

## Roy A. WINSER, Chemical Engineering.

Senior Chemical Society.

Winser is an Aurora man, having been an Aurora baby and an Aurora boy. He arrived March 3, 1886, and has remained on earth ever since. His folks would not allow him to go far away

from home, so his early education took place in the local schools and he was graduated from the East Aurora High School in 1904. As a chemist at A. I. T. he has analyzed Freud's system of recitation and reduced it to its elements—thus he evades flunking.

## George Frederick Wolters, Architecture.

Atelier; Nebraska Club.

Mr. Wolters first saw the light of day in Waukon, Iowa, March 16, 1882. In spite of this fact he has always been "Nebraska George" to us, although just how long he has been a naturalized citizen of Nebraska we cannot say. It is said by those who know, that George is acquainted with 57 varieties of feminine loveliness which are to be found at the Art Institute. Just how he manages to keep on good terms with all of them seems quite wonderful to us who have a hard time handling one or two.

WILLIAM GERHARD WUEHRMANN, Architecture Tau Beta Pi. The Atelier.

This Saxon-haired youth comes from over the Rhine—no, not from Cincinnati, dear reader, but from Bremen—where he was born August 22, 1885. Bill is one of the most famous barn dancers at the Art Institute, and has been seen in this particular form of insanity in Flirtation Hall many an hour when "Pa" Shattuck thought he was bending over a drafting board. He claims that the experience helps him to work better, but we think that there is another reason in his madness.

## SAMUEL L. ZIMMERMAN, Civil Engineering.

## Civil Engineering Society.

"Dutch" hails from McHenry High School, although his reception on earth was celebrated in Lomza, Russia. He has been a fairly peaceable citizen while among us, but there is a latent fire smoldering which almost burst into flame when he was requested to take eight hours of chemistry in his senior year. After strenuous efforts, he was able to free himself from that hankering for work which is so prevalent at Armour and which may have bothered him at some time.
