

Charity hits \$1600 peak in donations

More than 1,600 dollars was raised in the first semesterly "dollar drive," held during registration by the newly created Campus Charity Chest.

Dave Pasik, who directed the drive, stated that the sum will be administered to the charity organizations normally soliciting donations on the campus. These include the March of Dimes, Community Fund, World Student Service Fund, Red Cross, South Side Settlement House, and others.

The campaign marked the first time that donations for a "unified charity drive" were solicited during a registration period.

Because of the initial success of the drive, Pasik stated that he would recommend its continuance in the future.

In accordance with provisions of the Campus Chest, there will be no further student charity drives for the balance of the term, with the exception of Tag Day, sponsored by the Home Economics club.

Tech sponsors electrical meet

The fifth annual National Electronics conference will begin Monday at the Edgewater Beach hotel. During the three-day forum, sponsored by Illinois Tech, the University of Illinois, the American Institute of Electrical Engineers, and the Institute of Radio Engineers, papers on electronic research, development, and application will be presented. The conference was attended by 3,000 persons last year.

Win free ball eve in fancy guessing game

Want to win an expense-free evening at the Integral Ball, just for a bit of fancy guessing? Then join in the "Queen Quiz" contest and see if you can pick, in order, the five finalists for Integral Queen.

Technology News is cooperating with the Senior class of February, '50, by printing an entry blank upon which you may submit your choices. Don't scramble for the blanks, as more will be printed in the September 30 issue.

Note that the choices are to be made on a preferential basis; you have to predict the exact order of the finalists according to the official voting tally.

Just make your choice and turn in the entry blank below, or facsimile thereof, together with your vote for the Integral Queen finalists. Student activity cards will be punched at the time votes are submitted to prohibit students from voting more than once.

Dassie calls for more cooperation

Out of the crowd a lithe figure steps, and there, greeting you with a warm, winning smile and mischievous look that seem to emanate from friendliness and compatibility, is Bill Dassie. These are the attributes that have won for him the trust and confidence of his fellow students as attested by his election to the presidency of the January, '50 class.

Bill, an eight term ME with an inimitable gift for gab and flair for humor, has demonstrated the essence of collegiate spirit and vitality while at IIT. He has delved wholeheartedly into Triangle fraternity activities and is current president. He has also been "yeep" of APO and a member of ITSA, ASME, Pi Tau Sigma, and the Integral staff. Perhaps he is trying to make up for the time he feels he lost while at Proviso Township high school, where he merely dabbled in art, wrestling and swimming, and is going to the opposite extreme now. He counts among his rewards for expanded after-class activities increased self-confidence and personal satisfaction.

Bill's 25 years have encompassed a variety of experiences contributory to his mature philosophy on the settled future which he contemplates. After graduating from high school in 1941, he worked two years with Stewart-Warner as a tool designer. The war beckoned, so he joined the Seabees in October, 1943, and saw action at Bougainville. But this battle was child's play compared to his "Battle with Thermo" which took place about four years later at Tech.

Submerging his jovial manner for the moment, the serious Dassie reveals this opinion of frat life at IIT. "Tech is unique in that there is no problem of undue competition between or resentment of fraternities, he believes, 'but rather, a cooperative effort is summoned to carry the burden of social and political affairs on campus. I hope that the recent upsurge of student enterprise will be accomplished by increasing cooperation and recognition from the Institute administration.'"

Before the war Bill's hobbies were photography and women. However, both of these activities have been somewhat curtailed, the former due to the fact that his expensive equipment was stolen one fateful night. An engagement to a lovely psychology graduate from Beloit effectively curtailed the other.

Railmen to roll tonight

Technology Center's only railroad, the Camp Armour and Boulder Junction, is setting a new pace in construction, operation, and scenic effects. Twenty-one prospective rail magnates will attend an indoctrination meeting tonight in the club roundhouse, 6:00 p.m. to 6:30 p.m.

Timetable operations will follow the meeting, with the first train rolling at 7:00 p.m. Visitors are welcome to observe this demonstration, but the switches will be closed to late-arriving non-members at seven.

Still in the hush-hush stage are CA&BJRR plans for a new mountain division, altered routes, and enlargements to the Three Deuces control center.

Leiber receives Navy chemistry research grant

Dr. Eugene Lieber, Associate Professor of Chemistry, has been granted a two-year research contract by the Navy Bureau of Ordnance.

The research, to be conducted at Illinois Tech, will comprise a study of new derivatives of nitroguanidine and its physical and chemical properties. The objectives of the research are to add to present knowledge of high nitrogen content compounds of potential value.

Dr. Lieber has also recently been appointed a consultant of the Chemistry Section, Research Department, U. S. Naval Ordnance Test Station, Inyokern, California.

"My cigarette? Camels, of course!"

GOWN BY MARY MEAD MADDICK
—JEWELS BY REINAD

WITH SMOKERS WHO KNOW...IT'S

Camels for Mildness

Yes, Camels are SO MILD that in a coast-to-coast test of hundreds of men and women who smoked Camels—and only Camels—for 30 consecutive days, noted throat specialists, making weekly examinations, reported

NOT ONE SINGLE CASE OF THROAT IRRITATION DUE TO SMOKING CAMELS!
