

Lewis Institute

SUMMER SESSION

July 6 to August 14, 1903

Three quarters and a summer term of six weeks make a school year of forty-two weeks, leaving ten weeks for vacations.

The courses of instruction in the Institute are so arranged that pupils who attend the summer term may, to that extent, shorten the total time requirement. It is manifestly to the advantage of those who remain in the city to devote to study a part of the twelve weeks of the summer.

The arrangement of classes is such as to make it possible for a pupil to complete one or two courses of instruction in the term of six weeks. The usual hours are from eight to twelve in the forenoon.

Any course of instruction offered by the Institute will be repeated in the summer if the demand is such as to justify the formation of a class.

Courses of Instruction

Instruction is offered in the following departments:

English. Five courses in English grammar, composition, oral reading, and literature, in preparation for admission to the Institute and for college entrance.

History. Six courses in ancient, English, United States, and general European history.

Mathematics. Seven courses in arithmetic, algebra, geometry, and trigonometry.

Physics and Electrical Engineering. An elementary and an advanced course in general physics, and special individual instruction in electrical engineering.

Chemistry. An elementary and an advanced course in general chemistry, and special individual instruction in qualitative and quantitative analysis and in organic chemistry.

Manual Training. Six courses in woodwork and drawing designed to meet the needs of regular students and teachers of manual training.

Drawing and Shop Practice. Three courses in mechanical drawing and a course in machine shop practice, embodying a study of the construction of the different machine tools, with instruction in operating and keeping them in order.

Domestic Economy. Two courses, one in cooking and one in sewing.

Foreign Languages. Such beginning and advanced classes in Latin, Greek, German, and French as may be necessary to meet the demands of the students in attendance.
