

Tech Homecomers howl tonight

Glancy's five seek revenge

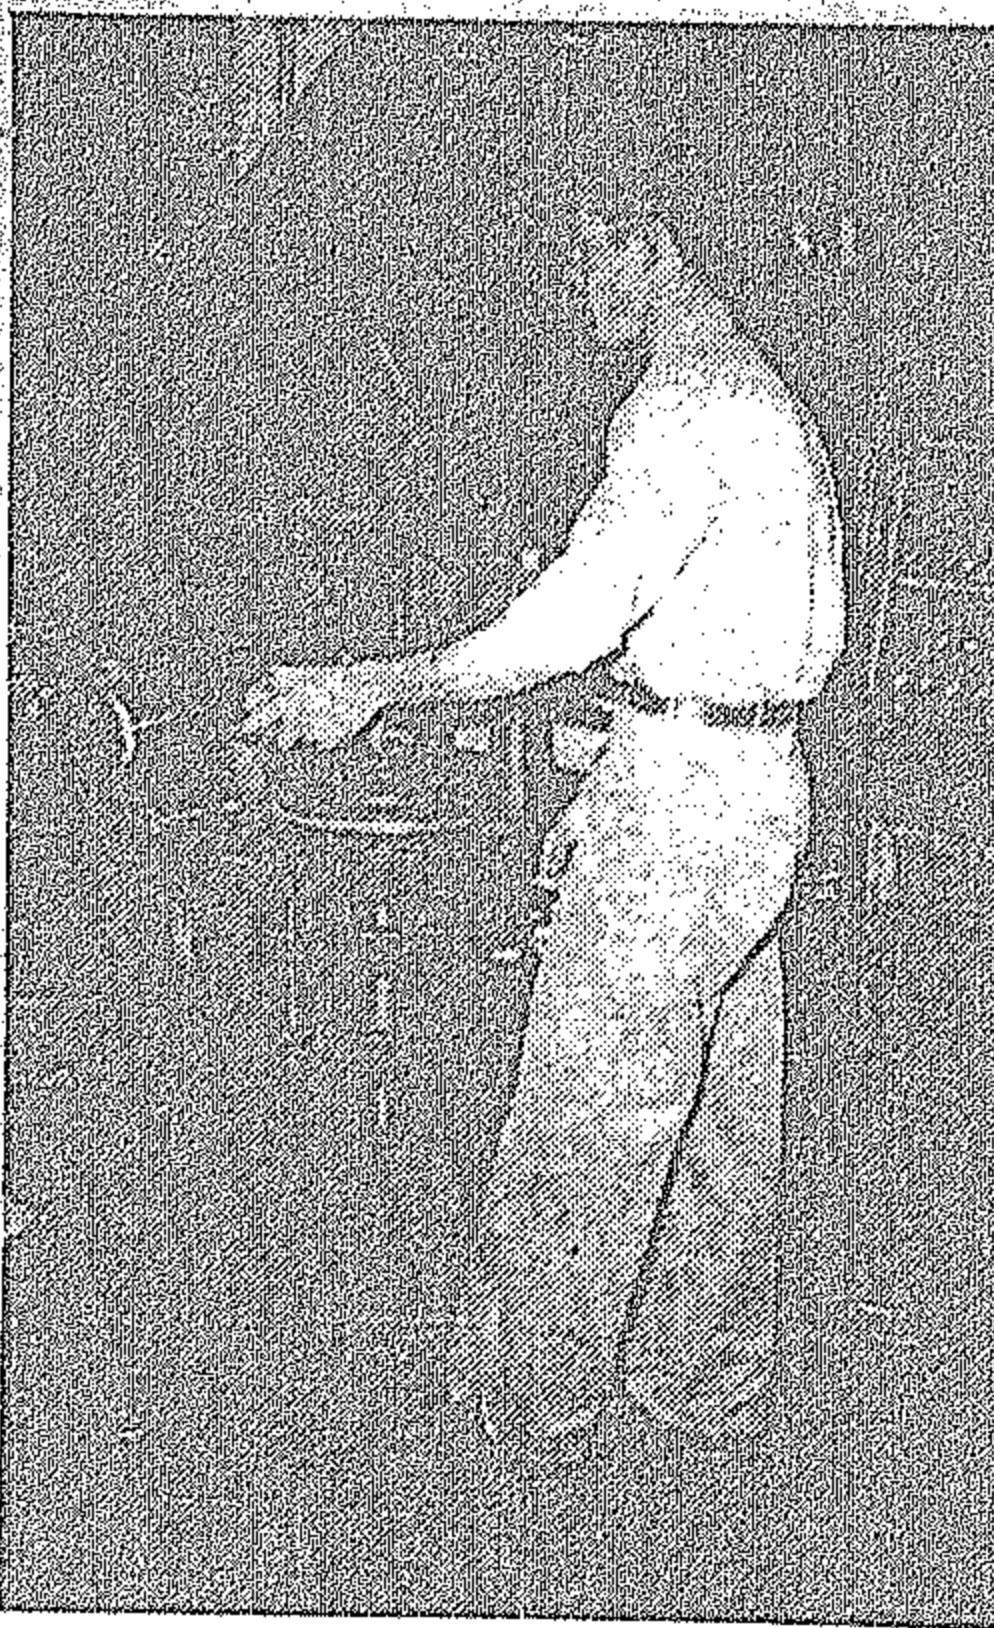

By Marks Levy

In one of the quiet periods of the long ride home from Lake Forest last January 11, Ed Glancy muttered, "Wait 'til they come back to Tech next fall—then we'll get 'em." The cagers had just lost a heartbreaker to the Foresters 56-49. It gave them an even split in their season records, the Techawks winning the first contest by three points, 51-48.

Glancy and some of the boys still remember that night and are looking forward to the "big" game tonight to prove their prophecy true. They will have to do it, however, without the services of Phil Urasky, Howie Gardiner, and Leo Kiley, all out with injuries.

This game may well set the pattern for the entire season; if the boys can get by Lake Forest they seem to be a cinch to better their record of the 1948 campaign of nine wins and nine losses. With a few breaks in their favor (last year quite a few went the other way) they can win almost all their games.

(See CAGERS on page 5)

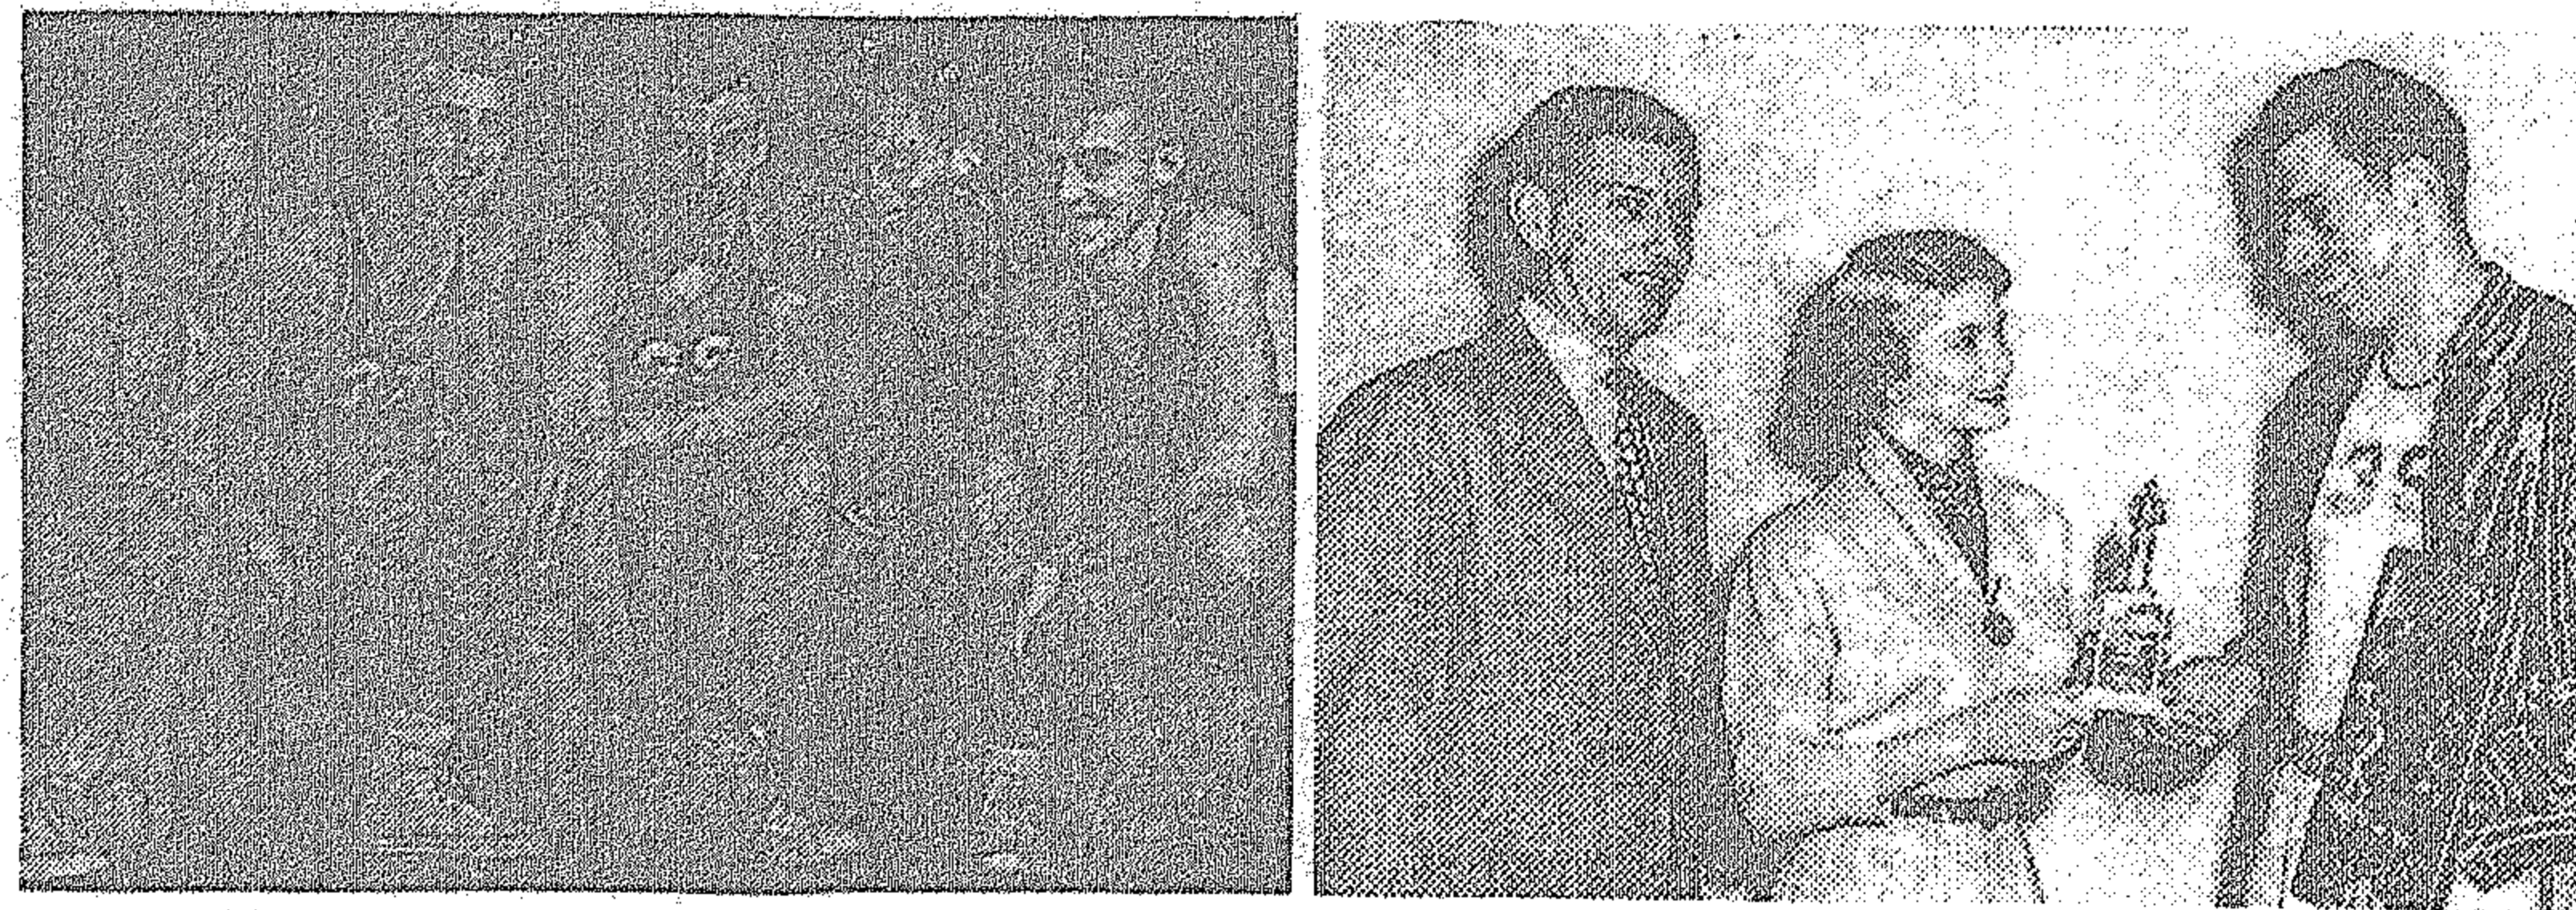

CO-OP STUDENT William Hill on the job checks the accuracy of a gear with a precision gauge.

Tech co-ops view Bears

Thirty IIT co-op students will be spectators at the Bear-Cardinal football game December 11. Reserved tickets, en bloc, have been procured. Again giving a clue to reasons for the rare esprit de corps prevailing among co-ops, who alternate semesters between classroom and industry, the Co-op club will soon stage a midwinter bobsled party. Locale of the snowfest will be the farm of the club advisor, Harold L. Minkler, director of placement.

Organized last spring, the club serves to foster fraternal feelings, and communications, between co-ops. Club meetings, held first and third Thursdays at 1 p.m. in 108MC, inform members of job openings and schedule changes.

Officers of the co-op organization include Roy Holm, president; Bill Hill, vice-president; and Don Heerdt, secretary-treasurer. Jim Fallagar, Jim Lang, and Don Crocker handle social, athletic, and publicity functions respectively.

THE FIVE TECHAWK cagers at the left that will start against Lake Forest tonight in the annual homecoming game are (left to right), Jerry Maatman, Bob Leiser, Captain George Scalamera, Carl Matson, and Bob McCue. At the right, Trudy Germi, "Miss Illinois of 1949", shows George Scalamera the awards that she will present him tonight at the game for being selected the outstanding Tech cager of the '48-49 season, as bucket coach Ed Glancy smiles on.

Dance follows cage opener

"Say Sig, did you hear about Miss Illinois of 1949 coming down to school tonight to present the 'Outstanding Basketball Player of 1948' trophy to big George Scalamera?"

It was little Reb speaking to his famous Techawk buddy, Sigmund Angle.

"You mean Miss Trudy Germi, I presume, my weak minded little pal," corrected Sigmund.

"Yes, she's quite a girl. Only 19, but she's already one of the top Patricia Stevens models. I hear she came out third in the Miss America contest at Atlantic City and won a trophy for having the best figure at the meet too," he added.

"We'd better raise the dough, Ziggy pal," replied Reb anxiously, "A guy's a chump if he misses this. Basketball I can leave alone and a dance is a dance, but Miss Illinois—WOW!" the little man chortled.

"Not so fast, my simple-minded pal. Remember what I've told you about women. Besides, this is the first game of the season and even if you're not the rabid kind of fan you might want to see what your team looks like. Where's your school spirit, kid?"

"Look who's talking. School spirit, huh, I'll bet you'll be the first one in the NU auditorium after the game to meet that bus load of nurses they're bringing down too, Ziggy old boy."

"You injure my reputation, Little friend. But since you mention women, I think I'd better have a talk with this Norman Sabye, the guy who got Miss Germi to come down to school. See you later at the game and dance, little chum."

Honors assembly to hear Bunche

Noted United Nations diplomat, Dr. Ralph Bunche, is coming to Illinois Tech. He will appear as featured speaker at the Honors Assembly next Thursday when he will discuss "U. N. Peace Operations."

World renown came to Dr. Bunche when he assumed the position of Palestine mediator following the assassination of Sweden's Count Folke Bernadotte. At that time he was working with Bernadotte on plans for reconciliation of the Israelites and Arabs. He was able to carry the negotiations to a successful conclusion.

When it was announced that Dr. Bunche would be in the Chicago area to deliver an address to a north shore group December seventh, Dean Larkin, who has known Bunche for many years, seized the opportunity to invite him to speak at the Honors Assembly.

A luncheon will be held on campus immediately preceding the assembly. Administration officials, several deans, community leaders, and the president and vice-president of Tau Beta Pi will be present.

The Honors Assembly, a semesterly event, has as its purpose the presentation of those students elected to membership in Tau Beta Pi. Awards are also presented to outstanding underclassmen in recognition of their scholarship.

New pair of scholarships in February

Two new scholarship funds, effective February, 1950, will provide financial assistance for outstanding students attending IIT. This was announced by Dean of Students Clarence E. Deakins.

Funds have been established by Seymour Oppenheimer, president of the Transport Package Company, and by an anonymous donor through the Chicago Community Trust.

The Annual Transparent Package Award provides two partial one-year scholarships for exceptional junior and senior chemistry majors.

Glamorous gifts theme of Home Ec exhibition; candy sale in offing

The Home Economics club has obtained the services of Miss Helen West, representative of the Tie Tie Products, who has just finished a series of gift wrapping demonstrations for the patrons of Marshall Field and Company, to demonstrate her art of making packages "too beautiful to spoil by opening."

Miss West will hold an exhibition in 302M during the free hour Tuesday at 1 p.m. Everyone is invited to attend, whether student or faculty.

On Tuesday, December 13, the Home Economics club is planning a candy sale in both unions. Delicious candy made by the dainty hands of the home economics girls will satisfy that sweet tooth.

Here is the next important clue to Christmas Spirit

Quiz "guess artists" are urged to try their luck at naming the "Christmas Spirit." The first correct guesser will win a "Winter Whirl" bid, an orchid corsage, a bottle of champagne, and a whole pyramid of prizes.

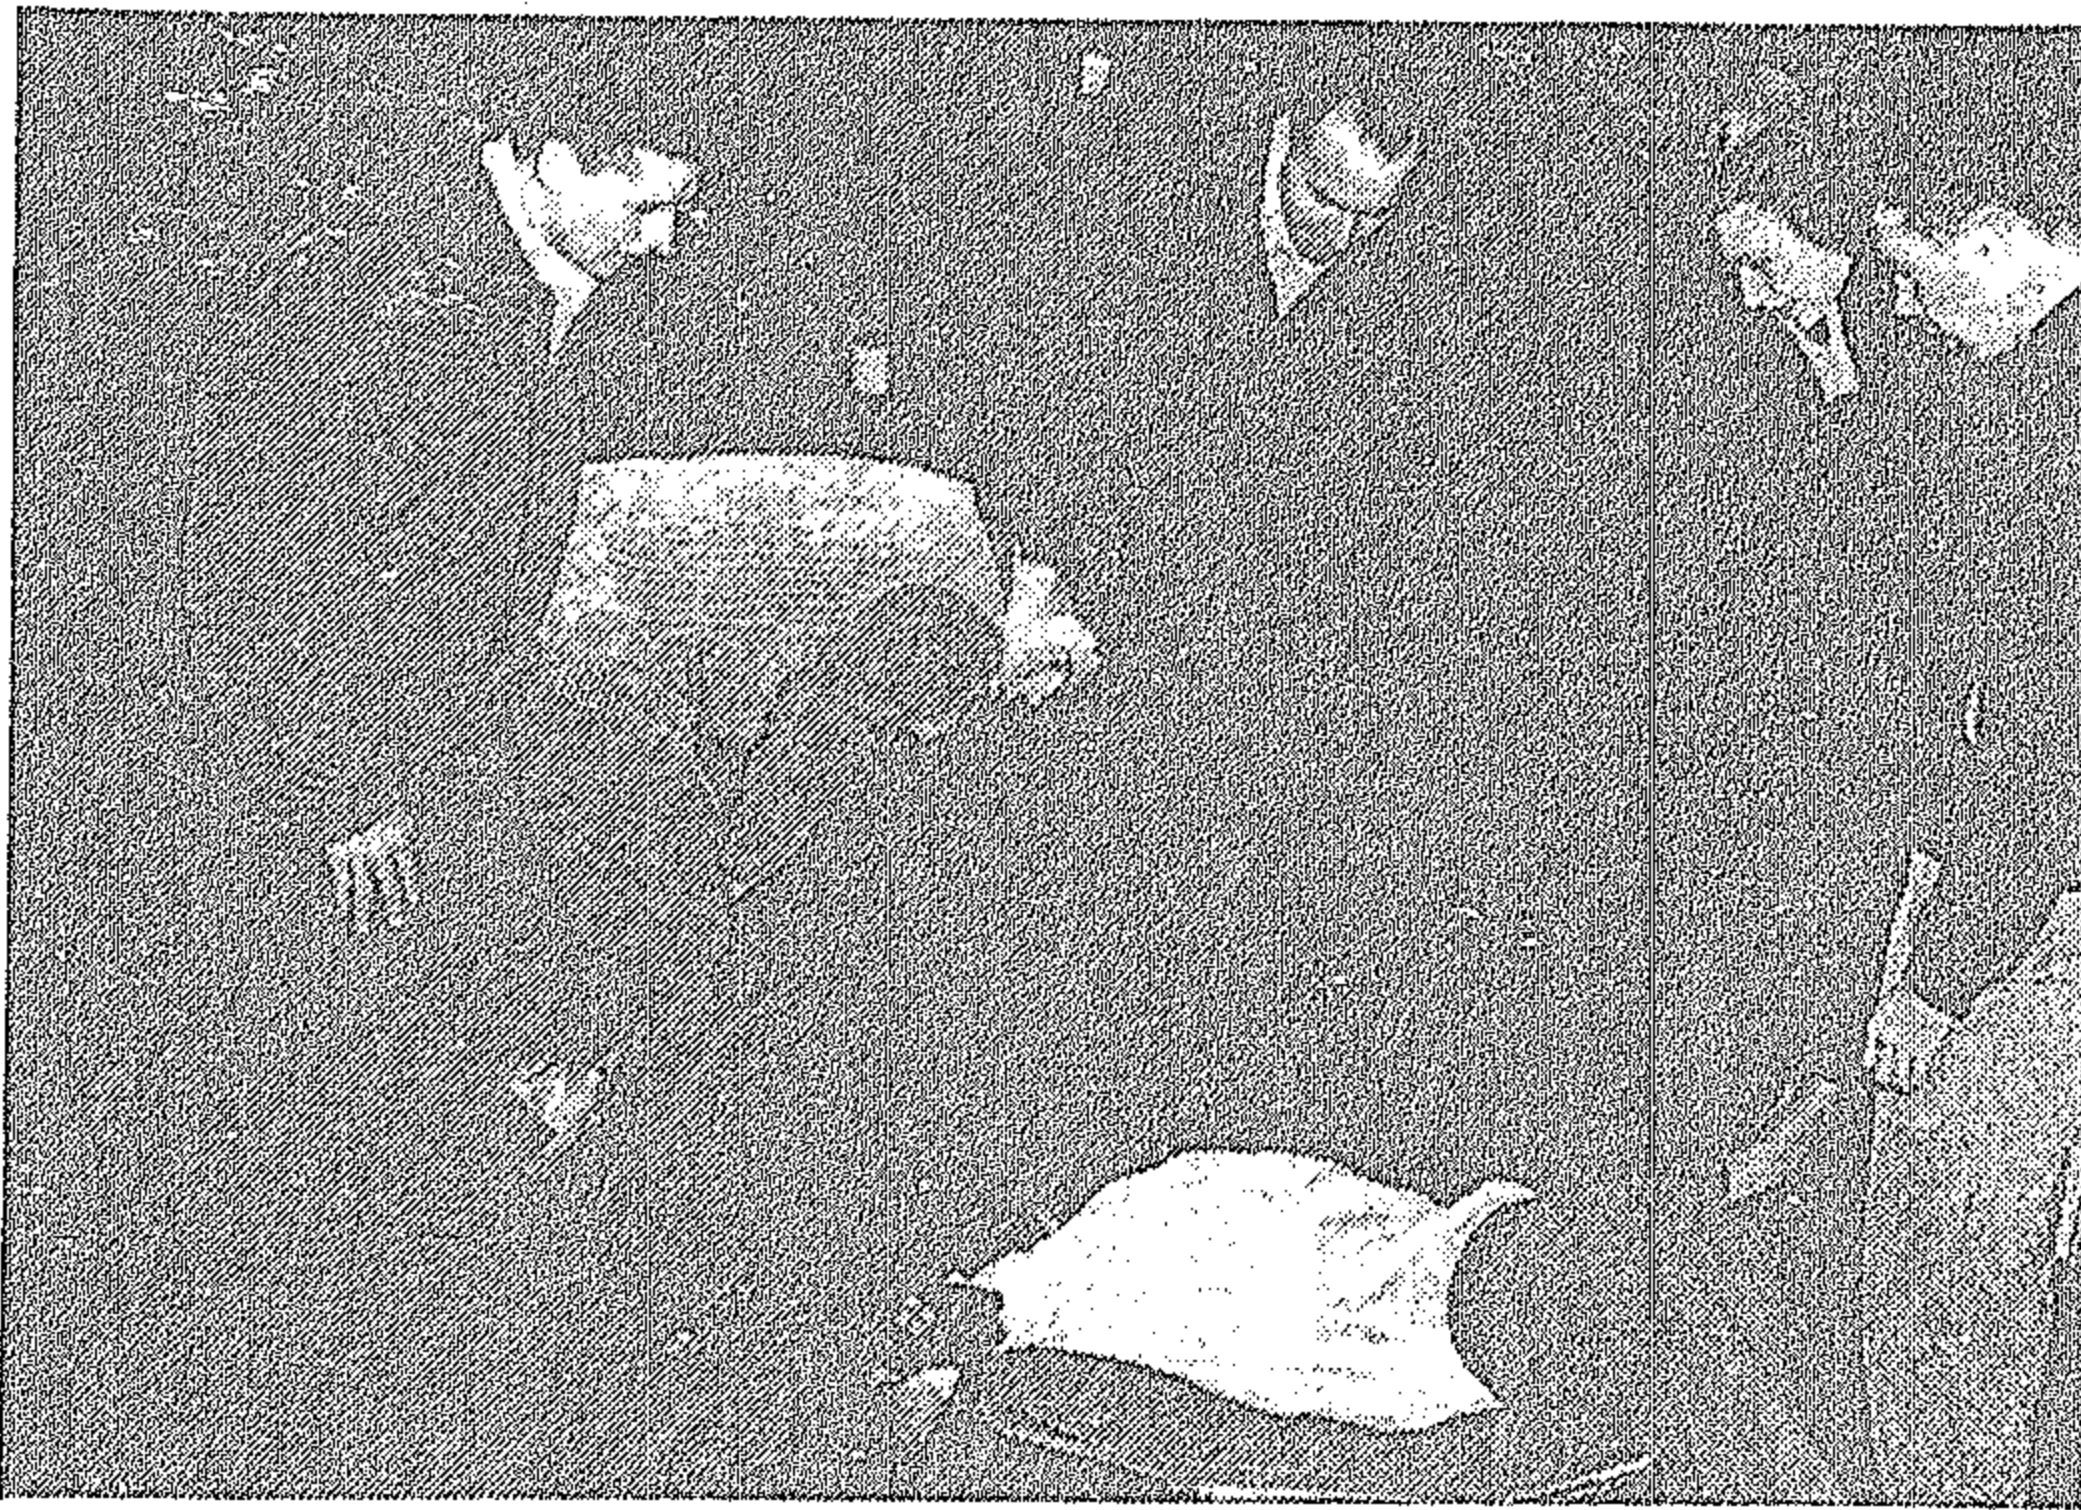

An official entry blank is available upon purchase of a bid for only thirteen quarters at the North Union lobby booth.

The first clue appeared in last week's issue of Technology News and proclaimed:

His name is in the new directory . . . you all know him and read his publication.

This week's clue narrows the search further. It says:

Distinguished . . . our phantom looks like the head of a department . . . Break down Reb . . . and give this guy some credit for a change!

"WHODUNIT?"—Spectators view the lifeless form of millionaire Byron Faulkner, whose murderer will be tried by a Tech jury on The Night of January 16th.

Curtain time on play

The curtain will go up in the NU auditorium Wednesday evening, on the first play to be presented by the Campus Players. "The Night of January 16th" is a tense murder thriller that takes place in a courtroom.

The play centers around lovely Karen Andre, secretary to the murdered Bjorn Faulkner, as played by Mary Triller, admissions counselor. The district attorney and the defense counselor are played by Tom ("Sigmund") Murray and Ralph Stusrud, respec-

tively.

Tickets can be purchased at the door. The curtain goes up at 8 p.m. The play will be presented three days beginning Wednesday.

Henry Knepler, director and instructor in the LLP department, announced that details for the director contest to be held soon will be released in the near future. Information obtained at this time indicates that a student will be selected by contest to direct a one act play to be given early next semester.

Blowing the Gaff

See games on activity cards

There seems to be some confusion over the question of whether or not student activity cards will be accepted as admission at the "Homecoming" basketball game tonight. The answer; they will be.

I suppose this news should be given front page space, but, due to the late date at which the decision was finally reached, this is the only place I could get it squeezed in.

Here's the scoop. Anyone who bought a ticket for the sole purpose of seeing the game will be refunded his money at the door upon surrendering his ticket and presenting a student ID card. If he bought a "couple" ticket he will have to pay the price of admission to the game for his date, unless she also has a student identification card. Surrendering of the ticket forfeits all right of attending the dance after the game.

All those attending both the dance and the game will receive no refund.

I'll have to apologize for not getting this information to you sooner but there was quite a problem deciding the proper procedure. The reason; our facilities.

Due to the limited seating capacity in our gymnasium, it was felt, and still is felt, that if admission were given free there would not be room for all interested in attending. But since a precedent has more or less been set in past games, by granting admission on activity cards alone, it was deemed advisable to follow the procedure until some definite policy is arrived at. Now it's a matter of first come first served if you want to see the game.

It's a shame that such conditions have to exist, but it's one of the problems encountered in conducting a building program and being forced to hold events in temporary structures.

Jim Gaffney, ITSA President.

Slipstick

A group of small children were telling each other where they came from and the prices their parents paid for them. One said, "I was born in a big hospital." Another said, "My mommy and daddy paid a 'normous price for me!" Still another boasted, "My mother and father bought me from the doctor and paid a million dollars." The fourth little girl then said, "My ma and pa are poor and couldn't 'ford to buy me. I was homemade!"

Peroxide is an ingredient in a new fuel for jet-propelled planes; but of course, we all know the stuff has been used before to improve the pickup.

Indignant lady to beautiful librarian: "It's strange you haven't that book. My husband said you had everything."

Mother: "When I was your age, young lady, a nice girl would never think of holding a young man's hand."

The Daughter: "But, mother, nowadays a nice girl has to hold a young man's hand."

A wealthy client insured her wardrobe while traveling in Europe. Upon reaching London she found an article missing and immediately cabled her agent in New York. "Gown Lifted in London."

The agent replied, after deliberation, "What do you think our policy covers?"

If a girl's a good loser at strip poker it isn't always sportsmanship. Sometimes it's just plain conceit.

"Ann turned off all the lamps 'cept one funny little green table light."

"Then what happened Don?"

"Well.....I've driven automobiles too long not to know what a green light means."

A cultured woman is one who by the mere shrug of her shoulders can adjust her shoulder straps.

"So your daughter is about to marry. Do you really feel she is ready for the battle of life?"

"She should be. She's been in four engagements already."

He: "In spring a young man's fancy lightly turns to thoughts of love."

She: "Yes, but you think it's spring every time you get into a warm room."

When a girl is a feast of beauty every young fellow wants to eat with his hands.

"Wow! Last night I finally persuaded my girl to say that little word: 'Yes'"

"Congratulations old man. When's the wedding?"

"What wedding?"

The height of absent-mindedness was recently reached by a burglar when he tried to steal some money out of a girl's stocking and then forgot what he went after.

By Carbolec Gussie

as I see IT

By ED MICHELIC

LETTERS didn't make the page this week for lack of space. I would like, however, to comment briefly on one sent me by a freshman who noted the disrespect shown lecturers in freshman general chemistry. He says in the letter, "Obviously, the students have no ability to understand the respect a student of science owes to a master who is teaching them. . . If the students stop to think, they should realize they are losing money by their actions."

He goes on to say, "I believe the crux of the thing is that the students just haven't stopped to think. Certainly, it isn't the result of malicious intent on anyone's part."

All students should think this one over.

BIGGER AND BET-

TER—that seems to be the theme of student publications this year. The new Student Directory is a useful book, and what's more, it does lay flat! Also to be commended are the Farr Crier and the Fowler Growler. Evidences of the high morale in the student dormitories, they are filled with news and chatter of dormitory activities. These are healthy signs of increased interest in organized student activities.

CURRICULUM CHANGES are the latest topic for conjecture among the students, and dissention among the department heads. Official statements will probably be released when preliminary rumors have grown beards.

I would suggest a committee of students be invited to discuss the proposed revisions.

Chances are that only students with 2.5 grade averages or better would be admitted to the charmed circle, but I'd like to see the less academically-minded represented, too. This whole suggestion, however, may be answered in a doctor's manner—the patient is unfit to prescribe his own medicine.

TECHNOLOGY NEWS

HERE'S YOUR PARTY—Student Ray Wechman puts through the call as he takes over the switchboard from day operator Mrs. Eleanor Stake.

Telephone system coordinates IIT

By Jim Gewartowski

After leaving one of those "simple" quizzes last week, your reporter was in somewhat of a stupor. With integral signs and force vectors still flowing through his brain, he descended the steps to the MC basement "lounge" and saw before him the outline of a door. He opened it and entered the room. To his surprise he heard female voices; one asked him what he wanted.

Now, in such a position your reporter had one of two choices—admitting his error which would probably cause speculation about whether or not he had just come from a BON meeting, or making the excuse that he was a Technology News reporter which might save him embarrassment. Choosing the latter, he took out his notebook and began asking for telephone numbers.

This, however, was a miscalculation, or rather a "Mrs." calculation, for all three girls there were married. The only number available was CALUMET 5-9600. A large switchboard took up the space on one side of the room, and suddenly your reporter caught on—this was the nerve center of Illinois Tech's telephone system, and these girls were the campus operators.

Mrs. Eleanor Stake, the head operator, gave a few details about the switchboard. It seems that it came to the IIT campus on January 17, 1948, and took over a job that four separate switchboards had previously done. Before this time there were switchboards in Main, IGT building, and in the ARF Main and Engineering buildings. The present switchboard is a three-operator board and has 500 terminals. Already 425 are being used, each one representing a telephone on the IIT campus.

About 3500 incoming calls per day are handled from 8 to 6. At 6 the female voice disappears and a male voice says: "Technology Center." Ray Wechman and Howard Kobayashi handle the board until 8 p.m. when each of the 24 incoming trunk lines is connected to a certain telephone on campus. The present switchboard is the type and size used by a town of 4,000 people.

Hearing a constant clicking sound your reporter asked if they were bothered by terminals. This sound turned out to be the campus dial system in action. The opening of the door to an auxiliary room disclosed the complex mechanism by which one person on campus calls another without bothering the operators.

One of the marvels of the board is the fact that five different parties can talk together at the same time on a so-called "conference circuit." A microphone is handy by which the operators can page people in the Armour Research building.

Here are a few suggestions from the operator. After dialing "9" for an outside call, be sure to wait for the second buzzing tone before starting to dial your number. When you wish to contact the

operator while speaking on the phone press the lever up and down about twice a second for the quickest attention of the operator. Dial FIR for fire to get the operator's immediate attention so that she can quickly relay emergency messages quickly. According to J. H. Schlichting, IIT's assistant business manager, who has charge of the board, Technology Center of the future will see the switchboard grow to a 1500 terminal, 12 operator board.

Shurrager wins grant for nerve system studies

Phil S. Shurrager, chairman of the department of psychology and education, has been awarded a \$5,000 extension on a grant by the U. S. Public Health service to continue his research on learning in the central nervous system.

Dr. Shurrager, who was given a \$6,000 grant last year, will be assisted by his wife, Dr. Harriett C. Shurrager. They comprise a husband-wife teaching and research team in Illinois Tech's psychology department.

Working with dogs, the Shurragers have measured the rate of learning of a single nerve cell. Their research work has centered around how and at what location the nervous system learns.

The extension of the grant will enable them to continue their latest project, the walking behavior of a spinal, or paraplegic animal. They will investigate, further, the learning in a single cell and then attempt to relate this smallest element to total learned behavior.

Heat plant nears completion

By Alan Plait

One usually thinks of a steam plant as a maze of pipes and wires. Well, IIT's new plant is rapidly beginning to look like just that. Most of the piping on the ground floor has been installed and the coal pulverizer leading from the hopper has been tested. The dust hasn't settled yet.

Asbestos installators move along as soon as new piping circuits are completed. The main job, and biggest one, has been the insulation of the large tanks throughout the plant.

Many of the gratings that will be used as flooring have already been set into place. There remain a few galleries that are being installed at this time.

The gas and water mains coming into the building from 35th street are all that are in the way of finishing the ramp for trucks that will extend to the rear of the structure's south side. Sidewalks have already been laid except for a small strip at the northeast corner, where steam lines, that have been harassing students, enter the wall.

The view from several vantage points in the building is impressive to say the least. Massive piping seems to run around in an obstacle course.

The boiler and huge coal hopper dominate the entire scene, however.

With the completion of tube installation in the bottom of the boiler, it will be fired up and tested for leaks. This will be done within a few weeks. It will be necessary to load coal by hand into the pulverizer until the tracks to the retaining hopper have been laid down. Work on this project will start as soon as the retaining wall to 35th street is completed.

The dust collector and the air compression unit that leads to the smokestack will operate soon. Electricians are working at a fever pace to get the motors running.

An additional one story structure is being prepared at the south side of the smokestack. This will be the gas booster station. Its purpose is to keep gas pressure on an even keel throughout the mains.

It doesn't look like a long time before students will be sweltering in the heat of the classrooms that the power plant will supply with steam.

Fun lovers form campus honor body

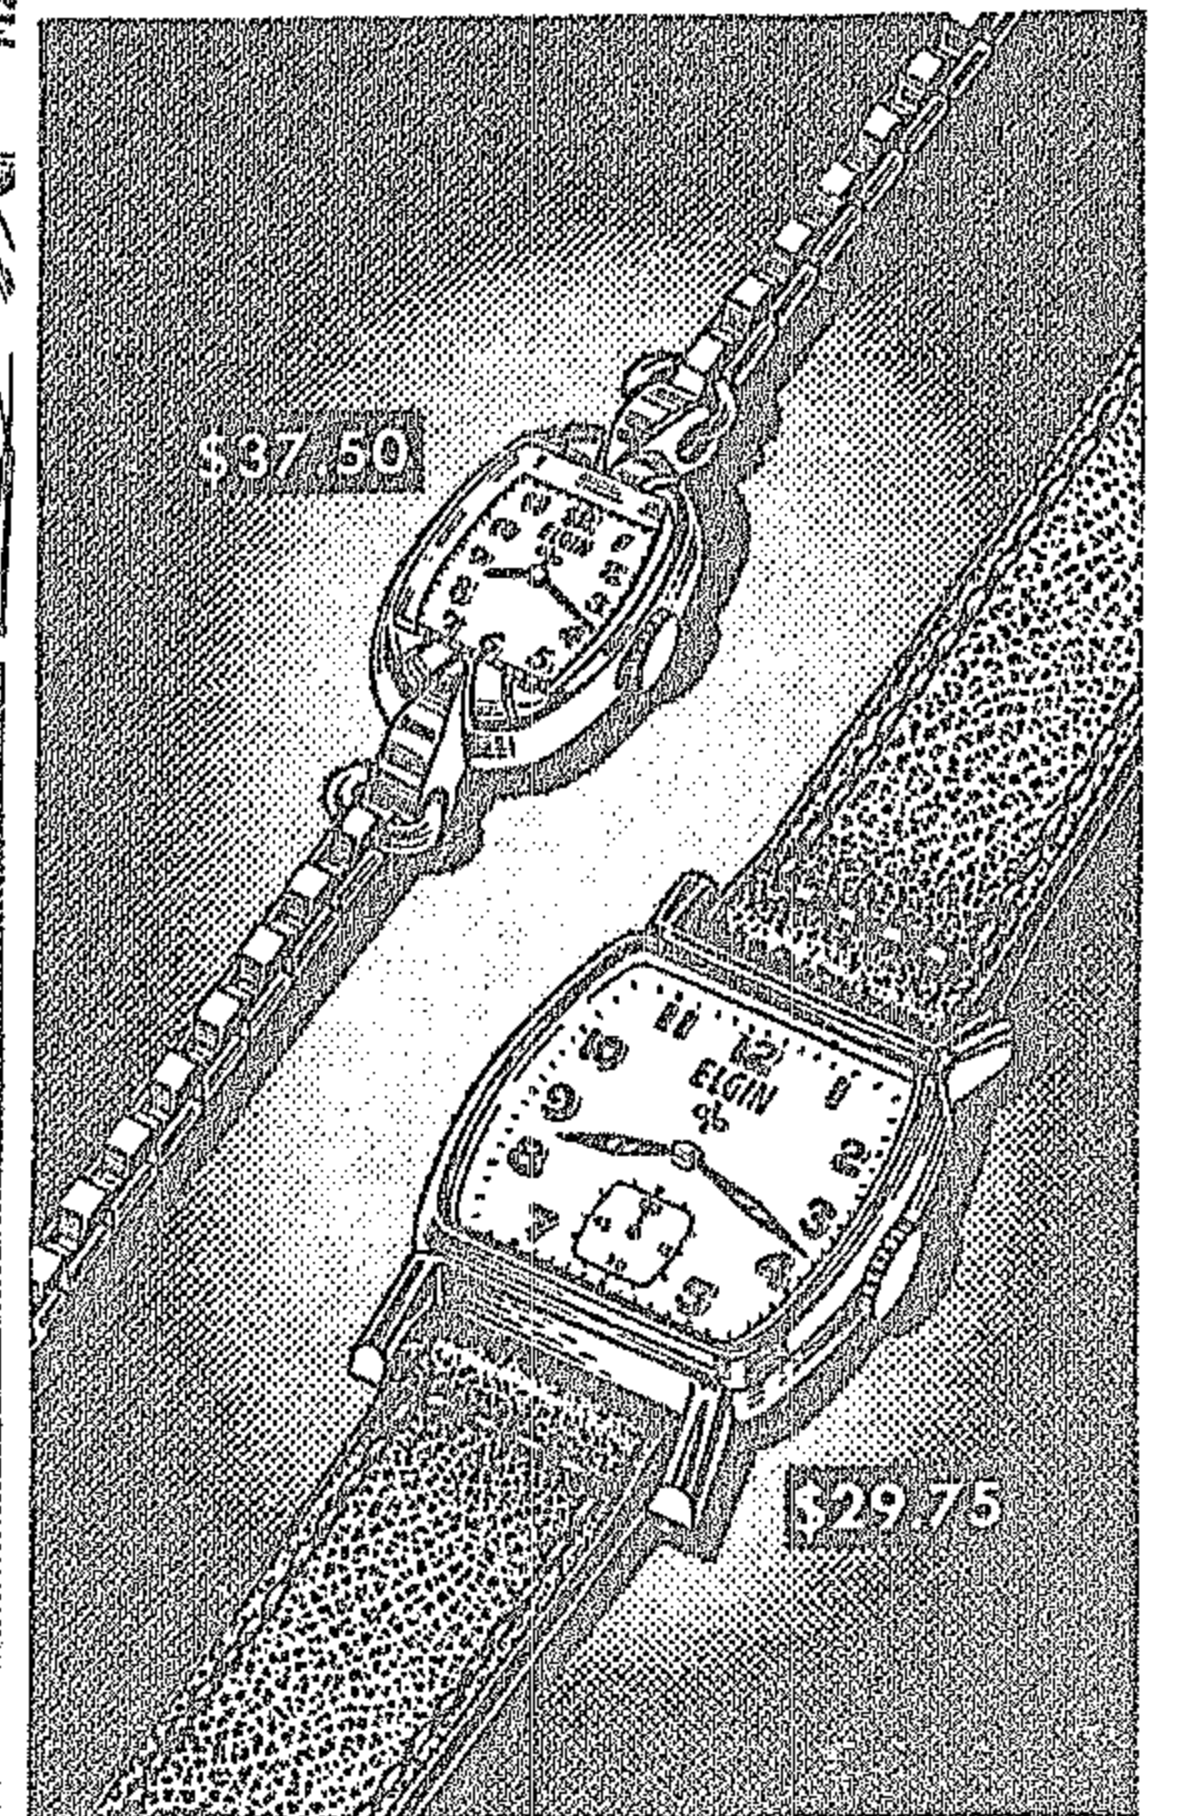

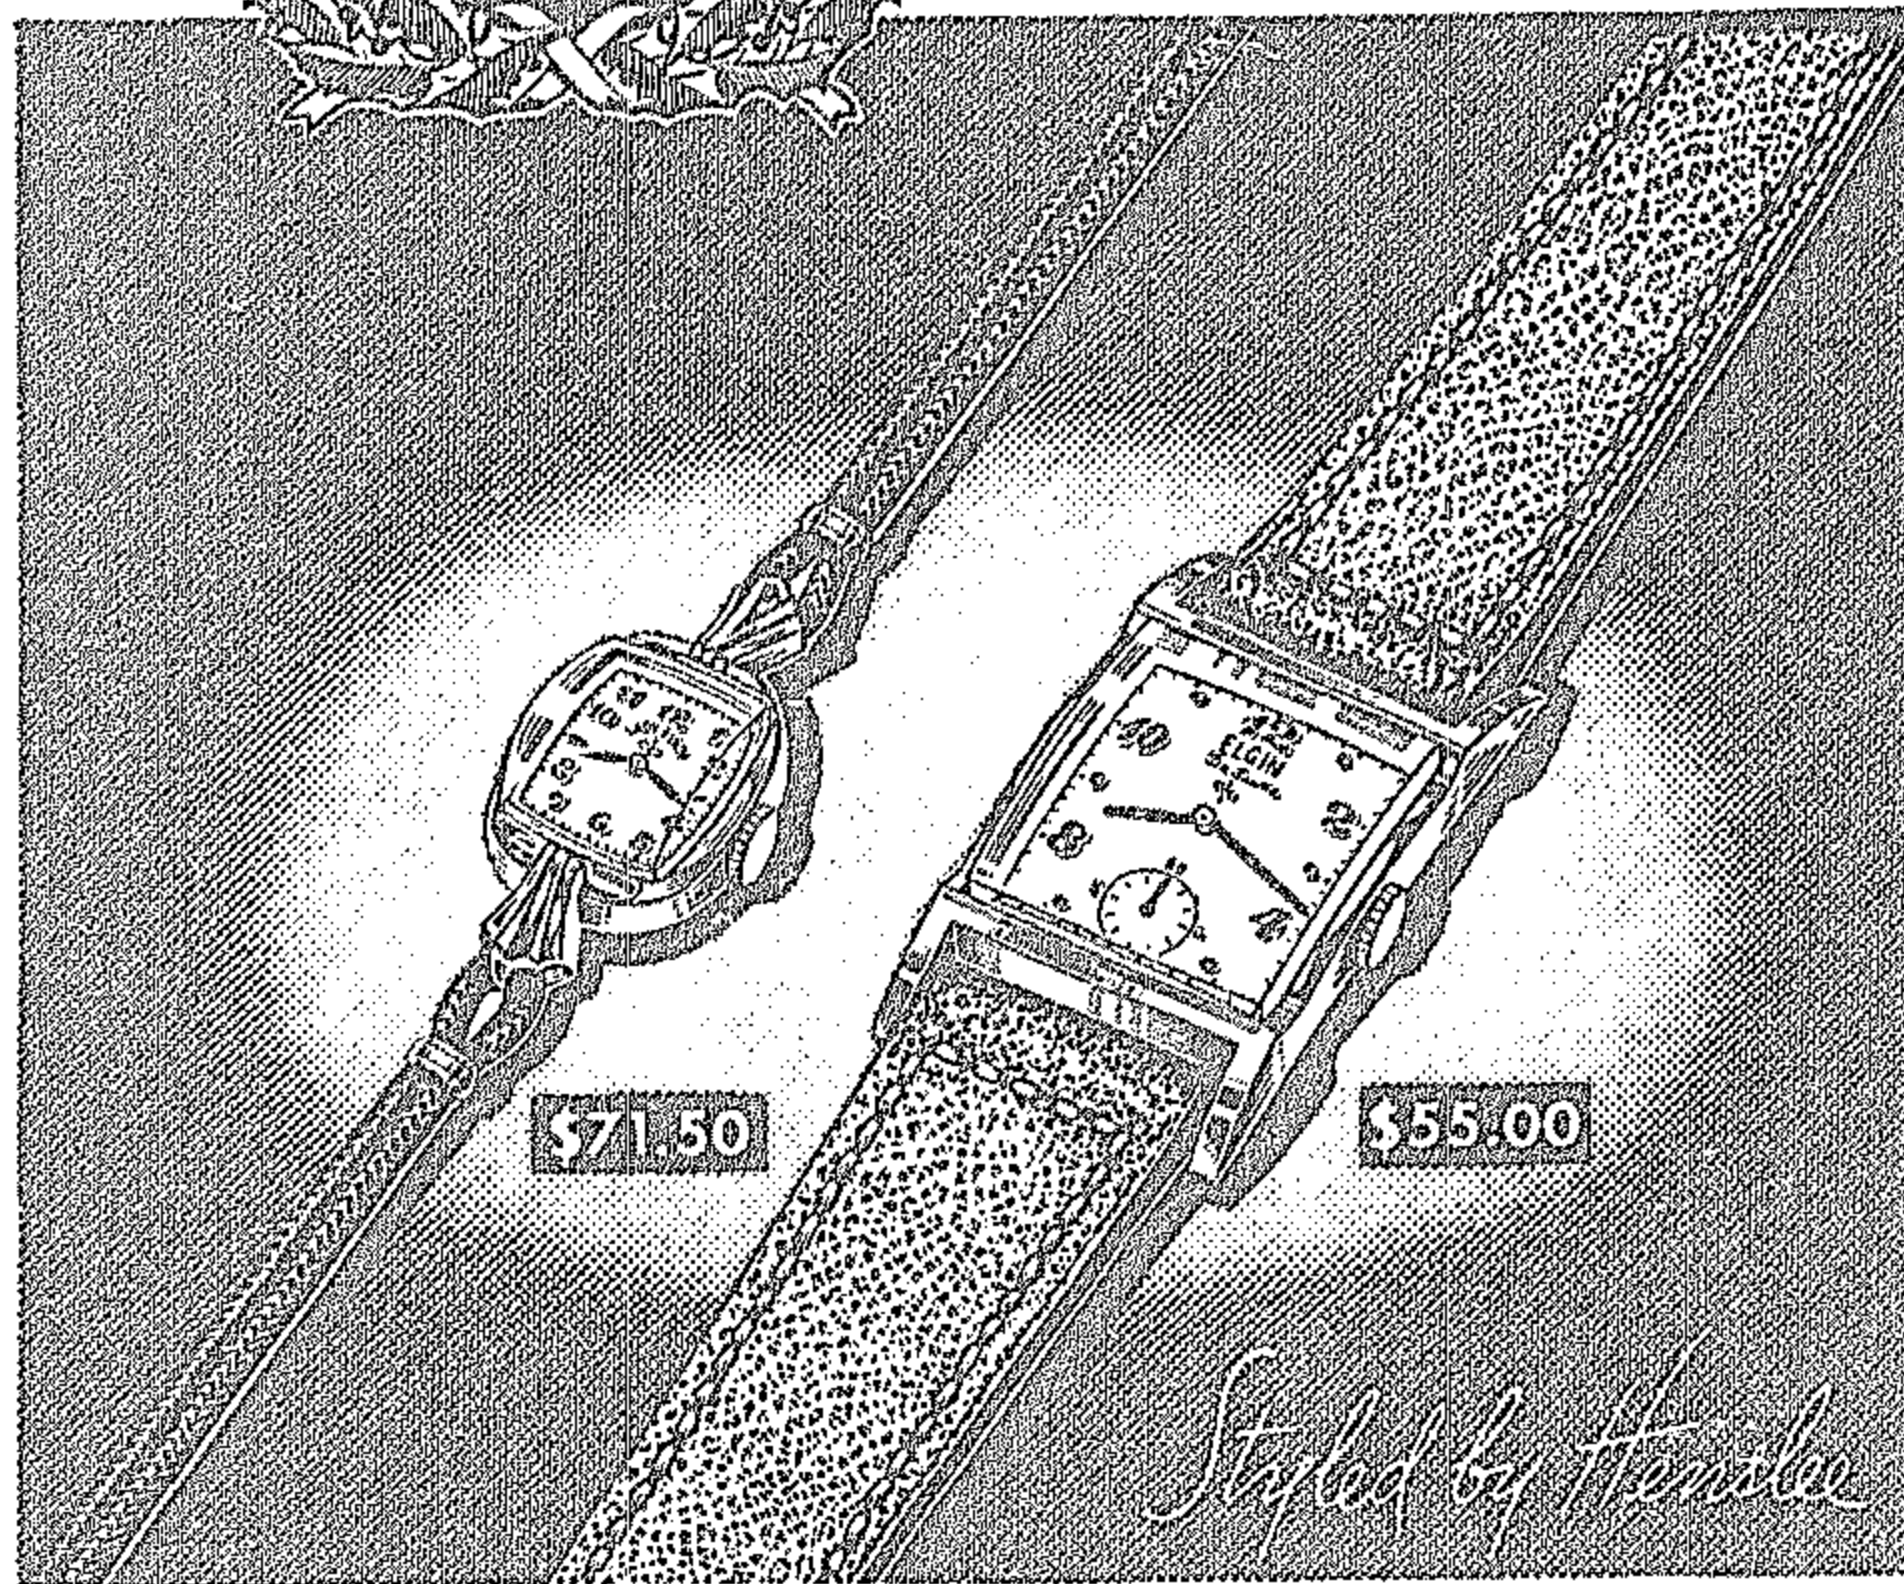

A new honorary is being organized on campus to fulfill a long felt need. This organization, to be known as Nu Chi Sigma, will have for its purpose "... to instill and maintain college spirit among students, to insure the preservation of humor upon campus, and to designate in a fitting manner those who have shown non-conformalism."

Founded by five men interested in promoting the above policy, Nu Chi Sigma will start its first pledge program next week. The "Founding Fathers," Frank Curtis, Mel Friedlander, Henry Holmes, John Scannel has promised to provide a novel pledging program for the interest and amusement for everyone.

Pledge duties promise to be anything but a burden. Aspirants will carry distinguishing devices, as is the case with other groups on the campus, but the equipment will vary from day to day. The entire proceedings will be in keeping with Nu Chi's motto, "Anything for a laugh."

"What a miracle you hide in a Christmas watch!"

said ELIZABETH TAYLOR
when she learned
of the DuraPower Mainspring
in ELGINS that
are so beautiful they won
the Fashion Academy Award!

Lord and Lady Elgins are priced from \$67.50 to \$5,000. Elgin De Luxe from \$47.50 to \$67.50. Other Elgins from \$29.75. All prices include Federal Tax.

That Christmas gift watch... Elgin is the one that will make you most happy. For Elgin style won the Gold Medal Award of the Fashion Academy. And only Elgin has the miracle DuraPower Mainspring. No other watch in the world has such dependable power for accurate timekeeping! Just pass the word around with the family that jewelers are now featuring Elgins in a wide range of prices.

Man of the week

Gene likes fun, passing courses

By Wayne Bessette

Eugene J. Rezabeck is an outstanding ME student who is probably better known as "Gene," the editor of the *Integral*. Graduating from Morton high school in 1944, Gene spent twenty-two months in the Navy. He entered IIT in September, 1946. With the feeling that he wanted to coordinate business and engineering, Gene chose to follow the Management option.

Gene is a member and former president of Triangle fraternity, treasurer of BON, and a firm believer in extracurricular activities as long as grades do not suffer. He

has also been a member of the IFC for three years. In acknowledgment of these achievements and also of his scholastic attainments, Gene has been made a member of Pi Tau Sigma and Pi Delta Epsilon, and has been listed in *Who's Who in American Colleges and Universities*.

As editor of the *Integral*, Gene has attempted to have the work distributed among members of the staff. In the past, one or two people were doing all the work.

As with many men, there is one main force keeping Gene's grades at a maximum—her name is Ellen. Ellen is, at present, a nurse at Wesley Memorial Hospital (although Gene somehow managed to meet her at a St. Luke's Hospital dance), but after next June she expects to be Mrs. Rezabeck.

Also included in Gene's post graduation plans is a job in engineering sales or production. In the meantime, Gene will continue at a hobby shared by all students at IIT: passing all his courses.

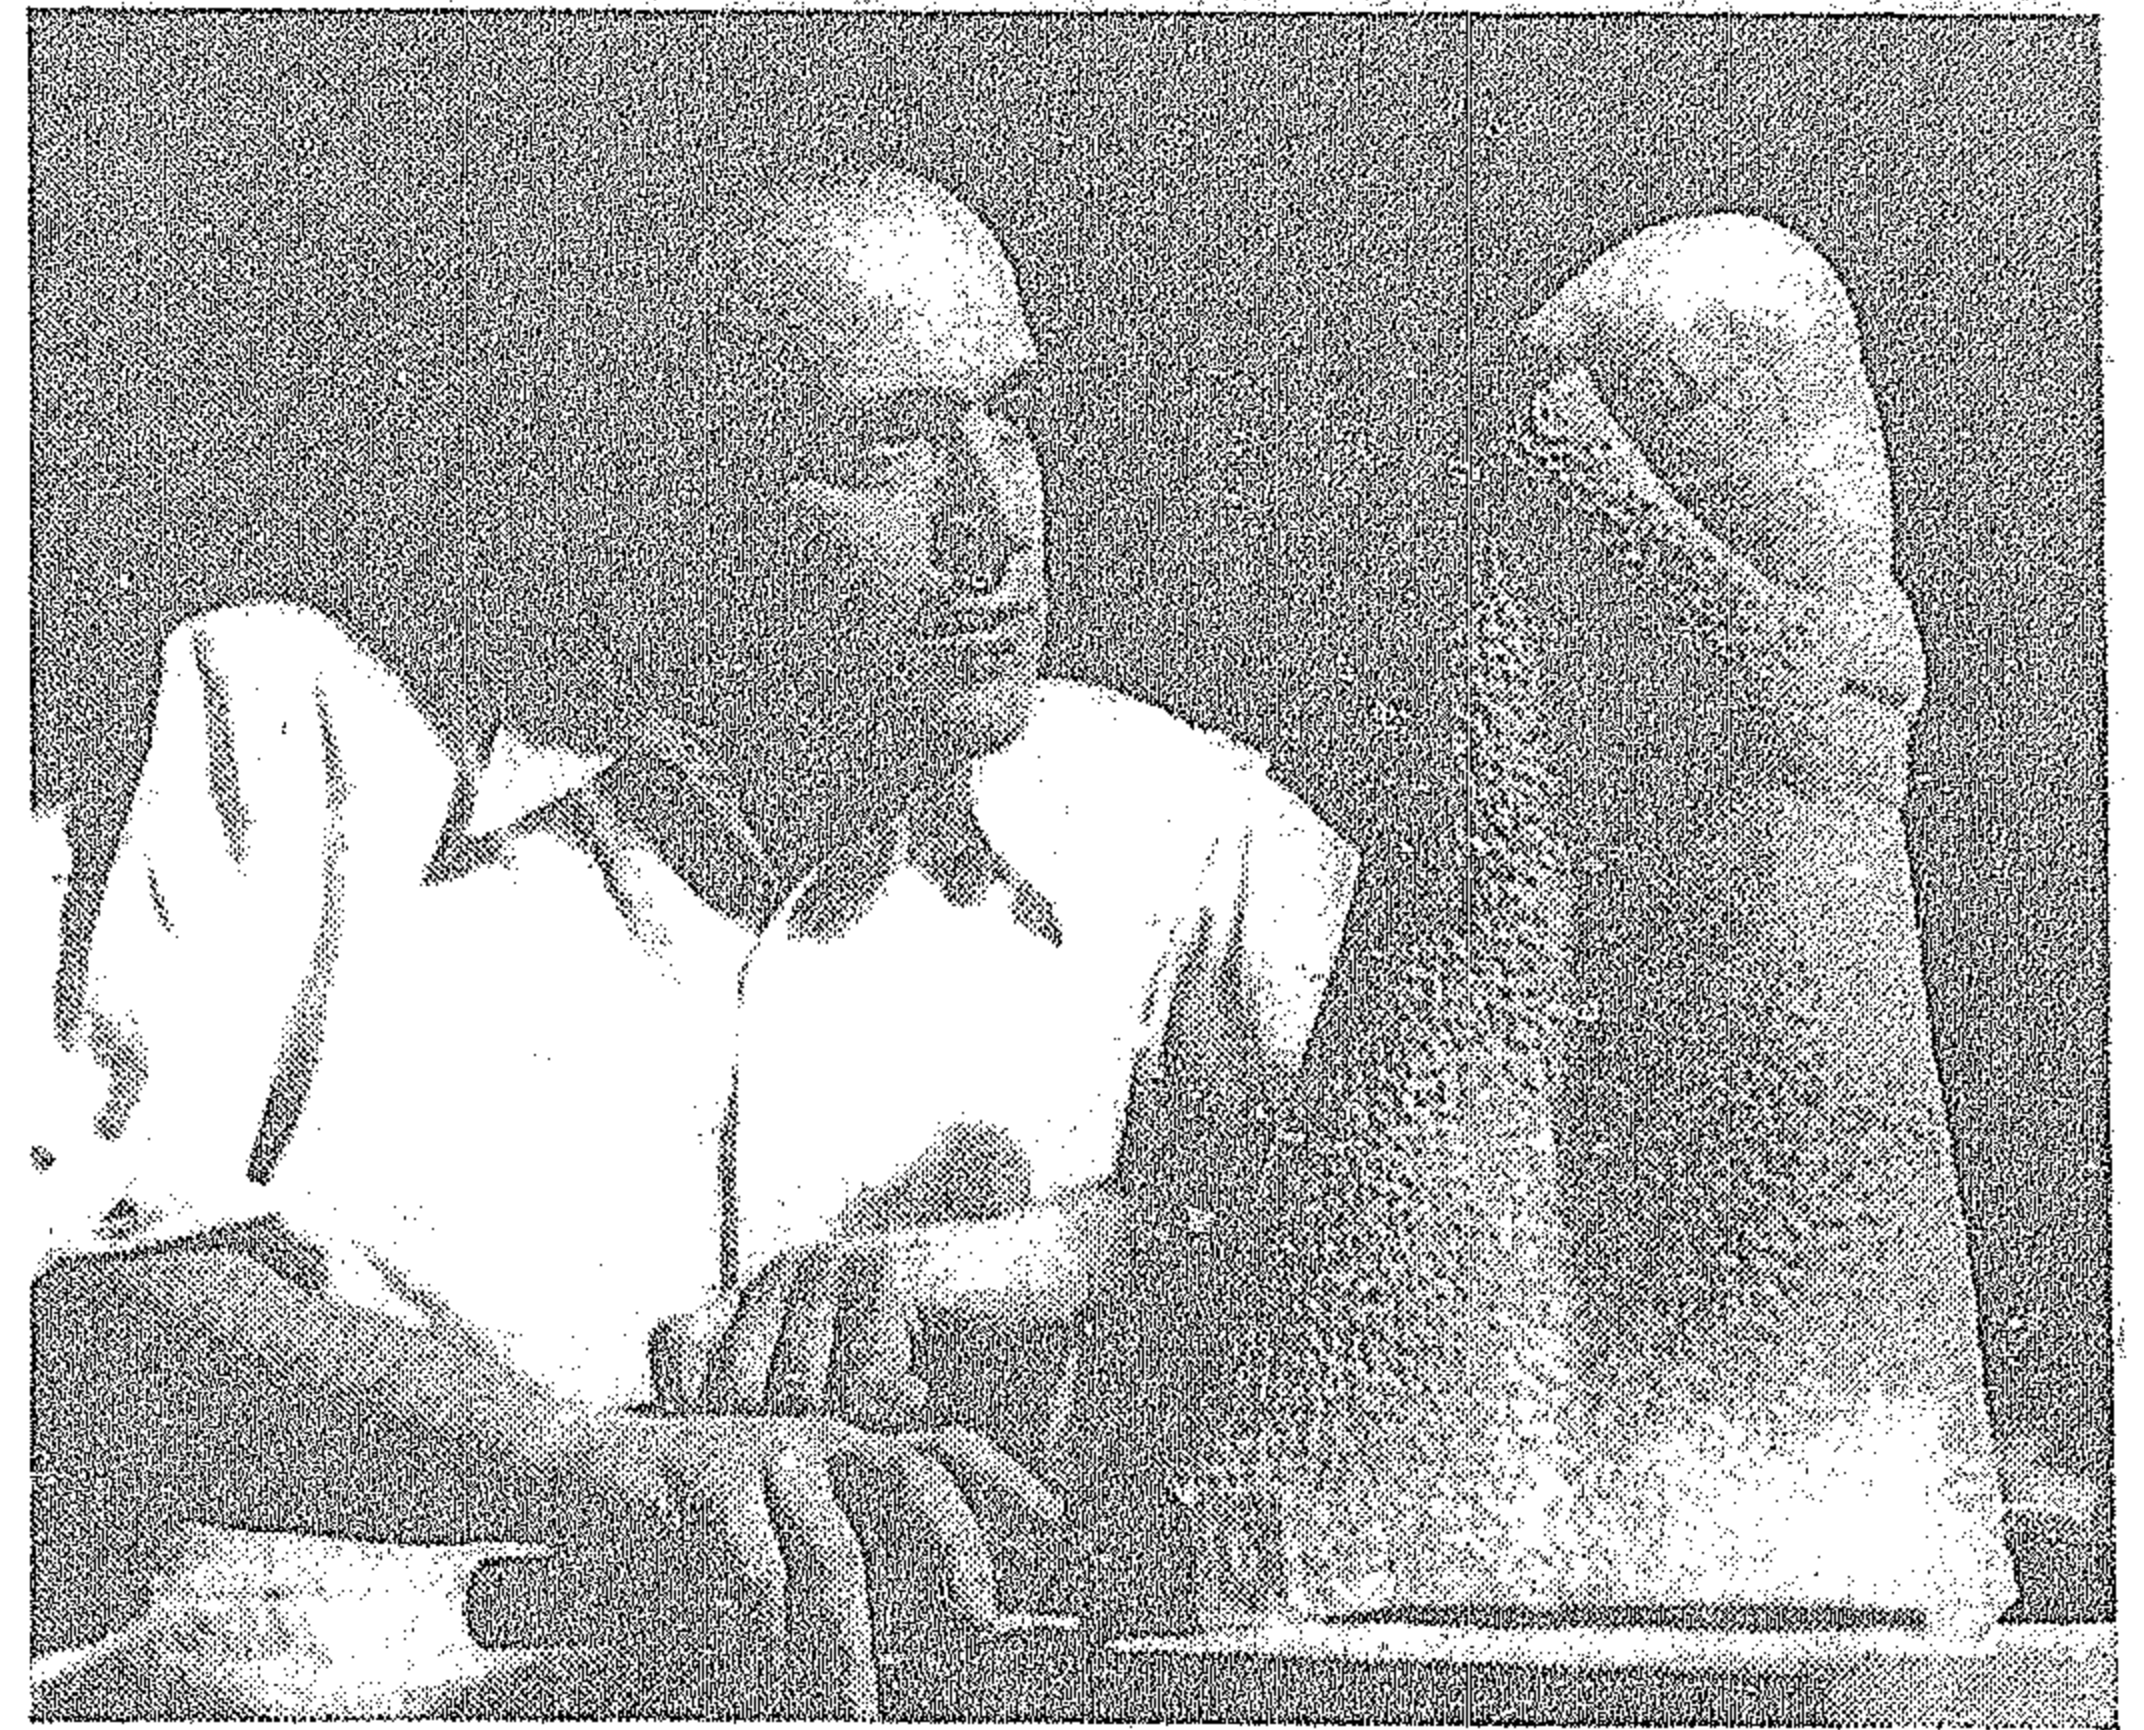

Clamps put on distribution of publicity

Strict enforcement of no-handbill rulings laid down by ITSA has been promised by the newly-created three-man publicity committee. The committee, working under the Advisory Committee on Student Affairs, was appointed last week to advise, regulate, and authorize the use of all ITSA controlled publicity mediums, including student bulletin boards, poster strips, and handbill distribution.

The committee, consisting of Dean Clarence Deakins, Frank Curtiss, and Joe Bass, has announced that hereafter the pasting of handbills on the inside walls of all school buildings will be prohibited and the necessary action will be taken to remove the signs. Taping handbills to inside walls is illegal, the committee pointed out, inasmuch as ITSA has several times specifically outlawed the maneuver because of the resulting damage to walls.

Enforcement of the handbill order will be relaxed for one week to enable the committee to give ample warning to student organizations.

Any publicity campaigns employing devices other than those now existing must be approved by the publicity committee, according to the ITSA resolution. In addition the committee will attempt to advise publicity-seeking groups on the methods and facilities available. They will also be responsible for the maintenance of bulletin boards, poster space, any other equipment subsequently purchased or administered by ITSA.

EGON WEINER rests to view a sculpture before making final chisel strokes.

Students view modern art as sculptor exhibits at Tech

By Carol Glennie

Adam and Eve attracted hundreds of visitors to the MC lobby this week as Egon Weiner displayed thirty pieces of semi-modernistic, life-like sculpture. The exhibit contained pieces of such widely differing subjects as the cast stone statues of Adam and Eve, the bronze bust of Frank Lloyd Wright, and the fish and horse-shark, carved from pieces of driftwood.

This is the first of a series of six exhibits sponsored by Illinois Tech and will run through December 10. Other exhibits will feature the oils of Ugo Liveri, water colors by Fritz Richter, and a collection of miniature paintings by Magda Heuermann.

Holder of the 1949 Logan Gold Medal Award from the Chicago Art Institute, Vienna-born Weiner, personally explained his works to the public at the reception Tuesday. Because of the wide interest which students showed at that time, Mr. Weiner will give a lecture next Tuesday at 1 p.m. in 102 MC.

Weiner started his career as sculptor in Vienna, at the age of fourteen, where he worked as a wood carver for four years. Before coming to this country, he was assistant professor of sculpture at the Public University of Vienna. At the present his time is devoted to the teaching of sculpture and life drawing at the School of the Art Institute of Chicago.

His work has rapidly gained world-wide recognition through exhibits in Paris, Vienna and many of the states. He has had one-man shows on both continents and is represented in some of the world's finest art museums including those in London, Melbourne, Chicago, Highland Park, Toledo, and the Vatican.

Cagers vs. Lake Forest in opener

(continued from page 1)

Led by Captain George Scalamera, the 1949 team promises to be one of the best ever to take the floor at Tech. With Bob Leiser and Carl Matson at the forwards, the boys have that scoring punch so sorely needed during the past years.

At guards are stellar Bob McCue and Jerry Maatman. Maatman is the only newcomer to last year's starting lineup and has worked out excellently next to McCue; both boys can really handle the ball and are deadly long shot artists.

As a sidelight, Scalamera last week was voted the outstanding player of last season. While breaking the individual scoring record with a tremendous total of 279 points for the 18 game campaign, George was a standout all year. In a vote by the players themselves, "Big George" was overwhelmingly voted the honor. The trophy will be awarded between halves of the game tonight.

The Foresters themselves are no pushovers. With Bob Joor and Norm Berglund back from last year, Lake Forest will be one of the toughest opponents the Tech-hawks will face all season.

The schedule of games is:

| | | |
|---------|----------------------|---|
| Dec. 2 | Lake Forest | H |
| Dec. 6 | Concordia | H |
| Dec. 8 | Milwaukee Teachers | H |
| Dec. 10 | Chicago | A |

Feb. 28 Illinois (Navy Pier) A
Mar. 3 Concordia A

The season promises to be a rough and tumble affair all the way. The team has all the qualifications of being a strong, hard-to-beat aggregation, and anyone who comes to see any of the games certainly will not be disappointed, as win or lose, the cagers are going to be a good team to watch.

The starting lineups for tonight are:

| IIT | | LAKE FOREST | |
|-----------|---|-------------|---|
| Leiser | F | Joor | F |
| Matson | F | Wolf | F |
| Scalamera | C | Jones | C |
| Maatman | G | Berglund | G |
| McCue | G | Katzler | G |

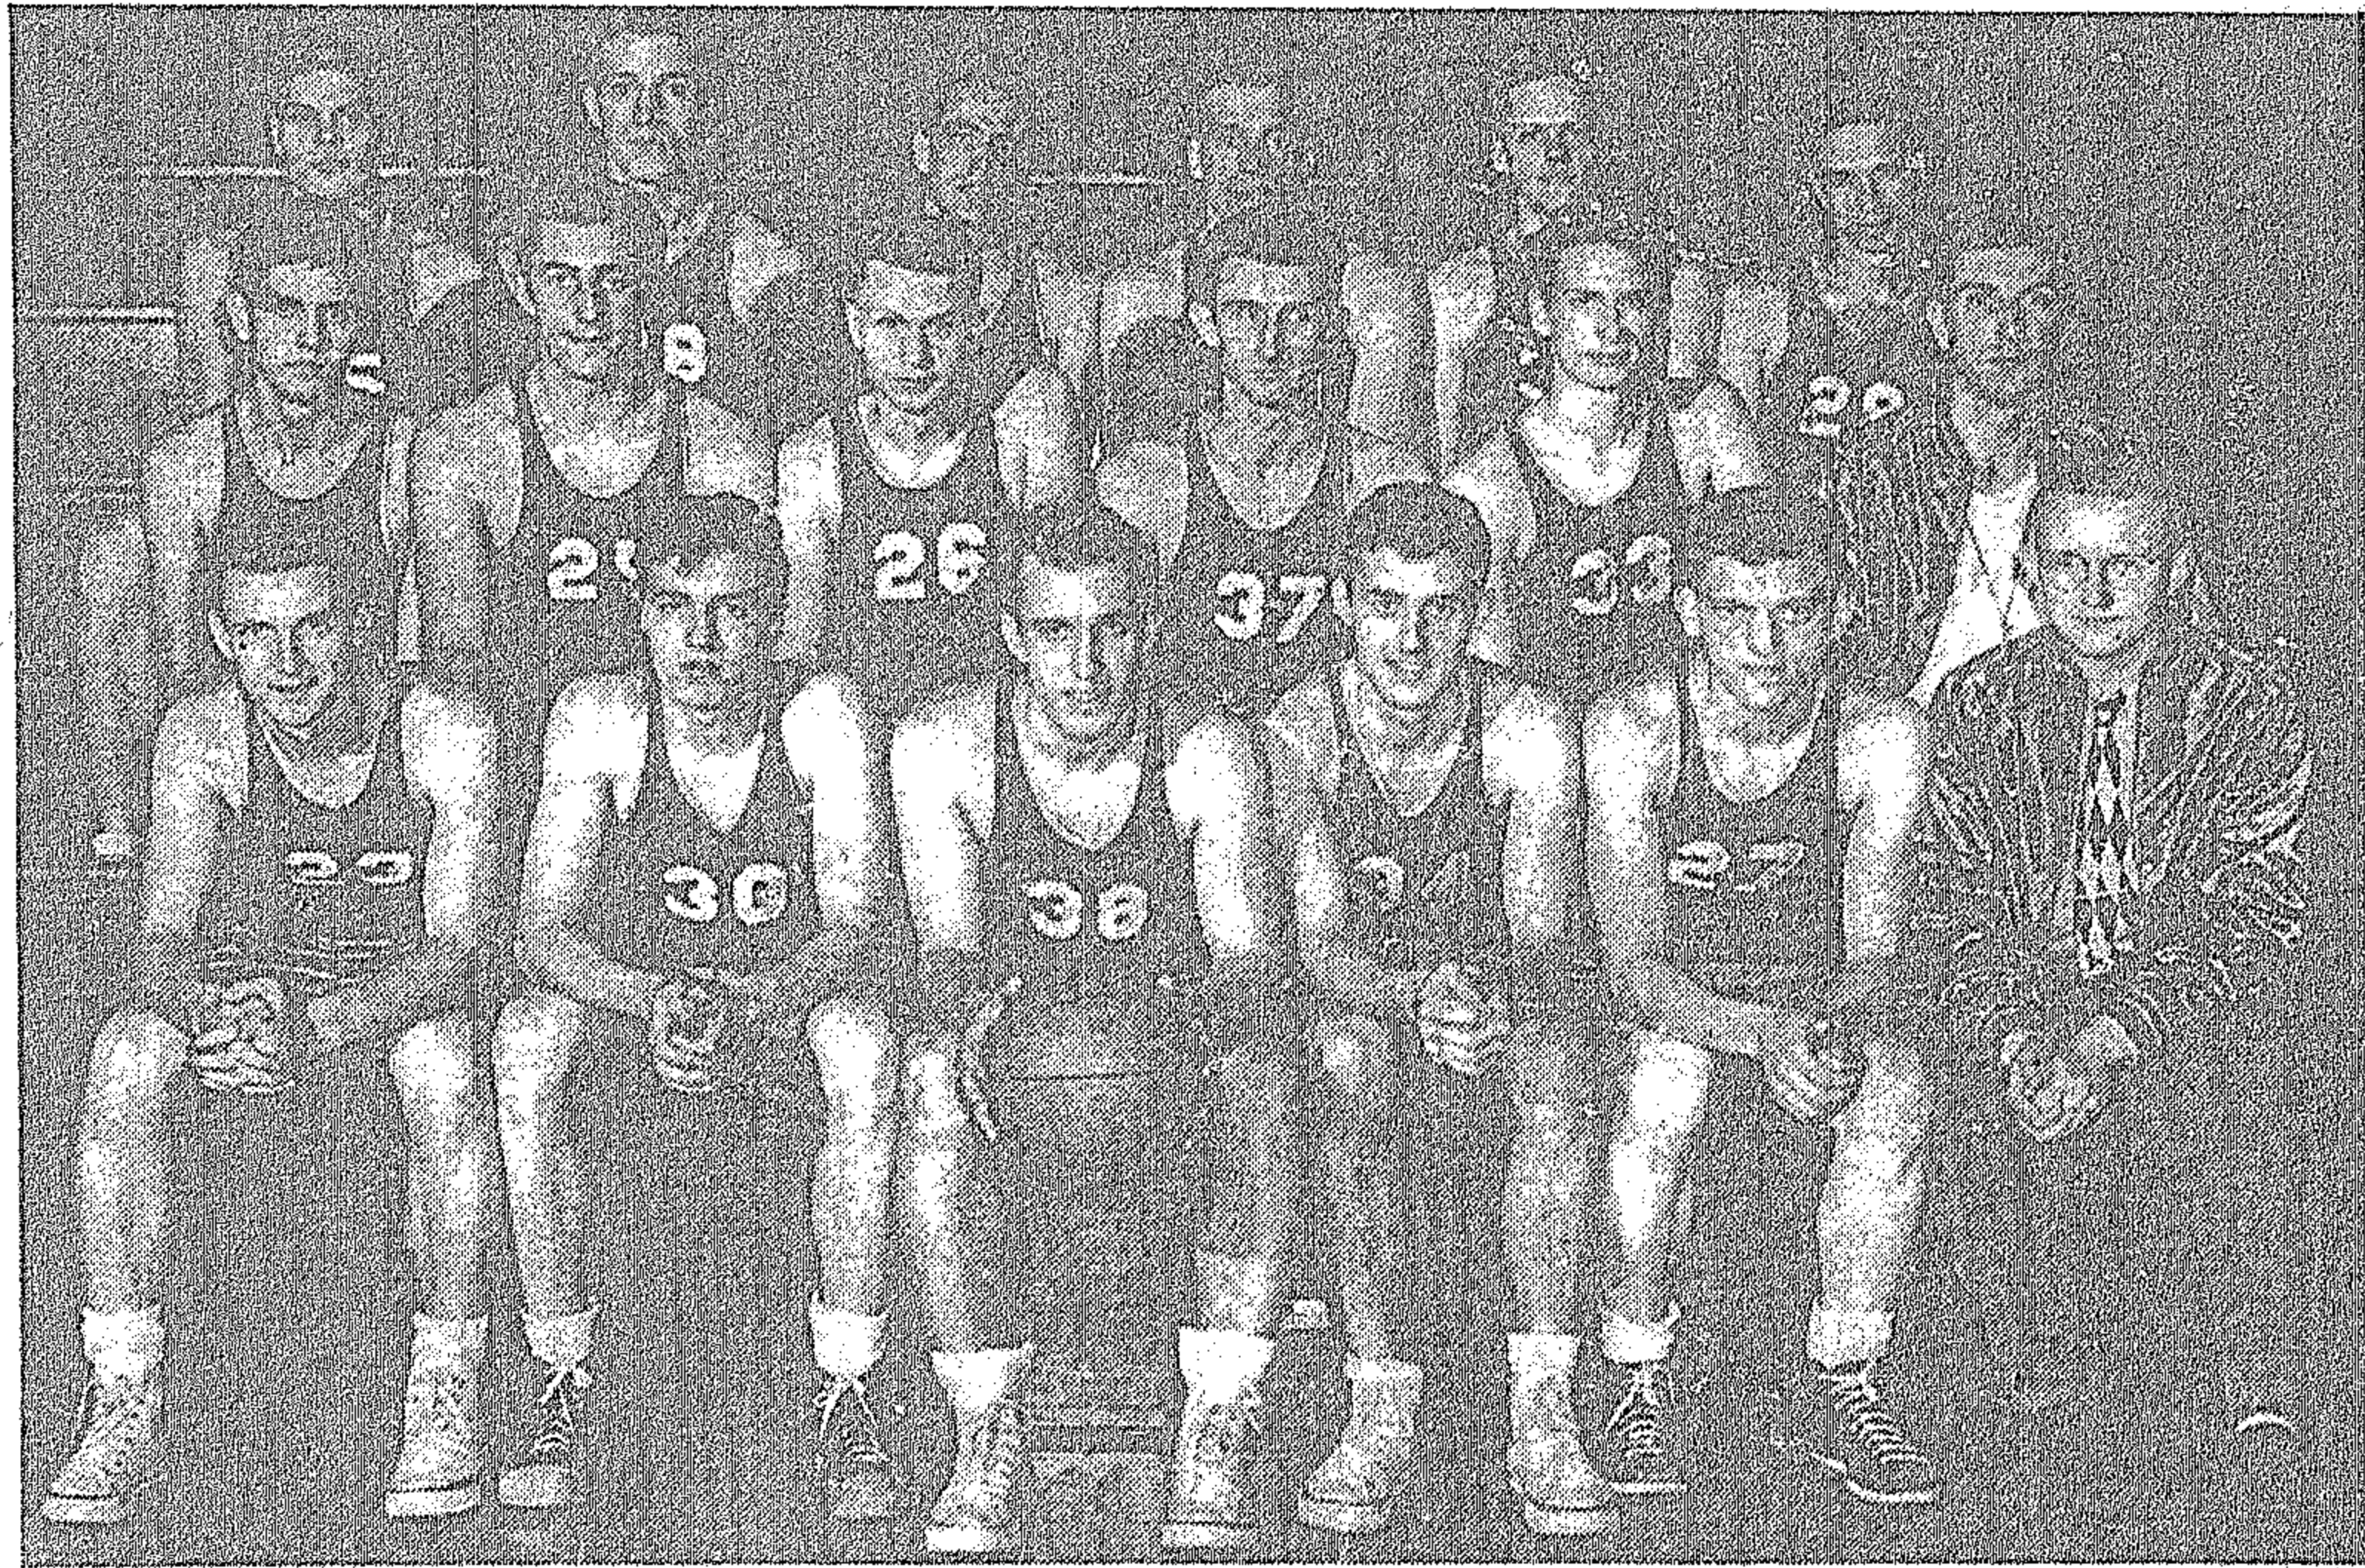

Wrestling team sets schedule

With his squad gradually being whipped into shape, Coach Tony Barbaro is primed to send the grapplers off to a flying start in their coming schedule of matches.

The team practices every Wednesday from 4-6 p.m. in the gym and Barbaro emphasized that the welcome mat is down for any Techmen who would still be interested in trying out for the many positions on the team.

The season's schedule is:
Dec. 2—Navy Pier (practice) A
Dec. 10—Bradley A
Dec. 17—Macomb H
Jan. 13—Navy Pier H
Feb. 17—Chicago A
Feb. 25—Open
Mar. 3—Wisconsin (Milwaukee ext.) H

Tech Sports

THESE ARE THE boys that make up the '49-50 Tech cage squad that swings into action tonight against Lake Forest in the annual Homecoming game. Front row: (left to right) Tom Goralka, George Georgan, Jerry Maatman, Bob McCue, Harry Heersema, and Jim Bobzin, manager. Row two: Leo Kiley, Bert Hoffman, Bob Peterson, Bob Lieser, Allen Hall, and Ed Glancy, coach. Row three: Howie Gardner, Howie Schultz, Carl Matson, George Scalamera, Ray Johnson, and Paul Peterson. Absent from picture, Phil Urasky.

Gremlins win in Slide Rule Bowl; trample Alpha Sigma Phi 12-0

By Larry Shapiro

Ray Bulka and Ray Klitzke lead the unbeaten, unscored upon Gremlins to a smashing victory in the annual "Slide Rule Bowl," sponsored by Technology News. Behind the superlative blocking of Joe Tourek, Joe Lokay and Tom McHale, and using Ed Burke's signal calling genius, the champs threatened time after time but tallied only twice. The first touchdown of the contest was scored almost before the game was underway.

Rambling Raymond Bulka gathered in Don McCaslin's punt on the Gremlin ten yard line, faked to his left, cut to the right sideline and played "Coaltown in the stretch" as he sped to a touchdown behind a wave of blockers.

Klitzke hit Bulka in the end zone late in the second half on a complicated 30 yard pass play.

Bobby Dunn playing defensive halfback for the Alpha Sigs went way up and tipped the ball down behind him; but "Coaltown" reached down behind Dunn's knees and wrapped his claws around the ball for the final score.

Bruce Tennant was the shining light for the Fraternity champions. His passes were well thrown and might have been of more avail except for a little butter spread on the fingers of his intended receivers.

Wesley Ooms and Mort Nemiroff were the defensive rushers for the Gremlins and kept Tennant company for most of the afternoon. Tourek's roving center destroyed the short passing attack of the Sigs.

Late Sports Results

- IF Basketball**
Theta Xi 34—Alpha Sigs 33 (overtime)
- IM Basketball**
Whiz Kids 36—Podunk AC 21
Chem Grads 29—Alley Benders 18
Archs 2—Operators 0 (forfeit)
NROTC 19—Farr Hall 11
IF's 33—Gas House 11

HOMECOMING . . . TECH vs. LAKE FOREST: Tonight Glancy's injury plagued charges will take the floor against a seasoned and powerful Foresters quintet in the season opener . . . Last Friday night our boys trampled over Harry's Owl Club, a perennially strong independent team, in their final practice scrimmage . . .

Bob Leiser continued his red hot shooting, hitting 10 out of 17 tries from the field . . . Scalamera is dropping his "automatic" hook shot with the comforting regularity of a Carter's Little Liver Pill . . . Mattson is getting back into his old form . . . McCue is having a little trouble finding his eye, since he was out of action for the first month of practice, but his playmaking know-how has never slackened . . . Maatman's girl was in last weekend, but he should be back in shape for tonight's game . . .

Keep your eye on freshman Allen Hall . . . If he keeps improving at his present rate he'll be pushing some of the veterans for a first string spot . . . Leo Kiley and Howie Gardner are trying to shake off the effects of injuries in time to see some action tonight . . . Kiley's fight, spirit, and experience are handy things to have around, as is Gardner's rebounding and drive . . . It'll be a great game tonight, one that you won't want to miss . . .

IM BASKETBALL: Intramural director Ed Glancy tells me that he has accepted 24 teams into this season's tournament . . . As usual, the tourney has been divided into four leagues of six teams each . . .

The winners of the individual leagues will play off at the end of the season for the title . . . The IM champs will then play the IF basketball champions for the newly inaugurated John J. Schommer trophy . . .

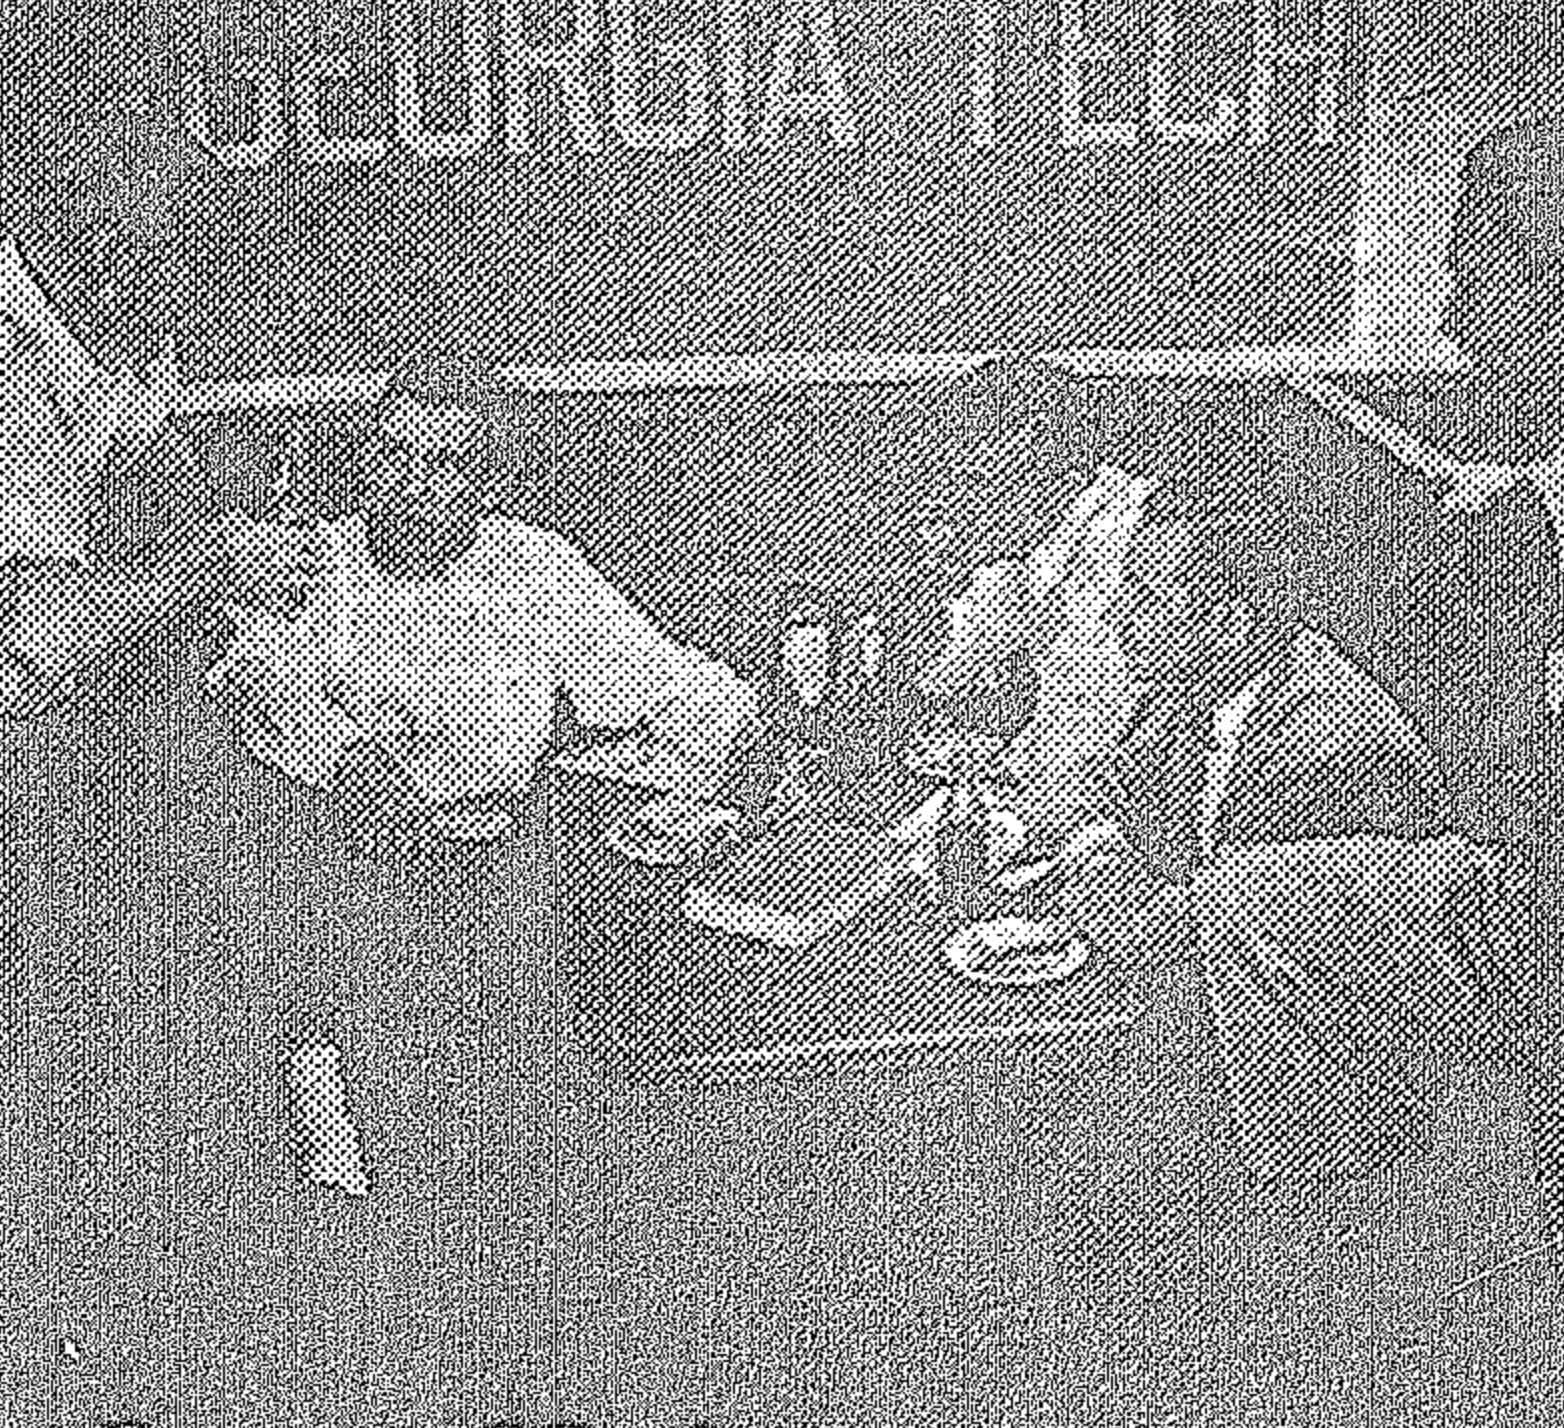

Missing in this year's competition are the defending champions, the Trojans . . . The perennial favorites such as the Whiz Kids, (led by "move the ball" Van Meter), the black shirted Wolves, (coached by "Shoulders" Maatman and his understudy Leo "Notre Dame" O'Kiley), and last and probably least, the fabulous Architect five, managed by their fabulous mentor, aging Ed "the lump" Burke, are rounding into form.

COMING THINGS: Watch for the first in a series of guest editorials that will appear in next week's issue of Technology News. . . "Uncle John" Schommer will begin a discussion of the pros and cons of football at Tech. . . Future editorials written by people in the know will discuss problems of athletic scholarships, greater athletic programs, and other facts and figures pertinent to our sports situation. . .

5¢

The Georgia Tech College Inn in Atlanta, Georgia, is a favorite haunt of the Georgia Tech students. That's because the Georgia Tech College Inn is a friendly place, always full of the busy atmosphere of college life. There is always plenty of ice-cold Coca-Cola, too. For here, as in university gathering spots everywhere—Coke belongs.
