials and tribulations of two prospective Techawks: Johnny Reynolds, played by John Holland, and Ann Blackstone, portrayed by Audrey Read.

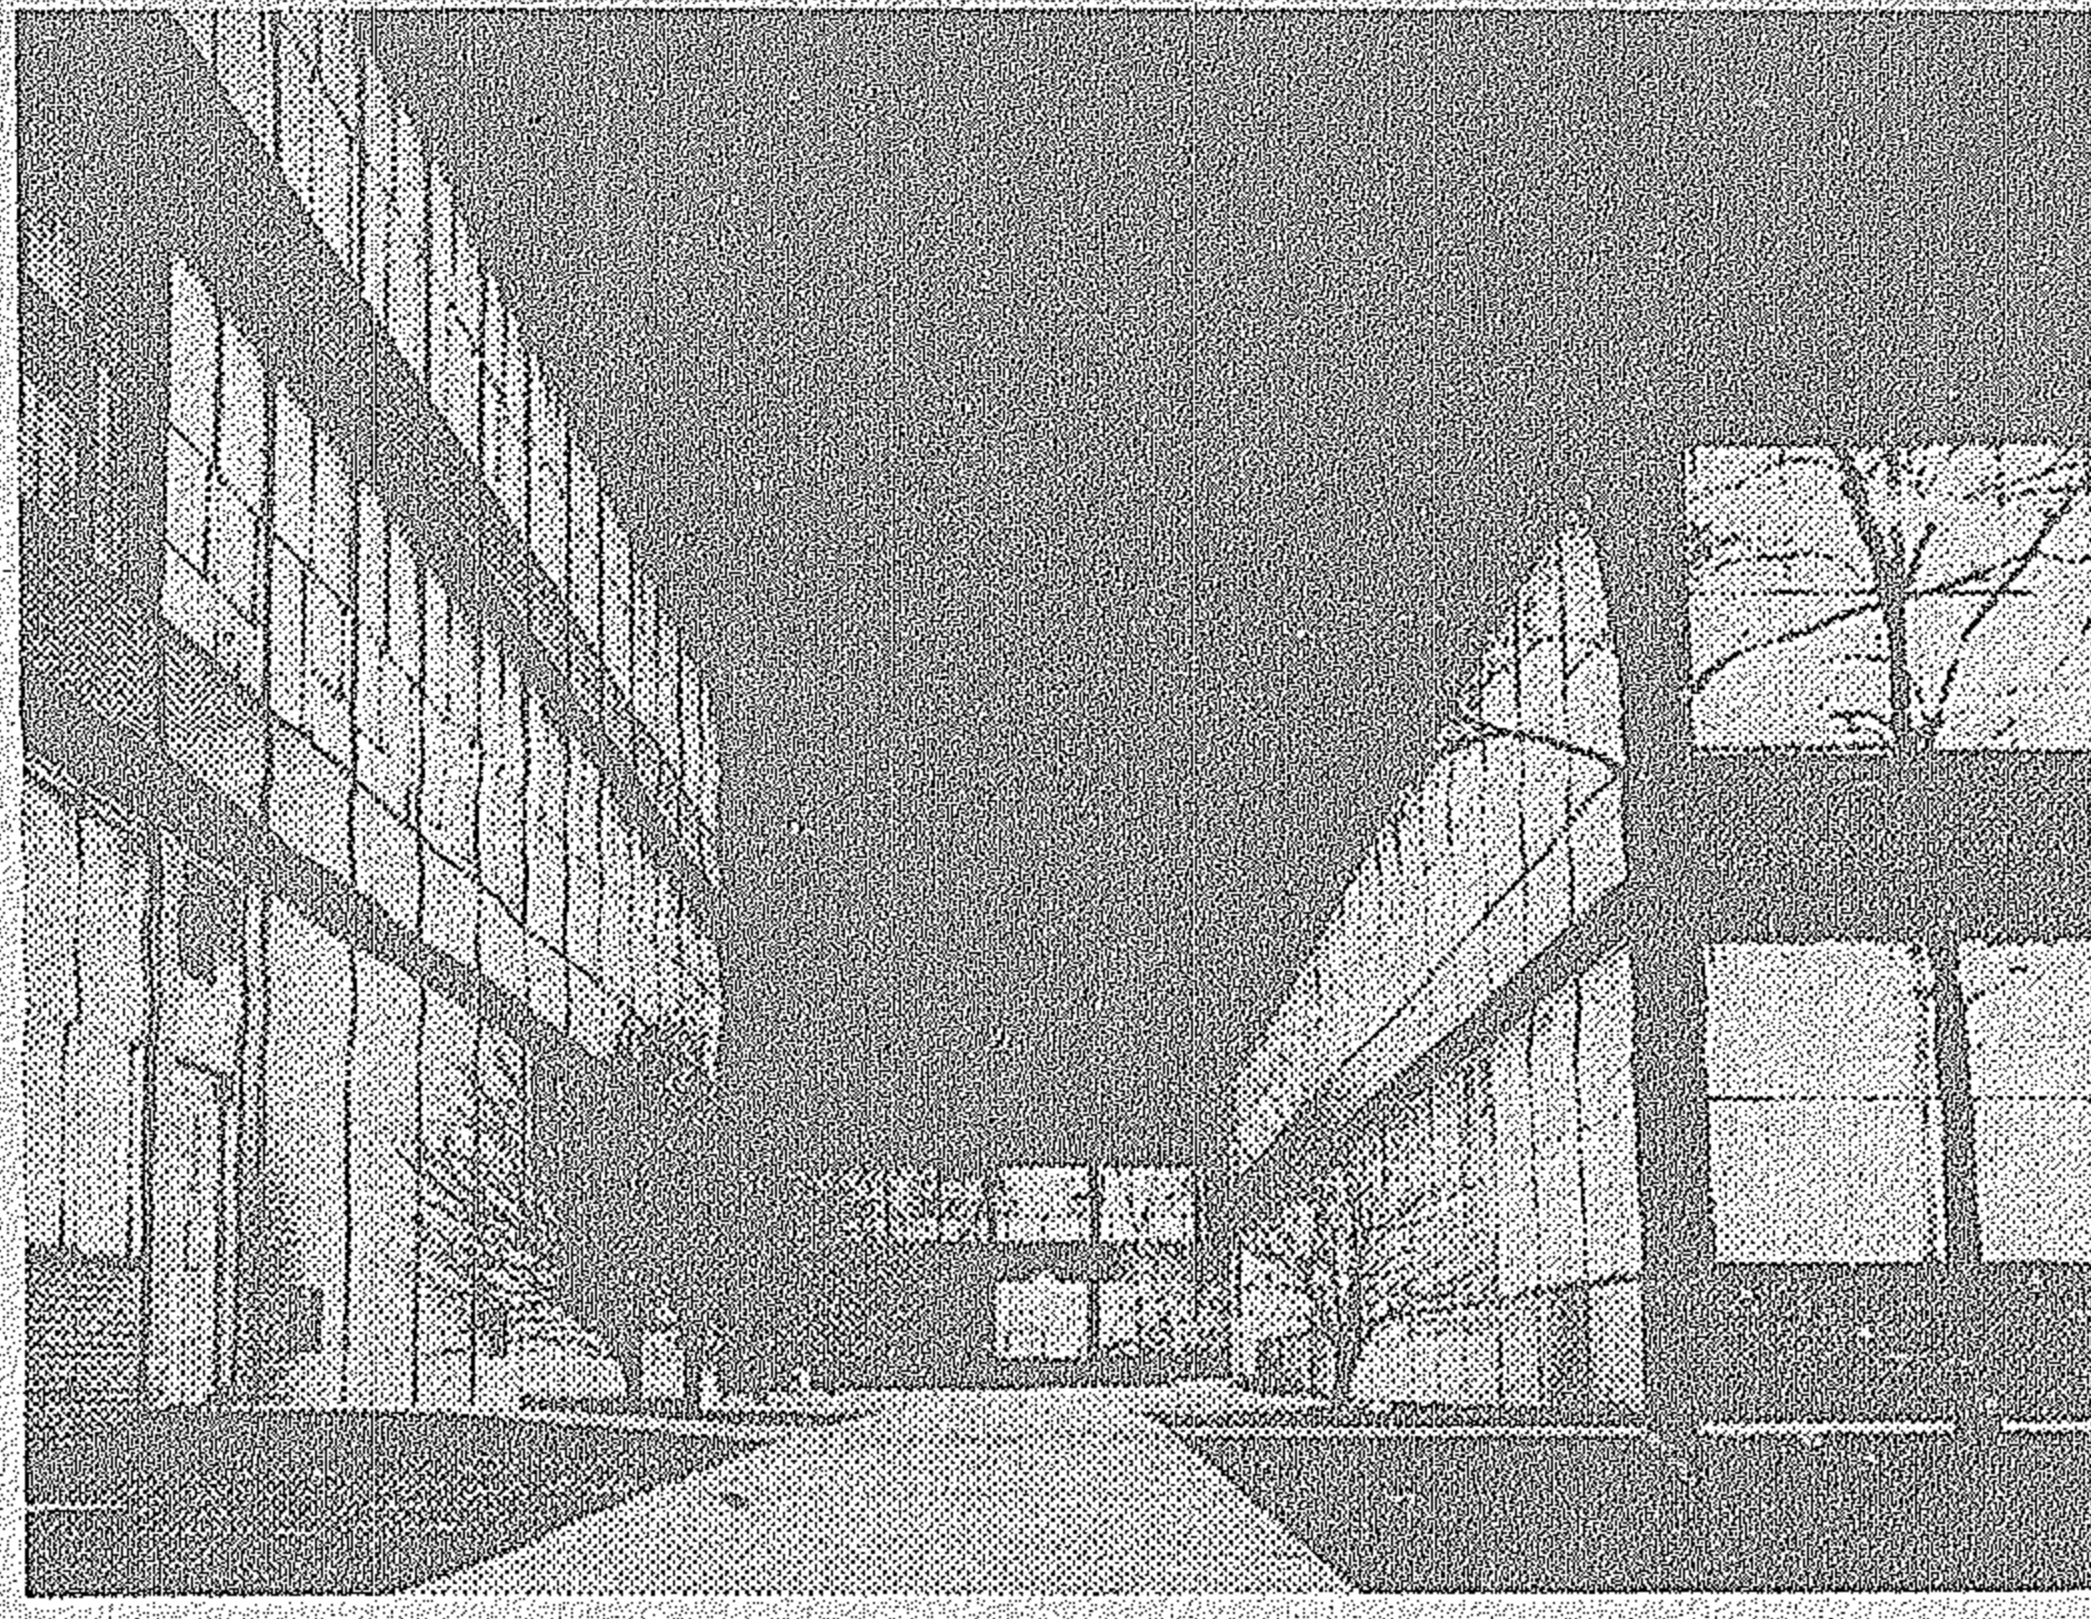

Campus Scenes Used

Montevideo, Uruguay and the port of New Orleans as well as such familiar places as the Illinois Tech campus and the "Three Deuces" are the scenes of the fast and furious action incessant throughout the play. The settings used were originated by Techawk Belle Kerman.

The musical highlights of the show are provided by the Melody Arx, a male quintet composed of Ted Zagula, John Holland, Donald Reedwageck, Roger Rosback, and Charles Banks, solos by Audrey Read and John Holland, and songs by the ensemble.

Music Club Accompanies

Background music and accompaniment will be supplied by an orchestra composed of music club members. Members of the dancing group include Virginia Dorociak, Marilyn Carey, Barbara Giles, and Joann Gallagher.

EVERYBODY'S GONE HOME—at the end of the first day of surging crowds of Open House visitors, Illinois Tech's new buildings are pictured just before "lights out".

Junior Week Attracts 25,000; Most Successful In History

By Ted Purzycki

Illinois Tech's forty-first annual Junior Week is over. Except for some forgotten direction markers, and some tired looks, there is little on the campus to remind an observer of the most successful Junior Week in the school's history.

The vast array of exhibits and crowded schedule of activities attracted a crowd of visitors which was estimated at 25,000 persons.

The three day's activities began at noon Wednesday when Bob Cunningham and Pat Vedel, by virtue of being named Man and Woman of the Year, were crowned king and queen of Junior Week to reign over the week's activities. Coronation honors were bestowed by John J. Schommer on the steps of the Chemistry building with over 1000 "subjects" in attendance.

Girls Win Softball

Following the coronation ceremonies, the senior softball team was conceded victory by the faculty squad, only to bow to a superior White Collar girls team, because they couldn't run backwards fast enough.

Next in the day's activities was the Rough Casting's presentation of "I'm a Genius." The afternoon performance was slowed down by the length of time between scenes; however, in the evening's performance the stage crew had improved to such an extent the between-scenes times was held to a minimum.

Sophomore Dance Successful

Immediately after the evening performance of "I'm a Genius" the sophomore class held a free dance, enjoyed by a crowd said to have been the largest ever to attend a dance in the North Union.

Highlighting the dance was a fashion show presented by the winners of the ITWA fashion contest. A trophy was presented at this time to Charlotte Zastrow, winner of the contest. Miss Zastrow modeled an evening gown which she designed and made herself.

Fraternities Compete

Thursday was the "Delts" day, with Delta Tau Delta taking first place honors in the interfraternity pageants with their presentation of "IIT in 1998." Their talents again were displayed in the evening, taking first place in the interfraternity sing. Winner and runners up of the sing were announced by the guest of honor, Dave Garroway, prominent Chicago disc jockey.

The final day of Junior Week saw

Tau Beta Pi Assembly Set For Monday

Tau Beta Pi, national honorary engineering fraternity, will pledge prospective members and "outstanding sophomore" awards will be made at the honor award assembly, to be held Monday from 11 a.m. to 12 noon in the NU auditorium.

John F. White, dean of students, has announced that all classes will be excused for the assembly.

Selections for Tau Beta Pi, the highest scholastic honor obtainable in an engineering school, are made from the outstanding members of the junior and senior class. The men to be pledged were selected on the basis of their scholastic average, extra-curricular activities and character.

Plan Sophomore Awards

In addition to the juniors and seniors to be honored by the fraternity, several departmental honoraries are planning to make awards to the outstanding sophomores of their respective departments. These awards are also based on scholastic achievement, extra-curricular activities, and character. The fraternities planning to make awards are Eta Kappa Nu, electrical engineering honorary, Chi Epsilon, civil engineering honorary, and Phi Lambda Upsilon, chemical engineering honorary.

Teller To Speak

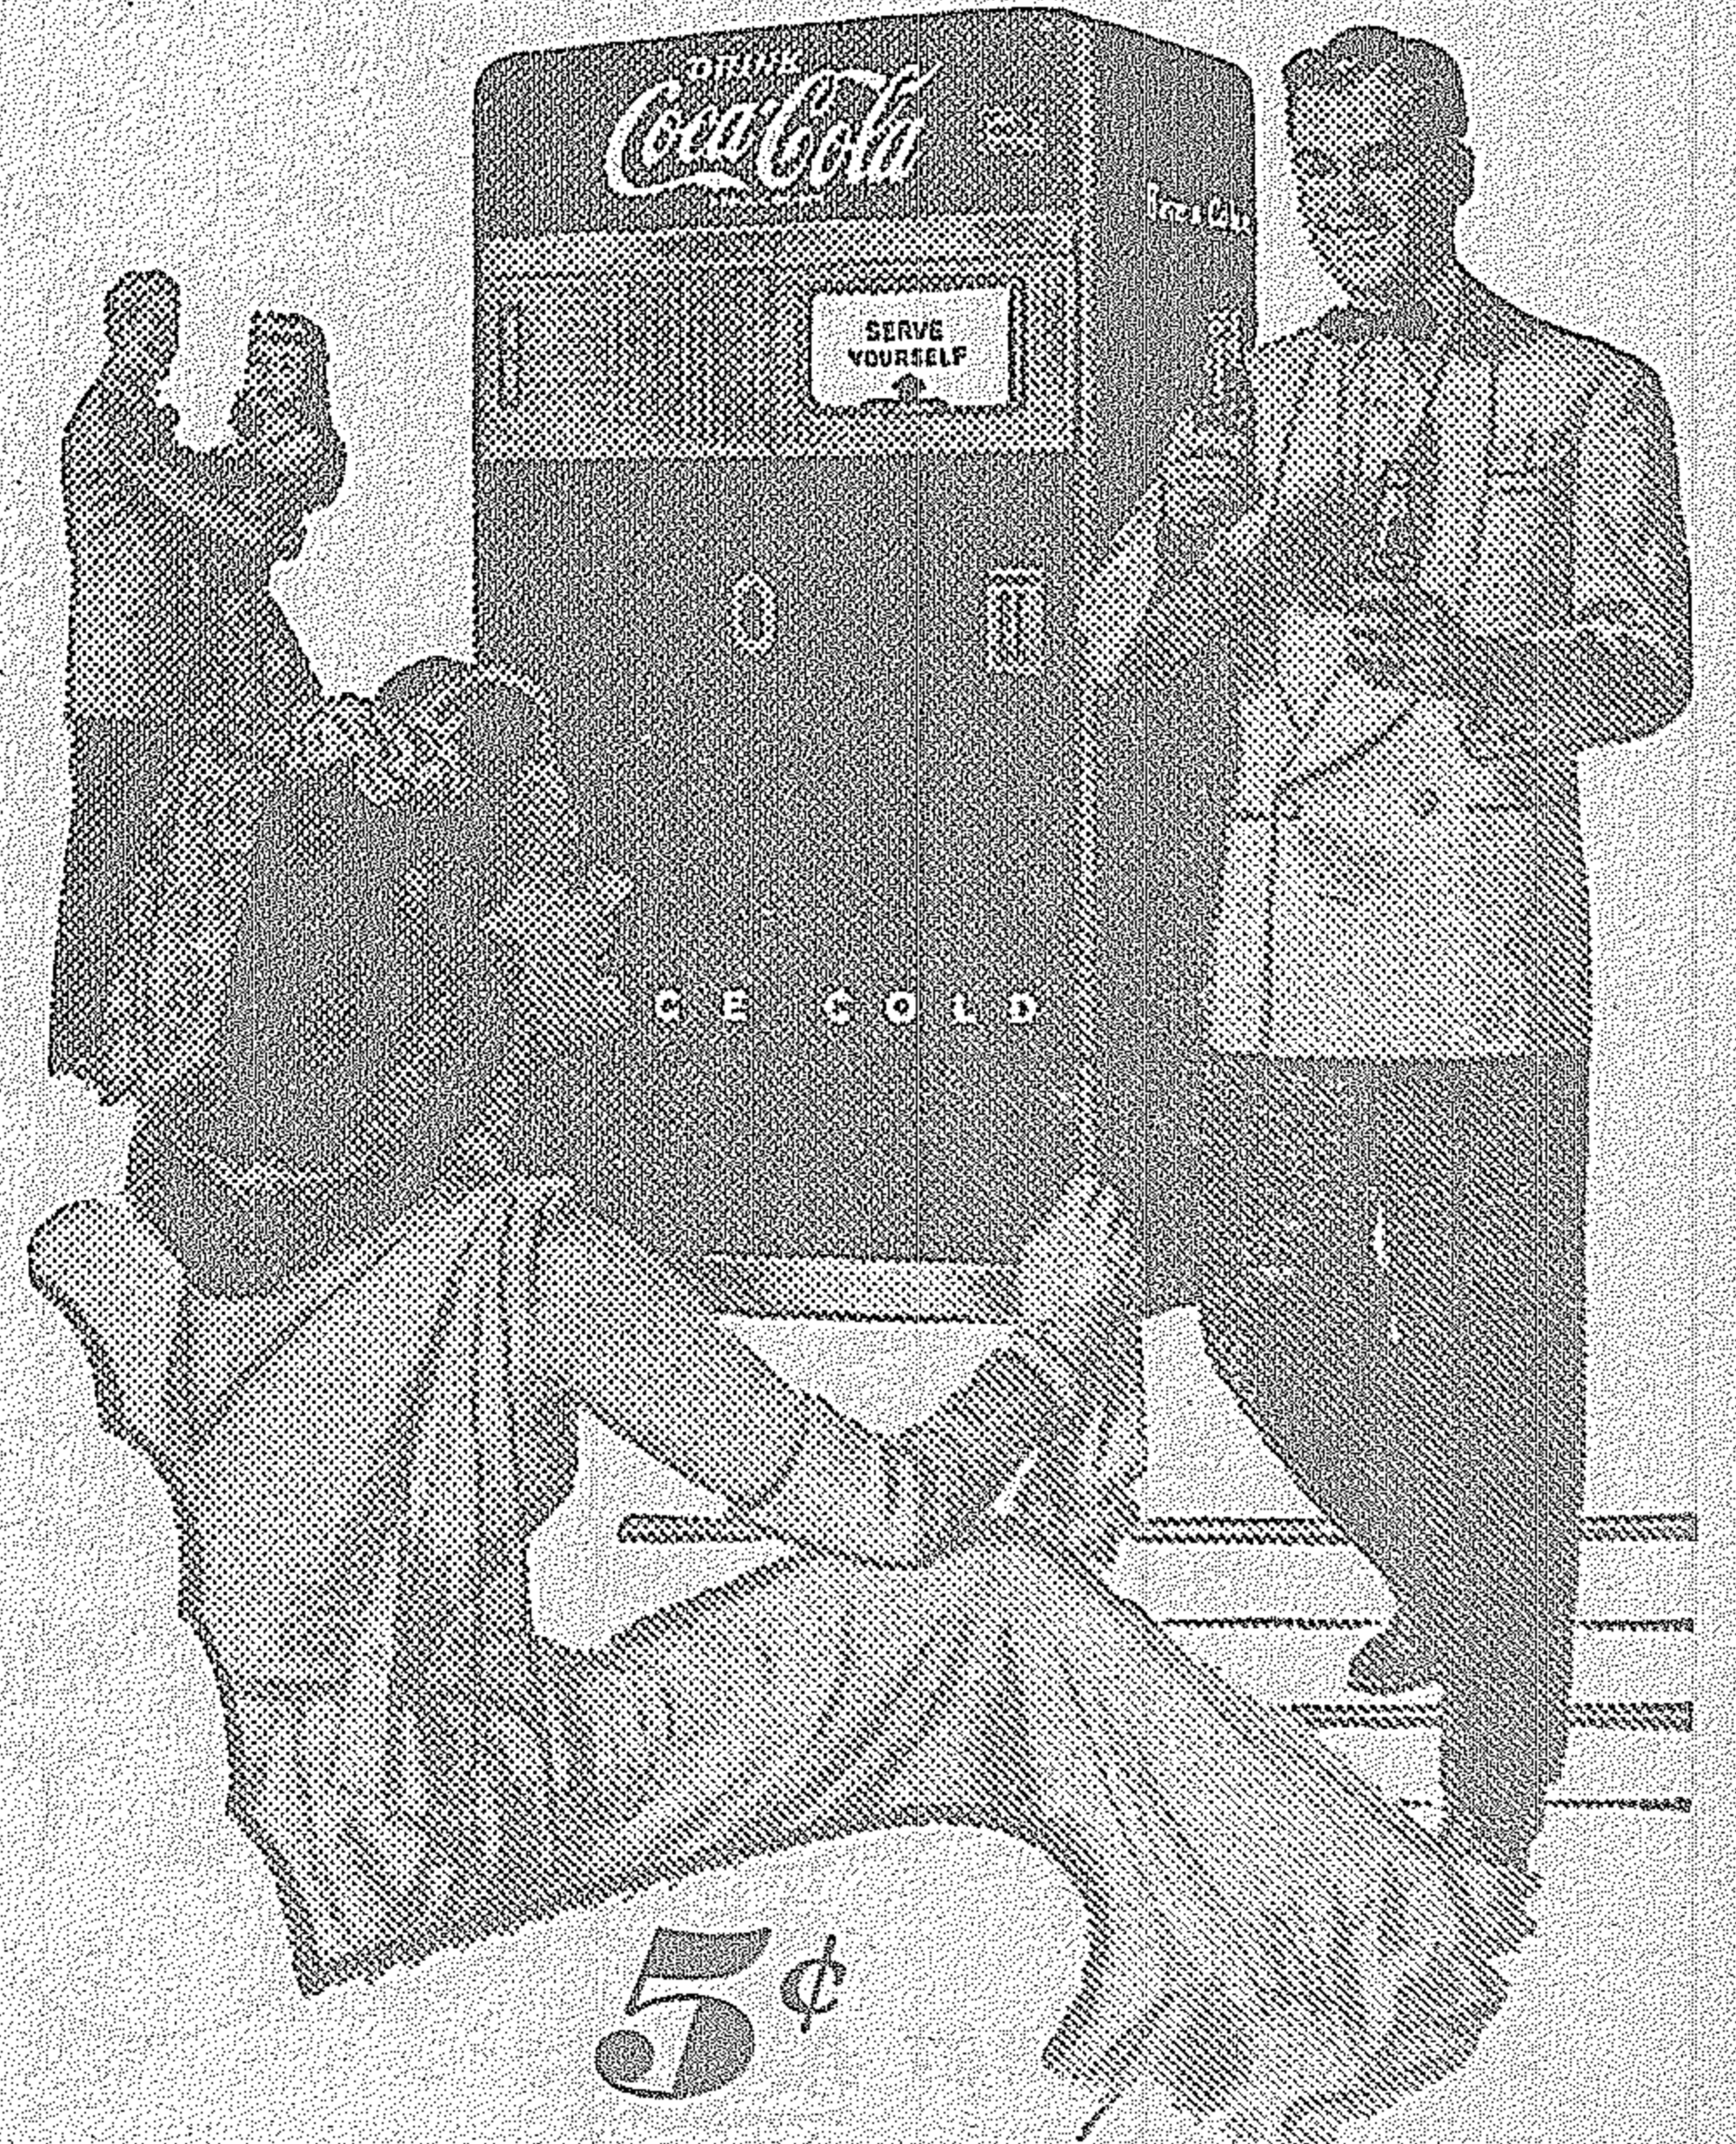

At the assembly the new members will be presented to the student body by William Gauthier, president of Tau Beta Pi. After the ceremony, Gauthier will introduce Dr. Edward Teller, guest speaker. Dr. Teller is a professor of physics at the University of Chicago and a renowned nuclear physicist. During the war Dr. Teller was attached to the staff of the atom bomb project in New Mexico.

an interfraternity track meet, fencing, intramurals and was highlighted by a baby contest. Over 50 future Techawks were entered in the competition. First place honors were shared by James S. Murphy in the 6 months to 1 1/2 year division, Nancy Fate, 1 1/2 to 2 1/2 years and Rita Mary Dale, 2 1/2 to 3 1/2 year division.

Prom Climaxes Week

A fitting climax to the week's activities was provided Friday night when the annual Junior Prom took place. Over 225 couples danced to the music of Dick Barrie at the Sherman hotel. During the intermission Man and Woman of the Year awards and interfraternity sing and pageant awards were presented by John F. White, dean of students.

Chisel Point leads in degrees: 4B, 2B, HB, 2H, 4H, 6H.

Round leads from 9H to 7B.

EBERHARD FABER

Just Like A Movie

Bus Rider Finds Romance; Dropped Transfer Eases Path

By John C. Dinou

I do not see Gene Andrews since last spring semester. He is not the same Gene I once know. He is now a happy Gene. He has the look of a contented elephant, although he by no means looks like an elephant except he is as big as one.

Anyway, when I see him his face is all grinning teeth.

"Do you remember the girl on the bus?" he beams. He rocks on his heels a little.

Hears About Girl

Do I remember the girl on the bus? Every Wednesday morning for 15 weeks I hear about the girl on the bus. It gets so I must forget physics lab and do nothing but hear about the girl on the bus.

Gene rides this bus to school every morning from home which is at a place called Roseland. He shares this bus with maybe 70 other sardines.

The first time he sees her all the other people evaporate and she seems to walk inside a misty halo. I remark as how this is silly as only angels have halos and he blurts "That's it, that's it!" and answer "Oh-ho, oh-ho."

No Progress Made. As he tells me this story I think of a movie I once see where a boy horse courts a girl horse. He sprints full blast over two or three counties hoping to hear her say "Oh my," but she does nothing but chew her grass or whatever.

Gene does everything but carry the bus on his back but he makes no impression at all. He does not sleep nights. He wastes away to a mere 200 pounds. She does not notice him from a lump of coal.

Knows The Score. I see he got it bad, so I ask why he doesn't say "good-morning" or some-such. He looks at me quite shocked and says, "She is not that kind of girl."

This surprises me more than somewhat as Gene is in the army three or four years and he knows red lights are not always on stop signals.

Courtship Begins. Now, spring to me means finals and I am in no mood to hear any

more of his troubles as I have plenty of my own. But this time it is different.

"Guess what," he says. "This morning she drops her transfer."

"So?"

"So I pick it up."

"Hmmm."

"Then she smiles at me and says 'Thank you!'"

"Wow!"

I think of the movie when the girl horse stops chewing her grass and gives her tail a little swish at the boy horse. It is about time as he is by now quite winded.

Movie Ends. But like I say I do not see Gene for some time. "Do you remember the girl on the bus?" he beams. He rocks on his heels a little. "She is now my ever-loving wife!"

Come to think of it, this movie ends with the boy horse rubbing snoots with the girl horse. Maybe the boy horse rocks on his heels a little too!

EE Honorary Begins Pledging Activities

Eta Kappa Nu, honorary electrical engineering fraternity, will begin pledging today, according to Robert Swartwout, vice-president. The pledging will continue for two weeks.

During this time the pledges will be required to wear painted resistors in addition to collecting the customary signatures.

On May 22 the fraternity will hold a formal initiation at the Normandy House restaurant, Chicago avenue at Michigan. The induction will be held in conjunction with that of the Northwestern university chapter and the initiation will precede a banquet at which Mr. W. K. Burchard of the Illinois Bell Telephone company will be guest speaker. Mr. Burchard will talk on the industrial problems of an engineer.

Fraternities And Sororities

Fifty Years On Campus, Phi Kaps Celebrate

Phi Kappa Sigma will celebrate its fiftieth anniversary on campus Friday. A reunion smoker is planned for representatives from all classes from 1897 to the present.

The Skull House has a new body of officers: Joseph F. Peters, president; Edward A. Zeitz, vice-president; Emil C. Bandobitch, scholarship chairman; Earl R. Kracht, pledgemaster; J. Ronald Brough, secretary; Robert E. Parsons, treasurer; Jack R. Stroube, corresponding secretary; Gerald R. McDonald and Daniel G. Wise, Sergeant-at-arms.

Hold Party at 'Point'

Sigma Kappa sorority held a rush party at the 55th street promontory on April 18. Alpha Sigma Phi fraternity was the honored guest. Sunday the Alpha Sigs in return honored the Sigmas with a tea dance.

ley Schultz, recording secretary; Arlene Edwards, corresponding secretary and Helen Tichy, treasurer will hold office for the coming semester.

Plan Joint Stag

Sigma Alpha Mu will hold a joint stag with Tau Epsilon Phi on May 7 at the Ashland Club House, 3859 N. Ashland Ave. At that time a bridge tournament will be held.

At the April 28 meeting it was decided that the fraternity would adopt an alumnus as faculty adviser. Mickey Gilden of the electrical engineering department was announced as the first adviser.

Elect Officers

Joann Schwartz, secretary-elect of Phi Beta Pi sorority, announced the Phi Beta slate of officers for the coming semester: Lillian Phillips, president; Estelle Jesser, vice president; Muriel Paller, treasurer; and Toby Samotny, Pan-Hellenic council representative.

On May 14 a dinner and theater party will be held. Among the guests will be the sponsor, Dr. Margaret Matchett, and ruhsees Maxine Schne-row and Anita Bach.

Win Swim Meet

The big news around the Alpha Sigma Phi house last week was the swim meet. Through the strenuous efforts of Jim Rice who had an individual score of 17 points and

One glass of water, please.

Pedal Marionettes Here Friday Night

The Coffe-Miller Pedal Marionettes will present Molier's The Imaginary Invalid tomorrow and Friday at 8 p.m. in the North Union lounge. Tickets are available in 303C.

The Coffe-Miller Marionettes are a specialty in the puppet world. In addition to the usual string control, a patented system of pedals controls their movements giving the puppets smoother and more life-like appearance.

Lest the effect be spoiled, no one will be admitted to the performance after the curtain rises.

The two performances have been brought to IIT through the efforts of Joseph Coffe, eighth term English major, and the English department.

SAM To Hear Wiberg Discuss Personnel Plan

The Society for the Advancement of Management will meet 6 p.m. Monday in the Metallurgy building auditorium, following dinner in the North Union cafeteria.

All students are invited to the meeting, which will feature a talk by Martin Wiberg, a teacher at IIT from 1937 to 1941. Mr. Wiberg will describe a new technique of work measurement that has made a radical improvement in the selection, training, and motivation of workers.

It is the first scientific tool developed that can be used to find correlations between various intangible factors that the writings of Mayo, Roethlisberger, Gardner, and Barnard have shown play an important part in creating an effective working force.

'Mystery Man' Quizzes Campus Smokers

There's a stranger on campus whose business it is to give free packages of Chesterfields to students—under certain conditions:

If the student happens to be smoking a Chesterfield at the time "Mr. ABC" stops him, he'll get two free packs; if he is not smoking, but can produce a pack from his pocket, one package will be his reward.

All Clear!

Tense faces peered above the chairs in 400MH at 1:05 Wednesday as the entire class surveyed the perilous situation from a crouched position.

The first rumbling sounds came shortly after students in Dr. R. A. Rudenholzer's class detected a strong odor of gas. One student was sent to investigate and did not immediately return; another student was sent after him when the rumbling noise first echoed through the building.

Loud noises coupled with a strong gas odor made the class think tragedy had arrived. After a second rumbling sound shook the floor, most of the students were halfway down the stairs before it was learned that the sounds were due to an oil can dropped on the floor of a lab in the same building.

Picnic Planned By Alpha Phi Omega

Alpha Phi Omega, campus service fraternity, will hold a picnic at Westchester woods on May 16. All actives, pledges, and dates are invited.

Gerald Rubin, entertainment chairman, said, "The committee has promised a rollicking good time for all. I hope to see a high percentage of members turn out, because this is one of the big events on the APO calendar."

NEWS IN BRIEF

PHI LAMBDA UPSILON — Dr. Harry Henig, professor of economics at Illinois Tech, will speak Sunday at the initiation banquet of Phi Lambda Upsilon, honorary chemical society.

Dr. Henig will address the largest pledge group in Phi Lambda Upsilon's 20 year existence on the campus. His subject will be "The Business Outlook for the Future."

Fourteen men will be initiated at 1 p.m. in the North Union, followed by a banquet at the Swedish Club of Chicago. The pledges are: Roland Meyer, Leonard Maury, Martin Fanz, Bill Boyer, Louis Baker, John Reding, David Boies, Stuart Sack, Robert Engdal, John Pope, Ray Chung, Aaron Shaffer, Stan Milczta and Jerry Morse.

WSE—The junior division of the Western Society of Engineers, in

conjunction with the Illinois Tech student chapter will hold a dinner and social meeting at 6 p.m. on May 14 in the Engineers' club at 314 S. Federal street. The purpose of the meeting is to get the members of the society acquainted.

The assembly will feature an experienced man in the engineering field who will speak on a subject "of general interest to engineering students."

NROTC FORMAL—The Illinois Tech unit of the NROTC will hold its second annual NROTC formal ball in the Naval armory Saturday, May 22.

Jim Henry and Ed St. Ville, dance committee co-chairmen, are planning to have George Burnett and his "Pump Room orchestra" playing for the dancers.

The dance is open to all midshipmen, NACP students and ship's company.

VETERANS' OFFICE—The veterans Administration has announced that Dale C. Murray has been appointed Veterans' contact officer for Illinois Tech.

Mr. Murray will visit the school each Tuesday and will be available from 9:30 a.m. to 4 p.m. in the veterans' office in the North Union.

All Public Law 16 veterans should contact him for their periodic reports.

TALENT AUDITIONS — Horace Heidt is offering, through the courtesy of the Philip Morris company, an opportunity for talented Teahawks.

Auditions will be heard on Tuesday at 3 p.m. in the NU auditorium for talent suitable for a radio show—either group or solo performances are welcome.

Winning contestants will have an opportunity to test their talents on the air on the program "Philip Morris Nite with Horace Heidt" to be broadcast on May 23.

Don Campbell, Jr., campus representative for the firm, may be contacted by calling Victory 7590 or by contacting him in the Technology News office.

Dentyne Gum — Made Only By Adams

Tech Thinclads Beat Elmhurst 76-64

Score Third Straight Win

The Scarlet and Grey thinclads won their third straight meet April 24th by defeating Elmhurst college 76 to 64 at Elmhurst. Sweeping the quarter mile and two mile the Techawks placed in every event except the shot put to roll up eight firsts to seven for Elmhurst.

Arnie Harrison placed in six events to lead all scorers with 16-2/3 points. Bill Cahill was second in Techawk scoring as he totaled 11-1/4 points.

Cahill Wins Two Events

Jo Jantzen started Tech scoring by placing second in the mile after setting a fast pace which made Pepmeier turn in a time of 4:35.6 to win. Cahill led Ben Sutton and Carl Matson to the tape to place in that order in the quarter-mile. Harrison, Milt Cox, and Walt Conhiff ended in a three way tie for second place in the high jump. Harrison also shared a second place tie with Ray Klitzki and Bill Blackmore in the pole vault.

Dave Miller led the field from start to finish to win the high hurdles. Harrison took second in the 100 yd. dash and then added another to his string of broad jump victories. In the half-mile, Cahill duplicated his 440 win by sprinting past Pepmeier on the finishing straightaway. Owen Dykema finished in the show position. Harrison added six more points to the team total with a first in the javelin and third in the 220 yd. dash. Cox added three points in the low hurdles with second in that event.

Jantzen Takes 2 Mile

Jantzen took an early lead in the 2 mile run and went on to win. Teammates Al Ashurst and Wally Kohler followed him. John Gauthier threw the platter 111 ft. 2 1/2 in to win the discus and cinch the meet for IIT. The mile relay team of Don McKee, Matson, Sutton, and Cahill easily won their event.

Saturday the team will return to Elmhurst for the running of the annual Elmhurst invitational track meet. The squad will be bolstered by the return of Jim Sauer who was honeymooning during Junior Week. Jim is the team's leading middle distance runner.

Journey to Beloit May 22

Climax of the track season for the team will be the trip to the annual Beloit relays on May 22. Already the squad is working in earnest, running special match races, in order to pick the relay teams.

Special emphasis is being placed upon the low hurdle shuttle, sprint medley, and mile relay teams. Harrison will be entered in the individual broad jump and javelin competition.

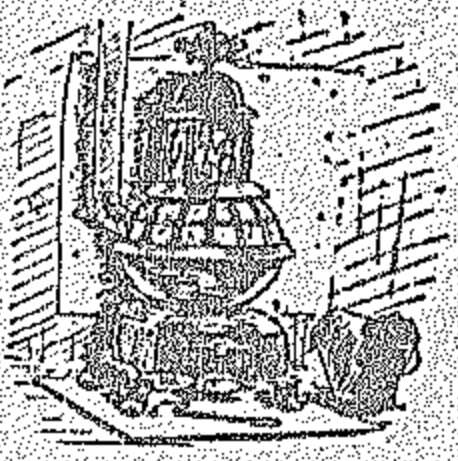

Golfers Score 14-13 Victory Over Loyola; Win Follows Losses To Lake Forest, Elmhurst

After being defeated in the first two games of the season, 10-2 by Lake Forest, and 13-2 by Elmhurst college, the Techawk pillrollers bounced back to overcome a strong Loyola team 14-13. Franklin Blaha, John Gailey, Tom Harvey, Bruce Gevis, Dave Felsenthal and Paul Kirby represented the victorious IIT aggregate.

The match was in doubt until the last putt. At this point, Kelly, number six man, sunk a putt for a birdie on the 18th hole and cinched the victory. Had Kelly missed, the game would have ended in a tie.

The best score of the day was shot by Tech's number four man, Bruce Gevis. Gevis blazed around the first nine for a 3 under for total of 33. His second nine was not as good and he ended up with a five over par 77.

Her one man for Lake Forest

Breeze by Shooting Ben Sutton

Everyone interested agrees that something should be done about the condition of Ogden field. But progress is slow.

Complete reconditioning is promised beginning June 15. Meanwhile four baseball players and three trackmen are suffering from injuries sustained on the uneven surface. No record is kept of intramural injuries.

BOB VOIGTMAN LEADS in one heat of the 440 yard race. Techawk Don McKee is a close second.

Plan Badminton, Horseshoe Events

The intramural department will sponsor an open ladder-type badminton tournament if sufficient interest is evidenced amongst the faculty and student body.

Entry lists will be posted in the gymnasium and faculty club. Those men desirous of competing are requested to indicate hours available for play. All playing equipment (rackets, birds, etc.) will be furnished. Personal gear (sneakers, gym suits) must be supplied by contestants. A trophy will be awarded to the champion.

If sufficient interest is evidenced a horseshoe tournament will be conducted. Appropriate areas will be set up for play on the campus.

The tournament will be a double elimination affair—individual and doubles contests will be scheduled. Appropriate awards will be presented.

Soccer Players To Meet, Map Plans For Team

The fate of the proposed soccer team will be decided tomorrow at 11 a.m. in 105 Chapin when soccer enthusiasts gather to map strategy for a September campaign. The meeting will be supervised by John Schommer, athletic director, and Ed. Glancy, head of intramurals, who will determine the extent of interest.

If more than 25 men appear, student organizers Mort Nemiroff and Ed Gintner will be given the green light for their plans. These include lining up prospective opponents from college and independent teams in this area.

was Jack Atten, former Northwestern U. star. Atten, one of the nation's leading collegiate golfers defeated Blaha, a former high school chum of his, in a very close game.

Every man on the team contributed his bit to win the meet. The men that played Loyola were picked on the basis of their performance in the two previous meets and probably represent a more or less stabilized first team. There are, however, several other men who have definite possibilities and who have not been mentioned here.

Every effort must be exerted to overcome the difficulties of repair and to give proper protection to our intramural and varsity athletes during the balance of this semester. The work should have been started in March, but the holes and ruts must be filled NOW!

The Elmhurst track coach committed a great breach of faith in connection with our recent track meet. The original agreement was for a dual meet. When the Wheaton team sought competition Coach McCauley declined to enter into a triangular. Accordingly, it was agreed that the three schools would run together, but would be scored as two dual meets—Elmhurst vs. Wheaton and Elmhurst vs. IIT.

Thus the Techawks were placed to outscore the Bluejays in a dual meet, and they succeeded. But the Elmhurst coach released a story of a triangular wherein Elmhurst placed second to Tech's third. Admittedly, the Techawks are not on a par with the powerful Crusaders, but they have more depth and balance than the undermanned Elmhurst squad.

Junior Week sports were, on the whole, successful. The IF track meet drew a large amount of interest. And Leonard Breen deserves credit for doing an excellent job as starter.

There is one problem connected with both the IM and IF track meets that require consideration. That is the question of varsity trackmen who do not have letter awards and under present IM and IF rules are eligible for competition.

The IM meet alone is too small to be divided into advance and novice divisions. This department would like to suggest that the fraternities enter their teams in the IM meet. Then the track coach could determine—on a performance basis—which men must compete in the advanced division. This idea, by the way, is not original, but is in use throughout the collegiate world.

Ball Team Edges Valpo 1-0; Leiser Hurls Six Hit Shutout

By Larry Shapiro

Illinois Tech's varsity baseball team emerged from its first week of play with a record of one win and two losses. The win was a startling 1-0 whitewash of a strong Valparaiso nine with the brush being administered by Bob Leiser, pitching find of the young season. The losses were handed the Techawks by Chicago and De Paul 7-2 and 11-3, respectively.

The opener with Chicago found the varsity playing against a veteran team that had benefited from playing four earlier contests. Chicago with two 'big' innings captured the contest 7-2, scoring four runs on four hits in the fifth and tallying three runs on two hits in the sixth. That scoring splurge wiped out a 2-0 lead established in the top half of the fifth when singles by Swede Swanson, Gordie Graenert, Ted Herman and Warren Melgaard pushed across the two markers.

Graenert Gets Four Hits

Graenert led the attack with a double and three singles while centerfielder Jerry Maatman checked in with a double and single in three tries. Bob Leiser started the game for the Techawks and hurled four scoreless innings yielding only two hits and fanning four. Paul Peterson took over in the fifth and was hammered for four runs on four hits while being the victim of two fielding errors. Bill McDonough and Bert Amstader finished up on the mound with McDonough being tagged for the other three Maroon runs.

The long ride home from Valparaiso was a pleasant one after the first victory of the season. Bob Leiser ran his string of consecutive scoreless innings to 13 by shutting out the Crusaders 1-0.

Hoffman Steals Home

The freshman twirler kept the six Valpo hits well scattered and had the situation under complete control from start to finish. George Gierke, a holdover from last year's Crusader powerhouse, threw a tremendous three hitter against the men of Tech, but saw his game fold up in the fifth as Al Hoffman stole home on an attempted 'squeeze' play.

Hoffman, the Tech left fielder, got the second of his two singles to open the top half of the fifth, was sacrificed down to second, advanced to third on an infield out, and slid home safely when Gierke fired a pitch behind the batter on the squeeze try. Leiser struck out 12 and Gierke fanned 10 Techawks.

Demons Swamp Hawks

Last Wednesday the team ventured into the Waveland park stronghold of De Paul university and absorbed an 11 to 3 licking.

The Demons lived up to their name as they hammered three Tech pitchers for 13 hits including four round trippers. Pete Coorlas supported the six hit pitching of George Leddy by banging out two home runs and a double. Leddy fanned seven while Roy Veitch, the Tech starter, set three down on strikes yielding six hits and four runs during his five inning hitch. He was followed to the hill by 'Lefty' Viola who hung around for the sixth and a four run barrage by the Demons. "Pete" Peterson took over and allowed three hits and three runs in the final two innings.

THIS IS no "yoke", son. If people have been calling you egg-head because your hair looks soft-boiled, here's eggs-actly what to do. Get busy with popular Wildroot Cream-Oil hair tonic. It grooms your hair neatly and naturally without that goopy look. Relieves annoying dryness and removes loose, ugly dandruff. Helps you pass the Fingernail Test! Wildroot Cream-Oil is non-alcoholic . . . contains soothing Lanolin. Get a tube or bottle of Wildroot Cream-Oil at any drug or toilet goods counter today. Always ask your barber for a professional application. (Better be hard-boiled with your roommate—keep egging him to get some Wildroot Cream-Oil of his own. It's tops for keeping your sunny side up!)* of 327 Burroughs Drive, Snyder, N. Y.

Wildroot Company, Inc., Buffalo 11, N. Y.

Tech Tennis Team Hits Stride; Defeats Bradley, Lake Forest

Illinois Tech's varsity tennis squad recovered its winning habit by trouncing Bradley and Lake Forest last week at home. The latter victory was particularly welcome to the Techawks, since the Foresters had upset IIT in the season opener on April 17.

The Foresters played well throughout the match to win our opener convincingly, 5 to 2. Ed Radek at number two singles, and Bob Zeitlin at number five won three-set matches for Tech's only points.

Against the powerful University of Wisconsin team on April 23, the Techawks showed to much better advantage, although losing 7 to 2. Bob Hall played one of his finest matches to defeat Wisconsin's number one man, Herb Hentzen, former Wisconsin state prep champion, 6-1, 3-6, 6-3. Tech's other win came at the number three doubles spot where Bob Davis and Bob Zeitlin paired to win in straight sets, 6-4, 6-2 over Hernstadt and Frederickson.

Tech finally reached the victory columns the following day, April 24, by defeating Bradley University at Armour Square, 6 to 3. Hall, Buchstaber, Bergstrom and Zeitlin all won their singles matches handily, and a pair of doubles victories sewed up the match. Burt Lynch, a former

IIT netter now playing for Bradley, defeated Ed Radek in three sets for one of the Braves' three points.

Delts Win IF Track; Alpha Sigs Second

Delta Tau Delta scored points in each of the nine events, including a 1-2-3 finish in the 900 yard run to score a smashing victory over nine other fraternities in Junior Week's interfraternity track meet, held at Ogden Field.

The Delts outscored their closest competitor, Alpha Sigma Phi, 54 points to 25½. Third place went to Theta Xi with 17½ points. Triangle was fourth and Tau Epsilon Phi and Pi Kappa Phi tied for fifth. Daedalians, Sigma Alpha Mu and Pegis Club finished in that order. Leonard Z. Breen of the Interfraternity council was in charge of the meet.

The Delts captured five first places. Cox won the high jump and broad jump. Ashurst won the 900 yard run and Richards beat out all rivals in the 100 yard dash. The 600 yard relay went to a Delt team. In addition, the Delts also claimed five second places. Other first places went to Hamilton, ASP, 220 yard dash; Kuzzia, TX, 600 yard run; Eberhardt, shot put, PKP; and TX, 1200 yard relay.

Revenge against Lake Forest came on April 27, as the Techmen swept four of five singles matches and the number one doubles match to triumph, 5 to 1. Darkness halted play on the final doubles match. Bob Hall defeated Bob Wiessmantel in the featured singles match, 6-4, 6-1 and Irv Buchstaber beat Ted Broeher, 8-6, 7-5.

Leiser, Conniff Double Winners In IM Track

Bob Leiser and Walt Conniff scored the only double triumphs in the IM track meet, held during Junior Week. Leiser won the 60 and 300 yard dashes while Conniff captured firsts in the 600 and high jump. In the other field events Jo Jantzen won the 16 pound shot put and Ken Yahiro the broad jump.

The mile was run in two sections, novice and varsity, to equalize competition. Winner of the novice division was Joe Donko. Owen Dykemo led the varsity competitors to the tape.

Nine Teams Undefeated In IM Softball; St. Mechs Show Power In 18-4 Victory

Although nine teams can boast an undefeated record as the intramural softball tournament entered its third week of competition, the "class of the league" can easily be spotted.

In pounding out an 18-4 win over the hapless Widgets, the Senior Mechs established themselves as early season powerhouses. This was the Mechs' second lopsided victory.

The Wolves protested their 6-4 defeat at the hands of the Wrong Guys. The Wolves held that the Wrong Guys were just that, since

Like to kick the ball around? Join the soccer team now forming.

they were playing with two ineligible men. The protest was upheld, and the game must be replayed.

The Hot Rods have been established as co-favorites along with the Soph Archs and the Senior Mechs, all by virtue of their powerful dem-

onstrations during the first two weeks.

Last week's results are:

Sr. Mechs	18
Widgets	4
Soph Archs	14
Chem Grads	6
Wrong Guys	6
Wolves	4
Wrong Guys	6
Bombers	3
Wolves	6
Sr. Juicers	5
Wrong Guys	13
Frosh Archs	9

Frosh Independents won by forfeit over the C. E. Jokers.

Sports Personality Of The Week

By Ed Jennings

When graduation time rolls around this spring, Illinois Tech will bid goodbye to one of its hardest working and best liked sports personalities, Bill McDonough.

It was back in 1938 after his graduation from Tilden Tech that Bill first came to IIT, then known as Armour Tech.

He managed expenses by alternately working and attending school. Baseball was Mac's chief sports interest and the '41 and '42 seasons found him serving as a mound artist for the Armour nine.

In the fall of '41, together with a group of other sports enthusiasts, Mac helped to organize Illinois Tech's first and only eleven man football team which he coached to a fairly successful season considering the factors involved. However, they were forced to disband since the school refused to give official recognition.

When the big scrap started Bill took a rain check on his scholastic and athletic activities to serve in the army air force. Commissioned a second lieutenant, it was three and a half years before he was free to resume his ME studies. Long a member of Honor I, he has served as president and treasurer of that organization. Aside from his three major athletic letters Mac has collected some eight or ten intramural awards as a member of a perennial group of lads, long a power in IM sports, and lately known as the Senior Mechs. This current baseball season southpaw McDonough is again bolstering the Techhawk mound staff.

As for the future, Bill hopes to take a position in the engineering department of the Tucker corporation this summer.

Bachelor McDonough says he will remain so for awhile—until some time next year to be more exact.

Let's Get Together

PHILIP MORRIS
is so much better to smoke!

PHILIP MORRIS offers the smoker an extra benefit found in no other cigarette. For PHILIP MORRIS is the ONE, the ONLY cigarette recognized by leading nose and throat specialists as definitely less irritating.

Physics Department Awarded Trophy For Open House Exhibit

A trophy for the best Open House exhibit was presented to the physics department last week by the Open House judging committee.

The committee, consisting of Earl C. Kubicek, Bryan E. Williams, and Gilbert A. Force, was scheduled to inspect all exhibits the afternoon of April 22. However, the number of exhibits required seven hours of study by the judges.

Commend IE, TD Exhibits

The physics department was commended on the high degree of student participation and the manner in which the material was demonstrated. The timeliness and visitor interest were also included in the rating.

Honorable mention went to the industrial engineering department. The committee felt that the IE exhibit was well manned and had much visitor interest but depended too much on commercial equipment. The TD exhibit was rated as cohesive, interesting, strong, and well delivered by student attendants.

Praise Visitor Participation

In the liberal studies division, honorable mention went to the biology department for their presentation depicting the relation of biology to the every day life of the visitor.

The Institute of Psychological Services was awarded honorable mention in the special exhibit division.

Phi Iota Theta Plans Affiliation

Theta Tau, national professional engineering fraternity, has a prospective campus chapter in a local fraternity, Phi Iota Theta. The group has conferred with the national officers of Theta Tau who seem in favor of initiating it sometime in March of next year.

The present officers of Phi Iota Theta are: Louis Jacobs, regent; Robert J. Freund, vice regent; Roy H. Running, scribe; William E. Hill, treasurer; Louis Davidson, inner guard; Robert F. Rocco, outer guard; and Robert Swanson, marshal.

Phi Iota Theta will still accept a few more petitions from engineering students who are either juniors or seniors and provided they are contemplating graduate work and are not chemical engineers or architects, who are ineligible for membership. Both day and evening students may become members.

Communications may be addressed to the scribe in care of the campus post office.

Bernays Wins \$4000 Award

Dr. Peter M. Bernays, assistant professor of chemistry at Illinois Institute of Technology, has been awarded a \$4,000 grant for a one-year study of the chemistry of scandium, a rare metallic element.
