

LOUIS HERMAN ROLLER

Thesis: *The Transmission of Niagara Falls Power to Chicago.*

Omega Lambda	Editor-in-Chief (elect) Integral (3)
Tau Beta Pi	Ass't. Editor Armour Engineer (3)
Eta Kappa Nu	Editor Armour Engineer (4)
Sphinx	Class Secretary (1), (2), (3), (4)
Chapin Club	Fulcrum Staff (2)
Sub-Marshal Junior Week (3)	Class Constitution Committee (3)
Armour Branch, A. I. E. E., Chairman (4)	Class Alumni Secretary.

We now beg to introduce the official scribe of the class of 1912, Mr. Louis Herman Roller, who, since the first, has been entrusted with the important duty of recording the many activities of the class. He is one of our youngest members, as he was born July 31, 1891, in the village called New York. He came to Chicago at an early age and received his preliminary education in the Chicago graded schools. He entered the Armour Scientific Academy in 1905, graduating in 1908, so as to enter the Tech with the bunch. He has been about the busiest man around school this year, as he has carried in addition to his studies and social affairs, the weight of the Armour Engineer. He is inclined toward literary work and has held numerous positions on the college publications. To his ability to read his notes after taking them is due his election as class secretary and also as alumni secretary.

Although Roller has always been busy with literary work while in school, he has been able to maintain a high grade of scholarship and consequently was elected into Tau Beta Pi in his junior year. He is chairman of the Armour Branch of the A. I. E. E. and has done much to establish the branch firmly. Although he has more to do than most of us, he is not a grind but enters into every school activity with spirit.

He has worked for three summers with the Commonwealth Edison Company, and this experience has given him a wide knowledge of affairs electrical, and cannot help but be useful to him later in life.
