

The summer courses offered by Armour Institute of Technology are designed to meet the needs of teachers and special students who desire to extend their knowledge of scientific and technical subjects; or undergraduates desirous of shortening their regular courses; of new students deficient in certain studies required for admission; and of those who are unable to attend the school year.

Students may enter the Institute in the summer session, instead of waiting until the autumn term. This is particular advisable for those students who are conditioned in any of the studies required for admission. It not only allows them to make up their deficiencies, but gives them an opportunity to become familiar with the methods of instruction.

*"A good man dies when a boy goes wrong."*
