PHYSICS LABORATORY

LATHES IN WOOD SHOP

THE FOUNDRY

pense of providing equipment. Mr. J. Ogden Armour also presented to the Institute the ground known as Ogden Field, the opening of which greatly stimulated the interest in athletics at Armour. The latest addition to the buildings of the Institute is Chapin Hall. The student club known as Chapin Club has rooms in this building.

During the summer of 1909, a fire occurred on the third floor of the "main building" in the store-room of the Chemical Department. Quite a loss was suffered, but was fully covered by insurance. The store-room was immediately rebuilt and is now very much better than ever.

Located in the great metropolis of the West, the Institute offers to its students opportunities of acquiring a practical training in engineering which would be impossible in almost any other locality. We have all reason to be proud of the remarkable progress made the Armour Institute of Technology within so short a period of time. The fame of the Institute and her graduates is being heard of every day all over the world as the graduates have gone to every state of the Union and many foreign countries.

"To be trusted is a greater compliment than to be loved."
