

Elect 24 Class, ITSA Officers Today

Expect Large Turnout; Record Number Of Candidates Running

Today the students of Illinois Tech go to the polls to elect their officers of student government in what is expected to be the largest election in IIT history.

The number of candidates has already broken the record of 59 last semester, with 63 candidates running for 24 positions.

New Apartment Construction Begins Shortly

The student housing program took another step toward completion last week when President Henry T. Heald announced that contracts for the construction of a ten story building had been awarded.

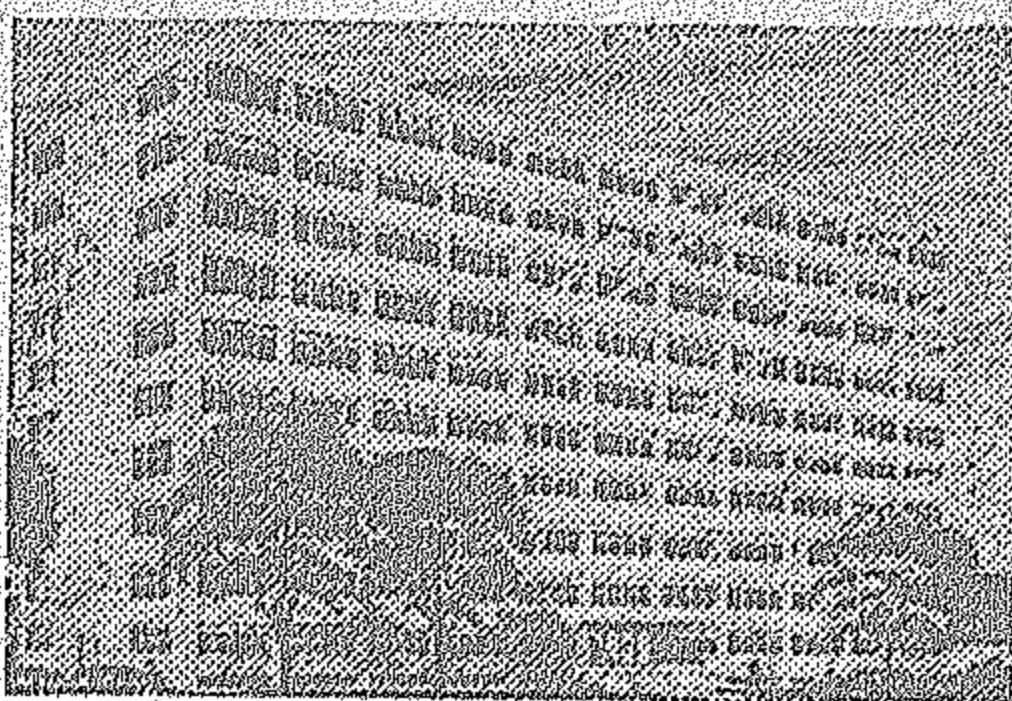

This 720 unit building will be erected on the west side of Michigan avenue between 31st and 32nd streets.

Both two-room and three-room units in the ten story structure will be available to married students at IIT. Applications are already being accepted.

Ready To Dig

Excavation for the project will be started within the next few days by William E. Schweitzer and company, Chicago contractors. Skidmore, Owings, and Merrill of Chicago are the architects.

Construction will be of reinforced concrete and brick and will conform

NEW ADDITION to Illinois Tech housing facilities is the above 10 story building to be built at a cost of \$1,200,000.

with the new buildings already built or under construction. The new structure will be 164 feet long and 46 feet wide and will be built with its lengthwise dimension parallel to Michigan avenue. Each unit in the building will receive either morning or afternoon sunshine.

Costs Include Utilities

Sixty-five two-room units will contain a combined living room and bedroom, kitchenette, and bath. Projected rental cost is \$65 a month.

Fifty-eight three-room units will (See page 3).

Views Of Council On Rating System Remain Unchanged

Representatives of the Academic council met with the Faculty council to discuss the matter of student rating of faculty members Thursday.

At the close of the meeting the Faculty council indicated that its memo of April 12 remains unchanged. In this memo they resolved opposition to any faculty survey, the results of which would be available to department heads.

However, the council also indicated that they intend to further discuss this matter with representative campus groups during the week. "The purpose of the meetings", stated Professor Eli Sternberg, secretary of the group, in an unofficial interview with a *Technology News* reporter, "is that the council seems to feel that there has been a misinterpretation about reasons which led the Faculty council to favor student polls in which the results are given only to the instructors."

The Academic council, which is composed of deans and administrative heads, sent Deans James C. Peebles, John D. Larkin, William A. Lewis, and Dr. John T. Retaliata as representatives to discuss the problem.

JUST BEFORE CURTAIN TIME—Virginia Dorociak and Gwen Stell help get Chris Miller and Giles ready for "Miracle on 33rd Street." L. to R. Miller, Stell, Giles, Dorociak. (See back page).

Top Technology News Jobs Open; Application Deadline Tomorrow

Tomorrow is the deadline for application for the positions of Editor-in-chief and Business manager of *Technology News*. Applications are also due from applicants for the top jobs on *Integral*, *Technette*, and the student directory.

Applicants must turn in a letter stating their qualifications to the Publications board, through Dean John F. White's office not later than 5 p.m. tomorrow. Personal interviews will be given all applicants at 1 p.m. the following day in Dean White's office.

Charles Trost, who has served as Business manager of *Technology News* for the past year, indicated that he will not re-apply for this position. Sherwood Benson, present Editor-in-chief of *Technology News* stated, "I regret that circumstances will not permit me to apply for the editorship a second semester."

There has been no Editor-in-chief of *Technology News* who has served for more than one semester in the last decade. The two new appointments on the newspaper will be for one year.

Show Atomic Bomb Film In North Union

"God of the Atom", a full-color scientific film depicting the atomic bomb problem will be shown at 11 a.m. Tuesday in the North Union auditorium.

In the 45-minute movie, produced by Dr. Irwin A. Moon in the Los Angeles laboratories of Moody Institute of Science, scientific apparatus and diagrams are used to demonstrate the theory of atomic power. Actual on-the-spot film records of the Nagasaki and Bikini blasts show the A-Bomb in action.

The program is to be presented through the work of the newly reformed Inter-Varsity Christian Fellowship, assisted by L. F. Skibitzke, film representative.

Time Flies

Techawks are girding themselves for the big pull which is not far off. One week from today the final exam schedule will appear in *Technology News*.

Cancer Benefit Dance Slated For Chicago Arena May 28

The "Collegiate Answer to Conquer Cancer" will take place May 28 in the Chicago Arena in the form of an All Collegiate Benefit dance.

The dance, sponsored by eleven local colleges including Illinois Tech, is the inspiration of Noel Goldblatt, son of Maurice Goldblatt, president of the University of Chicago Cancer Research Foundation.

Noel contacted the colleges and formed a committee to make plans for the dance. Illinois Tech was represented by Bob Ricker, who is now

from the State Lake, and Jan Sterling, now starring in the play "John Loves Mary".

A thousand corsages have been donated to be sold at the dance for a dollar each and those who intend to buy flowers are requested to re-

PRESIDENT HENRY T. HEALD buys the first ticket to the Cancer Dance, while Bob Ricker, chairman of the dance committee looks on.

chairman of the dance at this school. He is being assisted by Irene Radvilas, ticket chairman of the affair and Jim Gaffney, publicity.

Many Prizes Donated
Irv Kupcinet, columnist for the Chicago Sun-Times, will emcee the affair and introduce such star performers as Eddie Condon, now at the Blue Note, the Rag Doll's King Cole Trio, Ray McKinley and his orchestra, who made the popular recordings of "Civilization" and "Red Silk Stockings", Louis Jordan from the Oriental, Janie Powell,

frain from doing so until they arrive at the dance.

Cancer Society Benefits

The proceeds of the dance all go to the American Cancer Society which is putting on a drive with a goal of \$1,150,000.

Funds will be used to help in education, research, and treatment of cancer victims.

Tickets to the dance are on sale in the South Union lounge every day between the hours of 10 a.m. and 2 p.m.

Heated Contest

ITSA offices, to be held for one year, are the subject of heated triangular contests, excepting the position of secretary. George Bowman, Charles Trost, and Ken Thompson, three campus leaders, are the candidates for president. Bowman, CE, is the present junior class president; Thompson, also a CE, is present vice-president of ITSA; and Trost, an IE, is business manager of *Technology News* and president of Newman club.

The position of secretary is also uncontested in the senior class. Ed Zietz and John Doering, both prominent figures in Junior Week, find another triangular contest completed by Bob Amstutz, Triangle fraternity man, in the senior class presidency election.

No Uncontested Juniors

Junior class elections find no uncontested offices, and more candidates for president than any of the other classes. Four men: John Peterson, Paul Peterson, Gordon Paulson and Tom Murphy are battling for this position.

Candidates for sophomore offices are more numerous than any other on the campus, with a total of 20 running for five positions.

Due to the fact that only one semester is involved the freshman class, which also is now in the process of getting its feet wet in IIT campaigning, has the least number of candidates. The offices of president, treasurer, and social chairman of this class are uncontested.

Drawing Contest Entered By 150; Valuable Awards Presented To Winners

Nearly one hundred dollars in prizes was awarded to the four winners of the freshman technical drawing contest. Surviving elimination from 150 contestants were Harry E. Emmel, first prize; L. J. Mente, second; D. A. Perreault, third; and Frank Halwax, fourth.

The drawing contest committee, consisting of M. L. Betterley, R. O. Loving, I. L. Hill, S. Osborne, and H. C. Spencer, selected 15 drawings for display in the Metallurgy building, where they were viewed by members of the American Society of Engineering Education.

Acting as final judges were Randolph Hoelscher, dean of Engineering at Navy Pier; W. Luzadder, professor of engineering drawing at Purdue; and H. C. Hesse, professor of mechanical engineering at IIT.

New Integrals Arrive; Available In South Union

Distribution of the 1948 *Integral* will begin today at noon at the *Integral* office in South Union. Only graduating seniors will be given books today, while those who registered for annuals last semester will receive theirs tomorrow. The general student body can get copies on Friday.

Hours of distribution will be from 9 to 4 on each day. Only those who were in school last semester will receive books.

Morally Wrong?

Under consideration by the Faculty council is a proposal by three Illinois Tech students for alteration of the quiz system now in use.

It is pointed out that, at present, engineering or other technical quizzes can in no way be considered an educational process, or part of one. The memorization of physical constants and equations required for an average quiz does not permit investigation of the student's power to reason, or his ability to put to use his understanding of the course.

This has brought about a certain kind of frustration on the part of the quizee. It is responsible for the near-universal attitude toward cheating—that it is "wrong" to cheat just as it is "wrong" to walk across Ogden field when it is in a muddy condition. Cheating has come to be an infraction of disciplinary regulations for which the offender expects to be punished if caught; but nowadays there appears to be nothing morally wrong with the practice.

The use of alternate seating and more proctors would decrease cheating to an extent; it might, however, also generate an even less healthy attitude than the present one.

A far more constructive suggestion is that which calls for a general adoption of the open book type quiz—one in which the student is allowed to demonstrate his abilities, and his mark depends not upon his eyesight, but upon his understanding.

Fire One!

So now they're dancin' for the nation's health.

Eleven colleges in the Chicago area, including Illinois Tech, are cooperating to join in giving a dance called the "Collegiate Answer To Conquer Cancer." The informal dance atmosphere will be livened by the strains of Ray McKinley's band to say nothing of such notables as Louis Jordan and the King Cole Trio.

With all the "peaceful bloodshed" going on in the world it's sort of a pleasure to take part in a function like this — aimed at conquering cancer, not Israel.

Perhaps this dance will set an example for other cities and colleges. But whatever happens elsewhere, it looks like Collegiate Chicago is going to chalk one up against cancer on May 28.

NIGHT AND DAY

Letters To The Editor

Vote Commissioner Replies To 'Constructive' Criticism

Dear Sir:

Last week two letters concerning the pre-election activities and duties of the election committee were published in *Technology News*. I realize that both of these letters were intended as constructive criticism, which I always welcome. However, the casual reader may have drawn inferences from the letters which I feel obliged to clear up.

The date of Wednesday, May 5, was selected as the date for the release of petitions to students because it was felt that maximum participation, insofar as the number of candidates is concerned, could be obtained through the simultaneous release of information on the elections through *Technology News*.

Due to the fact that *Technology News* does not arrive at any exact time of the day the release of petitions could not

very well be timed to the arrival of the paper. Therefore the beginning of the day, 8 a.m., was selected as the time of release.

Naturally the other members of the ITSA Board knew the time of release, as did the other members of the election committee, so there was little opportunity to keep the time secret. And because of the fact that some of the members of the Board would be candidates in this election, I told any person who asked me the time of release.

While it is true that the candidates who turned in petitions early were among those who asked the time for release, it is also true that I told many people whom I did not know, but who had the same right to the information as any other person who cared to come to the ITSA office and ask.

No one had access to the petition blanks before 8 a.m., at which time they were placed in the South Union lounge for public distribution.

However, I think little damage was done, and future election committee chairmen can benefit from the verbal flurry of this election.

Warren G. Brockmeier
Election Commission Chairman

Points To Disservice

Dear Sir:

I want you to know that many people feel that the jokes in your "Slipstick" column are not always up to the level which can rightfully be expected of a college gentleman. The first three jokes in this column in the May 12 issue are highly objectionable. The second and third are definitely not for a mixed group such as appear on our campus.

Engineers don't have to be "tough," at least in the sense of being immoral. This column, further, is a genuine disservice to some of your readers.

J. D. Parent
Educational Director
Institute of Gas Technology
(copy also sent to President Heald)

Slipstick

Who says the Russians have no sense of humor? Here's a joke that is currently rolling them on the Kremlin sidewalks:

Puervi: Kto buila dama, c kotoroi ya videl bac, vchera. yecherrom?
Torui: One net dama—ona moya zhen-ya.

Scene: Frat House
Characters: Two Delts
"Got a pen?"
"Sure thing, pal."
"Some paper too?"
"Guess so."
"Going out past the mail box?"
"Yeah."
"Wait until I finish this letter?"
"Uh-huh!"
"Can I borrow a stamp?"
"Yeah."
"What's your girl's address?"

Eileen: Did that English course help Ralph any?

Joan: No, he still ends every sentence with a proposition.

"How is your son getting along at IIT?"
"He must be doing pretty well in languages. I just paid for three courses: \$10 for Latin, \$10 for French, and \$100 for Scotch."

There are two kinds of guys
And only two that I despise.
The first I'd really like to slam;
The one who copies my exam.
The other is the dirty skunk,
Who covers his and lets me flunk.

Even though we're the last people you may turn to, we are the last to let you down.

Your friendly neighborhood mortician,
Carbolic Gus

as I see IT

By Sherwood Benson
Editor-in-Chief

"WHERE'S THE EDITOR? I'll tear him limb from limb!" shouted the pretty stranger standing in the doorway.

"Who me?" says I. "I don't even know you."

The young lady had been rightly indignant about the publicity her affair had received in the paper—she came to her "source" of trouble.

But this sort of thing happens more or less frequently all through the semester—every semester. Only recently a deservng class dance did not receive the type of publicity it should have had.

Most of the victims blame the editor; they allude to his prejudice and claim, "He just didn't want to give us publicity."

An editor cannot afford to harbor this kind of prejudice, especially with 3400 publishers. No, this is not the root of the trouble—but there is a trouble.

I am going to present a plan to the ITSA Board of Control or the Student Coordinating Council (whoever will listen). It costs no money; the only thing it needs is understanding and some cooperation.

My plan is prompted by the firm conviction that a campus newspaper should not be relied upon to act as public relations agent for each individual all school affair that arises. Of course the paper should work with and cooperate with these functions in every way possible.

But all too often the importance of adequate publicity for a dance is completely overlooked. I would like to set up a student public relations bureau. Completely apart from the paper this bureau would operate in every way possible to make school functions a hit by writing interesting and complete copy to present to *Technology News*. Then when this "bureau" copy comes to the campus newspaper the editor should have the right to handle it or place it anywhere he sees fit.

A campus newspaper must retain its right to judge the importance of copy, but if the material is handled well before it reaches the editor's desk its chances of appearing in print are greatly increased.

Although circumstances do not permit me to reapply for the editorship of *Technology News* I would willingly handle this miniature "news bureau," with or without several assistants (preferably interested in advertising).

AN OPEN LETTER TO DR. J. D. PARENT:

(The letter referred to is in column 3.)

Dear Dr. Parent,

Thank you for your recent letter about Slipstick. Although I do not wholly agree with your point of view your letter is indeed an expression from a very earnest man.

You have already cost me \$3.75, for when I read your letter over for the tenth time I threw my hands up in despair and bought Max Eastman's book "Enjoyment of Laughter."

My despair sprang from my distaste for arguments such as "It has always been done," or "We get our jokes from some of the finest coeducational schools in the country."

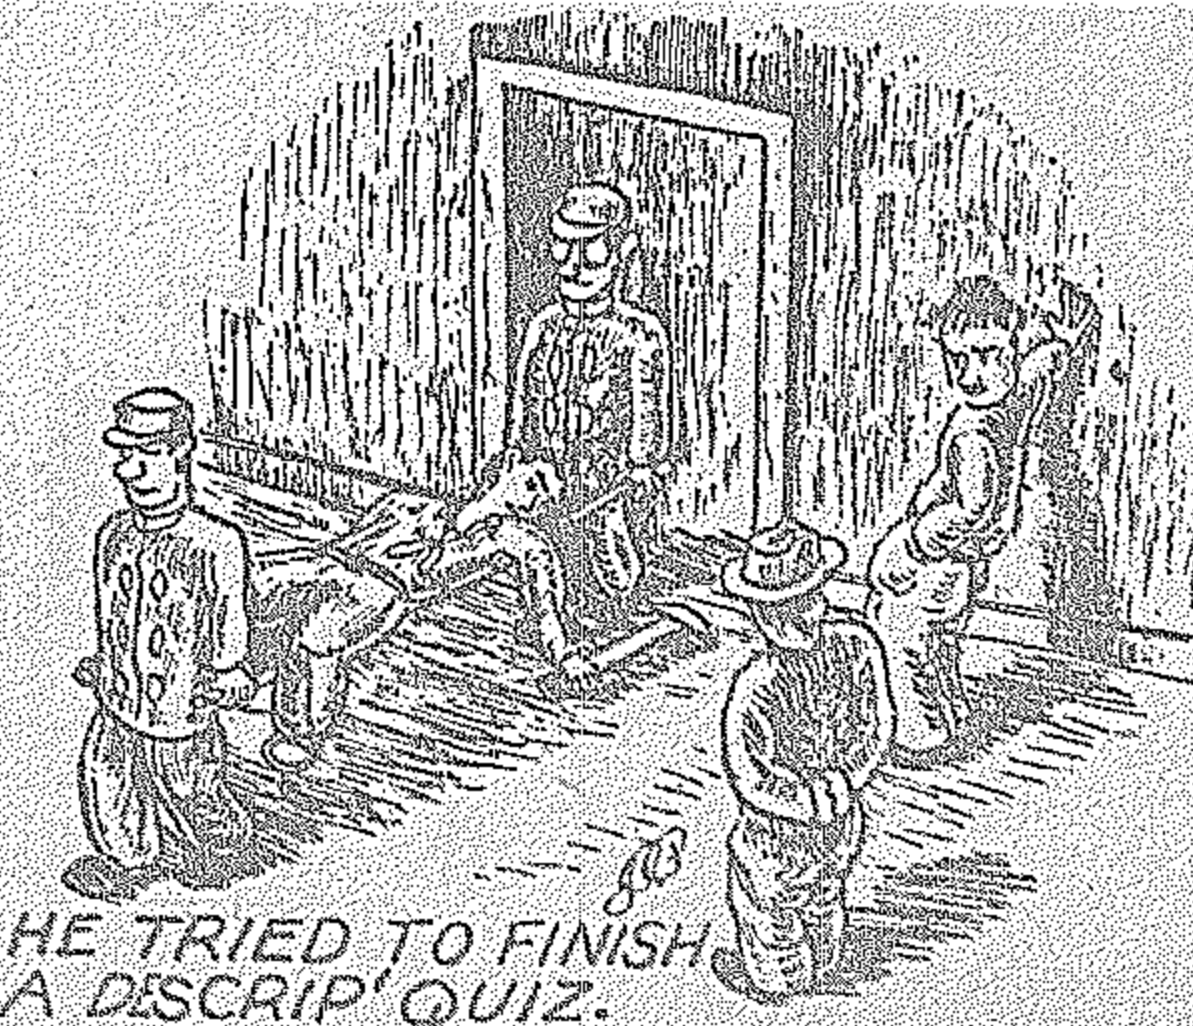

For how can I convince you that we are not trying to be "tough" or desert the level of gentlemanly standards when we print jokes that have a tinge of sex in their double meanings?

Eastman's book is well written but I could get no ammunition from any of his three chapters on sexy jokes and Freud.

We are constantly trying to draw the line between vulgarity and just plain college humor. But it should be realized that we cannot draw this line to suit all of our readers. Yours is the second "immorality" letter we've received in two years.

I myself take jokes as they come, with less analysis and more laughter.

Respectfully yours,
S. Benson

HE TRIED TO FINISH A DESCRIP QUIZ.

Europeans Write To Tech

Language students, romanticists, and would-be world travelers now have an excellent opportunity to exercise their latent letter writing abilities.

Illinois Tech has received about 20 letters from students in Germany and Austria, which arrived at Christmas time and have as yet been unanswered.

Many of these people have unique or unusual professions outside of their academic activities. One man is an interpreter on a river barge, another is a policeman attending night school. Most writers ignore the subject of politics, confining themselves to topics of a less controversial nature.

Students that wish to write to these willing correspondents in either German or English may contact Celia Barteau in the Integral office in South Union from 11 to 1 p.m. on Monday, Wednesday, or Friday. Language teachers at IIT have indicated that they will be available to aid letter writers in grammar usage.

The following is an example of the letters received:

Heidelberg, February 7, 1948

Dear Sirs:

I am interested in taking up correspondence with a young American. I saw your address in an old edition of the American newspaper "Die Frie Zeitung" which is published in the U. S. zone of Germany, and I ask you to help me find a partner. I can read and write English—I wrote this letter without the help of a dictionary—English is my favorite lesson at school, and I want to become more perfect.

My name: Rudolf Heinrich Haas, called "Rudi".

Age: 23

Sex: Male

Education: I am taking a refresher course at the "Realgymnasium" at Heidelberg. The course runs for discharged prisoners of war. (I was a prisoner of war for 3 years, 7½ months, 2 years of which I spent in the U.S.A. and the rest of it in Great Britain). On October 1 this year I hope to enter Heidelberg university to study natural sciences, especially Mathematics and Physics.

Special Interests: Mathematics, Physics.

Life in the United States

History and Geography of the United States.

I should like to write to a Pennsylvanian—I was at Camp Reynolds, Pa. and Sheffield, Pa.,—or a Californian, or a boy from Illinois.

My address: Rudolf Haas

17A Heidelberg

Mittlere Kirchgasse 7

U.S. Zone, Germany

Please accept my hearty thanks for helping me.

Yours respectfully,

Rudolf Haas

Freshman Vice-pres.

THEY'RE ON THEIR WAY — These Techhawk parents and their offspring are going to the Kiddies On Kampus party Saturday afternoon.

Movies, Prizes And Games To Delight Kiddies Saturday

It's children's day in the North Union lounge from 2 to 4 p.m. on Saturday. That's when the Kiddies On Kampus party will bring together over fifty children of the students of Illinois Tech.

Ages of the young partygoers now include from five months to seven years old. Children over two years of age will be grouped together and special games will be played. Balloons and balls, besides bags of candy and lollypops will be given to all the younger set.

Show Children Movies

A number of more substantial prizes will be offered the parents such as nylon stockings, and cartons of Chesterfield cigarettes. Tom Murray, a sophomore ME, is getting the grease paint ready for his clowning activities at the party.

Several color cartoons will also provide the youngsters with entertainment.

Sponsored by 10 Groups

Ed Adolphson, representative from the Interfraternity council, is handling the refreshments that the IFC is supplying, including large quantities of ice cream and cookies for both children and parents attending.

Ten groups are combining to sponsor this party. The other sponsoring groups are Alpha Phi Omega, Home Economics club, Illinois Tech Women's association, Technology News, ITSA Board of Control, Pan Hellenic council, White Collar Girls, Integral, and Pi Delta Epsilon.

Bailey Guest Of Honor At Local ASME Banquet

The Illinois Tech and Northwestern sections of the ASME attended a banquet sponsored by the Chicago branch Wednesday evening in the North Union cafeteria.

More than 100 graduates of IIT and Northwestern attended the session, which was preceded by a tour through the new buildings.

Guests of honor were E. G. Bailey, national president of ASME, President H. T. Heald, Dean J. C. Peebles, Dr. John T. Rettaliata, and professors Roland Budenholzer and S. E. Rusinoff.

Thirteen Pledge Sigma Iota Epsilon

Sigma Iota Epsilon, management honorary, pledged thirteen new members at a smoker last Wednesday night. Of the new members, three are in the business and economics curriculum, six are studying industrial engineering, and four are management option students.

Members pledging this term are: Ruth Bouril, Sherwood Benson, David J. Halperin, David D. Pasik, Morton Shapiro, John H. Stern, Eugene R. Stanley, Eric Gabler, John P. Doering, William R. Thayer, Herbert J. Winter, Harold E. Fortner, and Joseph E. Proser.

Lecturer To Present Research Geology Data

George H. Otto, geologist at Armour Research Foundation of Illinois Institute of Technology, will present the results of extensive research on the glacial geology of Chicago with an illustrated lecture May 26.

The research has been conducted for the Illinois state geological survey.

Methods were developed for tracing deposits of soft clay tills and associated stratified clays and silts. Applying the principles of soil mechanics to glacial geology, these methods are based primarily on the use of quantitative measurements of water content and unconfined compressive strength.

The lecture will be held at 8 p.m. in the auditorium of the Chemistry building.

CLASSIFIED ADS

LOST: Army B-2 flight jacket in Chem building last Thursday. Owner's name under collar. Return to lost and found. Reward.

FOR SALE: ONE CLEAN WHITE PACK Containing 20 Satisfying Smokes at your nearest Chesterfield dealer.

Magazines, Music, Peeves Used To Test Techawks' 'Empathy'

Would you rather have someone cough in your face or slap you on the back? Do you prefer a running nose to a showoff? Well, tell it to Willard A. Kerr, assistant professor of psychology, and maybe he'll tell you that you have empathy.

Journalists Unwind At Publications Banquet Sunday

Over 125 Tech writers and their wives will attend the annual IIT Publications banquet, to be held Sunday evening at Normandy House.

Given for all publications staff members, the banquet is a climax of the year's extracurricular journalism; it follows the distribution of the Integral and is just two days after the last issue of Technology News is put to bed in the gay hours.

Preceding the banquet, Pi Delta Epsilon, honorary journalism fraternity, will initiate 11 students, an honorary member, James W. Armsey, and an alumni member, Joseph E. Sullivan, class of 1916 and a member of Sphinx, predecessor of the present fraternity.

The new undergraduate members will be Bob Elliott, Leonard Speicher, Don Goldsmith, George O'Brien, Gene Rezabek, Jim Gaffney, John Dinou, Don Campbell, Jr., Saul Needleman, Al Winsberg, and Werner Neuman.

Awards will be announced at the banquet for the outstanding work in publications during the fall semester in the fields of news, sports, and feature.

Principal speaker will be Edgar A. Jett, assistant director of Armour Research Foundation.

NEW APARTMENT

(Continued from page 1) contain a living room, bedroom, kitchenette, and bath. Projected rental cost is \$85 a month.

All units will be unfurnished, and rentals will include all utilities except electricity.

Double-hung aluminum windows will provide large amounts of light for each unit. Ceilings will be nine feet two inches high. The building will contain two elevators.

IIT's student housing program will be partially financed by a conventional loan underwritten by State Mutual Life Assurance company.

This building, together with the two dormitories now under construction, mark the first step in Illinois Tech's long-range program to provide housing for its students and staff in a self-contained study, work, and living area.

No, "empathy" isn't a disease or an Italian dish, it's the ability to put yourself in another's place by imagining his thoughts and point of view. Dr. Kerr is, at present, exploring this relatively neglected field and is using IIT students as subjects. He employs his "Mass Empathy test" as a means of measuring an individual's aptitude in this field.

List Music, Magazines

The test consists of three questions: the first gives 14 different types of music (waltzes, polkas, "Hit Parade", etc.) and asks the testee to list them in the order of their probable popularity with non-office factory workers; question two names 15 popular magazines, the subject is told to list them in what he thinks is the order of their decreasing popularity with the "hypothetical average man"; the third question presents a list of annoying—experiences which are to be ranked in order of their decreasing repugnance to the average man.

Coughs Annoy Most

Dr. Kerr will carefully examine the results of these tests and determine their correlation with intelligence, experience in industry, and course of study.

On the subject of question three, nauseating habits, students research on the subject indicated that "coughing in my face" was the public nuisance number one, with bad breath and running noses second and third respectively.

O.D. SHIRTS — FIELD JACKETS — COVERALLS

Psychology Professor Explains Trend Away From Engineering

David P. Boder, professor of psychology, stated last week that the "trend away from engineering" reported in the last *Technology News* survey may be in part a result of the present character of the engineering educational system.

According to the survey, 42 per cent of Illinois Tech's senior engineering students do not intend to stay in engineering work for more than three years after graduation. Further, 58 per cent of the seniors felt that the financial status of an engineer did not justify "the long and expensive technical education necessary."

No 'Pre' Education

Dr. Boder stated that the apparent change of attitude may be attributed to two principal factors. The selection of a career by the high school graduate he indicated, is not made with mature judgment; possession

David Boder

of the abilities to study engineering does not always mean fitness for professional activity in the economic and social setting of the engineer.

The training of engineers, he pointed out, is nearly the only one which does not require "pre-professional" education, as do the professions of law, dentistry, and medicine. Dr. Boder stated it is during this "conditioning period" that many students of the latter professions find it expedient to alter plans and enter another field.

Suggests Career Advice

Recorded in last week's survey was an apparent increase in the sophomore year in support of engineering as a profession. Commentary written about these figures suggested that the increase was due to "the first mastery of things technical." Dr. Boder pointed out that this phenomena was, in all probability, due rather to the first year "weeding out" of men unfit for engineering.

"The significant trend away from the profession does not represent a serious loss of time on the part of the student who makes the change," stated Dr. Boder. "The training in the first and second year is of such general educational value that the only 'risk' is on the part of the educational institution which has invested its resources in students, a large proportion of whom may leave the profession.

"If the engineering career must necessarily be selected at the senior high school level, then more intensive psychological and vocational counseling is in order."

Schommer Briefs Graduating Seniors

Professor John J. Schommer, director of placement, delivered a short address on the subject of after-graduation employment at a meeting of the graduating seniors Thursday in the NU auditorium.

A show of hands indicated that the majority of the students had not yet accepted positions, although most members of the class are considering them.

Questionnaires were distributed to the class requesting data about the place of their future employment and starting salary.

Contributions For Clothing Campaign Pass Expectations

Contributions to the "Clothing for Palestine" drive here have already exceeded expectations according to Jona Cohn, director of the drive. "However," he stated, "there is still a high goal to be reached."

Used GI clothing is still being accepted in the South Union lounge. If students find it inconvenient to bring the clothes to school, arrangements may be made to have it picked up Saturday.

All clothing is to be cleaned and sent to New York from whence it will be shipped to Europe. This clothing will have a high shipping priority.

The following items are requested: khaki and O.D. shirts and pants, coveralls, field jackets, and fatigues.

Metallurgicals Join National Society

Organization of a student affiliate of the American Institute of Mining and Metallurgical Engineers will take place at a meeting tomorrow at 11 a.m., in 201MC.

The society will attempt to provide a meeting on common grounds for those students whose interests are the production, processing, and use of minerals and metals. Illinois Tech's chapter will be part of a national organization of 15,000 members.

All interested students are urged to attend the organization's first meeting.

Fraternities And Sororities

Alpha Sigs Play Host To Campus Sororities

The members of Alpha Sigma Phi are finding out that IIT is co-educational after all. A recent Sunday found them playing host to the "curvacious cuties" of Kappa Phi Delta and Delta Zeta sororities. A beer "bust" the following Monday served as a change in tempo and cause for much gaiety.

Guests that night included three Sigma Kappas. The same night the "Third floor Boys" dragged back "Sir Toby Belch", the new house mascot. Among other things the pup keeps Earl Martin and Jack Worcester busy with the mop.

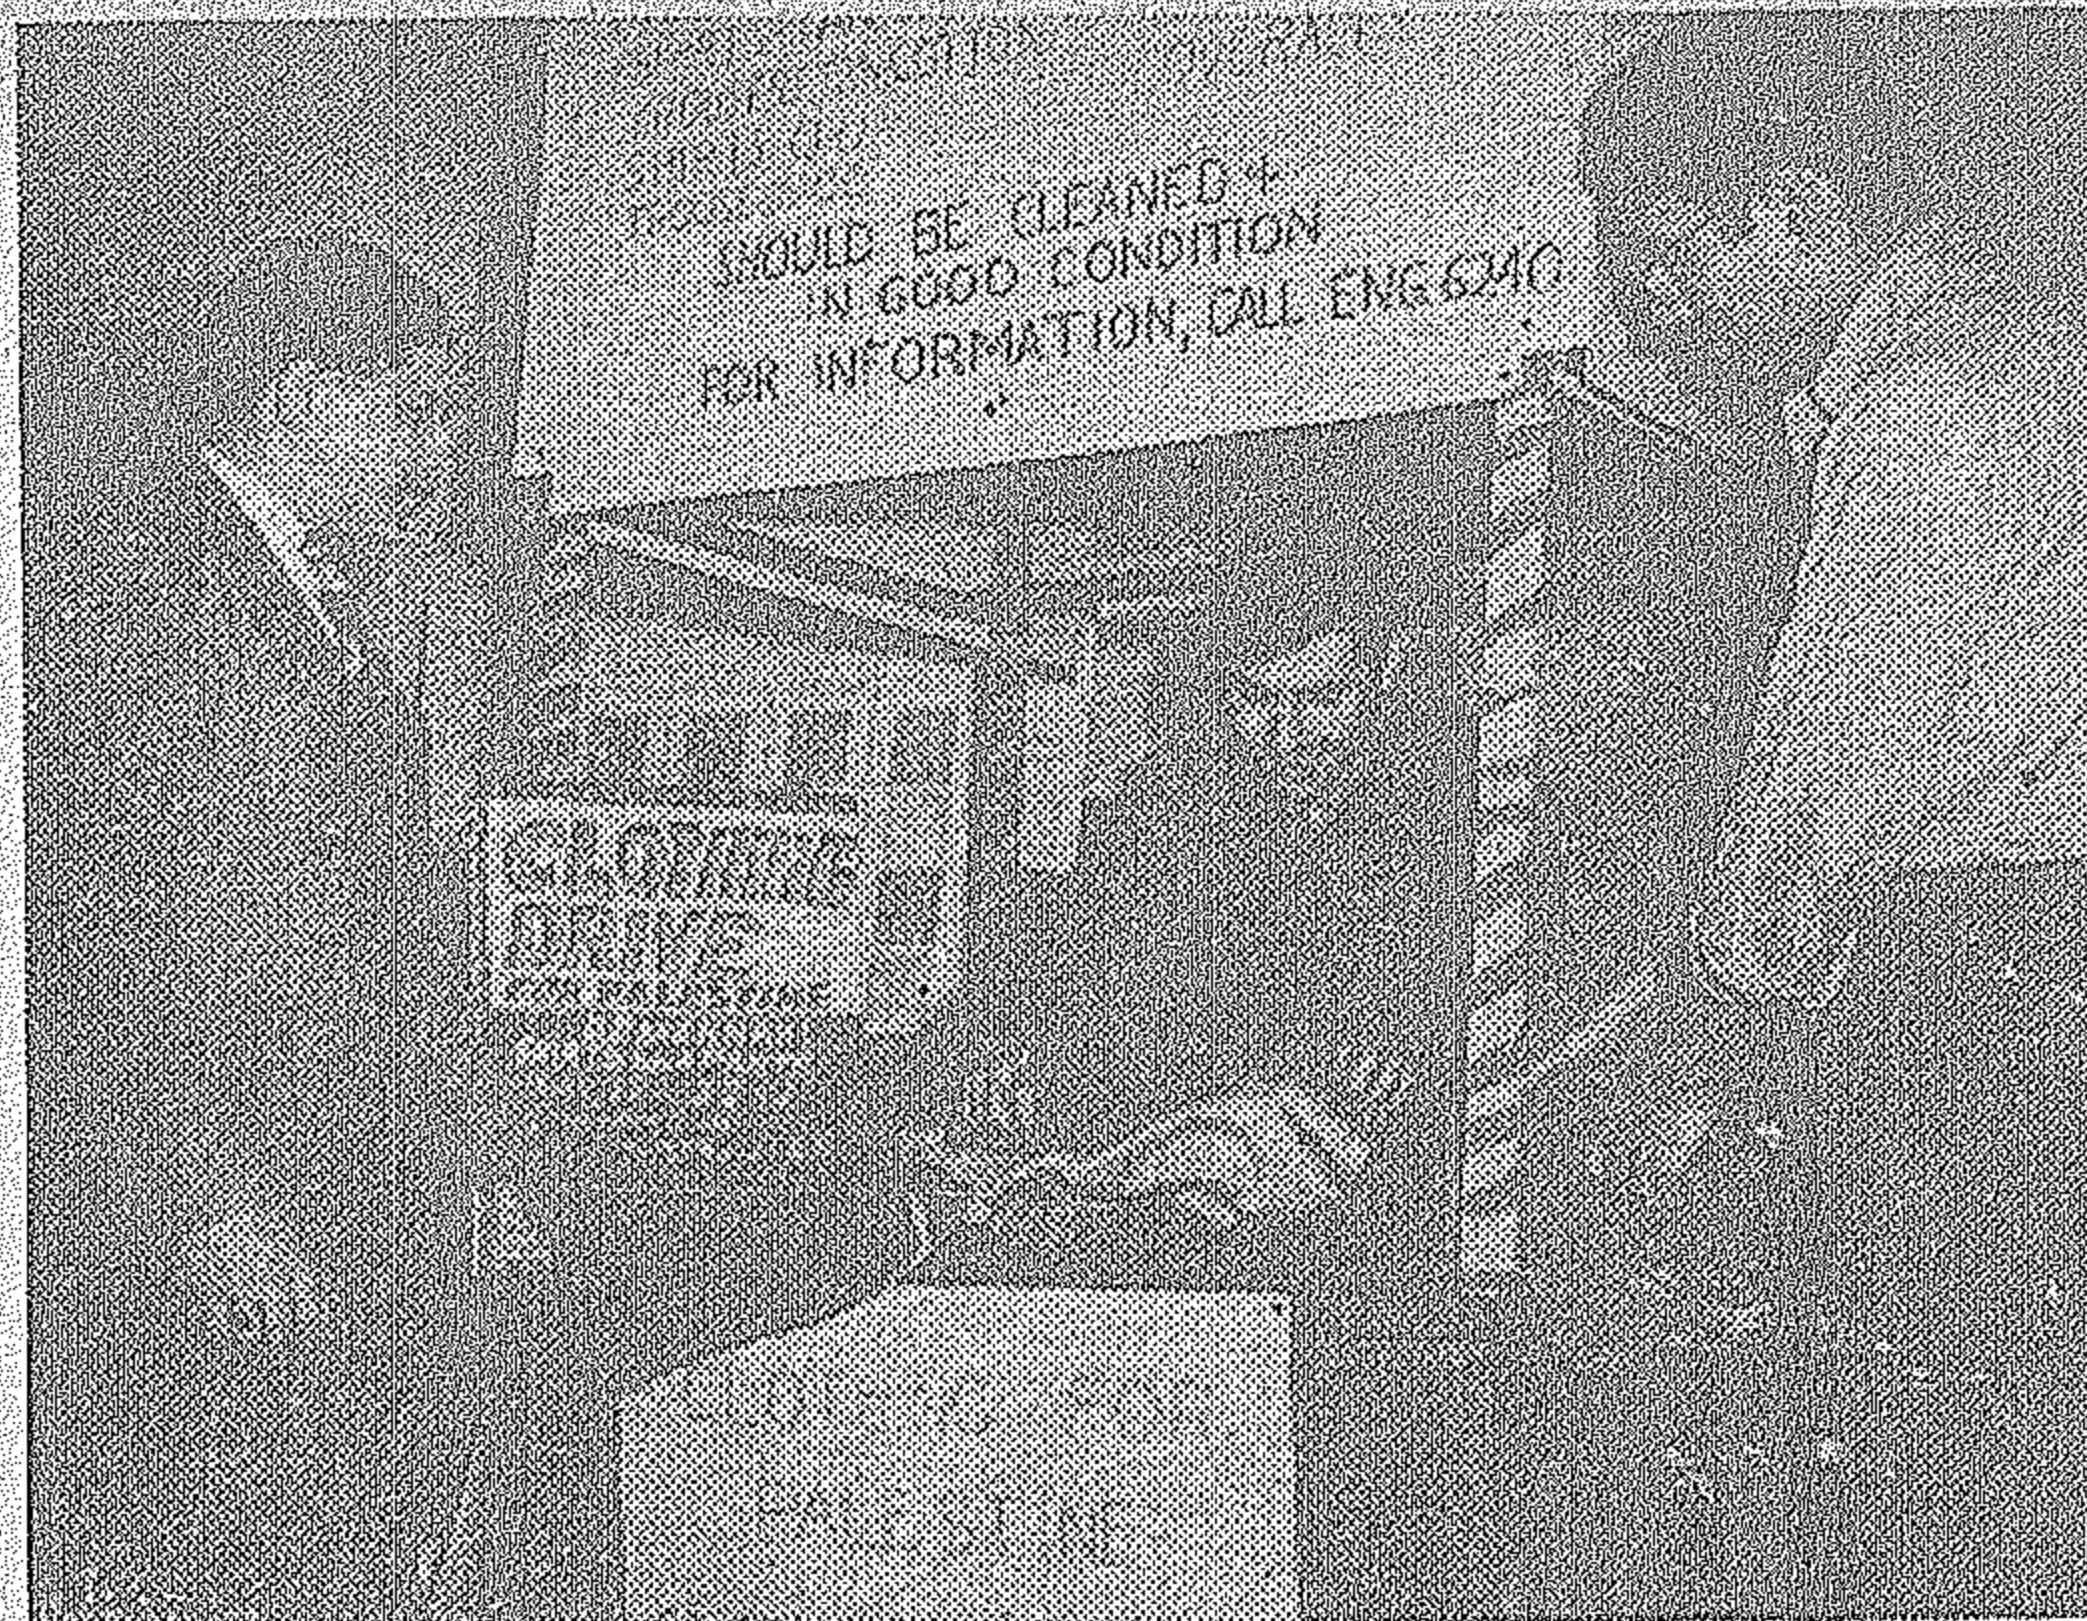

Delta Zeta Rushes

The annual "Founder's Day" party recently took place celebrating the 47 anniversary at IIT of Gamma Beta chapter of Delta Tau Delta. More than 150 undergraduates and alumni participated in the celebration at which Mr. A. B. Walling, National Alumni Secretary of the fraternity, extended his congratulations to the chapter for their steady growth at IIT.

On May 12 an old custom, discontinued during the war years, was reinstated at the Delt house with the revival of the annual "Fathers and Sons Banquet." Eighty Fathers and sons were in attendance for the banquet and entertainment of the evening. The occasion was highlighted by the guest speeches of Dean White and "Sonny" Weissman.

The chapter has welcomed one new pledge to the shelter, Wally Coniff.

Phi Kappa Sigma honored their members who were killed in the

IRV BUDISH ADDS ANOTHER article to the growing pile of clothing for Palestine while Jerry Delson and Jay Warshawsky sort out garments that have already been donated.

Applications For Membership Still Being Accepted By WSE

Illinois Tech's student chapter of the Western Society of Engineers, the only student chapter in existence at the present time, announced recently that applications for membership are still being accepted.

The chapter, which works closely with the Chicago section of the society, was formed this semester to give junior and senior engineering students at IIT an opportunity to attend meetings of the junior division of the downtown section in order to take advantage of the many technical meetings that take place throughout the year and to make contacts with practicing engineers in the midwest area.

All meetings of the Chicago section are open to members of Illinois Tech's student chapter at no charges other than that of the regular student membership fee.

Interested students may obtain additional information and membership applications from Robert S. Hamilton, president, in 118C.

Mechanical Honorary Pledges Eleven Men

The Delta chapter of Pi Tau Sigma, National honorary mechanical engineering fraternity, is now pledging 11 students.

These men, easily identified by their engineers' caps, red bandanas, and gloves, are Richard Skulski, Theodore Adams, Charles Bradlee, Ernest Brunauer, Edward Fajnor, Donald Gover, Robert Olesen, Melvin Schneider, Alexander Sinila, and William Weprin.

James D. Cunningham, president of Republic Flow Meters company will be initiated as an honorary member of Pi Tau Sigma.

AIEE Closes Its Current Season

As an end to its activities for this semester, the AIEE student branch will hold a meeting tomorrow at 11 a.m., in the Metallurgy building. An election of next year's officers is to be held and a presentation of the winning graduate paper will be given, followed by the "Flying Spot" demonstration and refreshments.

Gary Himler, whose entry in the Great Lakes district papers contest gained first prize in the graduate division, will present this paper entitled "The Reverse Blowout Effect", with slides, immediately after the election.

Following this, "The Flying Spot", an oscilloscope demonstration which includes a novel homespun story about the "Lonesome Transformer", will be shown. A board combining eight demonstration circuits on one control panel, originally designed for Open House by Bob Miller and Bill Laube, will be used in conjunction with the DuMont twenty inch scope.

Templeton Elected New APO President

At the joint installation and initiation of Alpha Phi Omega Friday night, Lester Templeton received the president's gavel from Sam Curiale, outgoing head.

Other officers for the coming semester are: Bill Dassie, vice-president; Bill Clark, recording secretary; Miles Skrivanek, corresponding secretary; John Ullrich, treasurer and Pledge-master; Loren Mages, sergeant at arms; John Tyner, alumni secretary; Jack Stratton, historian; Don Campbell, Jr., administration committee head.

Purdue Professor Talks On Photography Tonight

Dr. George Hawkins of Purdue university will speak tonight before the Society of Sigma Xi.

Dr. Hawkins, professor of thermodynamics and acting dean of the graduate school at Purdue, will talk on "Photographic Techniques and Apparatus for Engineering Research".

He will show the use of ultra high speed single and multiple flash photography, high speed motion picture photography, and infra-red photography in the solution of engineering research problems.

The lecture is scheduled at 8:30 p.m. in the auditorium of the Chemistry building.

service of their country, Sunday with a memorial ceremony. In a simple and fitting service, attended by the members, alumni and parents, a plaque was unveiled.

In order to increase the Phi Kaps' social life, a few of the Skull boys accepted an invitation from Purdue university to attend a house party.

On May 30 the Senior Farewell Party will be given at the Como Inn. The pledges are conscientiously preparing entertainment in the traditional manner.

Techmen Talk

By Saul B. Needleman

Question: "What do you believe is the best method for making up with the girl friend after an argument?"

Donald McDowell, Junior Chem

"The first thing after an argument with your girl is to decide who is in the wrong. Being a college man who has been exposed to higher education, it is inconceivable that I could be in the wrong. Having decided that I am blameless, it would be foolish to make any peace overtures to her. It is only a matter of a few days till she'll be around waving the olive branch. If, after one, or two, or three days, the obstinate female still hasn't come around, you better re-analyze the problem. Being a college man, I decide to overlook her shortcomings and call her up—if there isn't another fellow by that time."

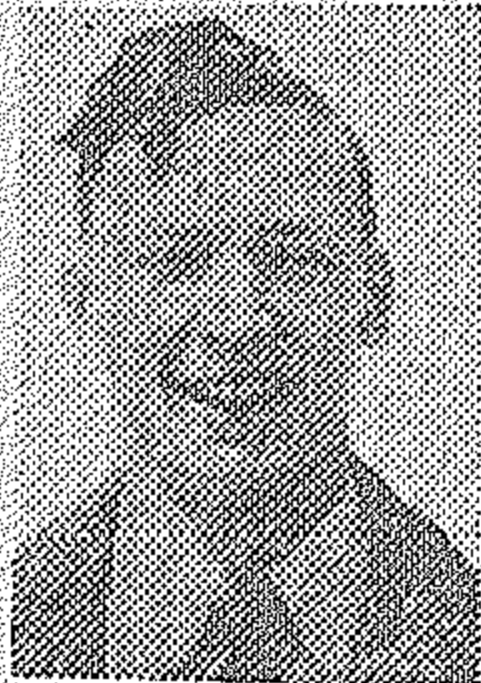

Sid Doppelt, Sophomore ME

"I believe that the best method for patching up an argument depends almost entirely upon the personality and mood of the girl and upon the type of disagreement that's involved. 'Few, if any, modern girls of today would be swayed by candy and flowers. In general I would say that some fast, smooth and persuasive talking would be about the best way to make the young lady forgive and forget. If this fails, however, it probably means that the girl is using the argument as a means of saying goodby.'"

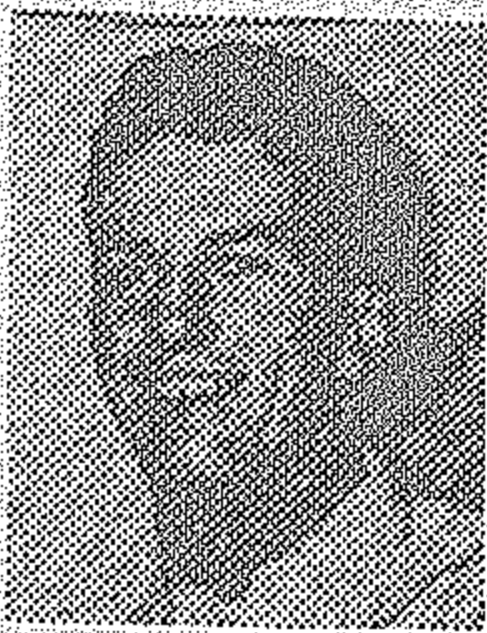

James Tomaschek, Sophomore EE

"I don't really think there is any one good way to make up with a girl after an argument. There are too many different kinds of girls and too many types of disagreements. About the best thing to do is to let nature take its own course. You might think this is taking the easy way out of a tough situation but if you and the girl were really that way about each other the thing will work out alright anyway. If you weren't too close to her, then why worry about the outcome? There are more girls where she came from. Of course, you shouldn't be stubborn."

Thomas E. McHale, Junior ME

"A method which used to work years ago was to flow a steady supply of candy and flowers to the girl in question but the girls don't seem to let that soften them up any more. You might call this a 'tried and failed' method rather than the usual 'tried and proven' technique. In my opinion, the girl should make the first approach towards patching things up because it's almost always the girl's fault. However, if she doesn't and if you like her well enough you should get on the phone and see what you can do. Once you're back in her graces a little fast talking together with a little 'loving' should pretty well smooth things out. If none of these methods work and you just can't get back in with her, well . . ."

Revised Constitution Up For Vote Today

Below is printed the revised constitution of ITSA, the amendments to which will be voted upon by Illinois Tech students today.

ITSA CONSTITUTION

ARTICLE I

NAME
This organization shall be known as the Illinois Tech Student Association.

ARTICLE II

OBJECT
The object of the ITSA shall be to administer, through its elected officers, the distribution of the monies in the Student Activities Fund as appropriated by the administration for the ensuing year, to develop unified spirit and to be the instrument of student self-government at IIT, by

1. Organizing and systematizing all inter-class relations, all class customs and privileges;
2. Conducting all class elections;
3. Serving as a means of communication between the student body and the faculty and the administration.
4. Investigating and rendering opinions upon any matter brought to the organization or upon any matter which may be initiated by the organization itself;
5. Passing and enforcing such acts as it may deem advisable for the government and regulation of student body;
6. Acting as a Court of Appeals from all sections of classes, members of committees in carrying on class activities, organizations, athletics, or any student;
7. Having full privilege of investigating the management of any student activity;
8. Fostering mass meetings at appropriate intervals;
9. Assisting in the promotion of intramural and inter-fraternity contests;
10. Stimulating interest in athletic contests;
11. Assisting the athletic department in arranging schedules, receiving and caring for visiting teams, etc.;
12. Providing cheers and cheer leaders;
13. Directing and managing all matters which properly fall under the direction of such an organization;
14. Ex-Officio Control over the Honor Board.

ARTICLE III

MEMBERSHIP
Upon receipt of properly executed student identification any registered day-school student of Illinois Institute of Technology shall automatically become a member of the ITSA, such membership to extend until the next scholastic registration day.

ARTICLE IV

GOVERNMENT

Section 1. The government of the ITSA shall consist of a managing board known as the ITSA Board of Control

Section 2. The ITSA Board of Control shall consist of fifteen members, nine representing the IIT student body and six representing the Faculty of IIT and Administration.

Section 3. The representation from the IIT student bodies shall consist of a president, vice president, secretary, treasurer, and the president of each class with the exception of the senior class in which case both seventh and eighth semesters are represented by their respective presidents.

Section 4. The representation from the faculty and administration of Illinois Institute of Technology shall consist of the President of the Institute, who shall voice the policies of the Institute; the Dean of Students, who is the administrative member in charge of student activities; the Business Manager of the Institute, who is entrusted with the dispersal of the monies in the Student Activities Fund; the Director of the Student Union, who shall voice the policies relative to student facilities, and two faculty members representing the entire academic personnel.

ARTICLE V

ITSA BOARD OF CONTROL OFFICERS

Section 1. The officers of this organization shall be elected every alternate semester and shall serve for one year or until their successors have been duly elected and qualified.

Section 2. The president of this organization must at the time of taking office be in his 6th or 7th semester.

The Vice-president, secretary, and treasurer of this organization must at the time of taking office, be in their fifth, sixth, or seventh semester. Each year a faculty member shall be chosen by the IIT faculty from the academic personnel and shall serve for two years or until their successors have been duly elected and qualified. Any faculty member so chosen shall not serve more than two consecutive terms.

Section 3. Duties of the officers of the Board of Control: It shall be the duty of the student president to call and preside over all meetings of the Board; shall be an ex-officio member of the Honor Board; and shall perform such duties as pertain to the office of president.

It shall be the duty of the vice-president of this organization to serve on all committees of the organization, assuming charge wherever feasible to decide whether any action taken by the Board is constitutional; to serve as chairman in the absence of the president, and to perform any other necessary duties that shall fall to the vice-president.

It shall be the duty of the secretary of this organization to take minutes of all meetings of the Board and of the association and to keep them in bound books; and to care for any other records and documents concerning this organization;

It shall be the duty of the treasurer of this organization to keep an accounting of all ITSA funds and to act as chairman of the ITSA finance committee.

ARTICLE VI

CLASS OFFICERS

Section 1. Each senior class shall elect one president, vice-president, secretary, treasurer, and social chairman. The junior, sophomore, and freshman classes shall elect similar officers for the entire class.

Section 2. The senior class officers shall hold office for one school year, the officers of the other classes shall hold office for one semester.

Section 3. The duties of the class officers are as outlined in the class officers manual.

ARTICLE VII

ELECTIONS

Section 1. Class and ITSA Board of Control officers shall be nominated by petitions signed by twenty-five bona fide students eligible to vote for that candidate.

Section 2. The Board of Control officers shall be elected by a poll of the entire student body; class officers by a poll of their respective classes.

Section 3. The election of officers shall be conducted by an election committee composed of members of the ITSA. The Hare System of balloting shall be used.

Section 4. Elections shall be held within the last four weeks of the semester preceding the term of office.

ARTICLE VIII

BUDGET

Section 1. The ITSA Board of Control shall prepare a budget to show proposed distribution of the Student Activity Fund as appropriated by the administration for the ensuing academic semester. This budget shall be completed and printed in the official student newspaper before end of the first month of the new semester. This budget shall be prepared as follows:

- (1) The ITSA Board of Control shall set aside an amount which it deems

ARTICLE X

RATIFICATION

Ratification by a three-fourths vote of the students balloting shall be sufficient for the conduct of student activities. These activities include publications and others which draw their membership from the entire student body. (2) The remaining amount shall be held to meet unforeseen contingencies which may develop during the school semester.

Section 2. Any balance at the end of the school year after all bills have been paid, shall be placed in a fund to be used at the discretion of the Board for any purpose contributing to the general welfare of the student body.

Section 3. A statement as to the distribution of the Student Activity Fund shall be printed in the official student newspaper as soon as all bills are paid for the school year concerned.

ARTICLE IX

AMENDMENTS

Section 1. The constitution may be amended at any time by a two-thirds majority of the student vote cast, said amendment to be submitted by the ITSA Board to a vote of the student body.

Section 2. By-laws can be amended or suspended by 2/3 vote of the fifteen members of the Board of Control. Notice of action to be taken must be brought up at the previous meeting.

Section 3. A quorum of the ITSA Board of Control shall consist of 2/3 of its fifteen members.

ARTICLE XI

SPECIAL ELECTIONS

Section 1. In case an officer of the Board of Control resigns or is unable to continue his duties, a successor shall be elected by the Board of Control.

Section 2. The president, vice-president, treasurer, secretary, social chairman, elect officers to class vacancies.

ARTICLE XII

CHEER LEADERS

The Board of Control shall choose cheer leaders and assistant cheer leaders in any manner they may deem advisable.

ARTICLE XIII

PROTESTS AND APPEALS

The Board of Control shall consider all appeals and protests regarding athletics, classes, organizations, committees or students as well as inter-collegiate athletics.

ARTICLE XIV

APPOINTMENTS

Any appointment made by the president of this organization shall be subject to the approval of the Board.

ARTICLE XV

DISTRIBUTION

The Constitution and By-laws of the ITSA shall be published in a recognized student publication in alternate semesters.

ARTICLE XVI

BY-LAW

"Roberts Rules of Order" shall govern the conduct of the meeting in all cases except those specifically covered by the constitution and by-laws.

"My future's in the telephone business"

"I've been in the telephone business a little more than two years.

"And what busy years they've been!"

"The Bell System has added more than 6,000,000 new telephones, erected some 1200 buildings, buried thousands of miles of cable and made great strides in extending and improving telephone service in rural areas.

"Telephone service has been extended to automobiles, trucks and trains, and a new system for transmitting telephone conversations and television programs by microwaves put in operation.

"At Bell Telephone Laboratories they're working on new electronic devices which will bring still wider horizons of electrical communications within view.

"I've had a part in this post-war progress."

There's a future in telephony.

BELL TELEPHONE SYSTEM

Techawks Edge Chicago Teachers 4-3

Maatman Aids Leiser To Snag Second Win

Victory Follows 11-9 Loss To Concordia In Conference Game

By Friedlander and Shapiro

The Scarlet and Gray won a well played game 4-3 from Chicago Teachers college Friday at Armour Square after losing their previous outing 11-9 to Concordia. Bob Leiser proved himself to be the Techawks' outstanding pitcher when he chalked up twelve strike-outs and allowed only three hits against the Teachers.

Up to the seventh inning Leiser had a no-hitter in his hands but Braune, lead off man for the Teachers upset the apple cart by pounding a hard single to deep right center. Maatman's retrieve held Braune at first, but Leiser's high hopes for a perfect game were banished.

Hawks Star Afield

The Teachers added a walk, a hit and were aided by an error to score two runs in this inning. They came back in the eighth once more after Excell hit a ground rule double down the third base line to drive in Kuzendorf who was on base by virtue of being hit by a pitched ball.

Leiser was aided in winning by the brilliant performances of Jerry Maatman and Swede Swanson. Maatman made a beautiful catch of a long fly hit by Briggs in the first half of the sixth. The Tech center fielder seemed to sense the direction of the ball as he was off at the crack of the bat and didn't stop running until he had the pellet in his hands. At this time he was somewhere in the general direction of the Three Dueces and the end of the park.

Big Inning Wins

The Techmen scored all four runs in the third inning and had a total of six hits, all singles. Four hits were made in the third, one in the first, and one in the fourth.

Concordia's Kittens took full advantage of six Techawks errors to score their 11-9 victory last week. It was Tech's second straight conference defeat.

The Techmen clubbed the ball all over the lot, collecting 17 safe blows, but didn't get them at the right time, and left runners stranded on the base paths.

Kittens Pound Ball

Paul Peterson was the starting Tech moundsman and was charged with the loss. "Pete" ran into trouble in the top half of the third when he was tagged for a double, triple, and home run. In this same inning, he walked one batter and was further victimized by "Vinny" Haughey's error.

Bert Amstader relieved Peterson and held the damage to five runs. Amstader pitched well, striking out six and yielding five hits and a brace of walks during his four inning stretch. However, Concordia's power boys, Bathje and Vallesky got to Amstader for a triple and home run, respectively in the sixth to boost the Kittens tally to ten runs.

McDonough Checks Sluggers

Bill McDonough stymied Concordia from the seventh inning on, fanning five, while his team mates tried hard to get back into the game.

The Hawks scored single runs in the third, sixth, and seventh. They got two in the fifth and fought bitterly to get four more in the ninth. Total—nine runs, too little and too late.

Netmen Defeat Concordia, Valparaiso

Overwhelm Opponents By Identical 7-0 Scores; Sweep Every Set In Matches

The IIT tennis squad proved themselves to be a powerhouse in their last two games by tallying the unprecedented score of 7-0 against both Valparaiso and Concordia. The scarlet and grey racquet swingers so bewildered their opponents that neither Concordia nor Valparaiso was able to score enough points to win a set.

In their meeting with Concordia, at Armour Square, Saturday the Tech men were pace by big Bob Hall who started the ball rolling in the right direction. Hall defeated his opponent, Nisserli, 6-2, 6-0. Buchstaber, followed up with a two set win over Trusheim 6-2, 6-0. Davis easily stopped with 6-2, 6-0.

Continue Sweep In Doubles

Zietlen beat Brockman 6-0, 6-4 and Bokasky won over Scrogins in the closest singles game 6-3, 6-4.

In the doubles events Buchstaber and Radek defeated Nesserli and Trasheim in two sets, 6-0, 6-4. Zeitlen and Davis teamed up to defeat Witt and Brockman 6-2, 6-2.

Against Valparaiso Buchstaber overcame stiff competition 7-5, 6-1. Hall followed by upsetting his opponent, Richter, 6-1, 6-3; while Radek polished off Epeniz 6-3, 6-2. The last single events were won easily by Davis and Zeitlen. Davis won from Bagge 6-1, 6-2; and Zeitlen beat Psiuchizama, 6-3, 6-1.

Return Matches Scheduled

Buchstaber and Hall took the number one doubles from Tomaska and Richter 6-4, 6-4; and Radek and Davis coupled their talents to come from a 5-5 tie in the first set and win 8-6, 6-3.

The Tech netmen travel to River Forest Saturday where they will play a return match with Concordia. The next home stand for the IIT squad will be May 28 when the Valparaiso team will seek revenge.

JACK BROWNE of Chicago Teachers tries to make third base via the dirt as Ted Herman makes the put out.

Golfers Win Third Straight; Defeat Bradley University In 14-13 Thriller

The IIT golf team rang up its third consecutive victory Saturday at Westgate country club, by defeating Bradley in a closely contested match 14-13. The outcome of this game gave the Scarlet and Grey pill rollers a total average of three wins to two losses.

Hero of the contest was number five man Paul Kerby. Although Kerby shot an 87 for the highest score of the day, he sank a crucial putt on the 18th hole to secure a needed one half point for victory.

Medalist was John Gailey of IIT who blazed through the course with a four over par 74. Gailey's opponent gave him a close race with a 75.

Other leading scorers for IIT were Bruce Genis, 77, and number six man, Dave Felsenthal, 79. Felsenthal surprised in winning his singles by three points.

The team was handicapped by the loss of number one man, Blaha. Blaha was incapacitated due to a chemistry exam.

This last minute method of winning seems to be very popular with the Techmen. In the Loyola game Kelly, number six man for the Techawks, sank a putt for a birdie on the 18th hole to score the final point in a 14-13 victory.

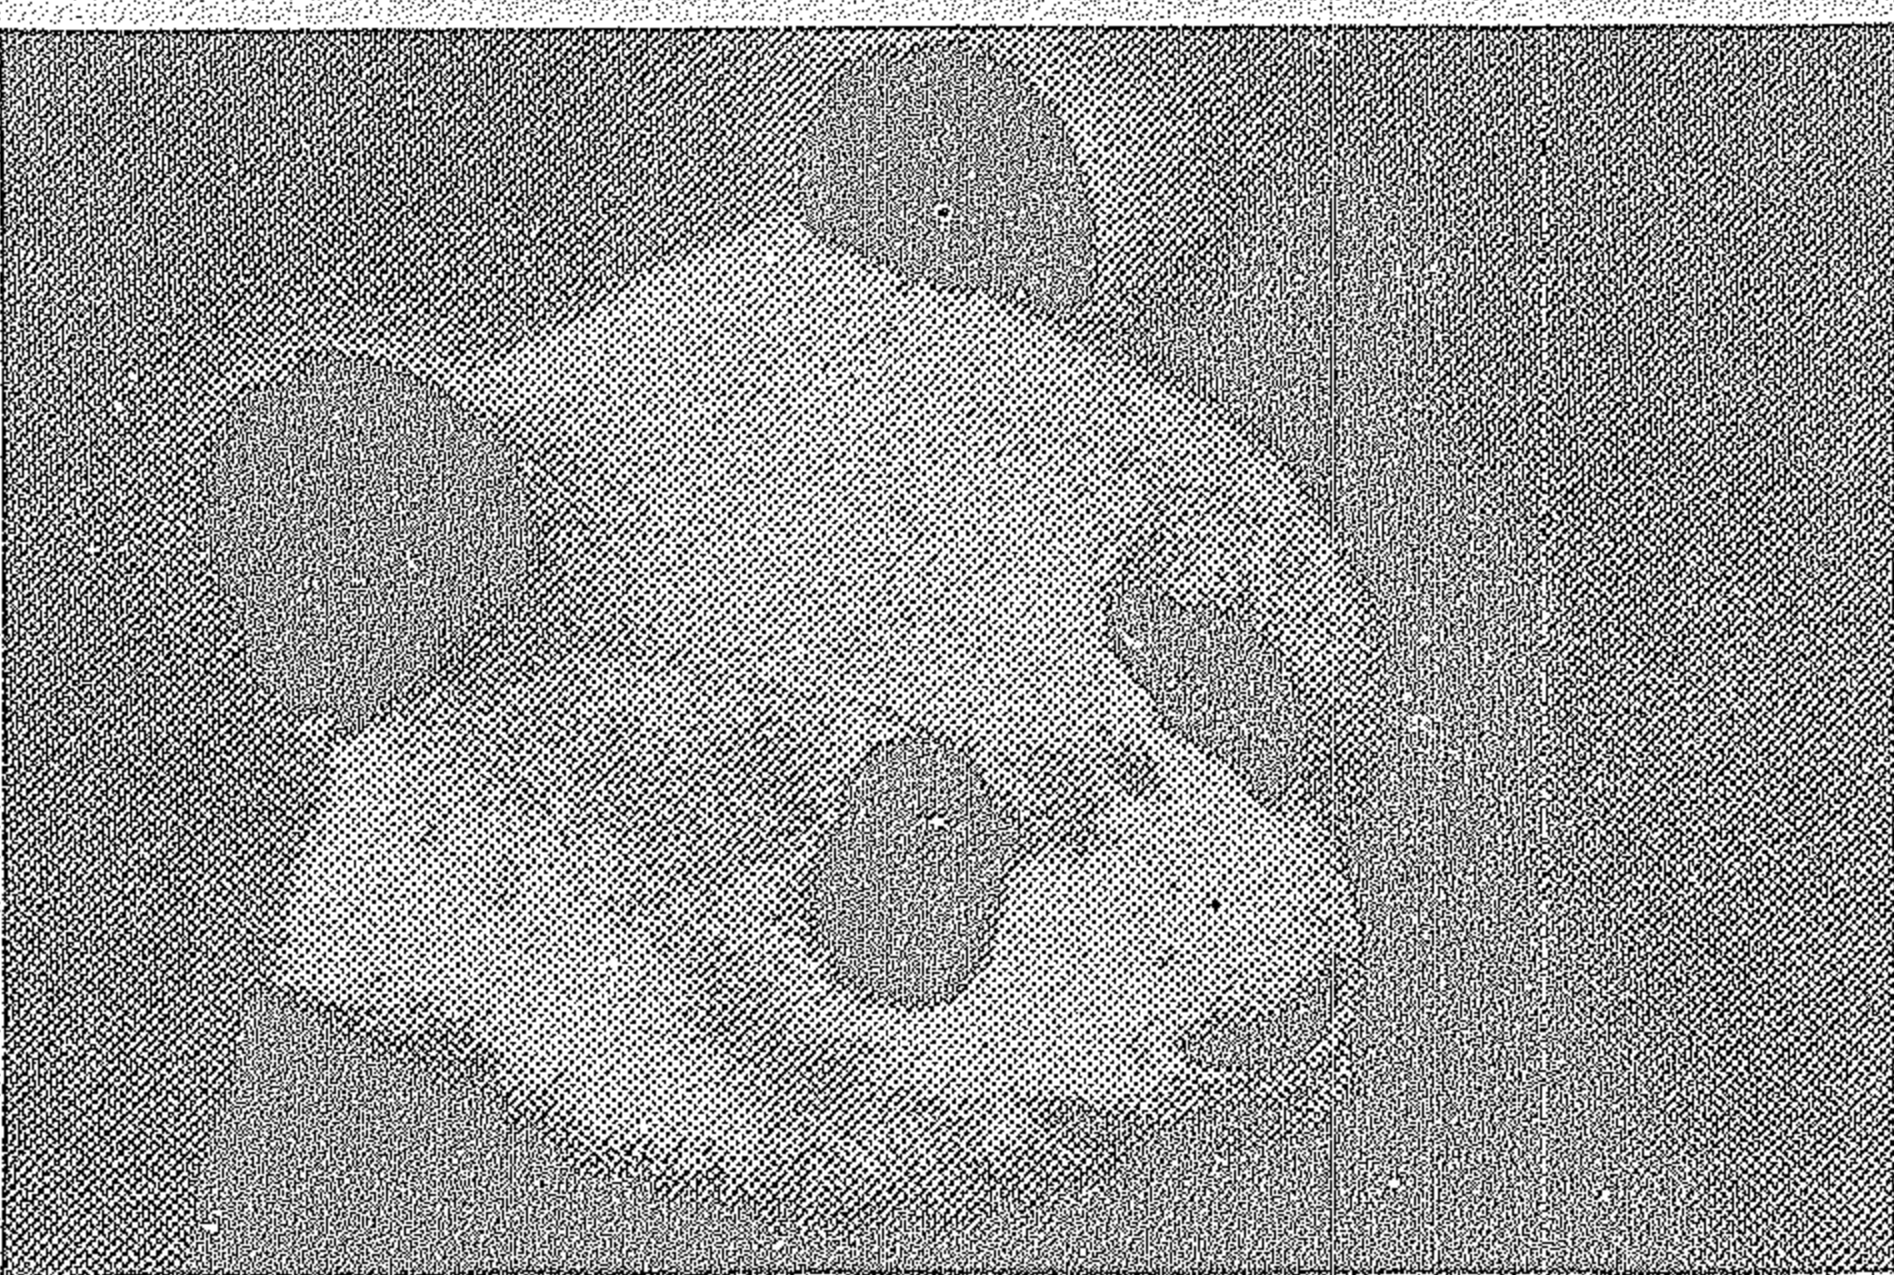

Tomorrow the Hawks are scheduled to meet Elmhurst and Lake Forest colleges in a triangular match. IIT will be hosts at Westgate.

Begin Second Round Play In Badminton Tourney

With Intramural badminton moving into the second round of elimination, Glassgen, Howe, and Trauth loom as the men to beat for the crown. Dark horse candidates for the first place trophy are feared among the 23 enthusiastic participants in the contest.

Using the rule that to be eliminated, players have to lose two games, losers of the first round get a chance to play again and remain in the tournament.

J. Paul Sheedy* Switched to Wildroot Cream-Oil Because He Flunked The Finger Nail Test

ALL panda-monium just broke loose for this little guy with the hairy ears and two black eyes. Somebody snatched his Wildroot Cream-Oil! You may not be a panda — but why not see what Wildroot Cream-Oil *canda*? Just a little bit grooms your hair neatly and naturally without that plastered-down look. Relieves annoying dryness and removes loose, ugly dandruff. And Wildroot Cream-Oil helps you pass the Fingernail Test! It's non-alcoholic . . . contains soothing Lanolin. Get a tube or bottle of Wildroot Cream-Oil hair tonic at any drug or toilet goods counter today. And always ask your barber for a professional application. In case there's a panda in your house — keep some Wildroot Cream-Oil *handa* for him!

WHERE THERE'S COKE THERE'S REFRESHMENT

BOTTLED UNDER AUTHORITY OF THE COCA-COLA COMPANY BY COCA-COLA BOTTLING CO. OF CHICAGO, INC.

Demons Trim Thinclads 68-61; Beloit Relays Saturday

Led by their stellar weight man, Steve Crane, the Demons of De Paul edged out the IIT track team 68 to 61. Crane heaved the iron sphere 45 feet, 10 inches to break the De Paul stadium record.

De Paul swept the shot and pole vault and took first and second in the discus to pile up 26 points. The Techawk's sole point in the three events came when Arnie Harrison placed third in the discus.

Harrison added 12-1/3 points to his season's total by scoring in seven of the fifteen events. Jim Sauer again registered 11-1/4 points by winning the mile and half-mile and anchoring the relay team.

Sauer Closes Fast

Sauer won the mile in 4:53, good time for the poor track conditions. Owen Dykema placed second. Nat Blackman of De Paul outsped four Techawks to win the quarter mile run in 52.3 seconds. Ben Sutton was second and Bill Cahill third.

Dave Miller and Harrison finished second and third respectively in the high hurdles. Harrison then recovered from a bad start to finish second in the 100 yard dash. Sauer again uncorked his finishing sprint to pass the pace-setter, Russ Tornabene of De Paul, and win the half-mile in 2:04. Cahill was third.

Jantzen 'Wins Thriller'

Blackman repeated his 440 triumph by winning the 220 yard dash. Sutton came up from fifth place to finish second by inches. Al Prisliger of De Paul, who is a well known Golden Glove boxer, and Jo Jantzen put on a "thriller" in the two mile run. They traded the lead several times, then raced neck and neck the final two laps. Jantzen won in 10:48 despite the muddy going. Al Ashurst finished third.

Milt Cox hit a barrier but won the low hurdles anyway as Harrison placed third. Arnie reversed this order in the broad jump as he leaped 21 feet, 4-1/2 inches to win, while Cox scored third. In the high jump Cox was second with Ron McClain, Walt Conniff, and Harrison tied for third.

Beloit Relays Saturday

Ken Yahiro tossed the pointed spear 150 feet, 7 inches to rack up a victory in the javelin. Harrison garnered yet another third. Sutton, Carl Matson, Cahill and Sauer closed the meet with an easy victory in the mile relay.

Saturday the team travels north to enter the annual Beloit Relays. Coach McCauley has high hopes of placing in several relay events including the shuttle-hurdles, the mile, the sprint-medley, and the freshman distance-medley.

Soccer Candidates Hear Schommer, Plan Practice

John J. Schommer, Director of Athletics, addressed 30 soccer enthusiasts Thursday. He delivered many words of advice and encouragement to the spirited group that is trying to organize a Techawk soccer team.

Sports Personality Of The Week

By Ed Jennings

If you've wondered who that oversized lad operating behind the plate or in the pivot for the Techawks might be the chances are pretty good that the person in question is "Swede" (alias Charles Swanson). Now a seventh term ME, he has managed to amass six athletic letters, evenly divided between the hardwood and the diamond.

Swede's six foot two inch frame and rifle arm are now serving their fourth season as Battery mates for the Tech mound staff.

His excess altitude has also been invaluable under the backboards when the going got rough for the Techawk five.

Chuck started his catching career at Fenger high school. After his graduation he entered IIT in the fall of 1941. In the fall of 1942 he played on that short lived eleven man football team which, although successful, went officially unrecognized.

Next in his order of affairs was a term of service in the Army Engineers where he found time to play football with his division team.

Back at IIT after his discharge, "the Swede" again played basketball and football and aided the fabled "Senior Mechs" in their IM football triumphs.

Besides being a member of Honor I for some three years, Swede has served as vice-president of that organization and treasurer of the Senior class. As for sports in general at Illinois Tech, Swanson thinks that students show a decided lack of support for their school's varsity athletics. He feels, as do many others, that this school possesses the material for winning squads, and that an increase in student support would give our teams the "winning spirit" they need.

As for his future, after graduation Swede plans wedding bells and a move to the west coast where he hopes to become an air conditioning engineer.

All over America... Smokers Report

NO CIGARETTE

HANGOVER

when you smoke PHILIP MORRIS!

—because PHILIP MORRIS is
DEFINITELY LESS IRRITATING

than any other leading brand!

All over America, smokers who have changed to PHILIP MORRIS tell us . . . they now enjoy a milder smoke, a fresher, cleaner smoke than they've ever known before.

Yes, there's a difference in PHILIP MORRIS that distinguishes it from all other leading brands!

If you're tired of "cigarette hangover"—that stale, musty taste in your mouth—that dry smoked-out feeling in your throat . . . join the millions who CALL FOR PHILIP MORRIS, and remember:

Of all leading cigarettes, PHILIP MORRIS—and only PHILIP MORRIS—is recognized by eminent nose and throat specialists as definitely less irritating!

NO OTHER CIGARETTE CAN MAKE THAT STATEMENT!

Read What One of America's Top-Ranking Doctors Says About PHILIP MORRIS

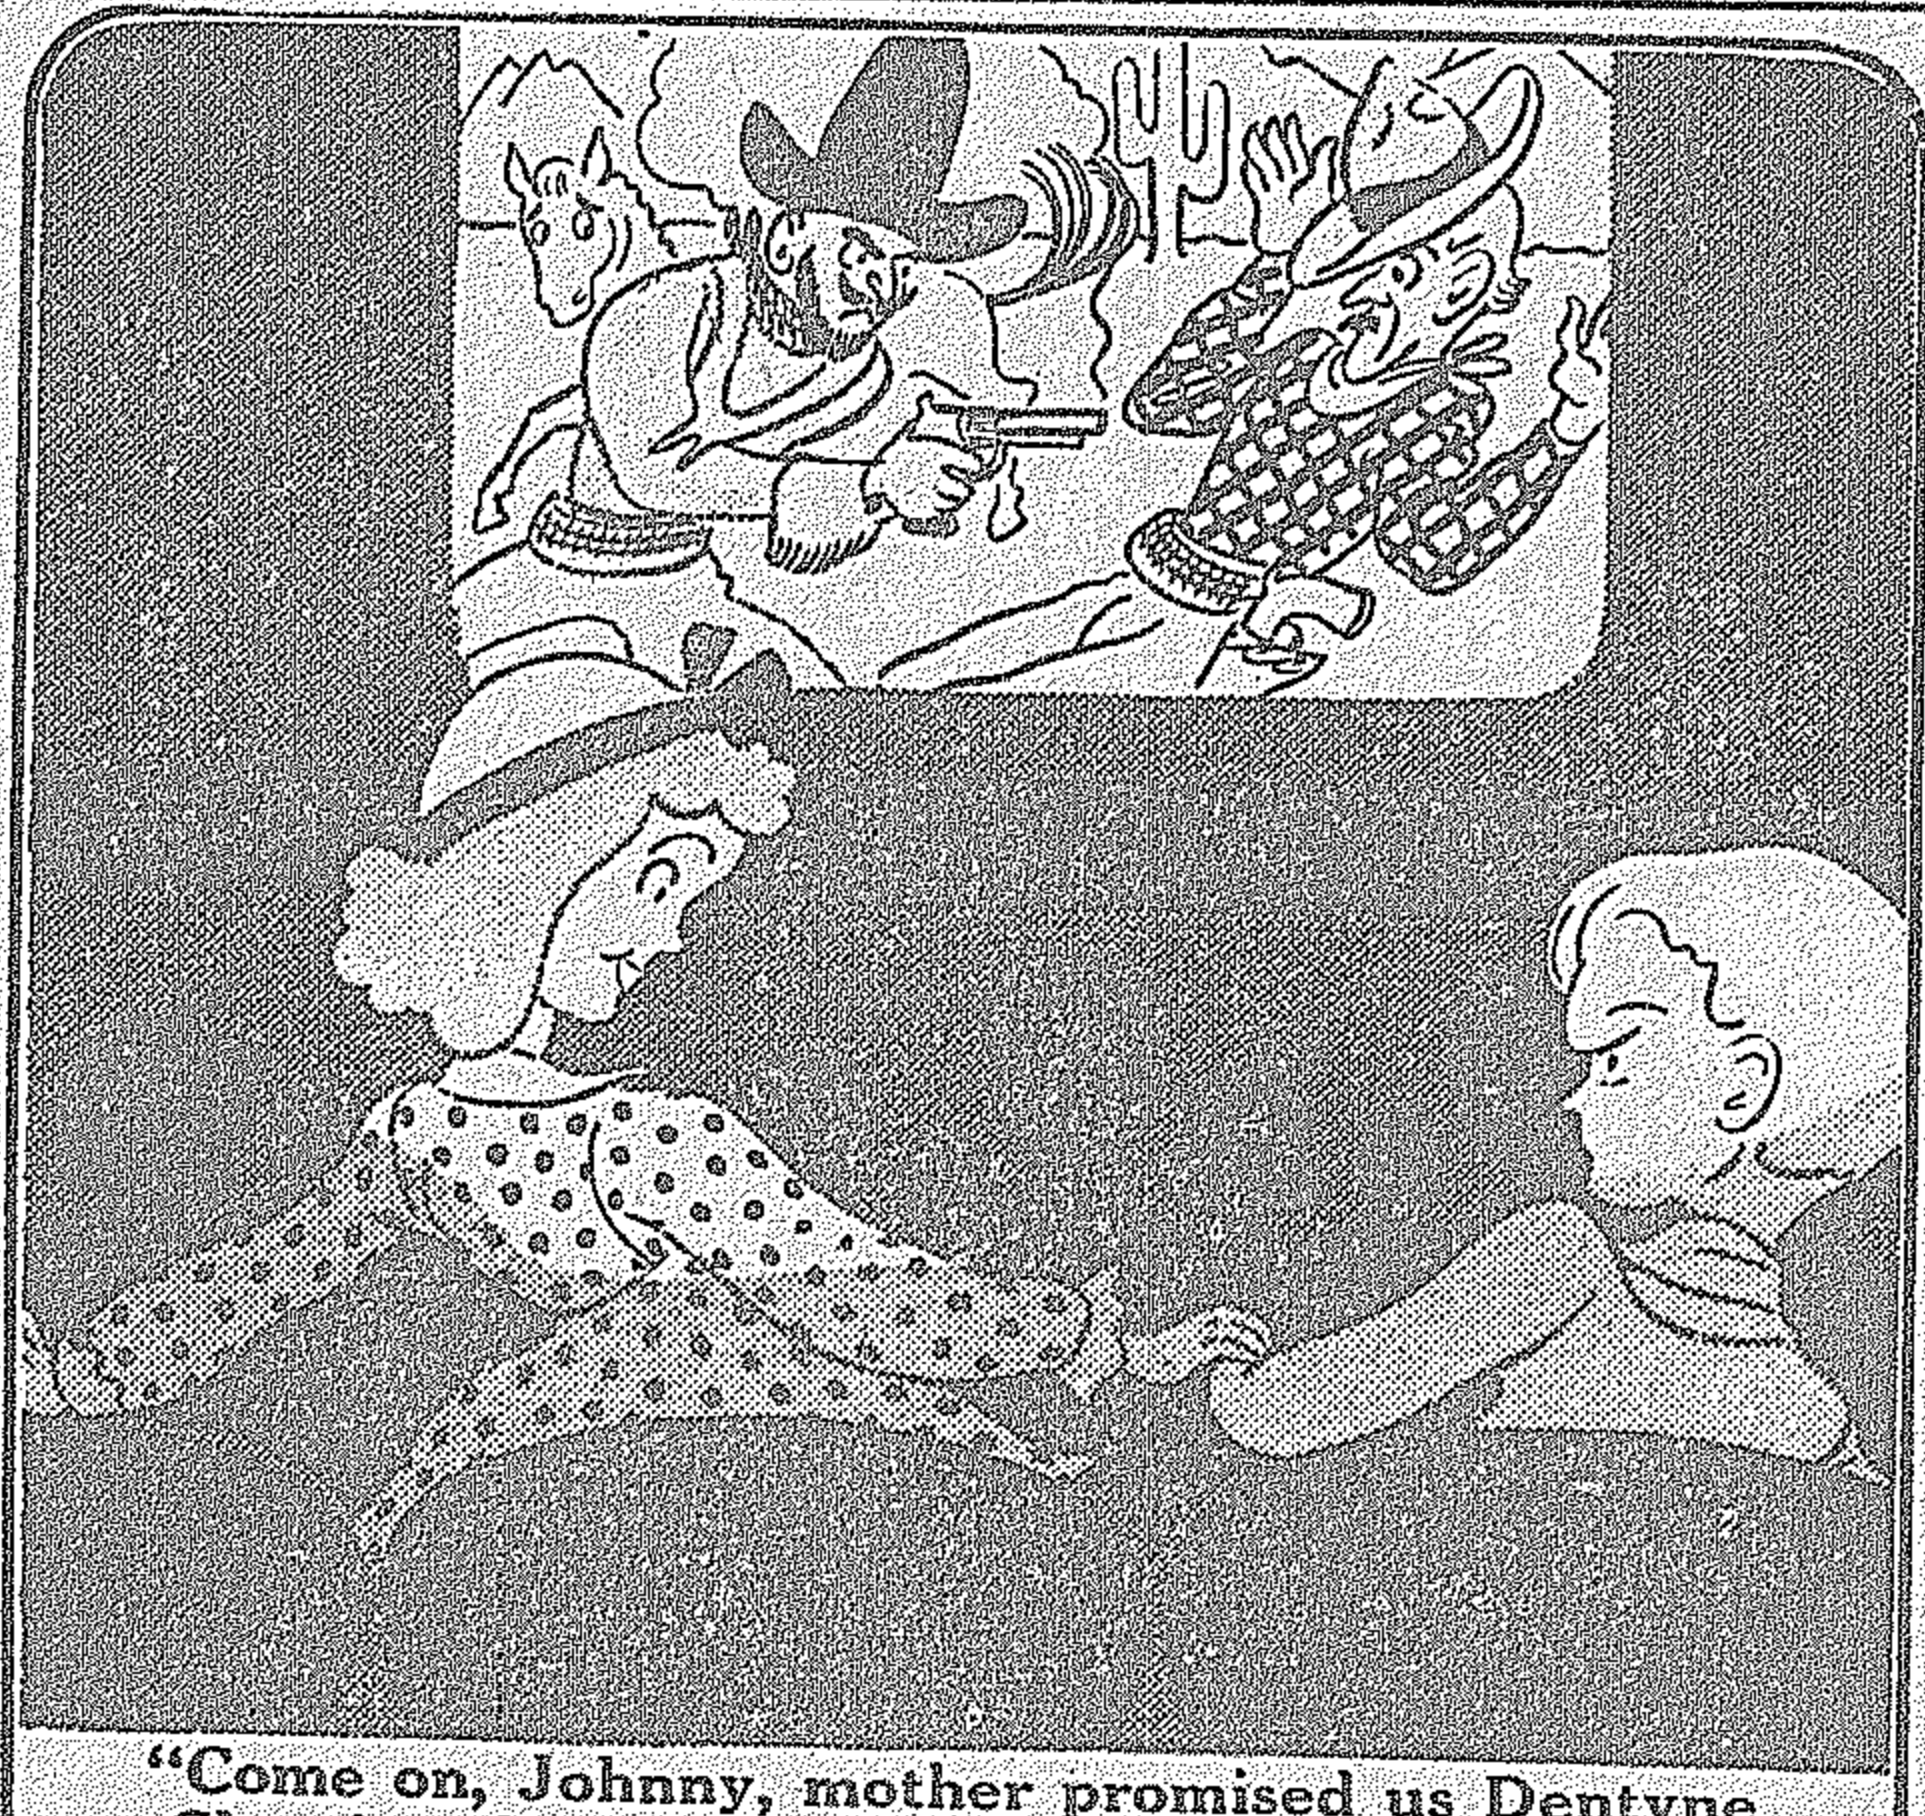

"I have often suggested to patients who smoke that they change to PHILIP MORRIS. I have seen the results of such a change—and the results have convinced me that PHILIP MORRIS Cigarettes are less irritating than the other brands."

From one of a series of PROFESSIONAL STATEMENTS by EMINENT NOSE and THROAT SPECIALISTS.

CALL FOR PHILIP MORRIS

You'll be glad TOMORROW you smoked PHILIP MORRIS TODAY!

"Come on, Johnny, mother promised us Dentyne Chewing Gum if we only sat through it once!"

"Not even Frankie Swoonatra could make me miss Dentyne Chewing Gum! That nifty flavor really sends me—I mean it really does. And the way Dentyne helps keep my teeth white, I wanta turn on the old smile all the time."

Dentyne Gum—Made Only By Adams

Miracle' Ends Run Of Two Nights On Tech Campus

By Otto Kroh

Opening night of "Miracle on 33rd Street," an original musical written on campus, left its audience with a good taste in its mouth.

Dramatech proved that its determination has in no way decreased since "The Male Animal" and that the 18-day postponement of the presentation produced as near-perfect a play as its 1947-48 theatre crowd has seen.

As the curtain opened, two of Armour's graduating seniors vow to send their sons to their own alma mater. Twenty years later, however, complications enter in the form of Audrey Read. In the part of the son's sweetheart, she causes him to desert his engineering education and follow her family on a journey to South America. Many scenes and songs later, the second finale presents a reunion of the two alumni as class registration runs wild.

Friday night brought with it some unfortunate experiences, among which were the mechanical failure of the curtain and an almost ear-shattering crash backstage during the second act.

Taken as a whole, this last and final run of the 1947-48 Dramatech season showed that great things may be expected from this group in the future.

Vincent Heads English Dept.

Howard P. Vincent, professor of English literature, has been named chairman of the department of language, literature, and philosophy, according to John D. Larkin, dean of liberal studies. Professor Vincent has been acting chairman of the department for the past academic year.

He came to IIT in 1942 as assistant professor, accepting the position because he was "impressed with the spirit of progressiveness" displayed at the Institute.

He is a graduate of Oberlin college where he majored in English and studied fine arts and history. He has MA and PhD degrees from Harvard university, where he was awarded a travelling fellowship in 1930. With the aid of this award Professor Vincent toured Europe. He returned to England in 1932 and again in 1937 to continue his studies.

Professor Vincent is general editor of the Collected Writings of Herman Melville and author of The Trying-out of Moby Dick. During the summer he will conduct a special seminar on Herman Melville at the University of Indiana.

Veterans Must See VA About Summer School

All Public Law #16 veterans must declare their intentions for summer school by June 2, the veterans office announced last week.

These men should contact the school veterans office or Dale Murray, VA contact officer. Mr. Murray is on the campus Tuesday from 9:30 to 12:30 in the office in the rear of the North Union auditorium.

TECH TIMETABLE

Items appearing in the Tech Timetable are those which have been scheduled with the Dean of Student's office.

"I LIKE CHESTERFIELDS
—THEY'RE MY BRAND
BECAUSE THEY'RE MILD."

Alan Ladd

WHY... I smoke Chesterfield

(FROM A SERIES OF STATEMENTS BY PROMINENT TOBACCO FARMERS)

"I think Chesterfield is a good-smoking cigarette and I like them. They have a good, ripe-tobacco taste and they're mild."

"Nobody pays a higher price to get good-smoking tobacco than Chesterfield. They buy sweet, ripe tobacco. Looks like a gold dollar in the barn."

Leavitt Roberts
FARMER, PARIS, KY.
