

Publications jobs are still open

Applications for the two top jobs of editor-in-chief and business manager of the Illinois Tech Directory are still being accepted.

Letters of application, addressed to James Armsey, chairman of the Publications board, should contain previous experience, if any, and other relevant information and be dropped in the campus mail before March 21. Students interested in working on the Directory, who do not feel they are qualified for one of the above positions, should send their name and a statement of their interest through the campus mail to the Illinois Tech Directory.

The positions of editor-in-chief, business manager, and advertising manager of the Internal are also open. These applications should likewise be addressed to the chairman of the Publications board.

After reviewing all applications, personal interviews of the applicants will be held before the final choice is made.

The Directory is scheduled to make its second appearance on the campus in the fall of 1949.

SAM plans for lively semester

A full calendar of activity has been promised members of the IIT chapter of the Society for the Advancement of Management.

This pledge was made by SAM president Seymour Lorber, who this week announced arrangements for the presence of Dr. Willard A. Kerr, associate professor of psychology and education, who will lead a discussion of "Personality in Business Success" at the next meeting, to be held March 8, in 101 MC.

Poster space assigned in both Unions

New mounting strips for posters have been placed on the walls of the North Union lobby and the South Union lounge.

The strips are mounted 30 inches apart and will accommodate standard poster boards available in the IIT bookstore. Due to lack of space in the North Union lobby, the present method of posting signs on tripods will be discontinued.

One of the projects of the advisory committee on student activities, the strips are to be followed by new, enlarged bulletin boards and permanent ticket booths for both Student Union buildings.

All students are reminded that posters must be approved by the Dean of Students office.

were addressed by Mr. Deane S. Hazen, vice-president and treasurer of U.S. Slicing Machine Company, on the topic, "What Makes Executives."

As a means of informing SAM members about activities and plans of the local chapter, a monthly bulletin is to be published under the editorial supervision of Harry L. Newman and Alfred R. Sadowicz. Intended to supplement pub-

lications of the national and metropolitan Societies, the campus periodical will devote only limited space to articles of general professional interest.

Pointing to the free movie program presented by SAM each Wednesday from 3 to 5 p.m. in the MC auditorium, Lorber said "This is only one of our new projects. Techawks will see a lot of SAM henceforth."

A skipper who stood at the wheel

Would wriggle and squirm like an eel.

Said the Mate, "Arrow Shorts, sir"

Are worn in all parts, sir—

There's no chafing seam in the keel.

No chafing center seam

For real comfort "below decks"—buy a box of Arrow seamless-seat shorts of long-wearing oxford or broadcloth.

"Sanforized" labeled—Cripper fasteners. See your Arrow dealer for Arrow underwear.

ARROW SHIRTS and TIES

UNDERWEAR • HANDKERCHIEFS • SPORTS SHIRTS

MISSING:

THE CENTER SEAM IN EVERY PAIR OF ARROW SHORTS

Notice to sedentary males! Shorts with center seams spoil a man's comfort and ruin his disposition.

That's why we are telling you about Arrow—the roomier shorts with the center seam left out!

For squirm-free classes and long wear in the laundry, see us now for Arrow shorts and Arrow's cut-for-comfort undershirts and T shirts.

"WILL IT RAIN TONIGHT?"

... everyone wants to know, but military and air-line pilots must know and know promptly!

To help transmit this information, the Bell System maintains the largest facsimile transmission system in the world . . . a network nearly 20,000 miles long.

Over these wires the United States Air Force, in cooperation with the United States Weather Bureau and other government agencies, is able to send up-to-the-

minute weather charts and maps to many points simultaneously. Each receives a faithful reproduction of the originals. The chance for error is eliminated, valuable time is saved.

This network is a part of America's vast communications system—the finest in the world. The job of maintaining and improving this system, of keeping the cost of telephone service as low as possible, never ends.
